Basis For Decision That Only One Source Is Available

Paul Mueller Company, Cage Code 1V224 - large business concern, is the Original Equipment Manufacturer (OEM) and retains the proprietary rights and knowledge to the technical data of the requested part pack to support Main Diesel Engine No. 2. The work contemplated in this contract is on the following critical safety items: (1) Main Propulsion Diesel Engines. Per COMSCINST 4490.1C, MSC N7, the Design Control Activity, has determined that only qualified sources may produce and service these critical safety items. Only authorized field service technicians have access to necessary technical data and have the expertise to identify and provide direct replacement parts for existing equipment, which must be compatible in terms of form, fit, and function with existing equipment or configurations. This ensures equipment reliability. Improperly installed or deficient parts could cause system failure and loss of the affected system or equipment while at sea. There is no known alternate manufacturer of such. Any substitution (if such exists) may not be compatible to the vessel's equipment and/or components service. MSC does not have manufacturing and technical information required to evaluate and determine whether non-OEM replacement parts offered are equivalent to the OEM components and replacement parts.
