INDUSTRY DAY

Expeditionary Warfare and Littoral Operations Department (E) Expeditionary Systems Division (E30)

18 FEBRUARY 2026

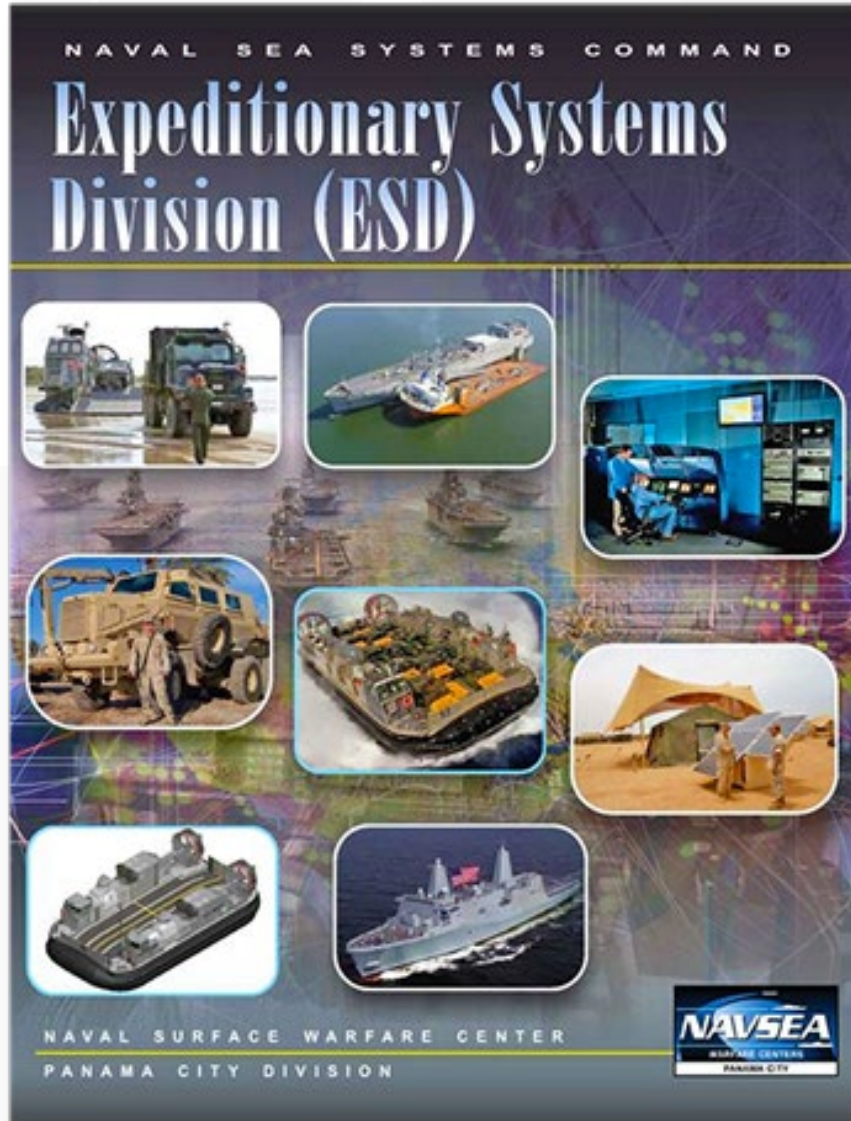

Distribution Statement A. Approved for public release: distribution is unlimited.

DOMINATE THE LITTORALS

*Delivering relevant solutions in the
littorals from seabed to space:
For Today, Tomorrow, and the Navy after Next*

Expeditionary Systems Division (E30)

Product Lines

- High Speed Littoral Connectors & Expeditionary Maneuver

Key Expertise Areas

- Littoral Connectors and Air Cushion Vehicle Systems
- Expeditionary Platform Command, Control, Communications, Computers, and Navigation (C4N)
- Expeditionary Maneuver Warfare Systems Engineering and Integration
- Amphibious Ship Interfaces, Integration, and Systems Engineering
- Littoral Maneuver/Expeditionary Advanced Base Operations
- USMC Vehicle and Systems Support
- Marine Corps Cargo and Logistics Movement
- Marine Corps Shipboard and Seabase Interfaces

High Speed Littoral Connectors & Expeditionary Maneuver

- Acquisition, post-delivery, and lifecycle support for Landing Craft Air Cushion (LCAC) 100 Class (SSC)
 - Engineering services in support of LCAC 100 Class production, Maintainers to support Research & Development craft, T&E engineering to support craft performance testing, Post-delivery In-Service Engineering Agent (ISEA) and Product Support Integration, ISEA/SSA Life Cycle support similar to legacy LCAC.
- Continued In-Service Engineering Agent support required for LCAC 01 Class
 - End-of-life engineering redesigns for mechanical and C4N systems, performance modeling and validation, Reliability & Maintainability, Test and Evaluation (T&E), Fleet Support and Integrated Product Support.
- Field services and depot overhaul in support of Fleet Modernization for both LCAC 01 and LCAC 100 Class
 - Includes fielding of Fleet Modernization Teams, test crews and maintainers, fly-away teams to perform tech support, kit fabrication, Low Rate Initial Production of modernization solutions, depot overhaul of major components and repair of diminishing assets due to End-of-Life.
- Cybersecurity support
 - Risk Management Framework (RMF) Cyber Support for Littoral Connector (LCAC 01, LCAC 100, LCU 1610, LCU 1700, etc.) and system baseline sustainment support through OS updates/patches and other (STIGs/Security Controls) vulnerability remediation.
- Foreign Military Sales support
 - Japanese and Korea LCAC ISEA support similar to USN LCAC.
- Ships integration, interface, and upgrade support
 - Shipboard integration and design/engineering support for amphibious ships, test and evaluations for ships interface with amphibious connectors, programmatic support for amphibious platform acquisition, and upgrade/installation support for surface ships
- Marine Corps systems engineering support
 - Provide technical support and recommendations on proposed system product improvements for the Marine Corp Engineering Systems, prototyping and production support for Marine Corp fuel distribution solutions, test and evaluation for Marine Corp vehicle capabilities, software development support for battlespace situation awareness applications, and support for MCWL S&T.
