

Attachment A1 - Schedule of Tests by CLIN

SAMPLE TESTING SERVICES SCHEDULE

Description of Services. Hydroelectric Design Center's need for Non-Personal Services for Sample Testing is as follows: An ISO 70195 accredited laboratory shall provide all personnel, equipment, supplies, facilities, management, tools, labor, materials, and incidentals necessary to perform the services of Sample Testing, to include, but not limited to receiving samples, machining appropriate specimen shapes, testing samples, submitting reports of the test results, and storing/disposal of specimens for each Call. The samples will be from various steel components over a range of steel standards associated with hydroelectric powerhouse components.

ITEM	Title	Description	Quantity	Unit	Est. Unit Price
0001	Sample with Charpy, no low carbon limit	Receive samples and complete the following tests: Chemistry (ASTM A751), Tensile (ASTM A370), Hardness (ASTM A370), Charpy (ASTM A370). Provide report of test results within 14 days of receipt of samples. Store test specimens and remnant material for 30 days after providing report. If no additional direction is provided after 30 days, test specimens and remnant material is to be disposed.	1	SET	
0002	Sample with Charpy, low carbon limit	Receive samples and complete the following tests: Chemistry (ASTM A751 and ASTM E1019-18), Tensile (ASTM A370), Hardness (ASTM A370), Charpy (ASTM A370). Provide report of test results within 14 days of receipt of samples. Store test specimens and remnant material for 30 days after providing report. If no additional direction is provided after 30 days, test specimens and remnant material is to be disposed.	1	SET	
0003	Sample without Charpy, no low carbon limit	Receive samples and complete the following tests: Chemistry (ASTM A751), Tensile (ASTM A370), Hardness (ASTM A370). Provide report of test results within 14 days of receipt of samples. Store test specimens and remnant material for 30 days after providing report. If no additional direction is provided after 30 days, test specimens and remnant material is to be disposed.	1	SET	
0004	Sample without Charpy, low carbon limit	Receive samples and complete the following tests: Chemistry (ASTM A751 and ASTM E1019-18), Tensile (ASTM A370), Hardness (ASTM A370). Provide report of test results within 14 days of receipt of samples. Store test specimens and remnant material for 30 days after providing report. If no additional direction is provided after 30 days, test specimens and remnant material is to be disposed.	1	SET	
0005	Sample - Mechanical Only	Receive samples and complete the following tests: Tensile (ASTM A370), Hardness (ASTM A370), Charpy (ASTM A370). Provide report of test results within 14 days of receipt of samples. Store test specimens and remnant material for 30 days after providing report. If no additional direction is provided after 30 days, test specimens and remnant material is to be disposed.	1	SET	
0006	Sample - Only Chemistry, no low carbon content	Receive samples and complete the following test: Chemistry (ASTM A751). Provide report of test results within 14 days of receipt of samples. Store test specimens and remnant material for 30 days after providing report. If no additional direction is provided after 30 days, test specimens and remnant material is to be disposed.	1	EACH	
0007	Sample - Only Chemistry, low carbon content	Receive samples and complete the following tests: Chemistry (ASTM A751 and ASTM E1019-18). Provide report of test results within 14 days of receipt of samples. Store test specimens and remnant material for 30 days after providing report. If no additional direction is provided after 30 days, test specimens and remnant material can be disposed.	1	EACH	
0008	Sample - Only Tensile	Receive samples and complete the following test: Tensile (ASTM A370). Provide report of test results within 14 days of receipt of samples. Store test specimens and remnant material for 30 days after providing report. If no additional direction is provided after 30 days, test specimens and remnant material can be disposed.	1	EACH	
0009	Sample - Only Hardness	Receive samples and complete the following test: Hardness (ASTM A370). Provide report of test results within 14 days of receipt of samples. Store test specimens and remnant material for 30 days after providing report. If no additional direction is provided after 30 days, test specimens and remnant material can be disposed.	1	EACH	
0010	Sample - Only Charpy	Receive samples and complete the following test: Charpy (ASTM A370). Provide report of test results within 14 days of receipt of samples. Store test specimens and remnant material for 30 days after providing report. If no additional direction is provided after 30 days, test specimens and remnant material can be disposed.	1	EACH	
0011	Small Specimen Machining Surcharge	Extra machining or use of different machining tools if samples are smaller than standard.	1	EACH	
0012	Extra Storage	If directed, store test specimens and remnant material for an additional 30 days.	1	EACH
