

Broad Agency Announcement

N68335-26-R-0458

Broad Agency Announcement to Support the Naval Air Warfare Center Aircraft Division
Webster Outlying Field Airborne Systems Integration Division

POSTED DATE: 10 April 2026

Prepared by: NAVAL AIR WARFARE CENTER AIRCRAFT DIVISION, Lakehurst
Procurement Group, Highway 547, Bldg. 120, Lakehurst, NJ 08733

*Offerors that submitted a proposal to N68335-25-R-0403 are requested to not submit an additional proposal abstract to this BAA, unless otherwise requested.

*FAR, DFARS, and NMCARS clauses referenced throughout this Broad Agency Announcement may have changed locations, added language or have been removed in their entirety due to the updates made from the Revolutionary FAR Overhaul. Reference <https://acquisition.gov/far-overhaul> for those changes.

SOL – Broad Agency Announcement

TITLE – Broad Agency Announcement to Support the Naval Air Warfare Center Aircraft Division Webster Outlying Field Airborne Systems Integration Division

RESPONSE DATES – Phase I: Responses may be submitted at any time up until the closing date of the BAA (10 April 2027) and the time identified in the sam.gov posting of the BAA.

Phase II: BY REQUEST ONLY

AGENCY – NAVAL AIR WARFARE CENTER AIRCRAFT DIVISION
Procurement Group, Highway 547, Bldg. 120, Lakehurst, NJ 08733

This notice constitutes a Broad Area Announcement as contemplated by *FAR Subparts 6.102(d)(2)* and *35.016, DFARS 235.016*, and the *Department of Defense Other Transactions Guide, July 2023*.

1 INTRODUCTION

This Broad Agency Announcement (BAA) is intended for proposal abstracts “for the acquisition of basic and applied research and that part of development not related to the development of a specific system or hardware procurement” according to Federal Acquisition Regulation (FAR) Part 35. This BAA is not intended for the acquisition of technical, engineering, or other support services. This solicitation is specific to research and development support in technologies that are applicable to the following: air platforms, manned and unmanned payloads, advanced computing and processing, air platform support systems, advanced air system security and protection, and improved Naval air capabilities. Example focus areas include improved technologies, techniques or advanced applications of communications, Electro-Optical (EO), Infrared (IR), Radio Frequency (RF), acoustic and non-acoustic sensors, persistent surveillance technologies, and special sensor systems for Navy manned aircraft and Unmanned Air Systems (UAS). Technologies proposed should emphasize rapid development, assessment, integration, and demonstration to the warfighter.

2 BACKGROUND

The Naval Air Warfare Center Aircraft Division (NAWCAD) Webster Outlying Field (WOLF) Airborne Systems Integration (ASI) Division develops advanced air platforms, sensors (e.g., acoustics, EO/IR, radar, magnetics, and other special sensors), and systems to meet current and future Naval capability demands. The purpose of these platforms, sensors and systems is to support a variety of aviation missions including distributed maritime surveillance, Air Undersea Warfare (USW), airborne strike, air warfare, counter-air, close air support and interdiction, defense suppression, advanced communications, digital interoperability, electronic attack, naval warfare and amphibious strike, Counter Unmanned Systems (C-UxS), anti-surface warfare, and contested logistic support. Most of the air platforms will be small Group 1 to Group 4 UAS or modifications to existing larger manned and unmanned air platforms. Sensors could be air deployed (via manned or unmanned aircraft), ground, surface, or undersea deployable as driven by the mission needs. Advanced computing and processing will be focused on air vehicle, payload, edge computing, artificial intelligence and machine learning, or multi-platform collaborative solutions supporting all aspects of mission information from pre-deployment,

through operations, to post deployment and sustainment. Advanced air system security and protection will be focused on securing information, transmissions, anti-tampering, and reduced probability of compromise of existing technologies or technologies in development. Improved naval capabilities will focus on key naval focus areas or capability gaps supporting improved lethality, availability, and affordability.

This BAA not only includes air vehicle systems, mission systems, sensors, sensor data processing, and sensor systems, but it also includes mathematical modeling of the sensors and air platforms, communication techniques between the sensors and/or platforms, interfaces, software development, the fusion and exploitation of multi-sensor data, studies, artificial intelligence, deep learning, machine learning, advanced algorithms, and other techniques used to develop advanced capabilities and reduce the cost of transitioning sensors technologies to the fleet. Furthermore, this BAA shall cover development and analysis of related air, sea, and land detection models using relevant data.

Though availability and affordability are not common topics within research and development, they are essential to meeting the Navy's needs for today and tomorrow. As such, research and development activities that provide technologies that improve system availability and/or could result in potential future cost savings to the government are included within this BAA.

As NAWCAD WOLF ASI's mission is to rapidly develop, evaluate, demonstrate, integrate, field, and transition airborne systems and advanced technologies to meet Warfighter needs; most BAA efforts will focus on mid- to high- Technology Readiness Level (TRL) technologies that can be rapidly demonstrated or used to support fleet experimentation, evaluate novel concepts for near-term future use, or evaluate technologies that could resolve critical functions or gaps.

2.1 Research Areas of Interest

The NAWCAD WOLF ASI Division is interested in, but not limited to, researching the following areas:

2.1.1 Platform Related Areas of Interest

- UAS/Unmanned Surface Vehicle (USV)/Unmanned Underwater Vehicle (UUV) autonomous operations, unique payload capabilities, Size Weight and Power (SWAP), powertrain, flight dynamics, and engine enhancements
- UAS powertrain improvements to include improvements in safety, flight duration, solar technologies, alternative power technologies, power capacity, increased performance, and or logistical improvements
- Manned and UAS audio, visual, heat, and/or RF noise dampening/cancellation techniques
- Contested airspace payload/remote payload delivery
- Expendable/low-cost surveillance, communications relay, and/or edge processing capabilities
- Innovative technologies for disadvantaged platforms
- Capabilities, improvements, or technologies to increase air systems operational availability and or decrease air platform life cycle cost
- Roll on or bolt on capability enhancements to existing manned and unmanned systems.

- Enhancements in air system survivability

2.1.2 Payload Related Areas of Interest

- Non-acoustic Anti-Submarine Warfare (ASW) sensors and systems
- Acoustic ASW sensors and systems
- Magnetic sensors and systems
- Research involving the interrelationship of acoustic and non-acoustic phenomena applicable to ASW
- Acoustic and optical Mine Counter Measure (MCM) sensors and systems
- EO systems engineering methodologies, technologies, and techniques
- Laser Identification Detection and Ranging (LIDAR) components and systems
- Hyperspectral components and systems
- Laser components and systems
- Electronic Warfare (EW) and cyber capabilities
- Enhanced airborne networking of autonomous vehicles, manned aircraft, and ground/afloat systems
- Adapted commercial networking technologies on military platforms
- Unattended remote controlled sensor technology
- RF techniques and radar technologies for land and maritime target detection, geolocation, Moving Target Identification (MTI), Multi-Moving Target Identification (MMTI), Inverse Synthetic-Aperture Radar (ISAR), passive bi-static or multi-static, tracking, and imaging
- Data link communication technologies and techniques that provide reduced probability to detect, anti-jamming capability, high data throughput, or resilient communications
- RF antenna technologies and communications techniques
- Lightweight sense and avoid technologies
- Low SWAP edge computing with reduced power consumption and heat generations
- Alternative position, navigation, and timing technologies
- Passive sensing technologies
- Reduction of size, weight, power, and cost of proven technologies for implementation in small UAS

2.1.3 Advanced Computing and Processing Areas of Interest

- Signal processing
- Information processing
- Telemetry methods for off-board sensors to and from various platforms
- Mathematical modeling and techniques for analyzing ASW effectiveness and performance
- In-sensor acoustic signal processing
- Techniques for quantum encryption, coding, and computation
- Multi-domain and UAS networking and communications technologies and techniques
- Sensor correlation, dissemination, reduction, and recording technologies and techniques

- Insertion of Artificial Intelligence (AI) and Machine Learning (ML) techniques into airborne sensors for situational optimization
- Multi-source data correlation fusion including tracks, sensors, and other multi-spectrum inputs
- Rapid precision detection, identification and targeting technologies and techniques
- Computational electromagnetic modeling and analysis techniques
- Precision geolocation technologies and techniques
- RF analysis and fusion technologies and techniques
- RF Signal analysis and processing technologies and techniques
- Machine or deep learning for raw data and/or pattern analysis
- Autonomy techniques, algorithms, or capabilities that increase lethality, readiness, or effectiveness

2.1.4 Advanced Air System Security and Protection Areas of Interest

- Technologies or techniques to increase sensor and airframe survivability to include advancements in countermeasure techniques.
- Near real time Cross Domain Solutions
- New kinetic and non-kinetic techniques for defeat
- Technologies or techniques to reduce airframe detection from active and passive remote sensors to include techniques to reduce airframe RF, visual, infrared, and acoustic signatures.
- Advancements in secure communication, storage, and tamper resistant non-recoverable system hardening.
- Advancements in tools, techniques, and technologies that provide enhanced Multi-Level Security (MLS) and Multiple Independent Level of Security (MILS).
- Advancements in cyber hardening techniques and technologies that improve system integrity and survivability against cyber threats
- Technologies or techniques that reduce security concerns with high probability of loss unmanned vehicles and sensors and or expendable unmanned vehicles and sensors.

2.2 Specific Areas of Interest

Proposals are being solicited in the following areas but are not limited to:

- 2.2.1 Collaborative multi-sensor payloads with onboard enhanced data fusion and autonomous operations focused on reducing data throughput on disadvantaged communication links, reducing operator workload, and enhancing multi-domain critical information sharing.
- 2.2.2 Enhanced manned and unmanned airborne payloads providing greater maritime situational awareness with increased effectiveness, reduced SWAP, and reduced total ownership cost.
- 2.2.3 Modification of Commercial-Off-The-Shelf (COTS) UASs for military application to include ruggedization, adaptation of engines utilizing non-explosive fuels, hybrid or long endurance engines, implementation of cyber safe software coding and UAS controls,

implementation of secure data links, improvements in battery and solar technologies, improved shipboard launch and recovery, and multi-system collaboration and automation.

- 2.2.4 UAS solutions that significantly decrease launch and recovery and support equipment footprint while expanding capability for launch and recovery to alternative operational sites that lack an organic UAS capability and support structure.
- 2.2.5 Advancements in UAS and UAS technologies that provide new and unique capabilities to the Warfighter.
- 2.2.6 Advancements in technologies that provide precision geolocation and network timing in in a contested environment, increase airframe survivability, and decrease probability of system detection.
- 2.2.7 Persistent air, ground, and ship communications data links that enable the warfighter to share data securely amongst unmanned and manned assets within line of sight and Over The Horizon (OTH) to include advancement in technologies, techniques, or alternative methods to automate, reduce, secure, and/or condense mission critical information and/or increase throughput, reduce probability of detect, increase availability, or miniaturize OTH communications.
- 2.2.8 Enhanced naval capabilities that can be implemented within a minimally invasive roll-on or bolt-on configuration to existing or emerging naval platforms utilizing open or existing standards and protocols.
- 2.2.9 Technologies or techniques that support increasing operational availability for existing or emerging platforms and or reducing total ownership cost.
- 2.2.10 Manned and unmanned systems, sensors, and sensor technologies that increase naval capabilities by providing new systems or advancements to existing systems through advanced data processing and detection, advanced algorithms, reduced processing and dissemination time, improved detection, reduced SWAP, increased detection range, increased survivability, decreased probability of detection while reducing total ownership cost.
- 2.2.11 Provide technologies, techniques, or alternative methods to provide lightweight low-cost expendable air launched, ship launched, or ground launched UAS and sensor technologies to provide sense and avoid, provide early warning detection, increase lethality, increase probability to detect, support increased survivability of nearby protected platforms, act as force multiplier and/or improve existing naval capabilities at lower total ownership cost.
- 2.2.12 Advancements in human-machine teaming technologies, autonomy, machine learning, or advancements focused on reducing threats to Warfighter, increasing effectiveness,

consolidation of mission critical actionable information, increasing lethality, and/or acting as a force multiplier.

- 2.2.13 Advancement in technologies, techniques or alternative methods to provide a robust immersive training, maintenance, and operational simulation environment focused on providing realistic venues to increase Warfighter proficiency, increasing capabilities to conduct complicated and or high-risk scenarios in a virtual environment, low-cost risk reduction, and provide remote support in a contested environment.
- 2.2.14 Novel approaches to improve readiness, improve resilience, or add capability to existing naval air platforms that can be fielded in a rapid manner with minimally intrusion into the air platform.
- 2.2.15 Novel approaches to mission system and communication systems that improve cyber resilience, reduce size weight and power, and provide open systems approach that enables an agile and adaptable mission system to support the fleet with capabilities needs for now and in the future.

3 FEDERAL AWARD INFORMATION

3.1 Awards

Multiple awards are anticipated. The level of funding for individual awards made under this solicitation have not been predetermined and will depend on the quality of the proposals received and the availability of funds. Awards will be made to Offerors with proposals determined to be the most advantageous to the Government. Factors to consider include potential contributions of the proposed work, overall funding strategy, and availability of funding.

The Government reserves the right to:

- Select for negotiation all, some, one, or none of the proposals received in response to this solicitation;
- make awards without discussions with Offerors;
- conduct discussions with Offerors if it is later determined to be necessary;
- segregate portions of the resulting awards into pre-priced options;
- accept proposals in their entirety or to select only portions of proposals for award;
- fund proposals in increments and/or with options for continued work at the end of one or more phases;
- request additional documentation once the award instrument has been determined (e.g., representations and certifications); and
- remove Offerors from award consideration should the parties fail to reach agreement on award terms, including intellectual property rights, conditions and cost/price within a reasonable time, or if the Offeror fails to provide requested additional information in a timely manner.

There is no commitment by the Navy to be responsible for any monies expended by the Offeror before award of a contract/agreement. For awards made as contracts, the socio-economic merits of each proposal will be evaluated based on the commitment to provide meaningful subcontracting opportunities with Historically Black Colleges and Universities, Minority Institutions, Tribal Colleges and Universities, Small Businesses, Small Disadvantaged Businesses, Service Disabled Veteran Owned Small Businesses, HUBZone Small Businesses, Veteran Owned Small Businesses, and Women Owned Small Businesses.

Proposals selected for award may result in a procurement contract or Other Transaction (OT) depending upon the nature of the work proposed and other factors.

Offerors looking for innovative, commercial-like contractual arrangements are encouraged to consider requesting OTs. Please refer to the *Department of Defense Other Transactions Guide*, dated July 2023 to understand the flexibility and options associated with OTs.

In accordance with *10 U.S.C. § 4022(f)*, the Government may award a follow-on production contract or OT subsequent to a prototype OT awarded under this BAA if: (A) competitive procedures were used for the selection of parties for participation in the transaction; and (B) the participants in the transaction successfully completed the prototype project provided for in the transaction.

(In all cases, the Government Contracting Officer shall have sole discretion to select the award instrument type, regardless of instrument type proposed, and to negotiate all instrument terms and conditions with selectees. The Organization will apply publication or other restrictions, as necessary, if it determines that the research resulting from the proposed effort will present a high likelihood of disclosing performance characteristics of military systems or manufacturing technologies that are unique and critical to defense. Any award resulting from such a determination will include a requirement for the Organization's permission before publishing any information or results on the program. For more information on publication restrictions, see the section below on Contracted Fundamental Research.

3.2 Contracted Fundamental Research

It is Department of Defense (DoD) policy that the publication of products of fundamental research remain unrestricted to the maximum extent possible. *National Security Decision Directive (NSDD) 189, National Policy on the Transfer of Scientific, Technical and Engineering Information* defines fundamental research as follows:

‘Fundamental research’ means basic and applied research in science and engineering, the results of which ordinarily are published and shared broadly within the scientific community, as distinguished from proprietary research and from industrial development, design, production, and product utilization, the results of which ordinarily are restricted for proprietary or national security reasons.

With regard to any restrictions on the conduct or outcome of work funded under this BAA, the Organization will follow the guidance on and definition of “contracted fundamental research” as provided in the *Under Secretary of Defense (Acquisition, Technology and Logistics) Memorandum of 24 May 2010*.

As defined therein the definition of “contracted fundamental research,” in a DoD contractual context, includes research performed under grants and contracts that are (a) funded by Research, Development, Test and Evaluation Budget Activity 1 (Basic Research), whether performed by universities or industry or (b) funded by Budget Activity 2 (Applied Research) and performed on campus at a university. The research shall not be considered fundamental in those rare and exceptional circumstances where the applied research effort presents a high likelihood of disclosing performance characteristics of military systems or manufacturing technologies that are unique and critical to defense, and where agreement on restrictions have been recorded in the contract or grant.

Pursuant to DoD policy, research performed under contracts that are a) funded by Budget Activity 2 (Applied Research) and NOT performed on-campus at a university or b) funded by Budget Activity 3 (Advanced Technology Development) does not meet the definition of “contracted fundamental research.” In conformance with the *Under Secretary of Defense for Acquisition, Technology, and Logistics* guidance and *National Security Decision Directive 189*, the Organization will place no restriction on the conduct or reporting of unclassified “contracted fundamental research,” except as otherwise required by statute, regulation, or executive order. For certain research projects, it may be possible that although the research being performed by the prime contractor is restricted research, a subcontractor may be conducting “contracted fundamental research.” In those cases, it is the prime contractor’s responsibility to identify and describe the subcontracted unclassified research in the proposal to include a statement confirming that the work has been scoped, negotiated, and determined to be fundamental research according to the prime contractor and research performer.

Non-fundamental research may require restrictions during the conduct of the research in addition to a DoD pre-publication review of such research results due to subject matter sensitivity. As of the date of publication of this BAA, the Government cannot identify whether the work under this BAA may be considered fundamental research and may award both fundamental and non-fundamental research.

Offerors should indicate in their proposal whether they believe the scope of the research included in their proposal is fundamental or not. While Offerors should clearly explain the intended results of their research, the Government shall have sole discretion to select award instrument type and to negotiate all instrument terms and conditions with selectees. Appropriate clauses will be included in resultant awards for non-fundamental research to prescribe publication requirements and other restrictions, as appropriate.

Relative to contracts (excluding OTs), *FAR Part 35* restricts the use of BAAs, such as this, to the “acquisition of basic and applied research and that portion of advanced technology development not related to the development of a specific system or hardware procurement.” Contracts made under BAAs are for scientific study and experimentation directed towards advancing the state of the art and increasing knowledge or understanding.

3.3 Instrument Type(s)

Awards may take the form of contracts and Other Transaction Agreements (OTA), as appropriate.

The following provides brief descriptions of potential instrument types:

- (a) Procurement Contract: A legal instrument, consistent with *31 U.S.C. 6303* that reflects a relationship between the federal Government and a state government, a local government, or other entity/contractor when the principal purpose of the instrument is to acquire property or services for the direct benefit or use of the federal Government.
- (b) Other Transactions (OTs).
 - i. Research OTs: Assistance Transaction other than a Grant or a Cooperative Agreement (see *32 CFR Part 37*). A legal instrument, consistent with *10 U.S.C. 4021*, for basic, applied, and advanced research projects. To the maximum extent

- practicable, the research contemplated in the instant project does not duplicate research being done under other DoD programs. and the to the maximum extent practicable, the funds from the Government do not exceed the total amount provided by the other parties. This resource-sharing requirement is intended to highlight the dual use focus of this authority and show commitment on the part of the performing team to pursue and/or commercialize the technology in the future. While the default position in the statute is generally a 50-50 resource share, the final amount of the share should be based on full consideration of factors such as the performing partner's resources, prior investment in the technology, commercial versus military relevance, unusual performance risk, and precompetitive nature of the project.
- ii. OT for Prototype/Prototype OTAs: A legal instrument, consistent with *10 U.S.C. 4022*, for prototype projects that are directly relevant to enhancing the mission effectiveness of personnel of the Department of Defense or improving platforms, systems, components, or materials proposed to be acquired or developed by the Department of Defense, or to improvement of platforms, systems, components, or materials in use by the armed forces... The Prototype OT must satisfy at least one of the following conditions:
1. There is at least one NDC or non- profit research institution participating to a significant extent in the prototype project.
 2. All significant participants in the transaction other than the Federal Government are small businesses, including those participating in the Small Business Innovation Research (SBIR) or Small Business Technology Transfer programs, or NDCs. 15 | OUSD (A&S) OT Guide
 3. At least one-third of the total cost of the prototype project is to be paid out of funds provided by parties other than the Federal Government. • The SPE □ for the agency determines in writing that exceptional circumstances justify the use of a transaction that provides for innovative business arrangements or structures that would not be feasible or appropriate under a contract or would provide an opportunity to expand the defense supply base in a manner that would not be practical or feasible under a contract.
- iii. In order to comply with *10 U.S.C. §4022(f)* for follow-on Production OTs,:
1. Award may be made without additional competitive procedures to a participant in the prototype OT if:
 1. Competitive procedures were used for the selection of parties for participation in the prototype OT; and
 2. The participant in the prototype OT successfully completed the prototype project.
 2. If the performer is a consortium, the Department determines that the participants successfully completed an individual prototype or prototype subproject as part of a consortium

Please refer to the *Department of Defense Other Transactions Guide*, dated July 2023.

4 PROPOSAL SUBMISSION

The submission process is two-phased, as described below. No further Request for Information (RFI), solicitation, or other announcement of this opportunity will be made.

All proposal submissions will be protected from unauthorized disclosure in accordance with *FAR Subpart 3.104-4* and *15.207*, applicable law, and DoD/Department of the Navy regulations.

Offerors are expected to appropriately mark each page of their submission that contains proprietary information.

PHASE I – Proposal

Phase I proposals may be submitted at any time up to and including the closing date of the BAA (DD Month 2026). Any Offeror that does not submit a proposal before the specified due date and time is not eligible to participate in Phase II and is not eligible for funding.

Offerors are instructed to not submit general capability statements in response to this BAA.

Proposals shall only be submitted for actual technologies or scientific research within the areas of interest in Section 2.2, Specific Areas of Interest. Offerors are encouraged to submit proposals on topics not specifically mentioned in the BAA; however, the proposed areas must be logically interconnected to existing BAA topics. Each proposal should state that it is intended for submission in response to this BAA and should cite the particular Research Area(s) of Interest in Section 2.1, as well as the Specific Area(s) Of Interest in Section 2.2, that the proposal is specifically addressing. Offerors may provide solutions that are applicable to multiple research topics in a single proposal, as appropriate. Additionally, Offerors may submit more than one (1) proposal abstract on each research topic if a separate solution or approach is being proposed.

Proposal Evaluation/Notification: Government evaluations of the proposals are anticipated to be conducted on a periodic basis; however, any such review does not assure a subsequent award. Any Offeror whose proposal was not identified as being of particular value to the Government is ineligible to submit a full proposal under this BAA.

4.1 Phase I - Proposal Abstract Requirements

(a) Proposal Abstract Format

- Paper Size – 8.5 x 11 inch paper
- Margins – one (1) inch on all four (4) sides
- Spacing – single-spaced
- Font – Times New Roman, 10–12 point
- Page limit – five (5) pages for proposal abstract, exclusive of cover page and Quad Chart. Quad Chart is limited to one (1) page.

Note: Any pages submitted exceeding the page limit shall be disregarded and not evaluated. Additionally, the electronic file name for all documents submitted under this solicitation must not exceed sixty-eight (68) characters in length, including the file name extension.

(b) Proposal Abstract Submission

E-mail submission is required (per the instructions below). The proposal must be Microsoft Word 2016 compatible or in Adobe Portable Document Format (PDF) and attached to the email. There is an email size limit of seven (7) MB.

- E-mail submissions should be sent to the attention of the BAA Contracting Personnel at: robert.a.megill2.civ@us.navy.mil, kyle.j.perry13.civ@us.navy.mil and truman.b.harris3.civ@us.navy.mil. Submissions that contain Controlled Unclassified Information (CUI) are to be encrypted in accordance with DODI 5200.48 and submitted digitally using a DoD SAFE Drop-off. In such case, request a DoD SAFE link via email to any of the persons aforementioned.
- The subject line of the email shall include reference to BAA number N68335-26-R-0458 and list the Research Opportunity Area of Interest by section and subsection, as applicable.
- Do not send ZIP files or password protected files.
- **Note: Proposals submitted to individuals other than the three email addresses above will not be accepted.**

(c) Proposal Abstract Content:

Proposal abstracts shall include the following:

- Cover Page: The cover page shall be labeled “PROPOSAL ABSTRACT” and shall include: the BAA number, organizational name, other team members and type of business for each, Technical Points of Contact (TPOCs) (including telephone number, and email information), Administrative Point of Contact (POC), and one (1) paragraph that summarizes the relationship between the proposal and the BAA.
- Technical Abstract and Approach: This section should include a description of the particular Research Area(s) of Interest in Section 2.1, as well as the Specific Area(s) Of Interest in Section 2.2, to which the Offeror is responding and how it ties to the Offeror’s response, how the fleet will benefit after transition (including commercial applications) due to the project research conducted, the technology challenges that must be overcome, the brief technical approach, a brief description of the facilities involved, a brief resume of the key personnel, the operational payoff using measures of performance, and potential Program Management Activity (PMA) sponsors and/or users.
- Cost and Period of Performance (PoP): Rough Order of Magnitude (ROM) cost estimate (per year) for each concept paper, PoP from start through technology insertion into the fleet, and the anticipated cost sharing agreement, if applicable. If concept proposal may result in a potential cost savings to the government, please include pertinent information about the potential cost savings to include any specifics that may be available. (I.e. technology could be produced at significantly lower cost than current technology, technology could replace multiple existing technologies at a lower cost, technology could reutilize or extend life of existing system...)

- Instrument Type: Specify the award instrument requested (procurement contract, Research OT, Prototype OT, follow-on production OT).
- Provide the anticipated Department of Defense Technology Readiness Level (TRL), defined in Table 1, per fiscal year. Proposal abstracts shall begin at TRL 4, at a minimum.
- Quad Chart: Completed Quad Chart with format in accordance with Table 2 for each concept paper.

The concept abstracts will be evaluated (at a minimum) upon submission with an approximate Government response time of sixty (60) days after submission.

Note: Typically research findings result in the need for additional services/supplies that are not possible to anticipate or project in to the future. Contract modifications may be executed to satisfy these requirements, thereby providing flexibility in technology assessment (with technology transition serving as the ultimate goal). In the event that this is required, it shall be considered to be within the scope of this BAA and the resulting contract, and therefore will have met the requirements of the *FAR/Defense Federal Acquisition Regulation Supplement (DFARS)* and the *Competition in Contracting Act*.

4.2 Phase I – Unique Entity Identifier and System for Award Management (SAM)

Unique Entity Identifier and SAM - All Offerors submitting proposals or applications must:

- be registered in the SAM prior to submission;
- maintain an active SAM registration with current information at all times during which there exists an active Federal award or an application under consideration by any agency; and
- provide the Data Universal Numbering System (DUNS) number in each application or proposal submitted to the agency.

SAM may be accessed at <https://www.sam.gov/>

Effective 27 April 2018, all new entities registering in SAM, as well as existing registrations being updated or renewed, will require the submission of an original, signed notarized letter identifying the authorized Entity Administrator for the entity associated with the DUNS number before the registration will be activated. Please be aware that processing this additional information may take several days and offerors are advised to be proactive in maintaining their SAM registration in an “Active” status as the government cannot award to an entity without an active SAM registration. More information can be found at <https://www.sam.gov/>.

TRL	Definition	Description
4	Component and/or breadboard validation in a laboratory environment.	Basic technological components are integrated to establish that they will work together. This is relatively “low fidelity” compared with the eventual system. Examples include integration of “ad hoc” hardware in the laboratory.
5	Component and/or breadboard validation in a relevant environment.	Fidelity of breadboard technology increases significantly. The basic technological components are integrated with reasonably realistic supporting elements so they can be tested in a simulated environment. Examples include “high-fidelity” laboratory integration of components.
6	System/subsystem model or prototype demonstration in a relevant environment.	Representative model or prototype system, which is well beyond that of TRL5, is tested in a relevant environment. Represents a major step up in a technology’s demonstrated readiness. Examples include testing a prototype in a high-fidelity laboratory environment or in a simulated operational environment.
7	System prototype demonstration in an operational environment.	Prototype near or at a planned operational system. Represents a major step up from TRL 6 by requiring demonstration of an actual system prototype in an operation environment (e.g., in an aircraft, in a vehicle, or in space).
8	Actual system completed and qualified through test and demonstration.	Technology has been proven to work in its final form and under expected conditions. In almost all cases, this TRL represents the end of true system development. Examples include developmental test and evaluation (DT&E) of the system in its intended weapon system to determine if it meets design specifications.
9	Actual system proven through successful mission operations.	Actual application of the technology in its final form and under mission conditions, such as those encountered in operational test and evaluation (OT&E). Examples include using the system under operational mission conditions.

Table 1 – Technology Readiness Levels and Descriptions

Organization / Company	Project Title
<u>Project Goal / Description:</u> In one concise phrase describe the effort	<u>Operational Payoff/Transition Targets:</u> Describe how the system would provide new or enhanced operational capability to the Warfighter. Use measures of effectiveness - % increase or decrease in either a technical parameter and/or an operational parameter. Describe any cost savings. Describe any impacts on quality of service. List potential and/or actual transition sponsors PMAs/PEOs.
Picture that captures essence of the project	<u>Deliverables:</u> What is the final product(s)? Include reports, databases, hardware, software, prototypes, demonstrations, standards, processes, etc.
<u>Technical Objective:</u> In one concise sentence, describe the technical objective of the effort.	<u>Cost and Schedule:</u> Outline major tasks and their duration start and end dates. Provide planned milestone decision points and demos or experiments. Provide funding for each planned year of the program.
<u>Technical Challenges / Risks:</u> Why is this difficult? What challenges must be overcome?	<u>TRL:</u> Provide beginning, current, and projected end state TRL at the completion of the stated effort.
<u>Technical Approach:</u> Specifically, how will the problem be approached. Describe major tasks to be performed.	<u>Contact Info:</u> Phone and Email

4.3 Table 2 - Quad Chart Format Phase II – Full Technical/Cost Proposal (**BY INVITATION ONLY**)

4.3.1 General Information

ONLY OFFERORS WITH A *PHASE I – PROPOSAL* ABSTRACT CONSIDERED CAPABLE OF MEETING EXISTING OR FUTURE PROGRAM REQUIREMENTS AND HAVE A HIGH PROBABILITY OF BEING FUNDED WILL BE ASKED TO SUBMIT *PHASE II – FULL TECHNICAL/COST PROPOSAL*. A REQUEST FOR SUBMISSION OF A FULL PROPOSAL DOES NOT GUARANTEE AWARD SELECTION. PROPOSAL ABSTRACTS CONSIDERED CAPABLE WITHOUT A HIGH PROBABILITY OF FUNDING WILL NOT BE ASKED TO SUBMIT A PHASE II HOWEVER WILL BE ARCHIVED FOR POTENTIAL FUTURE CONSIDERATION IF FUNDING PROBABILITY WERE TO CHANGE.

See the following Appendices for Phase II submission instructions:

Appendix 1 Requirements/Proposal Instructions Applicable to Contracts

Appendix 2 Requirements/Proposal Instructions Applicable to Other Transaction Agreements

5 EVALUATION CRITERIA

The Government will evaluate proposals responsive to any or all areas of interest discussed herein. Proposals **will not be** evaluated against each other since each proposal represents a unique technology with no common work statement. Determination of total value of the concepts will have the following evaluation criteria:

5.1 Primary Evaluation Criteria

- (a) The primary evaluation criteria, which are of equal importance, are: Scientific and technical merits of the proposed research to include, (1) the degree to which proposed research and development objectives support the targeted technical topic and (2) validity of the technical basis for the approach offered; and
- (b) Potential contributions to DoD, Navy, NAVAIR, NAWCAD WOLF ASI Division to include (1) relevance to the stated technology areas of interest; (2) anticipated operational military (or commercial, if applicable) utility; (3) ability of proposed system/study to be rapidly ready for field-testing; (4) suitability for inclusion in a warfighting experiment (results of a simulation/study may be suitable for inclusion, but a contractor proposing paper vice hardware, needs to specifically address this evaluation factor); (5) projected affordability of transitioning the technology to the fleet or a commercial activity (for any developed hardware); (6) logistics and fleet supportability of proposed solution; and (7) data rights.

5.2 Additional Evaluation Criteria

Other evaluation criteria, of lesser importance than 5.1 (a) and (b), but equal to each other, are:

- (a) the Offeror's capabilities, related experience, past performance on similar efforts, research personnel, facilities, techniques, or a unique combination of these that are integral factors for achieving the proposal objectives; and
- (b) the realism and reasonableness of cost, including proposed cost sharing (if any).

6 FEDERAL AWARDING AGENCY CONTACTS

Robert Megill, e-mail: robert.a.megill2.civ@us.navy.mil, Kyle Perry, email kyle.j.perry13.civ@us.navy.mil and Truman Harris, e-mail: truman.b.harris3.civ@us.navy.mil.

7 APPENDICES

Appendix 1 Requirements/Proposal Instructions Applicable to Contracts

Appendix 2 Requirements/Proposal Instructions Applicable to Other Transaction Agreements

APPENDIX 1 – Requirements/Proposal Instructions Applicable to Contracts

A. Application and Submission Information.

- Content and Form of Application Submission
- Full Proposals
- Instructions for Contracts

Content and Form Application:

Applicants must submit a full proposal in accordance with the instructions provided below and contained within a formal Request for Proposal (RFP). Files must be in Adobe Portable Document Format (PDF), Microsoft Word 2016 compatible and Microsoft Excel 2016 compatible. Do not password protect documents.

Offerors are responsible for clearly identifying proprietary information. Submissions containing proprietary information must have the cover page and each page containing such information clearly marked.

Full Proposal Format

- Paper Size – 8.5 x 11 inch paper
- Margins – one (1) inch on all four (4) sides
- Spacing – single-spaced
- Font – Times New Roman, 12 point
- Technical Proposal Page limit – twenty-five (25) pages, exclusive of cover page. There are no page limitations for the Cost Proposal or the remaining submission requirements.

Note: Any pages submitted exceeding the page limit shall be disregarded and not evaluated. Additionally, the electronic file name for all documents submitted under this solicitation must not exceed sixty-eight (68) characters in length, including the file name extension.

The following documents, with attachments, comprise a complete proposal package as described below:

- **Cover Page:** The cover page must include the following:
 - (a) BAA Number: N68335-26-R-0458;
 - (b) Title of Proposal;
 - (c) Identity of prime applicant and a complete list of subcontractors, if applicable;
 - (d) Type of organization selected from the following categories: Large Business, Small Disadvantaged Business, Other Small Business, Historically Black Colleges and Universities, Minority Institutions, Other Educational, or Non-Profit;

- (e) Technical Points of Contact (TPOCs) (name, address, telephone number, fax number, email address);
- (f) Administrative/business contact (name, address, telephone number, fax number, email address);
- (g) Total amount of the proposed effort;
- (h) Place(s) and period of performance (identify both the base period and any options, if included);
- (i) Award instrument requested;
- (j) Proposal validity period (minimum one hundred and twenty (120) days);
- (k) Data Universal Numbering System (DUNS) number;
- (l) Taxpayer identification number;
- (m) Commercial and Government Entity (CAGE) code.

Note: In all cases, the Government Contracting Officer has sole discretion to select award instrument type, regardless of instrument type proposed, and to negotiate all instrument terms and conditions with selectees.

- **Table of Contents:** A listing of the sections within the proposal to include corresponding page numbers.
- **Proposal Adequacy Checklist in accordance with *DFARS 252.215-7009***

If contained within the RFP, the Offeror shall complete the proposal adequacy checklist contained in *DFARS 252.215-7009* providing the location of requested information or an explanation as to why the requested information is not provided. In preparation of the checklist, Offerors may elect to have their prospective subcontractors use the same or similar checklist as appropriate.

- **Executive Summary:** Provide a synopsis of the proposed project including answers to the following questions:
 - What are proposed efforts attempting to accomplish?
 - How are efforts accomplished today and what are the limitations?
 - Who or what will be affected and what will be the impact if efforts are successful?
 - How much will it cost and how long will it take?
 - What are the teaming/subcontracting relationships, if applicable? What unique skills and knowledge does each team member have? What role will each team member perform?

The executive summary should include a description of the key technical challenges, a concise review of the technologies proposed to overcome these challenges and achieve the project's goal, and a clear statement of the novelty and uniqueness of the proposed work.

- **Technical Proposal:** The technical proposal must describe the research in sections as described below:
 - (a) **Technical Concept and Approach:** Describe the basic scientific or technical concepts that will be investigated, giving the complete research plan. Describe what is innovative about the proposed approach. Provide the proposed approach compared to alternate approaches other researchers in this field have taken. Given successful completion, describe the results, new knowledge, or insights.
 - (b) **Future Naval Relevance:** A description of potential naval relevance and contributions of the effort to the agency's specific mission.
 - (c) **Project Schedule and Milestones:** A summary of the schedule of events and milestones to include major tasks and their duration start and end dates. Include any planned decision points and demonstrations or experiments.
 - (d) **Provide a detailed roadmap of the Technology Readiness Level (TRL) progression to include beginning, current, and final TRLs in accordance with the Department of Defense (DoD) description in Table 1 (located in *Section 4, page 13*), as applicable. Also describe how the TRL self-assessment is validated through quantifiable measures.**
 - (e) **Stand-alone non-proprietary Statement of Work (SOW):** The SOW must clearly define the technical tasks/subtasks to be performed, their durations, and interdependencies. For each task/subtask, provide:
 - A detailed description of the approach to be taken to accomplish each defined task/subtask
 - Identification of the primary organization responsible for task execution (prime contractor, subcontractor(s), consultant(s)), by name
 - Measurable milestones (e.g., a deliverable, demonstration, or other event/activity that marks task completion)
 - A definition of all deliverables (reporting, data, reports, software, etc.) to be provided to the Government in support of the proposed research tasks/subtasks
 - Clearly identify any tasks/subtasks (to be performed by either a prime or subcontractor) that will be accomplished on-campus at a university, if applicable
 - Any optional tasking shall be separately identifiable within the document

Note: It is recommended that the SOW be developed so that each phase of the program is separately defined. The SOW shall be submitted in Microsoft Word format.

- (f) **Staffing and Key Personnel Qualifications:** A detailed description of the proposed staffing by labor category. Include a discussion of the qualifications of all key personnel. Include resumes or curricula vitae for any key personnel and consultants.
- (g) **Facilities, Equipment, and Government Furnished Information/Equipment/Material (GFI/E/M):** Describe facilities available for performing the proposed research and any additional facilities or equipment the organization proposes to acquire at its own expense. Indicate Government-owned facilities or equipment already possessed that will be used. Justify the need for each equipment item. (Additional facilities and equipment will not be

provided unless the research cannot be completed by any other practical means). Also provide a list of any GFI/E/M that would be required, if applicable.

- (h) Security: If it is determined that access to classified information will be required during the performance of an award, Offerors shall provide evidence (e.g., a written certification) of their current facility clearance and also indicate the current security clearance level and status (e.g., final, interim, pending) for all personnel who could potentially access classified information.
- **Cost Proposal:** A separate Adobe PDF document, in addition to a fully-disclosed, unburdened cost proposal with working formulas in Microsoft Excel, should be included in the proposal that provides appropriate justification and/or supporting documentation for each element of cost proposed. The electronic submission of the Excel spreadsheet should be in a “useable condition” to aid the Government with its evaluation. The term “useable condition” indicates that the spreadsheet should visibly include and separately-identify within each appropriate cell any and all inputs, formulas, calculations, etc. The Offeror should not provide “value only spreadsheets” similar to a hard copy.

Cost proposals shall be submitted in accordance with the requirements detailed in the formal RFP provided by NAWCAD Lakehurst (LKE).

- **Representations and Certifications:**

- (a) Prospective awardees must be registered in the SAM database prior to award and must complete electronic annual representations and certifications consistent with guidance at *FAR 4.1102* and *4.1201*. The representations can be found at <https://www.sam.gov/>. Supplementary representations and certifications that must be included in the proposal submission are as follows (Clauses subject to change based on Revolutionary FAR Overhaul):

Provision Number	Title
<i>FAR 52.204-24</i>	<i>Representation Regarding Certain Telecommunications and Video Surveillance Services or Equipment</i>
<i>FAR 52.209-7</i>	<i>Information Regarding Responsibility Matters</i>
<i>DFARS 252.203-7005</i>	<i>Representation Relating to Compensation of Former DoD Officials</i>
<i>DFARS 252.204-7007 Alt A</i>	<i>Annual Representations and Certifications</i>
<i>DFARS 252.225-7003</i>	<i>Report of Intended Performance Outside the United States and Canada – Submission with Offer (applicable for proposals over \$13.5M)</i>
<i>DFARS 252.227-7017</i>	<i>Identification and Assertion of Use, Release, or Disclosure Restrictions</i>

(b) Additional Guidance Regarding Data Rights/Intellectual Property Assertions

- Noncommercial Items (Technical Data and Computer Software): Offerors requesting a procurement contract must list all noncommercial technical data and computer software planned to be generated, developed, and/or delivered for which the

Government will acquire less than unlimited rights and shall also assert specific restrictions on those deliverables. In the event an Offeror does not submit the list, the Government will assume that it has unlimited rights to all noncommercial technical data and computer software generated, developed, and/or delivered, unless it is substantiated that the development of the noncommercial technical data and computer software occurred with mixed funding. If mixed funding is anticipated in the development of noncommercial technical data and computer software generated, developed, and/or delivered, Offerors should identify the data and software in question as subject to Government Purpose Rights (GPR). In accordance with *DFARS 252.227-7013, Rights in Technical Data – Noncommercial Items* and *DFARS 252.227-7014, Rights in Noncommercial Computer Software and Noncommercial Computer Software Documentation*, the Government will automatically assume that any such GPR restriction is limited to a period of five (5) years, at which time the Government will acquire unlimited rights unless the parties agree otherwise. The Government may use the list during the evaluation process to evaluate the impact of any identified restrictions and may request additional information from the Offeror, as necessary, to evaluate the Offeror's assertions. Failure to provide full information may result in a determination that the proposal is not compliant with the solicitation.

- ii. Commercial Items (Technical Data and Computer Software): Offerors requesting a procurement contract must list all commercial technical data and commercial computer software that may be included in deliverables contemplated under the research project and assert any applicable restrictions on the Government's use of such commercial technical data and/or computer software. In the event an Offeror does not submit the list, the Government will assume there are no restrictions on the Government's use of such commercial items. The Government may use the list during the evaluation process to evaluate the impact of any identified restrictions and may request additional information from the Offeror to evaluate the Offeror's assertions. Failure to provide full information may result in a determination that the proposal is not compliant with the solicitation.
- iii. For all technical data or computer software that will be furnished to the Government with other than unlimited rights, the Offeror shall provide a list describing all proprietary claims to results, prototypes, deliverables or systems supporting and/or necessary for the use of the research, results, prototypes, and/or deliverables. Documentation must be provided that proves ownership or possession of appropriate licensing rights to all patented inventions (or inventions for which a patent application has been filed) to be used for the proposed project. Offerors shall use the format specified in *DFARS 252.227-7017*.

- **Additional Submission Requirements** *(not subject to proposal page limit)*

- (a) Use of Arms, Ammunition and Explosives

- i. Safety

The Offeror is required to be in compliance with DoD manual *4145.26-M, DoD Contractor's Safety Manual for Ammunition and Explosives* if ammunitions and/or explosives (A&E) are to be utilized under the proposed research effort. (See *DFARS*

223.370-5 and *DFARS* 252.223-7002) If A&E are to be utilized under the proposed research effort the Government requires a pre-award safety survey in accordance with *DFARS Procedures, Guidance, and Information (PGI)* 223.370-4(C)(iv) entitled “Preaward Survey.”

If the Offeror proposes that the Government provide Government-furnished A&E containing any nitrocellulose-based propellants and/or nitrate ester-based materials (such as nitroglycerin) or other similar A&E with a tendency to become chemically unstable over time, Navy Marine Corps Acquisition Regulation Supplement (*NMCARS*) 5252.223-9000 will also apply to a resulting contract award. (See *NMCARS* 5223.370-5).

ii. Security

If arms, ammunition, or explosives (AA&E) are to be utilized under the proposed research effort, the Government requires a preaward security survey (See *DoD manual* 5100.76-M, dated April 17, 2012, *Physical Security of Sensitive Conventional Arms, Ammunition and Explosives, Enclosure 2, paragraph 2.a*).

If AA&E are to be utilized under the proposed research effort, the Government may require the contractor to have perimeter fencing around the place of performance in accordance with *DoD 5100.76-M dated April 17, 2012, Enclosure 5, paragraph 2.a*.

If AA&E are to be utilized under the proposed research effort, the Offeror is required to provide a written copy of the Offeror’s AA&E accountability procedures in accordance with *DoD 5100.76-M*. If the Offeror is required to provide written AA&E accountability procedures, the Offeror should provide the respective procedures with proposal submission. See *DoD 5100.76-M dated April 17, 2012, Enclosure 9, paragraph 9*.

(b) Conflicts of Interest

i. Disclosure.

An Offeror shall state in the proposal whether it is aware of any information bearing on the existence of any actual or potential organizational conflict of interest (OCI) as defined in *FAR 2.101* and as further discussed in *FAR Subpart 9.5* as to itself and any proposed subcontractors, partners, consultants, or other affiliates. Offerors and any proposed subcontractors, partners, consultants, or other affiliates performing Systems Engineering and Technical Assistance (SETA) or Advisory and Assistance Services (A&AS) for the organization are considered to have an OCI that may not be susceptible to mitigation.

The nondisclosure or misrepresentation of an interest creating an OCI may result in the disqualification of an Offeror for award, or if such nondisclosure or misrepresentation is discovered after award the Government may terminate the contract for default, may recommend that the contractor be disqualified from subsequent related contracts, or may subject the contractor to such other remedial actions as may be permitted or provided by law (see *18 U.S.C. § 1001* and *31 U.S.C.*

§ 3802(a) (2)). Therefore, Offerors should interpret the requirements of this section broadly.

An Offeror that does not provide support services to the Organization or concludes no actual or potential OCI exists shall include the following statement in its proposal:

“I [NAME] as an authorized negotiator on behalf of [NAME OF OFFEROR] certify that **NO** actual or potential organizational conflict of interest (OCI) exists under [BAA NUMBER]. I understand that the failure to disclose the existence of an actual or potential OCI shall result in the proposer not being considered for award.”

An Offeror who does provide support services to the organization or is aware circumstances exist that may result in the appearance that it may have an unfair competitive advantage shall submit the following with its proposal:

- (1) The name of the entity the Offeror, its subcontractors, partners, consultants or affiliates.
- (2) The number of the contract, subcontract, or agreement that creates the actual or potential OCI. If the NAWCAD Procurement Group did not award the contract or agreement, provide a copy of the document. If NAWCAD Procurement Group awarded the contract, provide the name of the technical point of contact.
- (3) A description of the actual or potential OCI. The statement must describe, in a concise manner, all relevant facts concerning any past, present, or currently planned interest (financial, contractual, organizational, or otherwise) relating to the work to be performed hereunder and bearing on whether the Offeror has a possible organizational conflict of interest with respect to (1) impartial, technically sound, and unbiased assessments, recommendations, or evaluations, or (2) being given an unfair competitive advantage. If relevant, Offerors shall address the personal conflicts of their employees.
- (4) A Mitigation Plan. Offerors should refer to *FAR Subpart 9.5* for policies and procedures for avoiding, neutralizing, or mitigating organizational conflicts of interest.
- (5) A concluding statement as follows:

“I [NAME] as an authorized negotiator on behalf of [NAME OF OFFEROR] certify that I have, to the best of my knowledge and belief, disclosed all actual or potential organizational conflicts of interest (OCI) under [BAA NUMBER]. I understand that the failure to disclose the existence of an actual or potential OCI shall result in the Offeror not being considered for award.”

ii. OCI Mitigation Plan Contents.

At a minimum, a Mitigation Plan shall:

- (1) Provide organizational charts showing the Offeror’s (and, as appropriate, those of its subcontractors, partners, consultants, and affiliates) structure as it relates to performance under the contract awarded under this BAA and all contracts and

agreements relevant to the OCI. Ensure that those elements that create the actual or apparent OCI are highlighted.

- (2) Demonstrate how the elements that create the actual or apparent OCI will be isolated from the resources that will perform work under the contract awarded under this BAA.
- (3) Provide information showing whether the organizational elements that will perform work under the contract awarded under this BAA will be geographically or physically separated from the elements that create the actual or apparent OCI.
- (4) For each contract or agreement relevant to the OCI, describe the process for reassigning personnel, including those belonging to subcontractors, partners, consultants, and affiliates, from one organization to another. Include restrictions that apply.
- (5) For each contract or agreement relevant to the OCI, describe the controls, (including nondisclosure agreements) that are exercised over the future employment of departing employees as it relates to the OCI.
- (6) For each contract or agreement relevant to the OCI, describe any OCI training the employees are offered or required to attend, along with the timing (before or after starting work on a Government contract), frequency, length, and content of such training.
- (7) Provide evidence of facts and circumstances that the Offeror asserts, mitigates, or address the concerns related to the actual or potential OCI.

iii. Review.

The Contracting Officer will review an Offeror's certifications, statements, and OCI Mitigation Plan (if applicable) and may require additional relevant information from an Offeror. All such information, and any other relevant information, will be used by the Contracting Officer to determine whether an award to the Offeror may create an OCI. If found to exist, the Government may: (1) impose appropriate conditions that avoid such conflict, (2) disqualify the Offeror, (3) determine that it is otherwise in the best interest of the Government to award a contract to the Offeror and include appropriate conditions mitigating such conflict in the award, or (4) seek a waiver. If the Contracting Officer determines that an actual or significant potential conflict of interest exists that cannot reasonably be avoided, neutralized, or mitigated, the Offeror will be ineligible for award. If accepted, the Mitigation Plan shall become part of the contract. Note that the Government will only evaluate OCI mitigation plans for proposals that are determined selectable based on the BAA evaluation criteria and funding availability. An Offeror who has refused to disclose the information or make the certification required by this BAA concerning an actual or potential OCI shall be disqualified from consideration for award.

(c) Small Business Participation Statement

If subcontracting opportunities exist, all prime Offerors shall submit a Small Business Participation Statement (regardless of size) in accordance with *DFARS 215.304* when receiving a contract for more than the simplified acquisition threshold (SAT). All Offerors shall provide a statement of the extent of the Offeror's commitment in providing meaningful subcontracting opportunities for small businesses and other concerns subject

to socioeconomic considerations through its awards and must agree that Small Business, Veteran Owned Small Business, Service-Disabled Veteran-Owned Small Business, HUBZone Small Business, Small Disadvantaged Business, and Women Owned Small Business concerns will have the maximum practicable opportunity to participate in contract performance consistent with efficient performance.

This assertion will be reviewed to ensure that it supports this policy by providing meaningful subcontracting opportunities.

(d) Small Business Subcontracting Plan

Large businesses and non-profits (including educational institutions) shall provide a Subcontracting Plan (hereafter known as ‘the Plan’) that contains all elements required by *FAR 19.704*, *FAR 52.219-9 (DEVIATION 2018-O0013)* and as supplemented by *DFARS 252.219-7003*. If a company has a Master Subcontracting Plan, as described in *FAR 19.701* or a Comprehensive Subcontracting Plan, as described in *DFARS 219.702-70*, a copy of the Plan shall also be submitted with the proposal.

The Plan will be reviewed and approved by the Procuring Contracting Officer (PCO) prior to contract award. See *FAR 19.702, Statutory Requirements*, regarding failure of an Offeror to negotiate and submit a Subcontracting Plan acceptable to the Contracting Officer. The successful Offeror’s Subcontracting Plan will be incorporated into the resultant contract. The Offeror shall propose a minimum of the subcontracting goals identified in the table below.

Small Business Area	Goal %
Small Business (SB) (Total)	30.00%
Small Disadvantaged Business (SDB)	5.00%
Women-Owned SB (WOSB)	5.00%
HUBZone SB (HUBZone)	3.00%
Service-Disabled VOSB (SDVOSB)	3.00%

If proposed goals are below the minimum, the Offeror shall include in the Plan a viable written explanation as to why small businesses are unable to be utilized and what attempts were taken to ensure that small business were given the opportunity to participate in the effort to the maximum extent practicable.

(e) Evidence of approved management/cost systems (as applicable)

- i. Property Management System: If Government Furnished Property/Government Furnished Equipment is anticipated, the Offeror shall provide evidence of an approved property management system, pursuant to *FAR 45.105*.
- ii. Cost Accounting Standards: Any Offeror submitting a proposal that, if accepted, will result in a Cost Accounting System (CAS)-compliant contract, shall include a

Disclosure Statement as required by 48 *CFR* 9903.202. Further information regarding CAS certification can be found in *FAR* 52.230-1.

- iii. Adequate CAS: If requesting a cost-type contract, the Offeror must provide evidence of an approved accounting system, per *FAR* 16.103-3(a)(3). If the Offeror is requesting a cost-type contract but does not yet have an approved accounting system, the Offeror shall provide the DCAA Pre-award Accounting System Adequacy Checklist to facilitate DCAA's completion of an SF1408. This form is available at: <https://www.dcaa.mil/Checklists-Tools/Pre-award-Accounting-System-Adequacy-Checklist/>

B. Application Review Information.

Recipient Qualifications & Eligibility.

(a) Responsibility Determination:

- i. Contracts shall be awarded to responsible prospective contractors only. See *FAR* 9.104-1 for a listing of the general standards against which an applicant will be assessed to determine responsibility.
- ii. Per 13 *CFR* §125.6(e)(2), compliance with the limitation on subcontracting shall be an element of responsibility. If the Offeror is a small business it shall provide a breakout to demonstrate how the prime contractor will satisfy the limitation on subcontracting for each period of performance. The contractor's compliance with *FAR* Clauses 52.219-14 Limitation on Subcontracting, 52.219-27 Notice of Total Service-Disabled Veteran-Owned Business Set Aside, 52.219-29 Notice of Set-Aside for, or Sole Source Award to, Economically Disadvantaged Women-Owned Small Business Concerns, 52.219-30 Notice of Set-Aside for, or Sole Source Award to, Women-Owned Small Business Concerns, or 52.219-3 Notice of Total HUBZone Set Aside or Sole Source Award, as applicable, will be assessed as an element of responsibility. Cost of contract incurred for personnel includes direct labor cost, overhead that has only direct labor as its base, and the small business's General and Administrative (G&A) rate multiplied by the labor cost. A proposal that fails to meet the limitation on subcontracting during each period of performance shall not be considered for award.
- iii. Per *FAR* 9.106-1(a), a preaward survey may be required if the Contracting Officer determines that the information on hand or readily available, including information from commercial sources, is not sufficient to make a determination regarding responsibility. Offerors are expected to cooperate in the conduct of a preaward survey if such survey is deemed necessary.
- iv. Applicants may be requested to provide information subsequent to proposal submission in order to assist the Contracting Officer in making a determination of responsibility.

- (b) System for Award Management (SAM): All Offerors must be registered in SAM unless exempt per *FAR* 4.1102. *FAR* 52.204-7 System for Award Management and *FAR* 52.204-13

System for Award Management Maintenance are incorporated into this BAA, and *FAR 52.204-13* will be incorporated in all awards.

Note that new registrations can take an average of seven (7) to ten (10) business days to process.

- (c) Employment Eligibility Verification (E-verify): As per *FAR 22.1802*, recipients of FAR-based procurement contracts must enroll as Federal Contractors in E-verify and use E-verify to verify employment eligibility of all employees assigned to the award. All resultant contracts from this solicitation will include *FAR 52.222-54, Employment Eligibility Verification*.
- (d) Federal Awardee Performance and Integrity Information System (FAPIS) will be checked prior to making an award. The web address is:
<https://www.fapiis.gov/fapiis/index.action>
The applicant representing the entity may comment in this system on any information about the entity entered by a federal Government official. The information in FAPIS will be used in making a judgment about the entity's integrity, business ethics, and record of performance under federal awards that may affect the Government's determination that the applicant is qualified to receive an award.
- (e) Wide Area Work Flow (WAWF): Unless using another means of invoicing, performers will be required to submit invoices for payment directly at <https://wawf.eb.mil>. If applicable, WAWF registration is required prior to any award under this solicitation.

C. FAR/DFARS/NMCARS Provisions/Clauses:

1. Anticipated Terms and Conditions.

For purposes of illustration and not of limitation, the following provisions and clauses may be applicable to NAWCAD LKE contracts:

Number	Provision/Clause
52.202-1	<i>Definitions</i>
52.203-3	<i>Gratuities</i>
52.203-6	<i>Restrictions On Subcontractor Sales To The Government</i>
52.203-7	<i>Anti-Kickback Procedures</i>
52.203-8	<i>Cancellation, Rescission, and Recovery of Funds for Illegal or Improper Activity</i>
52.203-10	<i>Price Or Fee Adjustment For Illegal Or Improper Activity</i>
52.203-12	<i>Limitation On Payments To Influence Certain Federal Transactions</i>
52.203-16	<i>Preventing Personal Conflicts of Interest</i>
52.203-17	<i>Contractor Employee Whistleblower Rights and Requirement To Inform Employees of Whistleblower Rights</i>
52.203-19	<i>Prohibition on Requiring Certain Internal Confidentiality Agreements or Statements</i>

52.204-2	<i>Security Requirements</i>
52.204-4	<i>Printed or Copied Double-Sided on Postconsumer Fiber Content Paper</i>
52.204-7	<i>System for Award Management</i>
52.204-9	<i>Personal Identity Verification of Contractor Personnel</i>
52.204-10	<i>Reporting Executive Compensation and First-Tier Subcontract Awards</i>
52.204-13	<i>System for Award Management Maintenance</i>
52.204-18	<i>Commercial and Government Entity Code Maintenance</i>
52.204-21	<i>Basic Safeguarding of Covered Contractor Information Systems</i>
52.204-23	<i>Prohibition on Contracting for Hardware, Software, and Services Developed or Provided by Kaspersky Lab and Other Covered Entities</i>
52.204-24	<i>Representation Regarding Certain Telecommunications and Video Surveillance Services or Equipment</i>
52.204-25	<i>Prohibition on Contracting for Certain Telecommunications and Video Surveillance Services or Equipment</i>
52.204-27	<i>Prohibition on a ByteDance Covered Application</i>
52.209-6	<i>Protecting the Government's Interest When Subcontracting With Contractors Debarred, Suspended, or Proposed for Debarment</i>
52.209-9	<i>Updates of Publicly Available Information Regarding Responsibility Matters</i>
52.209-10	<i>Prohibition on Contracting With Inverted Domestic Corporations</i>
52.211-5	<i>Material Requirements</i>
52.215-2	<i>Audit and Records – Negotiation</i>
52.215-10	<i>Price Reduction for Defective Certified Cost or Pricing Data</i>
52.215-11	<i>Price Reduction for Defective Certified Cost or Pricing Data – Modifications</i>
52.215-12 (Dev)	<i>Subcontractor Certified Cost or Pricing Data (Deviation 2018- O0015)</i>
52.215-13 (Dev)	<i>Subcontractor Certified Cost or Pricing Data – Modifications (Deviation 2018-O0015)</i>
52.215-15	<i>Pension Adjustments and Asset Reversions</i>
52.215-16	<i>Facilities Capital Cost of Money</i>
52.215-17	<i>Waiver of Facilities Capital Cost of Money</i>
52.215-18	<i>Reversion or Adjustment of Plans for Postretirement Benefits (PRB) Other than Pensions</i>
52.215-19	<i>Notification of Ownership Changes</i>
52.215-20	<i>Requirements for Certified Cost or Pricing Data or Information Other Than Certified Cost or Pricing Data</i>
52.215-21	<i>Requirements for Certified Cost or Pricing Data and Data Other Than Certified Cost or Pricing Data – Modifications</i>
52.215-23	<i>Limitations on Pass Through Charges</i>

2. Additional Notes Regarding Terms and Conditions:

(a) Electronic and Information Technology

All electronic and information technology acquired through this solicitation must satisfy the accessibility requirements of *Section 508 of the Rehabilitation Act (29 U.S.C 794d)* and *FAR 39.2*. Each project involving the creation or inclusion of electronic and information technology must ensure that: (1) Federal employees with disabilities will have access to and use of information that is comparable to the access and use by Federal employees who are not individuals with disabilities; and (2) members of the public with disabilities seeking information or services from the Organization will have access to and use of information and data that is comparable to the access and use of information and data by members of the public who are not individuals with disabilities.

(b) Production and Testing of Prototypes

A contract awarded under this solicitation may include a contract line item or contract option for the provision of advanced component development or prototype of technology developed under a contract for new technology for the delivery of initial or additional prototype units pursuant to *DFARS 234.005-1*.

APPENDIX 2 – Requirements/Proposal Instructions Applicable to Other Transaction Agreements (OTAs)

A. Application and Submission Information for Research Other Transactions and Prototype Other Transactions (OTs).

- Content and Form of Application Submission
- Full Proposals
- Instructions for Other Transactions

Content and Form Application:

Applicants must submit a full proposal in accordance with the instructions provided below and contained within the formal RFP. Files must be in Adobe PDF, Microsoft Word 2010 compatible, and Microsoft Excel 2010 compatible. Do not password protect documents.

Offerors are responsible for clearly identifying proprietary information. Submissions containing proprietary information must have the cover page and each page containing such information clearly marked.

Full Proposal Format

- Paper Size – 8.5 x 11 inch paper
- Margins – one (1) inch on all four (4) sides
- Spacing – single-spaced
- Font – Times New Roman or Calibri, 12 point
- Technical Proposal Page limit – twenty-five (25) pages, exclusive of cover page. There are no page limitations for the Cost Proposal or the remaining submission requirements.

NOTE: Any pages submitted exceeding the page limit shall be disregarded and not evaluated. Additionally, the electronic file name for all documents submitted under this solicitation must not exceed sixty-eight (68) characters in length, including the file name extension.

The following documents, with attachments, comprise a complete proposal package as described below:

- **Cover Page:** This must include the following:
 - (a) BAA Number: N68335-26-R-0458;
 - (b) Title of Proposal;
 - (c) Identity of prime applicant and complete list of subcontractors, if applicable;

- (d) Type of organization, selected from the following categories: Large Business, Small Disadvantaged Business, Other Small Business, HBCU, MI, Other Educational, or Non-Profit;
- (e) Technical contact (name, address, telephone number, fax number, electronic mail address);
- (f) Administrative/business contact (name, address, phone/fax, electronic mail address);
- (g) Total Amount of the proposed effort;
- (h) Place(s) and period of performance (identify both the base period and any options, if included);
- (i) Award instrument requested;
- (j) Proposal validity period (minimum 120 days);
- (k) Data Universal Numbering System (DUNS) number;
- (l) Taxpayer identification number;
- (m) Commercial and Government Entity (CAGE) code.

Note: In all cases, the Government Contracting Officer has sole discretion to select award instrument type, regardless of instrument type proposed, and to negotiate all instrument terms and conditions with selectees.

- **Table of Contents:** A listing of the sections within the proposal, including corresponding page numbers.
- **Executive Summary:** Provide a synopsis of the proposed project, including answers to the following questions:
 - What are proposed efforts attempting to accomplish?
 - How are efforts accomplished today and what are the limitations?
 - Who or what will be affected and what will be the impact if the work is successful?
 - How much will it cost and how long will it take?
 - What are the teaming/subcontracting relationships, if applicable? What unique skills and knowledge does each team member have? What role will each team member perform?
 - For Prototype OTs, Offerors must indicate whether they qualify as a nontraditional defense contractor in accordance with the definition of a nontraditional defense contractor at *10 U.S.C. 2302(9)*, have teamed with a nontraditional Defense contractor, or are providing a one-third cost share for this effort.Offerors must specifically:
 - Identify the nontraditional defense contractor(s);

- Specify why they are considered nontraditional defense contractors; and
- Specify the role of the nontraditional defense contractor(s) and how their role constitutes significant participation in the effort.

- If multi-party relationships are anticipated, provide a description of the legal arrangement anticipated and how this will impact the administration of the resulting OT. Note that the binding document should be in place before negotiations begin with the Government.

The executive summary should include a description of the key technical challenges, a concise review of the technologies proposed to overcome these challenges and achieve the project's goal, and a clear statement of the novelty and uniqueness of the proposed work.

- **Technical Proposal:** The technical proposal must describe the research in sections as described below:
 - (a) **Technical Concept and Approach:** Describe the basic scientific or technical concepts that will be investigated, giving the complete research plan. Describe what is innovative about the proposed approach. Provide the proposed approach compared to alternate approaches other researchers in this field have taken. Given the successful completion, describe the results, new knowledge, or insights.
 - (b) **Future Naval Relevance:** A description of potential naval relevance and contributions of the effort to the agency's specific mission.
 - (c) **Project Schedule and Milestones:** A summary of the schedule of events and milestones to include major tasks and their duration start and end dates. Include any planned decision points and demos or experiments.
 - (d) **Provide a detailed roadmap of the Technology Readiness Level (TRL) progression to include beginning, current, and final TRLs in accordance with the DoD description in Table 1 (located in *Section 4, page 13*). Also describe how the TRL self-assessment is validated through quantifiable measures.**
 - (e) **Stand-alone non-proprietary SOW:** The SOW must clearly define the technical tasks/subtasks to be performed, their durations, and interdependencies. For each task/subtask, provide:
 - A general description of the objective (for each defined task/activity);
 - A detailed description of the approach to be taken to accomplish each defined task/subtask;
 - Identification of the primary organization responsible for task execution (prime contractor, subcontractor(s), consultant(s)), by name;
 - A detailed list of milestones including the description, completion criteria, due date, and payment/funding schedule to include, if cost share is proposed, contractor, and Government share amounts. Milestones must relate directly to accomplishment of technical metrics. While agreement type (fixed price or expenditure based) will be

subject to negotiation, the use of fixed price milestones with a payment/funding schedule is preferred;

- A definition of all deliverables (reporting, data, reports, software, etc.) to be provided to the Government in support of the proposed research tasks/subtasks;
- Clearly identify any tasks/subtasks (to be performed by either a prime or sub) that will be accomplished on-campus at a university, if applicable; and
- Any optional tasking shall be separately identifiable within the document.

Note: It is recommended that the SOW be developed so that each Phase of the program is separately defined. The SOW shall be submitted in Microsoft Word format.

- (f) **Staffing and Key Personnel Qualifications:** A detailed description of the proposed staffing by labor category. Include a discussion of the qualifications of all key personnel. Include resumes or curricula vitae for any key personnel and consultants.
- (g) **Facilities, Equipment, and Government Furnished Information/Equipment/Material (GFI/E/M):** Describe facilities available for performing the proposed research and any additional facilities or equipment the organization proposes to acquire at its own expense. Indicate government-owned facilities or equipment already possessed that will be used. Justify the need for each equipment item. (Additional facilities and equipment will not be provided unless the research cannot be completed by any other practical means). Also provide a list of any GFI/E/M that would be required, if applicable.
- (h) **Resource Sharing (if applicable):** Describe any assets that will be used to contribute (by which team member(s)) to the resource/cost share (e.g., non-cash, in-kind) and provide evidence of its value (e.g., appraisal by a third party, commercial value). Describe the relevancy to and method of use of the asset in the proposed scope of work to be conducted under this OT. Provide documentation to verify that the asset is under the control of the Offeror's program management team. Note that only the time it is used on this project can be claimed. The Government shall not consider the following as contributions: foregone profit or fee, cost of money or profit/fee, and sunk costs or prior research unless a reasonable valuation and relevance to the current program can be established.
- (i) **Security:** If it is determined that access to classified information will be required during the performance of an award, Offerors shall provide evidence (e.g., a written certification) of their current Facility Clearance and also indicate the current security clearance level and status (final, interim, pending) for all personnel proposed who could potentially access classified information.
- **Cost Proposal:** A separate Adobe PDF document, in addition to a fully disclosed, unburdened cost proposal with working formulas in Microsoft Excel, should be included in the proposal that provides appropriate justification and/or supporting documentation for each element of cost proposed. The electronic submission of the Excel spreadsheet should be in a "useable condition" to aid the Government with its evaluation. The term "useable condition" indicates that the spreadsheet should visibly include and separately identify within each

appropriate cell any and all inputs, formulas, calculations, etc. The Offeror should not provide “value only spreadsheets” similar to a hard copy.

Accounting Standards: Offerors shall provide evidence that their accounting system complies with Generally Accepted Accounting Principles (GAAP), if the Offeror does not already have a Government-approved accounting system.

Cost proposals shall be submitted in accordance with the requirements detailed in the formal RFP provided by NAWCAD LKE.

- **Representations and Certifications**

- (a) Prospective awardees must be registered in the System for Award Management (SAM) database prior to award and complete electronic annual representations and certifications. The representations can be found at www.sam.gov.

- (b) Additional Guidance Regarding Data Rights/Intellectual Property Assertions:

- i. Noncommercial Items (Technical Data and Computer Software): Offerors requesting an OT must list all noncommercial technical data and computer software that planned to be generated, developed, and/or delivered for which the Government will acquire less than unlimited rights and shall also assert specific restrictions on those deliverables. In the event an Offeror does not submit the list, the Government will assume that it has unlimited rights to all noncommercial technical data and computer software generated, developed, and/or delivered, unless it is substantiated that the development of the noncommercial technical data and computer software occurred with mixed funding. If mixed funding is anticipated in the development of noncommercial technical data and computer software generated, developed, and/or delivered, Offerors should identify the data and software in question as subject to Government Purpose Rights (GPR). In accordance with *DFARS 252.227-7013, Rights in Technical Data – Noncommercial Items* and *DFARS 252.227-7014, Rights in Noncommercial Computer Software and Noncommercial Computer Software Documentation*, the Government will automatically assume that any such GPR restriction is limited to a period of five (5) years, at which time the Government will acquire unlimited rights unless the parties agree otherwise. The Government may use the list during the evaluation process to evaluate the impact of any identified restrictions and may request additional information from the Offeror, as may be necessary, to evaluate the Offeror’s assertions. Failure to provide full information may result in a determination that the proposal is not compliant with the solicitation.
 - ii. Commercial Items (Technical Data and Computer Software): Offerors requesting an OT must list all commercial technical data and commercial computer software that may be included in any deliverables contemplated under the research project and assert any applicable restrictions on the Government’s use of such commercial technical data and/or computer software. In the event an Offeror does not submit the list, the Government will assume there are no restrictions on the Government’s use of such commercial items. The Government may use the list during the evaluation process to evaluate the impact of any identified restrictions and may request additional information from the Offeror to evaluate the Offeror’s assertions. Failure to

provide full information may result in a determination that the proposal is not compliant with the solicitation.

- iii. For all technical data or computer software that will be furnished to the Government with other than unlimited rights, the Offeror shall provide a list describing all proprietary claims to results, prototypes, deliverables or systems supporting and/or necessary for the use of the research, results, prototypes, and/or deliverables. Provide documentation proving ownership or possession of appropriate licensing rights to all patented inventions (or inventions for which a patent application has been filed) to be used for the proposed project. Offerors shall use the format specified in *DFARS 252.227-7017*.

- **Additional Submission Requirements**

- (a) Use of Arms, Ammunition and Explosives

- i. Safety

The Offeror is required to be in compliance with DoD manual *4145.26-M, DoD Contractor's Safety Manual for Ammunition and Explosives* if ammunitions and/or explosives (A&E) are to be utilized under the proposed research effort. (See *DFARS 223.370-5* and *DFARS 252.223-7002*) If A&E are to be utilized under the proposed research effort, the Government requires a preaward safety survey in accordance with *DFARS PGI 223.370-4(C)(iv)* entitled "Preaward survey."

If the Offeror proposes that the Government provide Government-furnished A&E containing any nitrocellulose-based propellants and/or nitrate ester-based materials (such as nitroglycerin) or other similar A&E with a tendency to become chemically unstable over time, *NMCARS 5252.223-9000* will also apply to a resulting contract award. (See *NMCARS 5223.370-5*).

- ii. Security

If arms, ammunition, or explosives (AA&E) are to be utilized under the proposed research effort, the Government requires a preaward security survey. (See *DoD manual 5100.76-M, dated April 17, 2012, Physical Security of Sensitive Conventional Arms, Ammunition and Explosives, Enclosure 2, paragraph 2.a*).

If AA&E are to be utilized under the proposed research effort, the Government may require the Contractor to have perimeter fencing around the place of performance in accordance with DoD 5100.76-M dated April 17, 2012, Enclosure 5, paragraph 2.a.

If AA&E are to be utilized under the proposed research effort, the Offeror is required to provide a written copy of the Offeror's AA&E accountability procedures in accordance with *DoD 5100.76-M*. If the Offeror is required to provide written AA&E accountability procedures, the Offeror should provide the respective procedures with its proposal submission. See *DoD 5100.76-M dated April 17, 2012, Enclosure 9, paragraph 9*.

- (b) Conflicts of Interest

- i. Disclosure.

An Offeror shall state in its proposal whether it is aware of any information bearing on the existence of any actual or potential organizational conflict of interest (OCI) as defined in *FAR 2.101* and as further discussed in *FAR Subpart 9.5* as to itself and any proposed subcontractors, partners, consultants or other affiliates. Offerors and any proposed subcontractors, partners, consultants, or other affiliates performing systems engineering and technical assistance (SETA) or Advisory and Assistance Services (A&AS) for the Organization are considered to have an OCI that may not be susceptible to mitigation.

The nondisclosure or misrepresentation of an interest creating an OCI may result in the disqualification of an Offeror for award, or if such nondisclosure or misrepresentation is discovered after award, the Government may terminate the contract for default, may recommend that the contractor be disqualified from subsequent related contracts, or may be subject to such other remedial actions as may be permitted or provided by law (see *18 U.S.C. § 1001* and *31 U.S.C. § 3802(a) (2)*). Therefore, Offerors should interpret the requirements of this section broadly.

An Offeror who does not provide support services to the Organization or concludes no actual or potential OCI exists shall include the following statement in its proposal:

“I [NAME] as an authorized negotiator on behalf of [NAME OF OFFEROR] certify that **NO** actual or potential organizational conflict of interest (OCI) exists under [BAA NUMBER]. I understand that the failure to disclose the existence of actual or potential OCI shall result in the Offeror not being considered for award.”

An Offeror who does provide support services to the Organization or is aware circumstances exist that may result in the appearance that it may have an unfair competitive advantage shall submit the following with its proposal:

- (1) The name of the entity the Offeror, its subcontractors, partners, consultants or affiliates.
- (2) The number of the contract, subcontract, or agreement that creates the actual or potential OCI. If NAWCAD Procurement Group did not award the contract or agreement, provide a copy of the document. If NAWCAD Procurement Group awarded the contract, provide the name of the technical point of contact.
- (3) A description of the actual or potential OCI. The statement must describe in a concise manner all relevant facts concerning any past, present or currently planned interest (financial, contractual, organizational, or otherwise) relating to the work to be performed hereunder and bearing on whether the Offeror has a possible organizational conflict of interest with respect to (1) impartial, technically sound, and unbiased assessments, recommendations, or evaluations, or (2) being given an unfair competitive advantage. If relevant, Offerors shall address the personal conflicts of their employees.
- (4) A Mitigation Plan. Offerors should refer to *FAR Subpart 9.5* for policies and procedures for avoiding, neutralizing, or mitigating organizational conflicts of interest.

(5) A concluding statement as follows:

“I [NAME] as an authorized negotiator on behalf of [NAME OF OFFEROR] certify that I have, to the best of my knowledge and belief, disclosed all actual or potential organizational conflicts of interest (OCI) under [BAA NUMBER]. I understand that the failure to disclose the existence of an actual or potential OCI shall result in the Offeror not being considered for award.”

ii. OCI Mitigation Plan Contents.

At a minimum, a Mitigation Plan shall:

- (1) Provide organizational charts showing the Offeror’s (and, as appropriate, those of its subcontractors, partners, consultants, and affiliates) structure as it relates to performance under the contract awarded under this BAA and all contract and agreements relevant to the OCI, highlighting those elements that create the actual or apparent OCI.
- (2) Demonstrate how the elements that create the actual or apparent OCI will be isolated from the resources that will perform work under the contract awarded under this BAA.
- (3) Provide information showing whether the organizational elements that will perform work under the contract awarded under this BAA will be geographically or physically separated from the elements that create the actual or apparent OCI.
- (4) For each contract or agreement relevant to the OCI, describe the process for reassigning personnel, including those belonging to subcontractors, partners, consultants, and affiliates, from one organization to another. Include restrictions that apply.
- (5) For each contract or agreement relevant to the OCI, describe the controls, (including nondisclosure agreements) that are exercised over the future employment of departing employees as it relates to the OCI.
- (6) For each contract or agreement relevant to the OCI, describe any OCI training the employees are offered or required to attend, along with the timing (before or after starting work on a government contract), frequency, length, and content of such training.
- (7) Provide evidence of facts and circumstances that the Offeror asserts mitigate or address the concerns related to the actual or potential OCI.

iii. Review.

The Contracting Officer will review an Offeror’s certifications, statements, and OCI Mitigation Plan (if applicable) submitted and may require additional relevant information from an Offeror. All such information and any other relevant information will be used by the Contracting Officer to determine whether an award to the Offeror may create an OCI. If found to exist, the Government may: (1) impose appropriate conditions which avoid such conflict, (2) disqualify the Offeror, (3) determine that it is otherwise in the best interest of the Government to award a contract to the Offeror and include appropriate conditions mitigating such conflict in the award, or (4) seek a waiver. If the Contracting Officer determines that an actual or significant potential

conflict of interest exists that cannot reasonably be avoided, neutralized or mitigated, the Offeror will be ineligible for award. If accepted, the Mitigation Plan shall become part of the contract. Note that the Government will only evaluate OCI mitigation plans for proposals that are determined selectable based on the BAA evaluation criteria and funding availability. An Offeror who has refused to disclose the information or make the certification required by this BAA concerning an actual or potential OCI shall be disqualified from consideration for award.

B. Application Review Information.

Recipient Qualifications & Eligibility.

- (a) System for Award Management (SAM): All Offerors must be registered in SAM unless exempt per *FAR 4.1102*.

Note that new registrations can take an average of seven (7) to ten (10) business days to process.

- (b) Federal Awardee Performance and Integrity Information System (FAPIIS) will be checked prior to making an award. The web address is:

<https://www.fapiis.gov/fapiis/index.action>

The applicant representing the entity may comment in this system on any information about the entity entered by a federal Government official. The information in FAPIIS will be used in making a judgment about the entity's integrity, business ethics, and record of performance under federal awards that may affect the Government's determination that the applicant is qualified to receive an award.

- (c) Wide Area Work Flow (WAWF): Unless using another means of invoicing, performers will be required to submit invoices for payment directly at <https://wawf.eb.mil>. If applicable, WAWF registration is required prior to any award under this solicitation.

C. Mandatory Terms and Conditions:

Terms and conditions are subject to negotiation. However, the following terms and conditions are non-negotiable and will be in the resulting agreement.

- (a) Electronic and Information Technology

All electronic and information technology acquired through this solicitation must satisfy the accessibility requirements of *Section 508 of the Rehabilitation Act (29 U.S.C 794d)*. Each project involving the creation or inclusion of electronic and information technology must ensure that: (1) Federal employees with disabilities will have access to and use of information that is comparable to the access and use by Federal employees who are not individuals with disabilities; and (2) members of the public with disabilities seeking information or services from the Organization will have access to and use of information and data that is comparable to the access and use of information and data by members of the public who are not individuals with disabilities.

- (b) Comptroller General Access.

In accordance with *10 U.S.C. § 4022(c)*, each agreement that provides for payments in a total amount in excess of \$5,000,000 shall include a clause that provides for the Comptroller General, in the discretion of the Comptroller General, to examine the records of any party to the agreement or any entity that participates in the performance of the agreement.

(c) Follow-On Production Contract

In accordance with *10 U.S.C. § 4022(f)*, the Government may award a follow-on production contract or OT for any Prototype OT awarded under this BAA if: (1) A transaction entered into under this section for a prototype project may provide for the award of a follow-on production contract or transaction to the participants in the transaction. A transaction includes all individual prototype subprojects awarded under the transaction to a consortium of United States industry and academic institutions.

(2) A follow-on production contract or transaction provided for in a transaction under paragraph (1) may be awarded to the participants in the transaction without the use of competitive procedures, notwithstanding the requirements of chapter 221 of this title and even if explicit notification was not listed within the request for proposal for the transaction if—

(A) competitive procedures were used for the selection of parties for participation in the transaction; and

(B) the participants in the transaction successfully completed the prototype project provided for in the transaction.
