**PERFORMANCE WORK STATEMENT
NAVAL CONSTRUCTION TRAINING CENTER (NCTC)
GULFPORT, MS.
CONSTRUCTION TECHNICAL INSTRUCTORS AND STAFF SUPPORT**

1.0 SCOPE

The Naval Construction Training Center (NCTC) Gulfport, Mississippi is acquiring Instructor Support Services to carry out the training requirements for basic construction training to military personnel in the Army, Air Force and Navy assigned to construction occupational fields. Support is also required to provide advance construction training to Navy Seabee personnel. The number of specific courses, course duration, start dates, curriculum, class size, and the number of instructors required to adequately meet NCTC Gulfport mission is determined by the coordinated effort of NCTC Gulfport, Center for Seabees and Facilities Engineering (CSFE), and Naval Education and Training Command (NETC) and approved by the Chief of Naval Operations (CNO). The Contractor's sole responsibility is to provide the number of fully qualified instructors approved to meet the training requirements and to ensure the training requirements are fully met as prescribed by NCTC Gulfport. This training is continuous throughout the year with overlapping classes, which are staggered in order to meet scheduled training requirements.

2.0 BACKGROUND

The NCTC Gulfport is a shore activity in an active operating status. An Echelon V command, NCTC's Commanding Officer Reports to CSFE, NETC, and ultimately to the CNO. Respectively, NCTC Gulfport is subject to the regional area coordination authority of the Commanding Officer, Naval Construction Battalion Center (NCBC), Gulfport, on which it is located. NCTC Gulfport and NCTC Port Hueneme, California are the (2) two NCTC locations that provide basic construction training to construction Military Occupation Specialties (MOS's) in the Army and Air Force and basic and advance training for Navy Seabee personnel. Instructor support is provided by contract personnel for NCTC Gulfport, Mississippi.

3.0 PERFORMANCE WORK STATEMENTS

3.0.1 TRAINING COURSE DIRECTIVES: The following Catalog of Navy Training Courses (CANTRAC) Training Course Control Documents shall serve as directives for each course listed. In the event of a conflict between documents referenced herein and the contents of this PWS, the contents of this PWS take precedence. Nothing in this PWS, however, supersedes applicable laws and regulations, unless a specific exemption has been obtained.

- 3.2.1 INTERSERVICE BUILDER APPRENTICE TRAINING (BU-A NAVY), A-710-0010
- 3.2.2 STEELWORKER CLASS A USN BLOCK 0, A-711-0005
- 3.2.3 STEELWORKER CLASS A USN BLOCK 1, A-711-0006
- 3.2.4 STEELWORKER CLASS A USN, A-711-00XX (course is currently being developed to replace Steelworker Class A USN Block 0 A-711-0005 and Steelworker Class A USN Block 1, A-711-0006)

- 3.2.33 HYDRAULIC & PNEUMATIC SYSTEMS, A-610-0050
- 3.2.34 ENGINES, FUEL, AND ELECTRICAL SYSTEMS, A-610-0051
- 3.2.35 AUTOMOTIVE A/C, A-610-0052
- 3.2.36 ADVANCED DIAGNOSTICS AND SHOP MANAGEMENT, A-610-0053

3.0.2 TRAINING REQUIREMENTS

GENERAL: The Contractor shall provide fully qualified instructors who demonstrate experience in the areas listed in the Performance Work Statement (PWS). In the event an instructor(s) has to be replaced, the replacement shall be as qualified or more qualified than the instructor(s) being replaced. The Government COR/ACOR reserves the right to review resumes for any instructor or Training Master Scheduler replacement.

3.0.2 TRAINING ENVIRONMENT: The services required hereunder shall be performed utilizing both of the following specific instructional environments (these training environments are provided and maintained by the Government).

- Legacy Environment (Group-Paced, Instructor-Led). This is traditional classroom instruction in a Navy resident schoolhouse environment. The contractor shall provide on-site instructors to teach the course.
- Legacy Lab Environment (Builder Projects, Instructor-Led). Exercises are conducted on-site builder projects in either an indoor lab or outside site project. The contractor shall provide on-site instructors for each project exercise.

3.0.3 TRAINING SCHEDULES: Training shall normally be conducted eight (8) hours a day, five (5) days a week for the length of the course. However, the daily activity may extend beyond 8-hours if required to meet all training objectives outlined in the curriculum. Student remediation may be required and should be considered beyond the normal 8-hour training time for each class. During the execution of the class schedule where holidays or other events impact the expeditious movement of students through the training pipeline, the Naval Construction Training Center (NCTC) Site Director may extend the number of daily training hours to compensate, but not to exceed 40 hours per week per instructor.

3.0.4 CLASS CONVENINGS: NCTC Gulfport will establish class schedules. Any changes to class/course schedules will be established by NCTC Gulfport and forwarded to the Contractor Training Master Scheduler for implementation.

3.0.5 CHANGES TO CURRICULUM: Only training materials and lesson plans promulgated by CSFE shall be used in training delivery. It is recognized that certain portions of the course may become outdated based on a number of external factors. The Contractor's instructors are encouraged to identify and submit recommendations to the Contractor's Training Master Scheduler who recommends, makes changes and revisions to curriculum and submits such recommended changes and revisions to the NCTC Gulfport Site Director. However, the content of the instructional material shall not be modified until formally approved and implemented by CSFE. Any such Contractor recommendations shall be at no additional cost to the Government and shall become the property of the Government.

3.0.6 ACADEMIC STANDARDS: All instructors shall adhere to and maintain academic standards (e.g., course grading criteria established by NCTC Gulfport) in accordance with assessment standards for the course. If the student(s) have academic problems, the instructor shall provide remediation to improve their course performance. Academic standards for each course can be found in the testing section of the course curriculum.

3.0.7 CONTRACTOR RELATIONSHIP TO MILITARY AUTHORITIES: Contract instructors shall have the authority and are empowered to maintain their classrooms in an orderly and professional atmosphere.

3.0.7.1 COMPLAINTS AGAINST STUDENTS: Students are expected to conduct themselves in a professional and military manner. Students who fail to conduct themselves with the proper classroom decorum shall be cautioned by the contract instructor; if the inappropriate conduct continues, the student shall be referred by the contract instructor to the NCTC Site Director. In the event of any formal military action against students under their tutelage, contract instructors may be requested to provide written statements to or appear in person at Non-Judicial Punishment (NJP) or military Courts-Martial proceedings. Under no circumstance is a contract instructor to take disciplinary action against any student(s).

3.0.7.2 SITE MANAGEMENT: The Training Master Scheduler shall be designated as the Contractor Site Lead. In addition to performing duties outlined in paragraph 3.1, the individual shall provide overall management, supervision, and coordination of this contract and shall act as the local point of contact with the Government. The Contractor Site Lead shall have full authority to act for the Contractor on all matters relating to daily operations of the contract. The Contractor shall furnish, in writing, to the NCTC Gulfport Business Manager the name and contact information of the Contractor Site Lead no later than (15) calendar days after contract award. Providing a Contractor Site Lead will be at no additional cost to the Government.

3.1 KEY PERSONNEL: Contractor personnel that are evaluated in a source selection process and that may be required to be used in the performance of a contract by the Key Personnel listed in the PWS. When key personnel are used as an evaluation factor in a best value procurement, an offer can be rejected if it does not have a firm commitment from the person(s) that is (are) listed in the proposal. However, in the event that a person, previously committed to perform as key personnel under the contract becomes unavailable before award (or prior to the start of performance under the contract), the qualifications listed in each individual proposed key personnel resume, not the specific individual, are the materially relevant aspects of the proposed key personnel partially forming the basis of award. Therefore, even if a proposed key individual becomes unavailable to the Contractor between proposal submission and award, the Government will evaluate and make its award decision based on the qualifications listed on the proposed resume(s). When the Government awards a contract under those circumstances, the Government will require the awardee to use the qualifications listed on the relevant proposed key personnel resume as the basis for replacing the individual during contract performance. The offeror shall make no substitution of key personnel without prior notification to and concurrence of the Government COR. The prime Contractor is responsible for performance of all subcontractors. The following personnel are considered key personnel by the Government:

INSTRUCTOR SUPPORT SERVICES (TRAINING MASTER SCHEDULER):

The Training Master Scheduler is considered key personnel by the Government. The Contractor shall provide a Training Master Scheduler to coordinate all training conducted by the Naval Construction Training Center Gulfport on site and scheduled off-site training. The Contractor shall coordinate input from the Center for Seabees and Facilities Engineering (CSFE) and Naval Education and Training Command (NETC) regarding the number of classes, area of instruction, class size and schedule dates for proposed classes. The Contractor shall make all arrangements for classroom availability and assignments, insure required training aids are made available for each class, coordinate and monitor all classrooms and laboratory facilities assigned to NCTC Gulfport, provide student rosters to assigned instructors.

The TRAINING MASTER SCHEDULER shall serve as the single point of contact for all matters pertaining to “A” (Apprentice Training), C1 (Advance specialized skill training), D1 (Individual, not rating-specific professional development functional skill training), F1 (Individual skill or rating-specific functional training), and G1 (Pipeline skill progression Training) all related courses associated with NETC Seabee basic, intermediate and advanced training.

- 3.1.1** Respond to all correspondence pertaining to course issues. Receive phone calls and visitors, answer inquiries concerning scheduling courses.
- 3.1.2** Ensure the essential NITRAS (Navy Integrated Training Resources and Administration System), CETARS (Corporate Enterprise Training Activity Resource Systems [US Navy]) and Master Course Reference File (Seabee University/Course Schedule) are current and in accordance with NCTC, NETC and CSFE directives.
- 3.1.3** Draft and submit schedules to be used in the execution of Naval Technical Training conducted at NCTC Gulfport and off-site facilities.
- 3.1.4** Maintain records and data pertaining to all course of instruction at NCTC Gulfport.
- 3.1.5** Schedule and conduct weekly scheduling meetings between NCTC Gulfport, Schoolhouse Departments, D1 and F1 course coordinators, the Naval Construction Group Two (NCG2) and tenant Naval Mobile Construction Battalion (NMCB) training personnel.
- 3.1.6** Develop and submit for approval and promulgation weekly C1, D1, F1, and G1 school course schedules.
- 3.1.7** Identify scheduling conflicts, provide coordinated recommendations for approval and implement resolutions to scheduling issues in order to facilitate courses to the maximum extent.
- 3.1.8** Inform Government training department of, and propose resolutions to, issues arising from “A”, C1, D1, F1, and G1 school course completion packages.
- 3.1.9** Assist the Business/Financial Management Department Head (N8) with matters pertaining to “A”, C1, D1, F1, and G1 scheduling and school costs associated with courses taught, Equipment Replacement Plans (ERPs) and information on schedules for reimbursable billings.
- 3.1.10** Provide Command data for facilities level utilization and scheduling briefs pertaining to school courses.
- 3.1.11** Ensure monthly Metrics brief is updated and ready for presentation.
- 3.1.12** Coordinate/liase with NCTC Gulfport Company Commanders, Course Managers, NCG2 and tenant command training personnel for approval on matters relating to Naval technical training schedules and opportunities.
- 3.1.13** Provide advance notice of technical training opportunities to NCTC Gulfport Company Commanders, Course Managers, NCG2 and tenant command training personnel of any approved changes to establish schedules to facilitate continued coordination and minimize discrepancies in student attendance.
- 3.1.14** Class scheduling is determined by the number of courses scheduled to convene throughout the fiscal year. Additional classes may be scheduled and courses added based on inter-service training requirements. All class schedules shall be submitted as a draft copy for review and approval by the onsite immediate supervisor.
- 3.1.15** The Contractor shall manage class quota request and course enrollments for applicable C, D, F, and G courses, utilizing the enterprise Navy Training Reservation System (eNTRS). The Contractor shall ensure quotas/reservations are in compliance with course schedules, training instructions, and directives.

3.1.16 The Contractor shall coordinate C and G course quotas requirements based on unit request with the CSFE Production Line Manager (N53) to manage quotas. The Contractor shall coordinate/liaison all quota conflicts and provide recommended resolutions to help maximize training opportunities.

HISTORICAL WORK DATA: FY24 historical data shows 155 classes were scheduled at NCTC Gulfport.

3.2 INSTRUCTOR SUPPORT SERVICES: The Contractor shall provide qualified Inter-Service Builder Apprentice Training (BU-A) Instructors and qualified Advanced Instructors as outlined in paragraph 3.2.1 through 3.2.36 to meet the training requirements and schedule as determined by NCTC Gulfport under authority of CSFE, NETC and the CNO. Any Contractor assigned to serve as an alternate and/or replacement shall be as qualified as the Contractor they are replacing. Due to the high visibility of the NCTC training program, Contractor deviations from the labor mix of instructors deemed necessary by the command to meet the training requirements and schedule shall be justified in the management plan in detail to the satisfaction of the Commanding Officer NCTC Gulfport. It is required that no billet within the organization remains vacant for a period exceeding two (2) weeks. The intent of this provision is to ensure continuity of operations and maintain effective staffing levels. The organization shall implement procedures to monitor the status of all vacancies and take corrective actions to prevent vacancies from extending beyond the two-week threshold. Regular updates on vacancy status and recruitment progress shall be provided to the COR to ensure timely resolution. The Government COR/ACOR reserves the right to review resumes for any instructor or Training Master Scheduler replacement.

Course descriptions are provided in paragraphs 3.2.1 through 3.2.36. These are the courses scheduled for FY26.

3.2.1 INTER-SERVICE BUILDER APPRENTICE TRAINING (BU-A NAVY) A-710-0010:

Contractor shall provide qualified instructors to provide training in the basic technical knowledge and basic practical skills in preparation for immediate usefulness as a Structural Apprentice for all Navy Seabee, Army and Air Force personnel requiring basic apprenticeship training. Contractor shall provide instruction in the use of builder tools. Contractor shall provide instruction in the selection of equipment and materials used in manufacturing woodshop projects; erecting light frame structures, suspended ceiling tile, hot tar roofing, three tab composition shingles, concrete masonry structure, concrete forms, windows to doorjambes and casting to scope. Contractor shall provide instruction in installing, finishing drywall, installing door jambs with casing, installing baseboard and molding, installing composition floor tile and ceramic tile. Contractor shall provide instruction in the preparation and application of paint. Contractor shall provide instruction in mixing, transporting, placing and finishing concrete.

3.2.2 STEELWORKER CLASS "A" USN BLOCK 0 A-711-0005:

Contractor shall provide qualified instructor personnel to provide apprentice level training in construction mathematics, blueprint reading and basic layout, gas welding equipment, gas cutting, gas welding and brazing, silver brazing, vertical and flat arc welding, reinforcing steel, and fiber line.

3.2.3 STEELWORKER CLASS "A" USN BLOCK 1 A-711-0006:

Contractor shall provide qualified instructor personnel to provide apprentice level training in basic sheet metal layout, pattern development, fabrication, and pre-engineered buildings including installation and maintenance of doors.

3.2.4 STEELWORKER CLASS "A" USN A-711-00XX:

Contractor shall provide qualified instructor personnel to provide apprentice level training in construction welding and related skills. (this course is currently under development and will replace both the SW Class A Block 0 and Block 1 courses. Updated data will be provided when it becomes available.)

3.2.5 CONSTRUCTION PROJECT ESTIMATING A-412-0028:

Contractor shall provide qualified instructor personnel to provide selected personnel with the knowledge and skills necessary to plan, estimate, schedule, and report on construction projects at existing Naval bases, advance bases and selected off- base sites during peacetime and contingency operations in accordance with the Construction Estimating, NTRP 4-04.2.3 and Seabee Crew Leader Handbook.

3.2.6 CONSTRUCTION PROJECT PLANNING AND SCHEDULING A-412-0029:

Contractor shall provide qualified instructor personnel to provide training for Naval Construction Force (NCF) personnel E4 and E5, the basic level III Construction management knowledge and skills necessary to perform as a crew leader on an NCF construction project, specifically duties related to planning and development of the project package, and tools for managing the day-to-day NCF construction activities.

3.2.7 CONSTRUCTION PROJECT EXECUTION A-412-0030:

Contractor shall provide qualified instructor personnel to provide construction management training to Naval Construction Force (NCF) personnel E6 and above, Level II Construction Management knowledge and skills necessary to perform as a construction supervisor on one or more NCF construction projects, specifically the management and oversight duties related to project package, resource leveling, reporting, and interfacing with other agencies.

3.2.8 CONCRETE AND MASONRY A-710-0055:

Contractor shall provide qualified instructor personnel to provide instruction in concrete and masonry construction principles and techniques to include site layout, forming "D" reinforcement placement and finishing, construction using concrete masonry units (CMU) block, lay-out and estimating.

3.2.9 STRUCTURE FRAMING A-710-0054 COURSE OF INSTRUCTION:

Contractor shall provide qualified instructor personnel to provide in-depth instruction in Rough Carpentry framing principles and techniques that cover the following areas; floors, walls, roof frames and trusses.

3.2.10 INTERIOR AND EXTERIOR FINISHES A-710-0056 :

Contractor shall provide qualified instructor personnel to provide in-depth instruction in interior and exterior finishes that incorporate the following areas; drywall, doors and windows, painting, ceilings, exterior finishes, stairs, interior trim and roofing applications.

3.2.11 HEAVY CONSTRUCTION I A-710-0044:

Contractor shall provide qualified instructor personnel to provide in-depth instruction to builders E-3 and above in the knowledge and skills required to perform Heavy Timber Bridge construction. Instruction includes care for and use of an Engineer's Level, develop sketches, layout, assemble and erect Heavy Timber construction projects using tools, equipment and materials from the Bridge and Dock Builders Tool Kit 80041.

3.2.12 HEAVY CONSTRUCTION II A-710-0045:

Contractor shall provide qualified instructor personnel to provide in-depth instruction to builders E-2 to E-6 in the basic knowledge and skills required to plan and estimate materials, direct and assist in the safe conduct of NCF pile-driving operations using common pile-driving rigs using all types of piles. Instruction shall include appropriate High-Risk safety training. Prepare simple drawings and construction specifications. Make accurate estimates of materials, equipment, and manpower requirements using the NAVFAC P-405. Establish and maintain a standard pile-driving log. Observe pile-driving operations.

3.2.13 POWDER ACTUATED TOOLS A-710-0038:

Contractor shall provide qualified instructor personnel to provide in-depth instruction to E-1 and above personnel leading to a Hilti Operators License. Instruction shall include the following in accordance with approved Hilti technical and tool operation manuals, safety, operations, cleaning and preventive maintenance on Hilti low velocity powder actuated tools to include only the 451 and 460 powder actuated tools.

3.2.14 WELDING SUPERVISOR A-711-0031:

Contractor shall provide qualified instructor personnel to provide in-depth instruction for E-5 and above personnel. The course covers the necessary knowledge and skills to perform as a Welding Supervisor. Training includes review of management systems for welding supervisors, requirements of welds, detailed descriptions of welding processes, welding metallurgy, welding symbols, welding instructions, welding economics, the application of welding standards, welding inspection, health and safety, weld reports and records.

3.2.15 SHEETMETAL WORK A-711-0026:

Contractor shall provide qualified instructor personnel to provide in-depth instruction for steelworkers E4 through E6. Instruction shall provide steelworker trainees with the knowledge and skills required for pattern development

and lay-out for sheet metal ductwork, to include square to round transitions, intricate and compound angles; 3 piece 90 degree elbow fabrication; lay-out and cut selected ductwork transitions to include elbows, branch connections, “T” and “Y” joints and end caps for pre-fabricated and one-off sheet metal ductwork pieces.

3.2.16 STEEL REINFORCING A-711-0027:

Contractor shall provide qualified instructor personnel to provide in-depth instruction to Steelworkers E4 through E6. Instruction shall provide steelworker trainees with the knowledge and skills necessary to understand and interpret construction prints and specifications, conduct material estimating of reinforcing steel from construction prints, create reinforcing steel bend schedules, and provide skills in cutting, bending, tying, and placing reinforcing steel. In addition, the trainee will utilize hand and power tools to cut and bend reinforcing steel to construction specifications. This course is a module of the Steelworker (SW) Advanced Pipeline (A-711-0030).

3.2.17 GAS CUTTING AND WELDING A-711-0024:

Contractor shall provide qualified instructor personnel to provide in-depth instruction to Steelworkers E4 through E6. Instruction shall provide the knowledge and skills to Steelworkers to perform Oxy-acetylene Brazing, Cutting and Welding (OAW) on brass, copper and mild carbon steel given construction prints and specifications; equipment set-up; material selection and preparation; position welding to include horizontal, vertical and overhead; types of welds to include square groove butt, single “V” groove and fillet. This course is a module of Steelworkers (SW) Advance Pipeline (A-711-0030).

3.2.18 METAL FABRICATION AND LAYOUT A-711-0025:

Contractor shall provide qualified instructor personnel to provide in-depth instruction to Steelworkers E4 through E6. Instruction shall provide the knowledge and skills to Steelworkers in pipe-lay-out with steel squares, calculate welding offsets, use of pipe lay-out tools such as a contour marker, centering head, magnetic pipe levels and prefabricated pipe wrap-around; layout and cut selected pipe transitions to include elbows, branch connections, “T” and “Y” joints and end caps on mild steel pipe. This course is a module of Steelworker (SW) Advanced Pipeline (A-711-0030).

3.2.19 ARC WELDING (STRUCTURAL) A-711-0022:

Contractor shall provide qualified instructor personnel to provide in-depth instruction to Steelworkers E4 through E6. Instruction shall provide the knowledge and skills to Steelworkers to perform Shielded Metal Arc Welding (SMAW) on structural steel given construction prints and specifications; equipment set-up; material selection and preparation; position welding to include horizontal, vertical and overhead; types of welds to include square groove butt, single “V” groove and fillet. This course is a module of Steelworker (SW) Advanced Pipeline (A-711-0030).

3.2.20 ARC WELDING (PIPE) A-711-0023:

Contractor shall provide qualified instructor personnel to provide in-depth instruction to Steelworkers E4 through E6. Instruction shall provide the knowledge and skills to Steelworkers to perform Shielded Metal Arc Welding (SMAW) on structural steel pipe given construction prints and specifications; equipment set-up; material selection and preparation; position welding to include horizontal, vertical and overhead; types of welds to include square groove butt, single “V” groove and fillet. This course is a module of Steelworker (SW) Advanced Pipeline (A-711-0030).

3.2.21 SHIELDED INERT GAS WELDING A-711-0002:

Contractor shall provide qualified instructor personnel to provide in-depth instruction to Steelworkers E4 through E6. Instruction shall provide the knowledge and skills necessary to identify, set-up, and maintain all items in the NMCB Combination Electric Arc Inert-Gas Welding Kit, perform gas metal arc and gas tungsten arc welding of ferrous and non-ferrous metals up to and including 3/8-inch thickness, including selection of welding wire and method. This is a module of Steelworker (SW) Advanced Pipeline (A-711-0030).

3.2.22 TRANSPORTATION OPERATIONS A-730-0046:

Contractor shall provide qualified instructor personnel to provide Equipment Operator personnel the advanced technical training to perform Transportation Supervisor duties, transport hazardous materials, plan line hauls, and operate manual truck- tractors using technical references, in normal field conditions.

3.2.23 EARTHWORK OPERATIONS A-730-0047:

Contractor shall provide qualified instructor personnel to provide Equipment Operator personnel the advanced

technical training to utilize geographic information systems to perform horizontal construction, trenching and road construction and maintenance using technical references, in normal field conditions.

3.2.24 PAVEMENTS A-730-0048:

Contractor shall provide qualified instructor personnel to provide Equipment Operator personnel the advanced technical training to safely perform soil stabilization and asphalt operations in normal field conditions.

3.2.25 CONSTRUCTION INSPECTOR A-710-0022:

Contractor shall provide qualified instructor personnel to provide personnel with the knowledge and skill factors to review and analyze project construction drawings and specifications and prepare a Construction Inspection Plan including a checklist of inspection points during critical phases of construction and installation. Verify that all materials and/or equipment ordered meet specifications and verify their conformance to those specifications upon receipt. Inspect all phases of construction and installation, including civil, architectural and structural, electrical and mechanical, for compliance with drawings, specification and acceptable safe operating, installation and construction practices. Coordinate and observe specified tests on materials, electrical and mechanical systems (including operational tests on installed equipment) and ensures the contractor performs quality control tests on such items as sub base materials, aggregates and cementations for binding and on related mixes before, during and after installation. Upon receipt of all test results, the inspector analyzes the results for compliance with given specifications, prepares logs, records and reports on all inspections and tests.

3.2.26 TOOL AND EQUIPMENT MAINTENANCE TECHNICIAN A-712-0010:

Contractor shall provide qualified instructor personnel to provide advanced technical training in the installation, repair and maintenance of construction tools and equipment. To provide technical training in the installation, repair and maintenance of carpenter shop equipment, blade reconditioning equipment, portable, power, and hand tools. To provide instruction in procedures for establishing preventive maintenance schedules, set up and maintenance of manufacturer's and technical file, of recommended maintenance and operating procedures for construction battalion central tool rooms.

3.2.27 INTERIOR WIRING A-721-0001:

Contractor shall provide qualified instructor personnel to provide advanced technical training in the technical knowledge and practical skills necessary for a Construction Electrician to utilize the National Electric Code (NEC), installation of explosion proof fixtures and devices, installation of photocells, installation of thermostats, utilization of the fish tape, conductor installation system, utilization of the heavy duty cable puller, threading and bending large conduits.

3.2.28 CABLE SPLICING A-721-0023:

Contractor shall provide qualified instructor personnel to provide advanced instruction on the techniques and procedures for joining power cable employing straight and branched splices; termination and dead ends, testing and fault finding of cable system. Splice underground and aerial communications cable including cable terminations. Construct bridge and straight splices in plastic sheathed communication cable. Locate faults using appropriate equipment, techniques and safety precautions. Splice and terminate fiber optic cable with mechanical and fusion splices. Use optical time-domain reflectometer (OTDR) and power meter for testing and fault finding.

3.2.29 ADVANCED BASE POWER PLANT MAINTENANCE A-721-0024:

Contractor shall provide qualified instructor personnel to provide advanced instruction on the installation procedures, operation of an Advanced Base Power Plant in single and parallel operation. Maintenance and troubleshooting of Advanced Base Power Plants and associated equipment, is also covered.

3.2.30 ELECTRIC MOTORS AND CONTROLS A-721-0032:

Contractor shall provide qualified instructor personnel to provide advanced instruction on wiring motor controllers for auto transformer, resistance, and star-delta starting. Perform technical maintenance to include coils, relays, contacts, and switches. Establish a preventive maintenance program.

3.2.31 ELECTRICAL THEORY A-721-0034:

Contractor shall provide qualified instructor personnel to provide advanced instruction on the technical knowledge and practical skills necessary for assignment as an electrical crew supervisor. Electrical theory, the installation,

maintenance, and troubleshooting of solid-state devices in peacetime and contingency operations under limited supervision.

3.2.32 POWER TRAIN AND CHASSIS A-610-0048:

Contractor shall provide qualified instructor personnel to provide advanced instruction on the disassemble, clean, repair, adjust, and assemble standard transmissions, transfer cases, power take-off units, drive shafts, differentials, front drive axels, track-chains, pivot brakes, final drives, sprockets, idlers, rollers, and track pads.

3.2.33 HYDRAULIC & PNEUMATIC SYSTEMS A-610-0050:

Contractor shall provide qualified instructor personnel to provide advanced instruction on construct and operate a hydrostatic system using components common to a typical hydraulic system. Assemble a hydraulic hose and fitting assembly and test under normal working pressures; connect and operate a flow meter to determine hydraulic system problems, troubleshoot and operate hydraulic system using logical troubleshooting sequence. Use basic knowledge to test electro hydraulic valves.

3.2.34 ENGINES, FUEL, AND ELECTRICAL SYSTEMS A-610-0051:

Contractor shall provide qualified instructor personnel to provide advanced instruction on troubleshoot, analyze, and isolate diesel fuel system malfunctions on various types of fuel systems. Perform minor and major adjustments to fuel system components consisting of setting racks, governors, and timing fuel pumps to engines; adjust engine speeds, both minimum and maximum; adjust starting valve linkage and any other components that affect engine performance. Take record, and evaluate compression readings. Disassemble, inspect, repair, assemble, test and adjust diesel fuel system components (including mechanical and hydraulic governors) in accordance with manufacturer's specifications. Test, diagnose, charge and repair batteries. Read and interpret equipment electrical diagrams and schematics. Troubleshoot and repair electrical system malfunctions. Service and analyze starting and chagrining system malfunctions on all types of automotive, materials handling and construction equipment. Disassemble, inspect, bench test, repair and assemble starting motors, DC Generators, AC Alternators and other electrical components of the starting and charging circuits.

3.2.35 AUTOMOTIVE A/C A-610-0052:

Contractor shall provide qualified instructor personnel to provide advanced instruction on the advanced technical training to diagnose and repair air conditioning systems in both normal field and shop conditions.

3.2.36 ADVANCED DIAGNOSTICS AND SHOP MANAGEMENT A-610-0053:

Contractor shall provide qualified instructor personnel to provide advanced instruction on the advanced training in diagnostic and troubleshooting procedures, to isolate malfunctions in military and commercial vehicles, utilizing analog, digital, and computer diagnostic equipment in both the field and shop conditions.

3.3 INSTRUCTOR WORKLOAD DATA: Based on historical data, it is estimated that there are 35 courses, 242 instructional days at 8 instructional hours per day.

See Addendum I for courses that were taught in FY24/25 and the number of instructors required. See Addendum II FY26 proposed course schedule.

3.4. INSTRUCTOR PLACEMENT AND WORK REQUIREMENTS: Due to student load changing from year to year the Government shall have the capability to move instructors from one schoolhouse to another to support the training requirement. All instructor moves will be coordinated between the COR and contract onsite lead at least 30 days prior to moving any instructor(s). Instructors will only be cross utilized from the Specialty OF7 Schoolhouse and the in rate (BU, CE, EO, and SW) schoolhouses.

3.5 The total annual hours, inclusive of both instructors and the Master Scheduler, shall be no less than 45,760 hours. Proposals offering fewer than 45,760 hours would cause mission degradation and will be deemed unacceptable..

4.0 SKILLS AND KNOWLEDGE REQUIRED FOR INSTRUCTOR SERVICES

4.1. SKILLS AND KNOWLEDGE REQUIRED FOR TASK 1: TRAINING MASTER SCHEDULER

POSITION: The Training Master Scheduler shall have specialized experience, knowledge, skills and abilities to successfully perform the duties of the position. Experience should demonstrate a practical knowledge of the subject area of the position and the methods and techniques utilized in scheduling training in both a classroom and field exercise environment. The Training Master Scheduler shall possess knowledge of Navy Seabee structure and be familiar with all construction-related vocations.

The Training Master Scheduler shall have training scheduling experience gained through educational and job experience. The Training Master Scheduler shall be able to communicate clearly, concisely and effectively with all levels of personnel within the training environment. The Training Master Scheduler shall have knowledge and ability to operate computers and other office automated systems in order to prepare reports/ presentations, data input and extraction and possess experience in drafting course curriculum.

Minimum Qualification:

- The Training Master Scheduler shall possess a training scheduling background and a minimum of 5 years of scheduling experience as a training scheduler.

Physical Demands: Work is primarily in an office environment. Course monitoring shall on occasion require interaction and observation in a field construction site environment with a minimum degree of physical exertion. During site project monitoring, the Training Master Scheduler shall be required to be knowledgeable of safety regulations and requirements involving construction site operations. The Training Master Scheduler shall wear all prescribed safety gear/equipment when appropriate.

Work Environment: The Contractors working environment is primarily in an office setting. Project site observations involve everyday risks and discomforts associated with work on a construction site.

Replacement Personnel: Should the Training Master Scheduler need to be replaced at any time during the contract period of performance, the Training Master Scheduler replacement shall be as qualified or more qualified than the person being replaced. The selection and hiring of replacement personnel is the sole responsibility of the contractor and shall not remain vacant for a period exceeding two (2) weeks, as previously referenced in PWS 3.2.

4.2 SKILLS AND KNOWLEDGE REQUIRED FOR TASK II: INSTRUCTOR POSITIONS:

Instructor personnel shall have an extensive knowledge of construction management principles including planning, estimating, material take-off, resource leveling, project site layout, techniques of foremanship and actual construction experience.

Minimum Qualifications:

- Instructor personnel shall be a certified Journeyman in the area in which they are providing primary training or have a minimum of 5 years of experience in the area that they are providing training.
- Instructor personnel shall have Navy Enlisted Classification (NEC) 9502/805A Instructor or other service equivalent.
- The Instructor shall have a minimum of 5 years of experience documented through work experience from the private sector, military or both, or appropriate valid certifications equivalent to the NEC 9502/805A. The Instructor personnel shall have the ability documented through work experience to operate visual information equipment (LCD projectors, smart boards, document cameras, or other visual aid equipment) that can be utilized as training aides.
- The Instructor personnel shall have experience documented through work experience in the use and operations of computers and other automated office equipment used to produce and grade exams, prepare reports and input/extract data.
- Instructor personnel shall obtain a favorable determination from a National Agency Check Local Agency and Credit check (NACLC) investigation.

- Maintain valid Cardiopulmonary Resuscitation (CPR) qualification.

Physical Demands: Work is split between a classroom environment requiring long periods of standing and field training projects requiring prolonged standing and working in an active construction site environment. Additional physical demands require use of power hand tools, lifting or construction materials and climbing of ladders. Instructor personnel will have to maneuver on, around and under structures in the performance of their duties.

Work Environment: The work environment involves everyday risks or discomforts that require normal safety precautions typical of such places as offices, classrooms, training rooms, job sites and field exercises. Instructor personnel will have to take additional safety precautions when maneuvering on, around and under structures performing quality control inspections. Instructor personnel are also responsible for student safety and that students comply with safety precautions and wear proper safety equipment as needed or directed when in a training environment, construction project site or field exercise.

Replacement Personnel: Should an instructor need to be replaced at any time during the contract period of performance, the instructor replacement shall be as qualified or more qualified than the person being replaced. The selection and hiring of replacement personnel is the sole responsibility of the Contractor and shall not remain vacant for a period exceeding two (2) weeks, as previously referenced in PWS 3.2.

4.3 SPECIFIC KNOWLEDGE REQUIREMENTS

4.3.1. BUILDER APPRENTICE/BUILDER ADVANCED INSTRUCTOR: Instructor personnel shall have documented experience in light frame structure, suspended ceiling tile, hot tar roofing, three-tab composition shingles, concrete masonry structure, installing/finishing drywall, preparing/installing doors and casing, baseboard/molding, installing composite floor tile, ceramic tile, painting, mixing, transporting, placing and finishing concrete at a master level. Due to class size and safety requirements, the BU-A course requires 2 instructors be present for each day of instruction from commencement of the course until graduation. There is no waiver for the 2 instructor requirement for the BU-A course of instruction. Builder courses include paragraphs 3.2.1, 3.2.8, 3.2.9, 3.2.10, 3.2.11, 3.2.12, and 3.2.13.

4.3.2. EQUIPMENT OPERATOR ADVANCED INSTRUCTOR: Instructor personnel shall have documented experience in soil stabilization and asphalt placement utilizing grading and paving equipment. The equipment operator shall possess all valid licenses and certifications for the equipment in which they are providing training on. The Instructor personnel shall have a minimum of 5 years of experience with construction equipment. Documented experience is required for each piece of equipment for which the instructor personnel is providing training. Instructor personnel are designated by the command to conduct all Equipment Operator training. Equipment Operator courses include paragraphs 3.2.22, 3.2.23, and 3.2.24.

4.3.3. STEELWORKER APPRENTICE/ADVANCE INSTRUCTOR: Instructor shall be a skilled welder with documented experience in metal identification. Experience with Gas Metal Arc (GMA) welding, Gas Tungsten Arc (GTA) welding, read and interpret welding symbols, braze and solder, Shielded Metal Arc Welding (SMAW), operate and maintain power shears, lay out, erect, inspect and test riggings and hoisting devices at a masters level or equivalent. Instructor shall have a minimum of 10 years of steelworker/welding experience. Instructor personnel are

designated by the command for the Advanced Steel Worker School that consist of the following courses under paragraphs 3.2.2, 3.2.3, 3.2.4, 3.2.14, 3.2.15, 3.2.16, 3.2.17, 3.2.18, 3.2.19, 3.2.20, and 3.2.21.

4.3.4. SPECIALTY OF SCHOOL INSTRUCTOR: Instructor shall have broad knowledge and experience in construction planning and estimating; project execution, and project management. In addition, the instructor shall have a working knowledge of tool repair and maintenance of hand and power tools including carpentry shop equipment.

4.3.5. CONSTRUCTION INSPECTOR: Instructor shall have broad knowledge and experience in construction administration including detail duties and responsibilities of construction inspector throughout the various types of Navy inspection organizations, such as ROICC, public works, naval construction forces. Items dealt with include: Contract management, planning for contract compliance and safety, turnover and acceptance of work, damages, claims, labor standards and standards of conduct. Instructor shall have a minimum of 5 years of construction

inspector experience. Instructor personnel are designated by the command for the Construction Inspector Schools that consist of paragraph 3.2.25.

4.3.6. CONSTRUCTION PROJECT PLANNING AND SCHEDULING, AND CONSTRUCTION

PROJECT EXECUTION: Instructor shall have the knowledge and skill necessary to plan, estimate, schedule, and report on construction projects at existing Naval bases, advanced bases and selected off-base sites during peacetime and contingency operations in accordance with NTRP publications. Instructor shall have a minimum of 5 years of construction inspector experience. Instructor personnel are designated by the command for the Construction Planning and Estimating and CMCT Schools that consist of the following courses under paragraphs 3.2.5, 3.2.6, 3.2.7, 3.2.8, 3.2.9, and 3.2.10.

4.3.7. TOOL AND EQUIPMENT MAINTENANCE TECHNICIAN: Instructor shall have the working knowledge and skills to provide technical training in the installation, repair and maintenance of carpentry shop equipment, blade reconditioning equipment, portable power and hand tools, as well as procedures for establishing preventive maintenance schedules, set-up and maintenance of manufacturer's and technical files, and recommended maintenance and operating procedures for central tool rooms. Instructor shall have a minimum of 5 years of construction inspector experience. Instructor personnel are designated by the command for the Construction Inspector Schools that consist of paragraph 3.2.26.

4.3.8. CONSTRUCTION ELECTRICIAN ADVANCE INSTRUCTOR: Instructor shall be skilled in the principles of electrical theory; street lighting systems; electrical transmission systems; repair of electrical motors and generators; operation and maintenance of electrical power plants; solid state fundamentals; interoffice communication systems; telephone systems; installation and design of interior wiring and lighting systems; motor controller installation; and major/minor appliance repair. In addition, the instructor shall have knowledge in the techniques and procedures for joining power cable employing straight and branched splices; termination and dead ends, testing and fault finding of cable system. Slice underground and aerial communications cable including cable terminations. Construct bridge and straight slices in sheathed communication cable. Locate faults using appropriate equipment, techniques and safety precautions. Splice and terminate fiber optic cable with mechanical and fusion splices. Use power meter for testing and fault finding. Instructor shall have a minimum of 10 years of construction electrician experience. Instructor personnel are designated by the command for the Advanced Construction Electrician Schools that consist of the following courses under paragraphs 3.2. 27, 3.2.28, 3.2.29, 3.2.30, and 3.2.31

4.3.9. ADVANCED CONSTRUCTION MECHANIC INSTRUCTOR: Instructor shall be skilled in troubleshooting, tune-up and maintenance of gasoline, diesel engines; automotive and construction equipment power train, chassis and component assemblies. This includes valve and cylinder reconditioning testing and analysis of electrical and fuel injection systems while employing appropriate test equipment. Instructor shall have a minimum of 10 years of construction electrician experience. Instructor personnel are designated by the command for the Advanced Construction Mechanic Schools that consist of the following courses under paragraphs 3.2.32, 3.2.33, 3.2.34, 3.2.38, and 3.2.36.

4.4. PHYSICAL/ENVIRONMENTAL DEMANDS: Instructor personnel during field exercises must deal with extreme weather/outdoor seasonal conditions associated with training performed exclusively in an outdoor environment requiring prolonged periods wearing chemical and radiological equipment.

5.0 WORKING HOURS/SHIFT SCHEDULES: The information provided is based on the existing work schedule. Core hours are Monday – Friday 0700 – 1600, excluding weekends and legal public holidays. The workday consists of 8 hours. The command, at their discretion, can revise the work schedule between the hours of 0600 – 1800 in order to meet training requirements so long as the core hours do not exceed 8 hours per day or create situations requiring shift-differential or other pay rates outside established normal working hours. Additionally, Instructors shall be required to travel and travel is anticipated to be conducted outside of the Gulfport area.

5.1 FEDERAL GOVERNMENT HOLIDAYS:

- | | |
|-----------------------------------|-----------------------|
| a. New Year's Day | 1st day of January |
| Martin Luther King Jr.'s Birthday | 3rd Monday of January |

Presidents Day	3rd Monday of February
Memorial Day	Last Monday of May
Juneteenth Day	19 th day of June
Independence Day	4th day of July
Labor Day	1st Monday of September
Columbus Day	2nd Monday of October
Veterans Day	11th day of November
Thanksgiving Day	4th Thursday of November
Christmas Day	25th day of December

- b. When one of the above designated legal holidays falls on a Sunday, the following Monday will be observed as a legal holiday. When a legal holiday falls on a Saturday, the proceeding Friday is observed as a legal holiday. This list of holidays relates to Government duty days and is not intended to supplement or otherwise alter the provisions of any Wage Determination regarding applicable paid holidays.
- c. It is understood and agreed between the Government and the Contractor that observance of such days by Government personnel shall not be a reason for an additional period of performance, or entitlement of compensation except as set forth within the contract. In the event the Contractor's personnel work during the holiday, the Contractor may reimburse them; however, no form of holiday or other premium compensation will be reimbursed either as a direct or indirect cost, other than their normal compensation for the time worked, unless stipulated otherwise. This provision does not preclude reimbursement for authorized overtime work if applicable.
- d. When the Department of Defense grants excused absence to its employees, the Contractor agrees to continue to provide sufficient personnel to perform critical tasks already in operation or scheduled and shall be guided by the instructions issued by the Contracting Officer (KO) or the Contracting Officer's Representative (COR). Changes in employee work schedules shall comply with the terms and conditions of the contract, to include payment provisions. Contract workers will be allowed to telework during base closures for natural disasters and/or national security issues. If telework cannot be accomplished, then the contract worker will be entitled to regular pay for the period of closure.
- e. If Government personnel are furloughed, the Contractor shall contact the KO or the COR to receive direction. It is the Government's decision as to whether the contract price/cost will be affected as a result of Government shutdown and/or furloughed Government employees. In the event of a Government shutdown or furloughed Government employee(s) impacts contract price/cost, a negotiated settlement will be reached as deemed appropriate by the KO.

6.0 PERIOD OF PERFORMANCE:

See SF-1449 schedule.

7.0 PLACE OF PERFORMANCE: The normal place of performance is:

Naval Construction Training Center, 5510 CBC 8th Street, Gulfport, MS. 39501-9040
BLDG #s: 46, 47, 49, 50, 57, 67, 68, 69, 70, 305, 343, 344, 345, 346, 360, 363, 372, 363, 372, 376, 385B, 386, 438, 441, and 442.

8.0 TYPE OF CONTRACT: The Government will award a Firm-Fixed Priced Contract.

8.1.0. PHASE IN/PHASE OUT PERIOD: The Government anticipates to make award fourteen (14) days (i.e., two calendar weeks) ahead of the performance start date to allow for a phase in/phase out period to minimize any decreases in productivity and to prevent possible negative impacts on additional services. Phase in costs shall be incorporated into CLIN 0001.

8.1.1. PHASE IN PERIOD: During the phase in period:

- a. The Contractor shall check in to their respective commands, obtain CACs and permissions for Navy Marine Corps Intranet (NMCI) accounts, and required systems access.
- b. The Contractor shall conduct a turnover with their incumbent counterparts, to include but not limited to a walkthrough of processes, introductions to points of contacts, and inventory.
- c. One (1) week prior to the start of the period of performance, resumes for all new hires must be submitted to the COR for review of experience and qualifications.

8.1.2. PHASE OUT PERIOD

- a. The Contractor shall provide an electronic copy of a comprehensive phase out plan for approval of the KO and COR NLT 30 calendar days prior to contract expiration. The plan shall at a minimum identify a training program and a date for transferring responsibilities for each division of work described in the plan.
- b. The Contractor shall provide sufficient experienced personnel during the phase-in and phase-out period to ensure that the services called for by this contract are maintained at the required level of proficiency.
- c. The Contractor shall in good faith work with the successor in transitions and clarification of phase out services.

9.0 WORK ENVIRONMENT AND PHYSICAL DEMANDS

Work environment is in a classroom setting and outside project areas. Outside training projects are conducted year-round and will require exposure to extreme weather conditions. Instruction both in the classroom and outside environment required prolonged period of standing. Instructors shall maintain control and be responsible for the safety and welfare of students at all times during the training process.

10.0 TRAVEL EXPENSE: Travel may be required in support of this contract. Travel expenses incurred by the Contractor for authorized travel shall be reimbursed by the Government under the Travel Line Item in the contract. All travel required during the performance of this contract shall be approved in advance by the Government POC and shall adhere to the Federal Travel Regulations (for travel in 48 contiguous states), the Joint Travel Regulations, Volume 2, DOD Civilian Personnel, Appendix A (for travel to Alaska, Hawaii, Puerto Rico, and U.S. Territories and possessions). The Contractor is encouraged to obtain federal discounts to the maximum extent practical. If applicable, the Government will issue a letter of identification so that Contractor personnel can use Bachelor or Visiting Officer Quarters in the course of official travel. The Contractor will be authorized to travel within the funded travel limitations of this contract on a not-to-exceed (NTE) basis, subject to advance approval by the Government's POC. The Contractor shall obtain approval from the Government's POC prior to initiating any travel. The Contractor shall notify the Government's POC when travel funds expended reach 80% of the funded amount. The Government's liability for reimbursement of travel expenses is limited to the funding available under the Travel Line Item of the contract. The contractor shall estimate \$15,000 for travel per year to complete this effort inclusive of any applicable indirect charges including G&A.

11.0 GENERAL SAFETY AND HOUSEKEEPING: Contractor personnel shall observe and adhere to all applicable safety rules and regulations. Instructors shall be responsible for the general cleanliness of classroom and outside project areas.

12.0 NON-PERSONAL SERVICE STATEMENT: Contractor management shall ensure that personnel properly comply with the performance work standards outlined in the Performance Work Statement. Contractor personnel shall perform their duties independent of, and without the supervision of, any Government official or other Defense Contractor. The tasks, duties, and responsibilities set forth in the contract may not be interpreted or implemented in any manner that results in any Contractor employee creating or modifying Federal policy, obligating the appropriated funds of the United States Government, overseeing the work of Federal employees, providing direct personal services to any Federal employee, or otherwise violating the prohibitions set forth in Parts 7.5 and 37.1 of the Federal Acquisition Regulation (FAR). The Government will control access to the facility and will perform the inspection and acceptance of the completed work.

13.0 PHYSICAL SECURITY: The Contractor shall be responsible for safeguarding all Government equipment, information and property provided for Contractor use IAW OPNAVINST 5530.14E CH-3, Navy Physical Security and Law Enforcement Program. At the close of each work period, Government facilities, equipment and materials shall be secured.

14.0 EMPLOYMENT OF FEDERAL EMPLOYEES: The Contractor shall not knowingly employ any person who is a U.S. Government employee if employing that person would create a conflict of interest. Additionally, the Contractor shall not knowingly employ any person who is an employee of the Government, either military or civilian, unless such person seeks and receives written approval according to DoD 5500.7-R, Joint Ethics Regulations by the individual's commander or director. A copy of the authorization will be provided to the COR. In addition, the Contractor is prohibited from employing Government Quality Assurance Representatives whom the Contractor knows or should have known are responsible for monitoring any contracts/subcontracts awarded to the service provider.

15.0 CONTRACTOR ADVERTISING: The Contractor shall not place or display advertising of any kind on Government property.

16.0 EMERGENCY SERVICES: The Contractor shall have competent personnel trained and capable of dealing with minor personnel injuries. Contractor personnel shall immediately notify their supervisor of any accident requiring emergency medical treatment. The Contractor shall, in turn, notify the COR within 30 minutes or as soon as practicable. Emergency medical treatment and services for Contractor personnel is the responsibility of the Contractor.

17.0 PERSONNEL SAFETY: The Contractor shall immediately correct all safety deficiencies upon notification of the deficiencies by the KO, designated representative or COR, and shall notify the KO of the corrective action to be taken.

18.0 HEALTH PROTECTION CONTINGENCY PLAN: The Contractor shall possess the ability to operate in austere environment at the following Health Protection levels when implemented by the Base Commander.

HPCON Level Purpose: Each HPCON corresponds to the increased risk from the spread of infectious diseases (viruses) representing elevated risks of morbidity and mortality. The Contractor must be postured to respond to the below HPCON levels.

HPCON A - Limited: Health alert. Communicate risk and symptoms of health threat with employees; review plans and preparation.

HPCON B - Moderate: Strict hygiene (no handshaking, wipe commonly used items). If exposed, have employees self-isolate. Maximize use of telework for eligible personnel.

HPCON C - Substantial: Social distancing; limit or cancel in-person meetings, gatherings, temporary duty assignments.

HPCON D - Severe: Restriction of movement (quarantine), mass evacuation, and mass decontamination-
Contractor services not required unless given direction from the Contracting Officer (KO).

19.0 SECURITY REQUIREMENT

Instructor personnel must obtain a favorable determination from an investigation to T3. Work under this contract requires access to personally identifiable information (PII) and information protected by the Privacy Act of 1974. In addition to the security requirements below, Contractors performing work under this contract shall meet the following criteria: Per SECNA V M-5510.30, all individuals with access to PII or Privacy Act information shall be US Citizens; therefore, US Citizenship is a requirement. In all cases contract personnel shall meet eligibility requirements for a position of trust at a minimum. The Contractor shall comply with all applicable DoD security regulations and procedures during the performance of this contract. Contractor shall not disclose and shall safeguard procurement sensitive information, computer systems and data, privacy act data, sensitive but unclassified (SBU) information, classified information, and all Government personnel work products that are obtained or generated in the performance of this contract. Contractor personnel are required to have National Agency Check, Local Agency

Check and Local Credit Check (NACLC) investigation at a minimum in accordance with DoD Instruction 8500.2. Local Agency Check and Local Credit Check shall be submitted and results received prior to commencement of work.

NO FOREIGN NATIONAL WILL BE EMPLOYED ON THIS GOVERNMENT CONTRACT.

AN "UNFAVORABLE" OR "NO DETERMINATION" ADJUDICATION OF THE CONTRACTOR PERSONNELS INVESTIGATION WILL RESULT IN IMMEDIATE TERMINATION OF ACCESS TO THE WORKSPACE, GOVERNMENT COMPUTER/INFORMATION TECHNOLOGY ASSETS AND OFFICIAL RECORDS.

20.0 POST AWARD CONFERENCE/PERIODIC PROGRESS MEETINGS: The Contractor agrees to attend any post award conference convened by the contracting activity or contract administration office IAW FAR Subpart 42.5, Post Award Orientation. The Contracting Officer (KO), COR, and other Government personnel, as appropriate, may meet periodically with the Contractor to review the Contractor's performance. At these meetings, the KO will apprise the Contractor of how the Government views the Contractor's performance and the Contractor will apprise the Government of problems, if any, being experienced. Appropriate action shall be taken to resolve outstanding issues. These meetings shall be considered into the overall contract price.

21.0 AT LEVEL 1 TRAINING: All Contractor personnel, including subcontractor personnel, requiring access to Navy installations, facilities, or controlled access areas shall complete Antiterrorism Level I awareness training within five (5) calendar days after contract start date or effective date of incorporation of the requirement into the contract, whichever applies. The Contractor shall submit Certificates of completion for each affected Contractor personnel and Subcontractor personnel to the COR (or to the KO, if a COR is not assigned) within five (5) calendar days after completion of training by all personnel and Subcontractor personnel on a recurring annual basis. AT Level I awareness training is available at the following site: <https://jko.jten.mil/courses/AT-level1/launch.html>. If access to a computer is not available, the unit's Level II Anti-terrorism Officer (ATO) will conduct AT Level I training for the Contractor and personnel within five (5) calendar days after contract start and maintain a copy of the attendance roster for one year. Any Contractor personnel hired after contract start shall be required to receive AT Level I training within five (5) calendar days by the ATO. It will also be acceptable for the new hire to take the training online and present the training certificate to the ATO within three (3) calendar days. AT Level I training is an annual requirement with the 12-month period starting on the date of initial training and re-certification NLT the last day of the 12 month period. If the requiring activity does not have an ATO, the first ATO in the chain of command will conduct this training.

22.0 ACCESS AND GENERAL PROTECTION/SECURITY: Policy and Procedures. Contractor and all associated subcontractor personnel shall comply with applicable installation, facility and area commander installation/facility access and local security policies and procedures (provided by Government representative). The Contractor shall also provide all information required for background checks to meet installation access requirements to be accomplished by installation Provost Marshal Office, Director of Emergency Services or Security Office. Contractor workforce shall comply with all personal identity verification requirements as directed by DoD, Department of the Navy (DoN) and/or local policy. In addition to the changes otherwise authorized by the changes clause of this contract, should the Force Protection Condition at any individual facility or installation change, the Government may require changes in Contractor security matters or processes.

ACCESS TO FEDERAL FACILITIES

Per HSPD-12 and implementing guidance, all Contractor personnel working at a federally controlled base, facility or activity under this clause shall require a DoD CAC. When access to a base, facility or activity is required Contractor employees shall in-process with the Command's Security Manager upon arrival to the Command and shall out-process prior to their departure at the completion of the individual's performance under the contract.

23.0 DEFENSE BIOMETRIC IDENTIFICATION SYSTEM (DBIDS)

The Defense Biometric Identification System (DBIDS) is a DoD-owned and operated system developed by Defense Manpower Data Center as a force protection program to manage personnel identity and access at DoD installations. DBIDS is a network database system designed to easily verify access authorization of personnel entering military installations by using barcodes and fingerprint biometric identifications.

To improve management and force protection at Navy installations, the Navy is transitioning from using the Navy Commercial Access Control System (NCACS) to the Defense Biometric Identification System (DBIDS) for Contractors and vendors requiring access to an installation at no cost to them. The transition will begin 17 April and individuals will have up to 180 days to obtain the permanent card. After August 14, 2017, NCACS cards will no longer be accepted.

In order to obtain base access, an individual needs to acquire DoD sponsorship, have a thorough identity check, be properly vetted, and have a legitimate reason for base access. Identity checks require a passport or a Real ID Act compliant state driver's license. Vetting occurs when the individual's background and ID are compared against authoritative criminal justice data bases, and the individual has a letter or official document from the sponsoring organization which articulates the reason for access. When the above criteria are satisfactorily met, DBIDS credentials are issued.

NCACS cardholders will have 120 days from April 17, 2017 to obtain a temporary DBIDS paper pass. After the applicant obtains their DBIDS paper pass, they will have an additional 180 days to obtain an actual DBIDS card at no cost. Those requesting new access onto installations will receive the DBIDS card at the same time they are initially approved for access. After August 14, 2017, NCACS cards will no longer be accepted for installation access. For more information <https://www.cnmc.navy.mil/Operations-and-Management/Base-Support/DBIDS/>.

24.0 TOOLS AND EQUIPMENT

All Contractors will be provided desk, phone, computer/laptop, and office supplies for use to perform duties. The Heavy Equipment Mechanics will be provided hand/power tools and equipment used in the mechanical trade, including but not limited to torque wrenches, brake tools, gear pullers, compression testers, vacuum analyzers, electric circuit testers, tachometers, brake lathes, diagnostics equipment, etc.

25.0 CONTRACTING OFFICER REPRESENTATIVES (COR) AND ALTERNATE COR

The COR and Alternate COR for this contract will be
PROVIDED AT TIME OF AWARD

The Surveillance and Performance Monitoring (SPM) module in the Procurement Integrated Enterprise Environment (PIEE) [<https://piee.eb.mil/piee-landing/>] for nomination, tracking, documentation, and management of CORs will be used. The COR monitors all technical aspects of the contract and assists in contract administration. The COR is authorized to perform the following functions: Assure that the Contractor performs the technical requirements of the contract; perform inspections necessary in connection with contract performance; maintain written and oral communications with the Contractor concerning technical aspects of the contract; issue written interpretations of technical requirements, including Government drawings, designs, and specifications; monitor Contractor's performance and notify both the KO and Contractor of any deficiencies; coordinate availability of Government equipment furnished; and provide site entry of Contractor personnel. A letter of designation issued to the COR, a copy of which is sent to the Contractor, states the responsibilities and limitations of the COR, especially with regard to changes in cost or price, estimates or changes in delivery dates. The COR is not authorized to change any of the terms and conditions of the resulting contract.

26.0 QUALITY CONTROL

Quality Control is the responsibility of the Contractor. The Contractor shall be responsible for the delivery of quality services to the Government in accordance with (IAW) the terms and conditions contained in Federal Acquisition Regulation (FAR) Subpart 52.212-4 entitled, "Contract Terms and Conditions - Commercial Items" and any other applicable -clauses pertaining to quality control.

The Contractor shall develop, implement and maintain an effective Quality Control System which includes a written Quality Control Plan (QCP). The QCP shall implement standardized procedure/ methodology for monitoring and documenting contract performance to ensure all contract requirements are met. The Contractors' QCP shall contain a systematic approach to monitor operations to ensure acceptable services are provided to the Government. The QCP, as a minimum, shall address continuous process improvement; procedures for scheduling, conducting and documentation of inspection; discrepancy identification and correction; corrective action procedures to include procedures for addressing Government discovered non-conformances; procedures for root cause analysis to identify the root cause and root cause corrective action to prevent re-occurrence of discrepancies; procedures for trend

analysis; procedures for collecting and addressing customer feedback/complaints.

Corrective Actions. If at any time, it is determined by the KO that the quality control system, personnel, instructions, controls, tests, or records are not providing results that conform to contract requirements, action shall be taken by the Contractor to correct the deficiency. If a Contract Deficiency Report (CDR) is issued, the Contractor shall develop a Corrective Action Plan (CAP) that identifies the root cause, Corrective Action (CA) for the specific non-conformance, and prevent recurrence, including the timeline for completion.

27.0 QUALITY ASSURANCE

The Government will evaluate the Contractor's performance under this contract IAW the Quality Assurance Surveillance Plan (QASP). This plan is a Government only document primarily focused on what the Government must do to assure that the Contractor has performed IAW the requirements of the contract. It defines how the performance standards will be applied, the frequency of surveillance, and the minimum acceptable deficiency rate(s) as illustrated within the PWS and Performance Requirements Summary. All performance ratings will use (Exceptional, Very Good, Satisfactory, Marginal, or Unsatisfactory), as defined in FAR subpart 42.15, Contractor Performance Information. The Government reserves the right to conduct compliance surveillance of any contractual requirement of this acquisition.

28.0 PERFORMANCE REQUIREMENT SUMMARY (PRS)

The performance standards for this PWS are stated in the PRS below:

TASK	Performance Objective	Performance Standards	Frequency	Acceptable Quality level (AQL)	Surveillance Method
3.1.1	Respond to all correspondence pertaining to course issues. Receive phone calls and visitors, answer inquiries concerning scheduling courses.	All inquiries will be handled in a prompt, courteous and professional manner	Continual	100% of inquiries received by the contractor will be responded to. The number of inquiries responded to that meet with customer satisfaction will vary depending on the complexity and nature of the inquiry.	Customer feedback is the primary method of surveillance.

3.1.2	Draft and submit schedules to NCTC designated staff to be used in the execution of Naval Technical Training conducted at NCTC Gulfport and off-site facilities.	Scheduling will consist of all course related material, rosters, and instructors assigned and will be made available in advance of course start date.	Daily	The acceptable level is 100% of courses scheduled.	Customer feedback is the primary method of surveillance.
3.1.3	Schedule and conduct weekly meetings related to NCTC Gulfport, Schoolhouse Departments, D1 and F1 course coordinators, the Naval Construction Group Two (NCG2) and tenant Naval Mobile Construction Battalion (NMCB) training personnel	All scheduled meetings pertaining to course scheduling will be attended. Scheduling conflicts identified will be addressed promptly and resolved in a manner as to not disrupt ongoing courses.	Continual	Meetings scheduled will be attended on time. Scheduling conflicts, problems, or issues will be identified and resolved within 48 hours.	Customer feedback is the primary method of surveillance
3.1	The contractor shall provide NCTC Gulfport with the required amount of qualified instructors to teach Apprentice, Journeyman, and Advanced courses at Naval Construction Battalion Center Gulfport, MS. and off site locations as directed.	Courses will be taught as scheduled IAW the course syllabus and completed within the scheduled timeframe. All areas identified in the course outline will be thoroughly covered. Remedial training will be provided as required.	Continual	Training shall be conducted eight hours a day five days a week for the length of the course. The acceptable level is 100% of courses scheduled will be taught in their entirety. The target quality of the training provided is 100%. The actual quality level is derived from student feedback upon completion of the course. Improvements or changes to the course will be reviewed by NCTC based on student feedback and instructor evaluation.	Customer feedback, instructor evaluations, and student critiques are the primary method of surveillance

29.0 AUTHORIZED CHANGES ONLY BY THE CONTRACTING OFFICER

(a) Except as specified in paragraph (b) below, no order, statement, or conduct of Government personnel who visit the Contractor's facilities or in any other manner communicate with Contractor personnel during the performance of this contract shall constitute a change under the "Changes" clause of this contract.

(b) The Contractor shall not comply with any order, direction or request of Government personnel unless it is issued in writing and signed by the Contracting Officer, or is pursuant to specific authority otherwise included as a part of this contract.

(c) The Contracting Officer is the only person authorized to approve changes in any of the requirements of this contract and notwithstanding provisions contained elsewhere in this contract, the said authority remains solely with the Contracting Officer. In the event the Contractor effects any change at the direction of any person other than the

Contracting Officer, the change will be considered to have been made without authority and no adjustment will be made in the contract price to cover any increase in charges incurred as a result thereof. The address and telephone number of the Contracting Officer is:

NAME: Contracting Officer
 ADDRESS: 110 Yorktown Ave 3rd Floor, Jacksonville, FL 32212
 TELEPHONE: (564) 230-2273
