*Delivering relevant solutions in the
littorals from seabed to space:
For Today, Tomorrow, and the Navy after Next*

E40 – Test and Evaluation & Prototype Fabrication Division

The Code E40 Test and Evaluation and Prototype Fabrication Division delivers the critical infrastructure, expert personnel, and advanced equipment necessary for safe and effective test and evaluation. We specialize in supporting a wide range of mission areas, including Mine Warfare, Expeditionary Warfare, Naval Special Warfare, Unmanned Systems, and other missions primarily within littoral regions.

E40 Division Needs:

- **T&E and Range Support** – providing end-to-end engineering and programmatic support for test planning, execution, and analysis; operation of specialized test equipment and ranges to also include vessel chartering; certified handling of ammunition and explosives (A&E); and operational support for unmanned systems.
- **Fabrication & Prototype Support** – Providing end-to-end production support, including planning, scheduling, and data management; fabrication services such as machining, certified welding, water-jetting, painting, and electrical work; and critical operational functions including machinery maintenance, and certified rigging for both shore-based and at-sea operations.
