Section A: EXECUTIVE SUMMARY

1. This Request for Proposal (RFP) is to competitively procure a lease-to-purchase of approximately 400,000 to 600,000 square feet (SF) for a modern distribution center within a 50-mile range of the existing West Coast Distribution Center for Navy Exchange Service Command (NEXCOM) located in Chino, CA (see Attachment (7) Map showing Area of Consideration). NEXCOM intends to commence operational occupancy 8-10 months after award of lease for an initial term of one (1) year, with fourteen (14) one (1) year renewal options. The Government shall have the option to purchase the facility during initial term and subsequent four (4) option periods. Offeror(s) are required to provide purchase prices for each of the first five (5) years, and the Government reserves the right to negotiate the purchase price based on Fair Market Value. Offeror(s) that do not provide purchase options are considered non-responsive. The Government shall have no obligation to purchase the facility at any time.

The leased space must meet all Minimum Technical Requirements as stated in Section C.1, Minimum Technical Requirements, at the time of the Offer submission. In addition, the leased space must also meet all Specifications as set forth in Section C.2, Specification, below, and Attachment (2) – Facility Requirements., at the time of Government’s occupancy.

In the event the proposed location does not meet all Specifications listed within this RFP at the time of Offer submission, the Offeror may elect to perform whatever improvements necessary to meet the Specifications (Tenant Improvements) and include the total cost of these improvements as a lump sum amount with the Offer, separate from the annual rental amount. Due to the nature of this being one (1) year firm term lease, the Government is prepared to provide to the Lessor, upon completion, review, and acceptance of the work, a lump sum payment for the Tenant Improvements. The Offeror is expected to accurately identify what improvements will need to be conducted and the total cost to perform this work at the time of submission. No additional amendments or modifications to the cost of Tenant Improvements will be accepted by the Government.

Upon occupancy, the Government will need to make additional alterations and additional improvements, not required to be performed by the Lessor or contained in this RFP, to the facility in order to conduct operations, considered as “Government Furnished/Government Installed (GF/GI)” equipment. Examples of GF/GI equipment are a conveyor/racking system, storage racks, material handling equipment, and related material and/or personal property. The Offer shall clearly indicate the Offeror’s authorization to allow the Government, utilizing Government-procured contractors and support personnel, to make the necessary improvements on the leased premises after taking occupancy to the leased facility. However, the improvements and

installation of GF/GI equipment shall be documented with execution of a bilateral amendment to the lease, and the Government shall retain the right to remove the GF/GI equipment or abandon it in place should the Government terminate the lease for any reason.

Tradeoff procedures will be utilized for this lease-purchase action in order to ensure selection of the source evidencing the best overall capability to comply with lease-purchase requirements in a manner most advantageous to the Government when considering all evaluation factors.

Offeror(s) are encouraged to demonstrate approaches maximizing value and advantage to the Government. The Offeror(s) proposing the most advantageous offer for the Government will be selected. The Government intends this RFP to result in the acquisition of the right to use distribution space for the stated purpose and the right to make improvements and install GF/GI to conduct operations. These rights will be prescribed in the lease and a bilateral amendment lease that the Government will subsequently enter into with the successful Offeror. A sample lease is provided for reference as Attachment (1).

Offers are due to the designated representative Tracy Chapman by **12:00 PM (noon) EST on July 13, 2026** at tracy.a.chapman.civ@us.navy.mil RE: Navy Contract Number N62470-26-RP-00006 and must include all information specified in this RFP. Please send a separate email to tracy.a.chapman.civ@us.navy.mil to ensure proposal was received due to file size capacity. Offers shall remain valid for six (6) months from the offer due date. There will be no public opening of offers, and no information will be disclosed regarding offers until an award has been made. Offers and accompanying documents are prepared at the exclusive cost and risk of the Offeror. The Government may, at its option: (1) accept an initial offer without discussions or negotiations, or (2) award to other than the lowest priced offered, or (3) reject any and all offers without stating justification.

Within ten (10) days of award, the successful Offeror must execute the lease provided as Attachment (1). The selected Offeror, if providing Tenant Improvements, shall provide a Performance Bond, Attachment (3), and the final design of the leased space incorporating these improvements within sixty (60) days of final award notification. The final design will be promptly reviewed and must be approved by the Government prior to construction commencement.

This Executive Summary is informational, not binding, and if there is a discrepancy between the Executive Summary and the remainder of the RFP, provisions of the remainder of the RFP control.

Section B – Instructions to Offerors

Examine all Sections of this RFP and all attachments before preparing offers. Follow instructions for submitting Technical Data Package, Section B.2.(b), as a separate enclosure. The Government will post this RFP on SAM.gov on **April 3, 2026**.

B.1 Offer Preparation and Submission

(a) Offers shall be received no later than:

12:00 PM (noon) Eastern Standard Time on July 13, 2026

At the following address:

Email : Designated Representative Tracy Chapman at tracy.a.chapman.civ@us.navy.mil

(b) Offers, and any subsequent modifications, shall be submitted via electronic format. Electronic submissions shall be sent to tracy.a.chapman.civ@us.navy.mil and shall include appropriately labeled documents to include the response to the RFP and any associated attachments or enclosures. Once the offer is sent electronically, a separate email shall be sent to the Government's point-of-contact at tracy.a.chapman.civ@us.navy.mil to ensure Government's receipt of the offer. Offers should clearly show the RFP title and number, and the name, address, email, and telephone number of the Offeror. Government's point-of-contact will then respond with confirmation of receipt of electronic submissions.

(c) Additional information that is relevant to understanding an offer may be provided; however, unnecessarily elaborate offers are not desired. Brochures or other material not requested by this RFP or necessary to provide a complete and effective response to this RFP should not be included with the offers.

(d) Offerors are expected to carefully examine all the information and instruction in this RFP. Failure to prepare and submit all information as required by this RFP, including all sections, attachments, and post-award submittals, may result in the offer being rejected as non-responsive.

B.2 Offer Content

Offers must be submitted using the *Standard Proposal Form* provided in Attachment (4). The *Standard Proposal Form* provides an effective means by which the Government can systematically evaluate all offers against the technical requirements contained in this RFP and compare the prices of submitted proposals. Offerors may also provide additional information about their lease space that they deem relevant in a format of their choosing; however, the *Standard Proposal Form* must be included in the proposal. Offers must be comprised of the following:

- a cover letter, in the format and containing all information specified in Section B.2.(a) below;
- a Technical Data Package, containing all items listed below in Section B.2.(b), as a separate enclosure;
- a completed and signed *SF-25, Performance Bond*, Attachment (3);
- a completed and signed *Standard Proposal Form*, Attachment (4);
- a completed and signed *GSA form 3518, Representations and Certifications*, Attachment (5);
- a completed *Seismic Certification for Existing or New Spaces*, Attachment (6); and
- a completed *Form 12000 Prelease Fire Protection and Life Safety Evaluation for a Warehouse Building*, Attachment (8).

(a) Cover Letter

The Offeror shall include a dated cover letter, on letterhead if available, formally responding to the RFP. The cover letter shall be signed by the Offeror and all persons or entities other than limited partners who will have a financial interest in the project. Pages should be numbered. The letter should reference this RFP by title and number and contain the information below:

- The name of the Offeror and confirmation the offeror and owner(s) are not employees of the U.S. Government.
- Name, email and telephone numbers of the person(s) authorized to negotiate and execute any resulting lease. Provide alternate points of contact as necessary.
- All information necessary to complete the SF2, U.S. Government Lease for Real Property, Attachment (1).
- Identification and location of the property offered by providing the address.
- Evidence of ownership of the property. Alternately, if the Offeror is not the owner, evidence of the Offeror's authority to act for the property owner. Offers signed by an agent shall be accompanied by an original signed document evidencing the agent's authority to offer the lease.
- Date leased space will be ready for the Government's occupancy.
- A statement confirming the offer will remain valid through lease award.
- A statement confirming the leased space currently meets, or will meet through Tenant Improvements, all specifications, provisions, clauses, terms and conditions of the RFP and Lease prior to commencement of the Government's occupancy.
- Total Annual Rent for the initial one (1)-year term plus subsequent fourteen (14) option years. Total Annual Rent must be inclusive of all regular building maintenance and utilities.
- A firm Purchase Price for each of the first five (5) years of the lease term. The Government shall have no obligation to purchase the facility.
- Statement of property and liability insurance coverage (what is insured and the dollar limits of coverage) and insurance carrier.

If Offer requires construction of Tenant Improvements, also provide the following:

- Total cost required for Tenant Improvement to be paid by the Government in a lump sum payment.
- Evidence of availability of funds in an amount necessary for Tenant Improvements. If financing will be sought through a financial institution, such commitments must be signed by an authorized bank officer and state amount of loan; term in years; annual percentage rate; and length of loan commitment.
- The name of the proposed construction contractor, as well as evidence of the contractor's experience, jobs completed, and performance capabilities.
- Licenses or certifications of the individual(s) and/or firm(s), providing architectural and/or engineering design services or evaluations, to practice in the state where the facility is located.

(b) Technical Data Package

- Provide property address, net square feet offered for lease, with net useable space itemized, and square footage for any corridors. If there are multiple tenants within the property, state where within the property the Government's leased space will be located, include calculation of percentage of total building net square feet to be occupied by DoW personnel and provide a list of adjacent tenants. State whether the space offered is contiguous or on more than one floor.
- Layout drawing 1/8" scale (or larger standard scale) showing the location of all existing windows, entrances and exits of the building, type of construction, interior finishes of walls and ceilings in all habitable rooms, corridors and exit-ways within the space, structural features, and mechanical and electrical equipment. Show net usable space measurements for each room and corridor widths that demonstrate the entire space requirement is met.
- Narrative (one page or less) explaining how the facility meets or will meet the requirements for accessibility to the physically handicapped provided in Section C.1 of this RFP.
- Narrative (one page or less) explaining how the facility meets seismic safety criteria either by conforming to model building codes identified in Attachment (6) or by completion of FEMA 310. Identify the registered engineer that will certify the seismic safety criteria or FEMA 310 survey within 30 days after award if the offer is successful.
- Provide written concurrence to allow US Navy Security Personnel and/or the Department of Homeland Security access to the facility prior to award to assess the facility for Interagency Security Committee (ISC) standards for Facilities.
- Provide a location map.
- Provide statement of distance from proposed lease location to existing West Coast Distribution Center in Chino, CA located at 4250 Eucalyptus Avenue, Chino, California, 91710.
- Brief narrative that discloses all deviations from the current local building code for new structures, including those permitted by "grandfather clauses".
- Interior and exterior photos of existing facilities.

If Offer requires construction of Tenant Improvements, also provide the following:

- Layout drawing 1/8" scale (or larger standard scale) showing the location of all proposed windows, entrances and exits of the building, type of construction, interior finishes of walls and

ceilings in all habitable rooms, corridors and exit-ways within the space, structural features, and mechanical and electrical equipment upon completion of Tenant Improvements. Identify all rooms as designated on a room schedule that shows net usable space measurements for each room and corridor widths that demonstrate the entire space requirement is met and that all standards for accessibility to the physically handicapped are also met. A final design of Tenant Improvements will be required within thirty (60) days following award notification.

- Provide a delivery schedule of space ready for occupancy, including the 60% completion date, date when space will be ready for telephone/internet installation work, and date all Tenant Improvements are anticipated to be complete.
- Brief narrative (4 pages or less) that states column sizes and spacing, if any, lowest finished ceiling height that will exist when the space is ready for occupancy, design floor load, floor covering(s), wall coverings, linear feet of partitioning included in offer, type and size of HVAC system including conditioned space exhaust fans, thermostats and controlled zones, elevator measurements, keying system, any current security features, and any pertinent space layout details.
- Should the RECO request additional information, an amendment to the RFP requesting the additional information and including the due date for submission will be announced in writing.

B.3 Explanations

Prospective Offeror(s) desiring an explanation or interpretation of the RFP or any other related information, must make such request in writing addressed to the RECO, at the Government's point of contact listed below, at least 10 days prior to the due date for receipt of offers. It is preferred that requests be e-mailed. Oral explanations or instruction will not be binding on the Government. Any information given to a prospective Offeror concerning the RFP will be furnished promptly to all other prospective Offerors if that information is necessary in submitting proposals or if the lack of the information would be prejudicial to other prospective offerors.

The Government's Point-of-Contact for this RFP is: Ms. Tracy Chapman, Realty Specialist
 Phone: 757-322-4954
 Email: tracy.a.chapman.civ@us.navy.mil

B.4 Who May Submit an Offer

An Offeror may be an individual, partnership, corporation, association, municipality, or government or quasi-government authority, such as an airport commission, that possesses legal ownership of the facility and is authorized to enter into a leasehold agreement with the Government to lease the property. The forming of a Joint Venture, an association of two or more persons, corporations, partnerships, and/or associations, to carry out a single business enterprise for profit, for which purposes the parties combine their property, money, efforts, skill and knowledge, is considered an acceptable business entity under this RFP. However, if the Offeror is a Joint Venture, it must (1) be established prior to the submission of initial offers, and (2) the initial offer submitted must contain the Agreement for Joint Venture or similar documentation of a resolution signed by all participating parties.

B.5 Multiple Offers

Offeror(s) may submit multiple offers. Separately price each offer and distinctly mark each package and page so that if the pages become separated, the reader can clearly identify which offer the package or page applies to. Each offer shall meet the requirements of this RFP separately to enable evaluation without the need to request additional information.

B.6 Amendment(s) to RFP

This RFP shall not be changed or amended except by a formal written Amendment signed by the RECO. If this RFP is amended, all record holders of the RFP will be provided a dated copy of the Amendment. Furthermore, all terms and conditions which are not modified shall remain unchanged and shall continue in full force and effect. Offerors shall acknowledge receipt of any Amendment by signing and returning one copy of the Amendment to the RECO. The RECO must receive the signed acknowledgement of the Amendment by the time and at the place specified in the RFP for the receipt of offers.

B.7 Late Submission, Modifications or Withdrawals of Proposals

- (a) Any offer received at the office, designated in section B.1 above, after the exact time specified for receipt will not be considered unless it is received before award is made and:
 - (1) It was sent by email to the designated Point of Contact not later than July 13, 2026 specified for receipt of proposals, or
 - (2) It is determined that late receipt was due solely to mishandling by the Government after receipt at the proper Government office, or
 - (3) It is the only proposal received.

B.8 Evaluation Process

- (a) All offers will first be evaluated to determine whether the offer(s) meets the Minimum Technical Requirements as described in Section C.1, and Attachment (2). Offer(s) that do not meet the Minimum Technical Requirements shall be considered non-responsive.
- (b) The Government reserves the right to eliminate from consideration for award any or all offers at any time prior to award of the contract; to negotiate with offerors in the competitive range; and to award the contract to the Offeror submitting the proposal determined to represent the best value the proposal(s) most advantageous to the Government, price and other factors considered.
- (c) The Government intends to evaluate proposals and award a contract without discussions with Offerors (except clarifications as described in FAR 15.306(a)). The Government reserves the right to conduct discussions if the RECO later determines them to be necessary. In addition, if the RECO determines that the number of proposals that would otherwise be in the competitive range exceeds the number at which an efficient competition can be conducted, the RECO may limit the number of proposals in the competitive range to the greatest number that will permit efficient competition among the most highly rated proposals.

NOTE: The Government intends to make award on initial offers. If the Government, at its sole discretion, determines discussions are necessary, a competitive range with the most competitive offers will be established. If discussions are held, Offerors will be provided an opportunity to revise their proposals at the conclusion of discussions.

(d) Evaluation Factors:

- (1) The Government will select a successful Offeror using the Best Value Source Selection Process. The Government will use “Tradeoffs” as the source selection approach. A tradeoff process is appropriate when it may be in the best interest of the Government to consider award to other than the lowest priced Offeror or the highest technically rated Offeror. **The Government will award the lease to the Offeror whose offer demonstrates best value and is most advantageous to the Government.** The Government will evaluate each Offer independent of all others.
- (2) The Evaluation Factors represent key areas of importance and emphasis. Proposals will be evaluated based on Factors 1 - 3, identified below.

NOTE: Factors 1 and 2 are of the greatest importance and weighed equally as the two highest of the three factors. Factor 3 is of the second highest importance.

i. Factor No. 1: Price

The Total Annual Rent, the total cost of Tenant Improvements, as well as the purchase prices offered for each of the first five (5) years of the lease term will be evaluated together to determine the Offer most advantageous to the Government. Offers requiring none or minimal Tenant Improvements in order to meet the Specifications as described in Section C.2 may be preferred. No adjectival rating will be utilized for this factor; however, the Government reserves the right to assign greater preference to an Offer requiring Tenant Improvements or proposing higher overall cost if one, or both, of the Factors 2 and 3 are determined to be most advantageous to the Government.

ii. Factor No. 2: Technical Requirements and Specification

Minimum Technical Requirements will be evaluated on “Met” or “Not Met” basis. All proposals that do not meet one or more Minimum Technical Requirements as described in Section C.1 will be considered non-responsive and will not be considered further. In addition, Offers that currently do not meet all Specifications as described in Section C.2. and does not propose to meet those Specifications through Tenant Improvements will be considered non-responsive and will not be considered further. Each Offer will be evaluated using the adjectival ratings as described in Section B.8(h) of this RFP based on how it meets or proposes to meet all Specifications. Proposals may offer facilities or designs that exceed the baseline Specifications described in Section C.2. Offers will be evaluated based on physical condition of the facility and all required fixtures and appurtenances as well as operational efficiency of the layout. Greater preference may be given to properties that are newer and allow ability for the Government to expand. The

Government will evaluate the Proposals to determine which facility will provide the most benefit to the Government's operations in terms of efficiency and capabilities. Proposals that offer greater operational capability and efficiency may be evaluated more favorably.

iii. **Factor No. 3: Area of Consideration:**

All proposals with facilities located outside the delineated area as indicated with a red line on Attachment (7) ("Area of Consideration") will be considered non-responsive and will not be evaluated further. The Government will consider all properties located within the Area of Consideration and evaluate them using the adjectival ratings described in Section B.8(h) of this RFP. Greater consideration will be given to properties that are within shorter driving distance to existing West Coast Distribution Center, 4250 Eucalyptus Avenue, Chino, California, 91710.

- (h) The Government will evaluate Factor 2, Technical Requirements and Specifications and Factor 3, Area of Consideration using the below adjectival ratings.

Rating	Evaluation
Excellent	Proposal/factor demonstrates thorough and detailed understanding of requirements. Technical approach and capabilities significantly exceed performance and capability standards. Proposal/factor offers one or more strengths. Strengths significantly outweigh weaknesses, if any. The proposal/factor represents a high probability of success with no apparent risk in meeting the Government's requirements. See preferences provided in factors 1-3 above.
Satisfactory	Proposal/factor demonstrates acceptable understanding of requirements. Technical approach and capabilities meet performance and capability standards. Proposal/factor offers no strengths, or, if there are any strengths, these strengths are offset by weaknesses. The proposal/factor represents a reasonable probability of success with overall moderate degree of risk in meeting the Government's requirements. See preferences provided in factors 1-3 above.
Marginal	Proposal/factor demonstrates a lack of understanding of requirements. Technical approach and capabilities do not meet performance and capability standards necessary for acceptable contract performance. Proposal/factor contains major errors, omissions, significant weaknesses and/or deficiencies. The proposal/factor represents a very low probability of success with an extremely high degree of risk in meeting the Government's requirements. Proposal/factor could only be made satisfactory with major revision of the proposal. See preferences provided in factors 1-3 above.

(i) **Price Analysis**

The Government will perform analysis by one or more of the following techniques to ensure a fair and reasonable price:

- (1) Comparison of proposed prices received in response to the RFP.
- (2) Comparison of proposed prices with the Independent Government Estimate (IGE).
- (3) Comparison of proposed prices with available historical information.
- (4) Comparison of market survey results.

B.9 Award

- (a) Award of this lease and all agreements related to the obligation of the Government to make payments pursuant to the award of the lease contemplated in this RFP are subject to U.S. law, including but not limited to, Anti-Deficiency Act, 31 U.S.C.1341, and the availability of appropriations. Award of any contract under this RFP is contingent upon the availability of funds from which the payments can be made. No legal liability on the part of the Government under this RFP or for any payment may arise until funds are made available to the RECO for a lease contract and until the Offeror receives notice of such availability, to be confirmed in writing by the RECO. In the event sufficient funds are not made available, the Government shall not make an award under this RFP.
- (b) A lease will be awarded to the responsive Offer determined to be the best value to the Government based on Evaluation Factors. Accordingly, the Government, in its sole discretion may: (1) reject any Offer the Government deems non-responsive in accordance with the stated criteria in this RFP; (2) award on initial Offer without discussions; or (3) award to an Offeror other than the lowest priced Offeror.
- (c) The Government may accept an Offer whether or not there are negotiations after its receipt, unless the Offeror submits a written notice of withdrawal to the Government before award. Negotiations conducted after receipt of an Offer does not constitute a rejection or a counteroffer by the Government. The acceptance of the Offer and award of the lease by the Government will occur upon notification of unconditional acceptance of the Offer or execution of the lease by the RECO and mailing or otherwise furnishing written notification or the executed lease to the successful Offeror. After conclusion of negotiations, if required, the RECO will require the Offeror selected for award to execute the proposed lease prepared by Naval Facilities Engineering Systems Command, Atlantic which reflects the proposed agreement of the parties. Execution of the proposed lease may not occur until the Government completes the environmental analysis required by the National Environmental Policy Act (NEPA).
- (d) Lease Terms
 - (1) The lease that the Government and successful Offeror will enter into will be based on the following terms, among other standard provisions required for U.S. Government real estate contracts. Offerors should consider these main terms when preparing their Offers.
 - i. Firm Term and Option Periods. The firm term will be for one (1) year with options for the Government to renew the lease for fourteen (14) additional periods of one year each. The total potential term is fifteen (15) years. The Government will provide written renewal notice to the successful Offeror at least one hundred eighty (180) days prior to the expiration of each term.
 - ii. Occupancy Date. Occupancy shall commence upon the mutually agreed date of the parties with consideration given to completion of Tenant Improvements. In accordance with the National Environmental Policy Act of 1970 (NEPA), the Government may not award the lease to the successful Offeror until the Government has completed an assessment of the potential impact to the environment of the proposed action.

iii. **Lease Payments.** The Government will pay a prorated amount of Total Annual Rent on quarterly basis, unless otherwise negotiated, in arrears to the successful Offeror in exchange for the right to use the premises in accordance with the terms of the lease. The Total Annual Rent shall be fair and reasonable as determined by the Government's Senior Staff Appraiser. If the Offeror proposes to perform the necessary Tenant Improvements, the cost of the Tenant Improvements will be paid in lump sum at the time of Government's occupancy of the premises, subject to Government's review and acceptance of work, and will be further documented in a bi-laterally executed amendment to the Lease.

B.10 Limitation

The Government may cancel this RFP at any time at the Government's discretion. In no event will the Government bear any costs associated with Offerors' preparation of proposals, responses, or post-award submissions and actions required by this RFP.

Section C. Technical Requirements and Specifications

C.1. Minimum Technical Requirements

(a) Facility Age: Facility must be less than or equal to 35 years old. Over 35 years old does not qualify and is non-responsive.

(b) Building Size: Total building size must be a minimum of 400,000 SF. Total building size of less than 400,000 SF will be considered non-responsive. Total building size must allow for approximately 8,000+SF of office/administrative space.

(c) Interior Height: Interior warehouse must have a minimum height clearance of 30 feet. Interior height less than 30 feet will be considered non-responsive.

(d) Building Shape: The building shape must be square or rectangular. Other shapes will be considered non-responsive.

(e) Utilities. Mains, lines, and meters for utilities shall be provided by the Lessor. Maintenance of mains, lines, and meters shall be provided by the Lessor as part of the rent. All utilities will be included. The Lessor shall ensure all utilities necessary are available for operation twenty-four (24) hours a day, seven (7) days a week. Any known outages for maintenance will be coordinated with the local Government representative in advance.

(f) Site Access: The Government shall have access to the leased space, including parking spaces, 24 hours per day, 7 days per week, including federal, state and local holidays.

(g) Maintenance. The Lessor must provide all building maintenance and repairs including yard maintenance and HVAC for the duration of the lease. The Lessor shall not be responsible for maintenance and repair for GF/GI.

(h) Accessibility: The facility must meet all applicable codes and regulations for handicapped accessibility. Criteria and standards of accessibility for the handicapped for DoD owned or funded facilities is set forth in 36 CFR 1191, Americans with Disabilities Act (ADA) Accessibility Guidelines for Buildings and Facilities; Architectural Barriers Act (ABA) Accessibility Guidelines and will be applied to buildings and facilities leased by the Department of Defense (DoD). If, at the time of leasing, leased space meets past or present state or local codes for handicapped accessibility and provides the features required by that section, the space may be used as is or altered to comply with 36 CFR 1191 at the option of the agency responsible for the budget for the acquisition and use of space. If space is subsequently altered and/or expanded during the term of the lease then alterations shall comply with requirements established in 36 CFR 1191.

(i) Seismic Safety: The building must meet Seismic Safety standards acceptable to the Government. Offers that are responsive to this RFP will be evaluated in accordance with the Seismic Design of Buildings, Unified Facilities Criteria (UFC 3-301-01), Structural Engineering, and Naval Facilities Engineering Systems Command Instruction (NAVFACINST 11000.40), Seismic Hazard Mitigation Program.

C.2. Specifications

(a) Dock Doors: Must provide a minimum of 65 dock doors. Each door must have vertical lift dock doors. Although preference is for dock door opening is 9' wide x 10' high (standard size), dock door opening of 8' wide X 10' high are acceptable. Each door must have installed dock aprons/seals to close the gap from trailer to building. Stop/Go lights dock door system is required. Dock door fans/lights are required. Facilities which have less than 65 doors, doors without dock aprons/seals to close the gap from trailer to building, no Stop/Go light dock door system, no dock door fans and lights, or with dock doors smaller than 8' wide X 10' high will be considered non-responsive. Must have a minimum of one grade level dock door ramp.

(b) Dock Leveler Ramps: Each dock door must have full size dock leveler ramps measuring 7' wide x 8' long (standard size), either with push button automation or operated by a pull chain. Each dock leveler ramp must be in functional working condition and have a minimum of 30,000-pound capacity.

(c) Office Space: Primary administrative office space must allow a minimum of 5,000 SF, to be located at the main entry point of the building. Secondary administrative office space must allow a minimum of 3,000 SF, to be located within the main warehouse processing floor. Both primary and secondary offices require heating, ventilation, and air conditioning, telephone/computer connectivity, power, and lighting.

(d) Lighting: Lessor shall provide interior and exterior lighting in accordance with the United Facilities Criteria (UFC) 3-530-01, 09 February 2023, Change 1, 15 December 2023. Locations that do not meet the requirements of the UFC will be considered non-responsive, to include, but not limited to, the use of LED and requisite warehouse lighting for handling small-sized items in an active pick environment. Lighting shall be measured in 5 different areas of the warehouse space and must average greater than 20 foot-candles. At lease commencement, all outside and

inside lights must be in working order. Lessor shall install all replacement bulbs, lamps, tubes and ballasts for both outside and inside lights at no cost throughout the duration of the lease term.

(e) Parking: Building must have a minimum of 200 automobile parking spaces including handicap requirements per code.

(f) Trailer Yard: Trailer yard must be heavy duty asphalt and/or reinforced concrete. Must have 60' deep reinforced concrete apron at each dock door. Must have reinforced concrete aprons for each trailer parking location. Trailer yard must accommodate trailer parking for a minimum of 100 standard trailers, in addition to the 65 dock door positions, and provide adequate maneuvering space for trucks to position trailers at dock doors. Trailer yard must be enclosed with perimeter fence. Opening gate to the truck yard must include a "guard shack" with power, internet access, and HVAC.

(g) Special Purpose Areas: The facility must provide sufficient capacity for special purpose areas (included in the 400,000 SF requirement). 1. Aerosol Storage area: 1500+ SF and special sprinkler protection per code. 2. Sensitive storage area: 4,000 SF, enclosed with chain link fence and special sprinkler protection per code. 3. Material Handling: Equipment/Battery charging stations: Requires special ventilation per code, 10,000 SF and able to fit 75+ MHE with 75 chargers, preference to have multiple charging areas with ventilation throughout the warehouse and charging areas must have plumbed eye wash stations with wash down capability with drainage. 4. Maintenance shop area must be 4,000+ SF. 5. HAZMAT storage area must be 1,000+SF.

(h) Break Rooms: 2,800 Square Feet (SF) or larger room, located inside the building and must include: heating, air conditioning, lighting, sufficient electrical output of 100 amps or more. Must have bathrooms located within close proximity.

(i) AT/FP: The facility must meet security standards (AT/FP Level 1) as required by UFC 4-010-01, change 3, 24 May 2024, which states the security standards established by the Department of Homeland Security's Interagency Security Committee (ISC) in the Risk Management process for Federal Facilities shall apply to all off-installation leased space managed by DoD. In accordance with these ISC standards, lessor must permit the Government to conduct a security survey for each facility offered to determine a risk rating pursuant to the ISC standards. Offers must receive an acceptable risk rating from the Government in order to be eligible for award.

(j) Flooring: Warehouse floor slab construction must comply with ACI 302.1R-04, Guide for Concrete Floor and Slab Construction. The warehouse floor area must be a sealed floor to minimize wear and dusting. The warehouse floor must be level to a tolerance of less than or greater than Fmin35 (floor flatness).

(k) Fire Protection: The warehouse must have an operational fire alarm system per code. The fire system must allow for enough capacity for "in rack sprinklers" where needed. Offered space shall meet or be upgraded to meet the applicable egress requirements in the National Fire Protection Association (NFPA) 101, *Life Safety Code* or an alternative approach or method for achieving a level of safety deemed equivalent and acceptable by the Government. Offered space

located below-grade, including parking garage areas, and all areas referred to as “hazardous areas” (defined in NFPA 101) within the entire building including non-Government areas), shall be protected by an automatic sprinkler system or an equivalent level of safety. The sprinkler protection in accordance with the Unified Facilities Criteria (UFC) Fire Protection Engineering for Facilities UFC 3-600-01 Change 6, of 06 May 2021. The automatic fire sprinkler protection for these areas shall be in accordance with Section 4-48.2.1 of the UFC 3-600-01.

(l) Restrooms: Restrooms must have accessible men’s and women’s toilet facilities sized per code for a building occupancy of a minimum of 250 employees (55% men; 45% women).

(m) Architecture Requirements. The Offeror shall furnish layout drawing 1/8" scale (or larger standard scale) showing the location of all existing and/or proposed windows, entrances and exits of the building, type of construction, interior finishes of walls and ceilings in all rooms, corridors and exit-ways within the space, structural features, and mechanical and electrical equipment. Identify all rooms as designated on a room schedule that shows net usable space measurements for each room and corridor widths that demonstrate the entire space requirement is met and that all standards for accessibility to the physically handicapped are also met.

(o) Warehouse Ventilation: Building should have powered louvers in combination with roof exhaust fans so that a cross breeze can be achieved for building ventilation and air flow.

(p) Electrical Services: Electrical services must be 480volt, 3 phase, 3,200-amp, 65,000 Available Interrupting Current (AIC).
