

INDUSTRY DAY

Maritime Mining Division (Code E60)

18 FEBRUARY 2026

Distribution Statement A. Approved for public release: distribution is unlimited.

DOMINATE THE LITTORALS

*Delivering relevant solutions in the
littorals from seabed to space:
For Today, Tomorrow, and the Navy after Next*

E60 Maritime Mining

What is Maritime Mining:

Naval Maritime Mining involves the placement of self-contained explosive weapons in water to damage or destroy surface ships or submarines. These devices are designed to be triggered by the approach or contact of a vessel and can be used offensively to hinder enemy shipping or defensively to protect friendly waters.

Therefore, the Mining Division is interested in engineers and technicians with a background and/or experience with maritime and undersea equipment and systems. In addition, some systems require anti-tamper and cyber security features/attributes.

Branches within E60:

- E61: Development of Navy Acquisition Programs
- E62: Support of In-Service/Sustainment of Navy Acquisition Programs
- E63: Development and support of Advanced Mining Capabilities
- E64: Development of Science and Technology (S&T) Mining Efforts

E60 Maritime Mining Division Interests

1. Maritime Mining falls into the Undersea Domain
2. Individuals with Knowledge, Skills, Abilities:
 - Mechanical Engineers, Electrical Engineers, Computer Engineers/Scientist, Cyber Security, Ocean Engineer
 - Undersea Sensing (All Modalities: Acoustics, Pressure, Magnetics, Underwater Electric Potential – UEP, etc.)
 - Signal Processing
 - Data Analytics
 - AI/ML
 - Systems engineering
 - Build / Develop Test plan for programs as they go from prototype/EDM to first article
 - How to build test programs to develop OQE for requirement verification
 - Design for Ocean environment: Corrosion/Fouling, Currents, Hydrodynamics
 - Electrical Design: PCB, Schematic design/development, coding, build-test, power
 - Mechanical design: CAD - Solid Works (Models, Assemblies and Drafting), Finite Element Analysis (FEA) Pressure Vessels Design, Hydrodynamics, Buoyancy Calculations and stability, Heat Transfer, Material and Ordnance handling equipment and
 - Mechanical and Electrical Technicians
3. Facilities / Resources
 - Interested in fabrication capability(ies)
 - Interested in Space for Fabrication and assembly
 - Interested in Open Secret Fabrication and Assembly space (3000-5000 square feet)
