

WARFARE CENTERS
PANAMA CITY

INDUSTRY DAY

C5ISR Division, Code E20

18 FEBRUARY 2026

Distribution Statement A. Approved for public release: distribution is unlimited.

DOMINATE THE LITTORALS

*Delivering relevant solutions in the
littorals from seabed to space:
For Today, Tomorrow, and the Navy after Next*

C5ISR DIVISION E20

JEXC2

WHAT IS JEXC2?

JOINT AND EXPEDITIONARY COMMAND AND CONTROL (JEXC2) FAMILY OF SYSTEMS (FoS)

Our Mission:

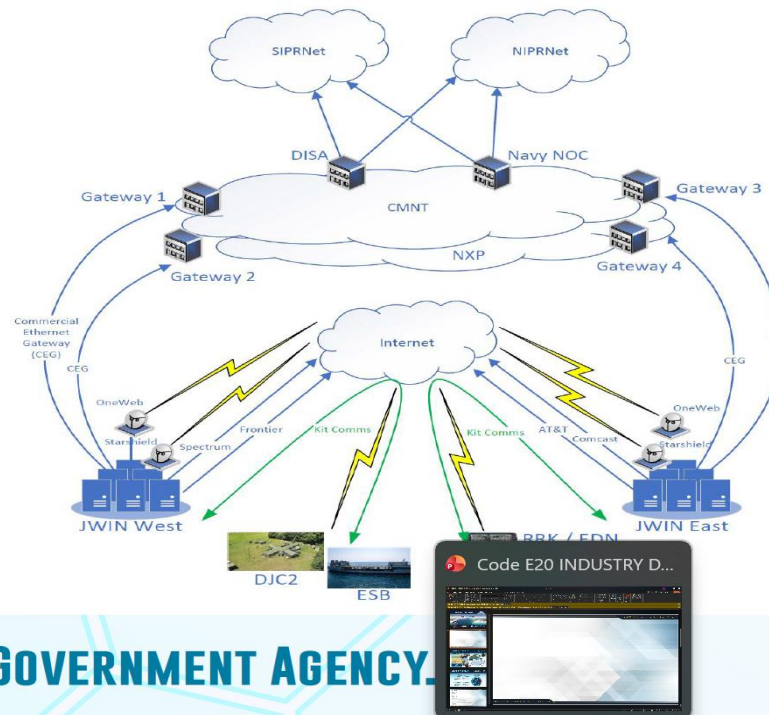

To rapidly provide and cost effectively sustain innovative C4I solutions to a diverse customer base, with agility to remain at the forefront of technology in an ever-changing battlespace.

What We Do:

- Full Lifecycle of C4I Systems
- ISEA & R&D Supported By:
 - Software Support Activities (SSA)
 - Hardware Support Activities (HSA)
 - Communications/NW Support Activities (CSA)
 - Integrated Logistics Support (ILS)
 - Mission Support Center (MSC)
 - Cybersecurity Operations (CO)
- Project Management and Systems Engineering

JEXC2 PROJECTS

DEPLOYABLE JOINT COMMAND AND CONTROL (DJC2)
NAVY ENTERPRISE TACTICAL COMMAND AND CONTROL (NETC2)
VIRTUAL SECURE ENCLAVE (VSE) MARITIME OPERATIONS CENTER (MOC)
JOINT AND EXPEDITIONARY COMMAND AND CONTROL OTHER CUSTOMERS FUNDS (JEXC2 OCF)
EXPEDITIONARY SEA BASE (ESB) C4I ACQUISITION
EXPEDITIONARY SEA BASE (ESB) C4I SUSTAINMENT
SURVEILLANCE TOWED ARRAY SENSOR SYSTEM (SURTASS) C4I
JEXC2 FUTURES
AMPHIBIOUS ASSAULT DIRECTION SYSTEM (AADS)

C3F	COMMANDER, U.S. THIRD FLEET
C4F	COMMANDER, U.S. FOURTH FLEET
CNFJ	COMMANDER, NAVY REGION JAPAN
CPF	COMMANDER, U.S. PACIFIC FLEET
ESB	EXPEDITIONARY SEA BASE
EXCON	EXPEDITIONARY CARRY-ON NETWORK
EXU1	EXPEDITIONARY EXPLOITATION UNIT ONE
HM-14 / HM-15	HELICOPTER MINE COUNTERMEASURES SQUADRON 14/15
NCTAMS	NAVAL COMPUTER AND TELECOMMUNICATIONS AREA MASTER STATION
NETC2	NAVY ENTERPRISE TACTICAL COMMAND AND CONTROL (NETC2) C2 CAPABILITY
NCTS	NAVAL COMPUTER AND TELECOMMUNICATIONS STATION
RRK	RAPID RESPONSE KIT
USAF JTF	UNITED STATES AIR FORCE JOINT TASK FORCE
VSE	VIRTUAL SECURE ENCLAVE

NSWC PCD IS PRIME INTEGRATOR AS A GOVERNMENT AGENCY.

C5ISR DIVISION E20

MDAP

WHAT IS MDAP?

MULTI-DOMAIN AWARENESS AND PROTECTION (MDAP)

Our Mission:

Focused on addressing the capability gaps of the warfighter in the areas of homeland, port, and shipboard protection.

What We Do:

- Counter-terrorism efforts
 - Critical Infrastructure Protection
 - Counter-Unmanned Aerial Systems (C-UAS)
- Biometrics
 - Biometrically Enabled Access Controlled
 - Biometric collection systems
- Navy Non-lethal Effectors
 - Bio-fiber development
 - Ocular deterrent systems
 - Hailing Systems
- Defense against Cyber Attacks
- Littoral Operations Science and Technology
- Multi-classification environment for rapid C5ISR-T capability development

MDAP PROJECTS

INTEGRATED RESILIENT OPERATIONS NETWORK (IRON)

ADAPTIVE PERSISTENT AWARENESS SYSTEM (APAS)

LION'S MANE

EXPEDITIONARY PROTECTION IDENTIFICATION
AND CONTROL (EPIC)

LITTORAL OPERATION SCIENCE AND TECHNOLOGY (LOST)

TESTBED FOR INTEGRATED TECHNOLOGY,
AUTOMATION, AND NETWORKS (TITAN)

SERVICE COST CENTER

Engineering

Coordinate architecture changes driven by cybersecurity requirements. Develop/implement tools and solutions focused on early identification, planning, and delivery of security solutions to the warfighter.

Implementation

Research, design, test, and deliver security solutions to downstream systems quickly, efficiently, and with little impact on the warfighters operations.

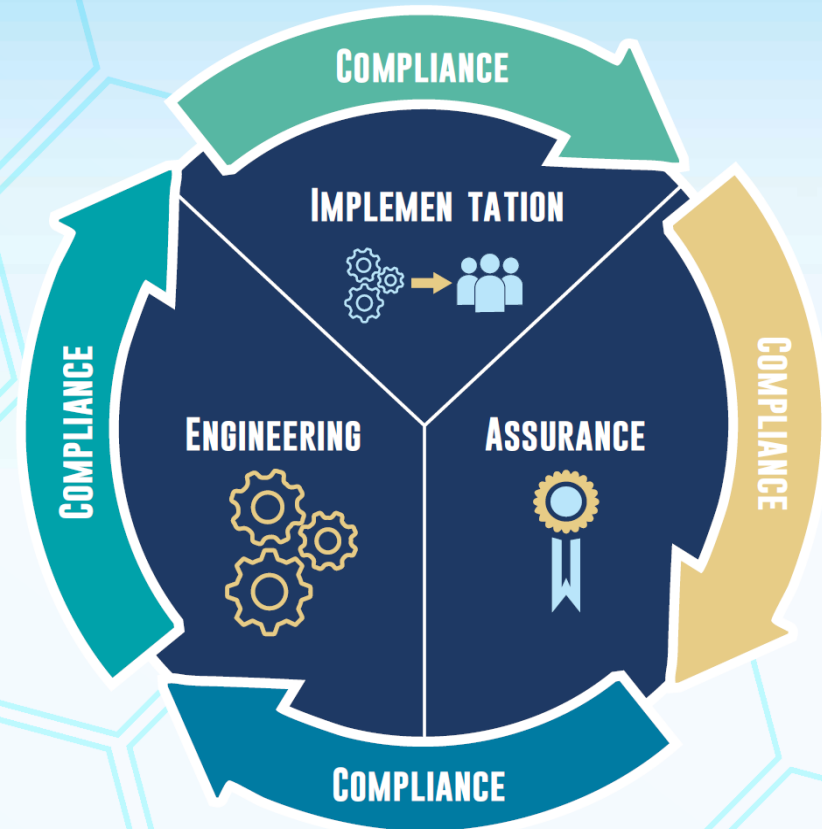

Compliance

Continuously monitor system baselines through scanning and analysis, provide inputs to system artifacts and POA&Ms, produce system guides, and determine vulnerability remediation.

Assurance

Maintain a working knowledge of Navy and Ech II RMF business rules to support system authorizations and maintenance throughout the life of the system.

SUPPORT PROCESS

MDAP/JEXC2– Future Contracts

- Long-Range Optical Interrupter - Compact Optical Interrupter Laser (LROI-COIL) support
 - Expected start January 2026
- Software and Cyber
 - Expected start June 2026
- C5ISR, Integrated Technology, Automation, Uncrewed Autonomous Systems (UxS), Counter Uncrewed Autonomous Systems (C-UxS), Security, and Network Technology
 - Georgia Tech Applied Research
 - Expected start May 2026
- Engineering, Network, and Communication
 - Expected start March 2026
- Mission Support Center Follow-on
 - Current ends October 2027
 - Initial package development 2nd/3rd quarter FY 26
- Large Scale Synthetic Material Production
 - Production of synthetic material based on NSWPCD developed process
 - Package development starting 4th quarter FY 26
 - ~\$3-4M
- Science & Engineering Support (As requirements are defined, potential use of Engineering, Network, and Communication above)
 - Support the Lion's Mane team and fleet engineering support
 - Package development starting 4th quarter FY 26
 - Multi-year | ~\$6-7M
