☒ Description of the item(s) or service(s) required and the estimated cost(s):

☒ Specific characteristics of the material or service that limit the availability to a sole source/brand product (unique features, function of the item, etc.). Describe in detail why only this source/brand can furnish the requirements to the exclusion of other sources/brands. **This service can only be provided by AT&T due to the isolated geographic location of NSA Monterey. AT&T own all the telephone infrastructure in the area. Any competitor would need to install new infrastructure to allow for connection, increasing the Navy's cost significantly.**

☐ The requested material or service represents the minimum requirements of the Government.

☒ The material or service must be compatible in all aspects (form, fit and function) with existing systems presently installed/performing. Describe the equipment/function you have now and how the new item/service must coordinate, connect or interface with the existing system. **Due to the geographic location of NSA Monterey, there are no other service providers in the area for this service. AT&T own all the telephone infrastructure in the area. Any competitor would need to install new infrastructure to allow for connection, increasing the Navy's cost significantly.**

☐ A patent, copyright or proprietary data limits competition:

☐ The items are "direct replacement" parts/components for existing equipment. Provide the information about the Next Higher Assembly (NHA)/equipment which the replacement parts are going into (e.g. description, model, part number, Original Equipment Manufacturer (OEM), etc.).

☒ Other information to support sole source/brand name sole source procurement. The rationale must then justify "either" substantial duplication of cost to the Government that is not recovered through competition or unacceptable delays in fulfilling the mission of the agency. **This service allows the base Entry Control Points to access Security Force database when CAC cards are scanned. Should this service not be available, security force would be required to manually authenticate CACs, requiring additional manpower.**
