

Single Source Justification (Simplified Acquisition)

Section A: General Contract Information

Is this a Bridge Action as defined in the [AF Bridge Action Reduction Plan](#)? ☐ Yes ☒ No

Contracting Activity: ACC-PKJ, AMIC

Project/Program Name: CAMEO FY26 Training

Purchase Request / Local ID Number:

Estimated Contract Cost (including Options): [REDACTED]

Section B: Description of the Supplies/Services Required

(U) The action being processed is the award of a sole-source contract to PivotPoint, for providing official training services related to Cameo Systems Modeler. This training is critical to support the Government's Model-Based Systems Engineering (MBSE) efforts, particularly in the areas of system modeling, traceability, requirements management, and simulation. The training is specifically designed to ensure that new team members are proficient in the use of Cameo Systems Modeler, which is the tool mandated for complex systems engineering and modeling.

(U) The service required is specialized training for the Cameo Systems Modeler tool, which is used in MBSE for system design, analysis, and simulation. The training will cover advanced features of the tool, including traceability, system validation, requirements management, and integration with other systems engineering tools. The training will be tailored to meet the specific needs of the Government, particularly for sectors like aerospace, defense, and engineering, ensuring that personnel are equipped with the necessary skills to operate Cameo Systems Modeler effectively.

(U) There is the potential that multiple years of this training will be needed to meet long term Government needs related to Cameo.

Section C: Justification for Soliciting from a Single Source or Brand Name

(U) The unique qualifications of PivotPoint make them the only responsible source capable of providing certified, specialized training. Other training providers may offer general MBSE or SysML training, but none are authorized by No Magic, Inc. to provide the proprietary, tool-specific training required for Cameo Systems Modeler. The training includes specialized topics such as system validation, traceability, and advanced simulation features that are unique to Cameo and require the tool developer's in-depth knowledge and certification. No other vendor possesses the required proprietary expertise, customization, or access to the necessary content for official training.

(U) Market research was conducted by evaluating various training vendors for Cameo Systems Modeler, including Atego, Sparx Systems, and Dassault Systèmes. These vendors were found to provide MBSE or SysML training but lacked the tailorable specialized training for Cameo Systems Modeler. The research confirmed that PivotPoint is the only vendor authorized and capable of delivering tailored training that addresses the specific, proprietary features of Cameo Systems Modeler. This makes them the sole-source provider for this training.

(U) This acquisition is being processed under FAR 8.405-6(a)(1)(i), which allows for a sole-source award when only one responsible source can provide the required supplies or services due to the unique nature of the acquisition. In this case, PivotPoint, as a certified provider by No Magic, Inc., is the only authorized vendor capable of providing certified training for Cameo Systems Modeler, the proprietary tool for which No Magic, Inc. is the exclusive developer, offering tailored Government specific mission focus.

Section D: Efforts to Obtain Competition

(U) Market research was conducted to evaluate potential vendors for Cameo Systems Modeler training. This research

Single Source Justification (Simplified Acquisition)

included reviewing training offerings from other MBSE and SysML training providers, such as Atego, Sparx Systems, and Dassault Systèmes. However, it was determined that these vendors do not offer training specific to Cameo Systems Modeler. PivotPoint is the only provider certified by No Magic, Inc., the developer of Cameo Systems Modeler, to deliver the tailored tool-specific training required. As such, despite efforts to solicit from other vendors, PivotPoint remains the only responsible source for this specialized training.

Section E: Steps to Preclude Future Single Source or Brand Name Awards

(U) The Government will continue to monitor the training landscape for Cameo Systems Modeler and explore the possibility of expanding the pool of qualified providers. However, given that No Magic, Inc. remains the sole certifying entity for the tool, it is unlikely that other vendors will gain the necessary certification to provide official Cameo Systems Modeler training in the foreseeable future. The agency will consider this market condition in any future acquisitions and may pursue other avenues, such as expanding vendor partnerships or exploring updates to training certification requirements, if feasible.

Section F: Contracting Officer's Determination

I have determined, in accordance with [FAR 13.106-1\(b\)\(1\)](#), that the circumstances of this contract action deem only a single source is reasonably available.
