

VENTURE HORIZONS

Defense Advanced Research Projects Agency (DARPA)

April 2026

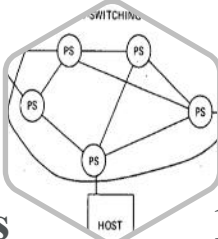

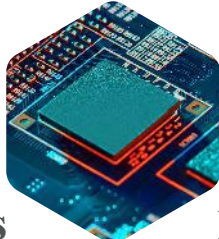

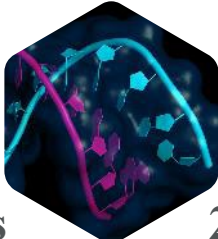

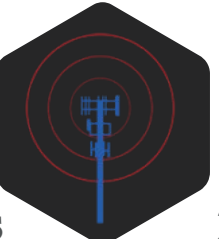

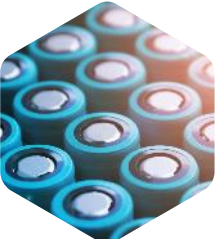

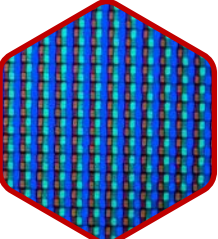

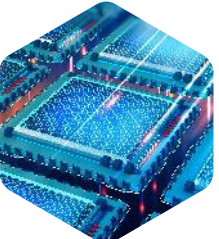

The Defense Advanced Research Projects Agency's Commercial Strategy Team is Looking for Partners

For more information: go to sam.gov

VENTURE HORIZONS

DARPA seeks to provide opportunities to connect investors with non-adversarial capital to DARPA Program Managers and DARPA Research & Development performers through a partnering initiative, *DARPA Venture Horizons*, to amplify the impact of DARPA's development of breakthrough technologies

Throughout its history, DARPA has created game-changing technologies, empowering industry leading technologists to solve some of the world’s most complex problems

Computer Mouse & GUI	TCP/IP & The Internet	Microelectronics CAD, IR, RF, MEMS	AI, Computer Vision Speech Recognition	Self-Driving Cars	MRNa Vaccines	FutureG and Advanced Materials
						
1960s	1970s	1980s	1990s	2000s	2010s	2020s
						
Material Science	Lithium Ion Batteries	LCD Screens	DNA Sequencing Syn. Bio	Personal Assistant	Quantum Computing & Devices	

DARPA Venture Horizons will provide investors access to certain DARPA portfolio and subject matter experts with the potential to create game-changing outcomes

DARPA's Research Portfolio - Six Technical Offices

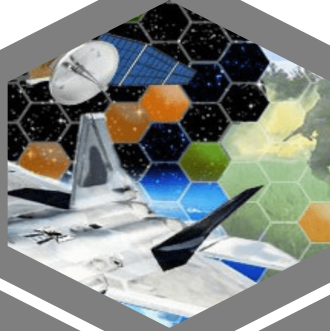

DARPA comprises approximately 220 government employees, including nearly 100 Program Managers, who oversee more than 250 research and development programs across six Technical Offices:

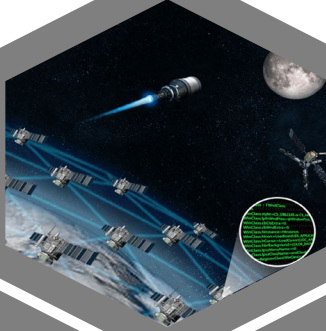

Microsystems Technology Office (MTO)

- Materials and Components to expand foundations
- Tools and processes for indigenous development
- New modalities to achieve mission effects

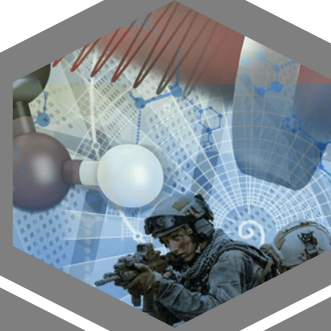

Strategic Technology Office (STO)

- Advanced sensors and processing
- Battlefield effects
- Command, control, and communications
- System of autonomous systems
- Empowered human decision making

Tactical Technology Office (TTO)

- Disruptive platforms and systems
- Reimagination of hardware design, development, test, manufacture and sustainment
- Focus on rapid, affordable, and scalable

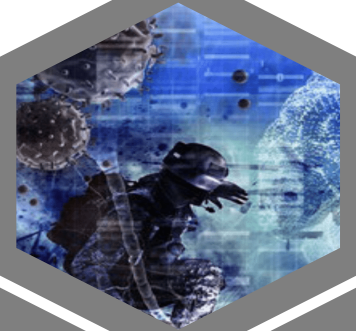

Defense Sciences Office (DSO)

- Novel materials and structures
- Sensing and measurement
- Computation and processing
- Enabling operations
- Collective intelligence
- Emerging threats

Information Innovation Office (I2O)

- Proficient AI
- Advantage in cyber operations
- Confidence in the information domain
- Resilient, adaptable, and secure systems

Biological Technologies Office (BTO)

- Maintain force readiness
- Tactical warfighter care and functional restoration
- Operational resilience and logistical security
- Biosensors and novel methods and materials

Important Notes

- This is an RFI issued solely for information and new initiative planning purposes; it does not constitute a formal solicitation for proposals. In accordance with Federal Acquisition Regulation 15.201(e), responses to this RFI are not offers and cannot be accepted by the Government as such
- DARPA General Service Agreement (GSA) and Senior Commercial Advisor (SCA) team members may be ineligible to participate in this program
