Background

The DWIA requires a service to provide weekly reports and analytics on U.S. radio stations airplay and music data. This information will be used to support various mission-critical activities. By procuring a service that provides this level of industry-standard data, the DWIA will be able to perform analyses and make assessments with the same level of fidelity and insight used by professionals at the forefront of the commercial radio industry.

Scope:

The scope of this requirement encompasses all tasks associated with the collection, processing, analysis, and delivery of U.S. music and radio airplay data. The contractor shall provide a robust online platform, detailed datasets, and summary reports that cover a broad range of U.S. radio markets, music genres, and consumption methods (sales and streaming). The service shall be the contractor's standard commercial offering, provided to the Government without modification.

SPECIFIC TASKS

The contractor shall perform the following tasks:

1.1 Radio Airplay Monitoring:

The contractor shall monitor a comprehensive panel of U.S. radio stations to track music airplay. This shall include:

- **1.1.1** Monitoring a panel of no fewer than 2,000 U.S. terrestrial and satellite radio stations.
- **1.1.2** Ensuring coverage of no fewer than 200 U.S. radio markets, including all Top 25 markets.

- **1.1.3** Tracking a wide variety of radio formats including, but not limited to: Top 40 (CHR), Adult Contemporary (AC), Hot AC, Country, Rock, Alternative, R&B/Hip-Hop, and Dance.
- **1.1.4** Providing detailed data for each song spin, to include: song title, artist, time/date or daypart of play, and station identification.
- **1.1.5** Calculating and providing audience impression data for each song spin, based on industry-accepted ratings information.

1.2 Music Consumption Data Collection:

The contractor shall collect and process data on music consumption from a wide range of U.S. sources. This shall include:

- **1.2.1** Collecting sales data for physical and digital music formats from a network of retailers, including mass merchants, chain stores, and independent retailers.
- **1.2.2** Collecting data from all major streaming and on-demand audio services (e.g., Spotify, Pandora, Apple Music, YouTube).
- **1.2.3** Aggregating and processing sales and streaming data to provide a comprehensive view of music consumption by song, album, and artist. Data must be verifiable and of a quality sufficient to be used as an industry benchmark (e.g., for *Billboard* charts).

1.3 Data Analytics Platform:

The contractor shall provide access to a secure, web-based data analytics platform for Government personnel. The platform must provide the following functionalities:

- **1.3.1** Secure login for a minimum of 6 individual users.
- **1.3.2** The ability to query, filter, and analyze both current and historical data for radio airplay, sales, and streaming.
- **1.3.3** The ability to generate custom charts and reports based on user-defined parameters (e.g., market, station, format, artist, song, label, time period).
- **1.3.4** Provide access to pre-built, standardized industry charts and reports.

1.4 Reporting and Deliverables:

The contractor shall provide standardized reports and deliverables as outlined in Section 2.0.

2.0 DELIVERABLES

The contractor shall provide the following deliverables:

Deliverable No.	Deliverable Title	Frequency	Format	Due Date
1	Access to Online Data & Analytics Platform	Continuous access	Web-based Platform Login Credentials	Within 5 business days of contract award
2	Weekly Airplay & Music Consumption Summary Report	Weekly	Electronic (e.g., PDF, CSV) via email or platform download	No later than Monday, 12:00 PM ET
3	Weekly Industry Standard Music Charts	Weekly	Electronic (via platform or email)	Concurrent with release to industry
4	User Training	As Needed	Virtual/Webinar	Upon Government request

REQUIREMENTS:

The Government is seeking sources with the capability to provide data and analytics service. The service must include, at a minimum:

- **Radio Airplay Monitoring:** The capability to monitor a comprehensive panel of U.S. terrestrial and satellite radio stations across all major U.S. markets and a wide variety of formats. Data must include individual song spins, station identification, and audience impression metrics.
- **Music Consumption Tracking:** The capability to collect, process, and report on music sales (physical and digital) and streaming data from a vast network of U.S. retailers and digital service providers (DSPs).
- **Data Analytics Platform:** Access to a secure, web-based platform or online tool that allows for on-demand data access, querying, analysis, and custom report generation on both current and historical data.

- **Reporting:** The delivery of weekly summary reports and industry-standard music charts detailing key findings and trends in radio airplay and music consumption.

Additional Considerations

- The contractor must comply with all applicable FAR and Department of War clauses and provisions incorporated into the resulting contract.
