

STATEMENT OF WORK

1. Objective/Requirements

NASA seeks to modernize and provide future state roadmap for the NASA Integrated Operations Center (NIOC) to enhance enterprise-level capabilities for network and security operations. The objective is to implement a scalable, secure, and efficient architecture that supports mission-critical operations and aligns with NASA OCIO's modernization goals.

2. Scope of Work

The contractor shall provide services to design, implement, and validate modernization efforts for the NIOC. This includes:

- Assessing current state operations and infrastructure.
- Developing a modernization roadmap for future state NIOC (integrated tooling, gray space monitoring, predictive/behavioral analytics, etc).
- Implementing initial modernization phase (1 WYE) and expanding upon successful demonstration.
- Ensuring compliance with Federal and NASA operational and security standards.

3. Description of Technical Requirements

- Architecture Design: Develop a modern, integrated NIOC architecture.
- Monitoring Enhancements: Implement advanced monitoring and analytics capabilities.
- Automation: Introduce automation for routine tasks and alerts.
- Scalability: Ensure the solution can expand beyond initial implementation.
- Compliance: Adhere to Federal and NASA cybersecurity and operational policies.
- Reach back: Provide benefits of lessons learned and SMEs from similar Federal Agency engagements.

4. Government Furnished Equipment and/or Information

NASA will provide:

- Current state policies, procedures, drawings, diagrams, etc., for project baseline.
- Access to all facilities required for investigation.
- Access to personnel as needed for project performance.
- Access to GFE as deemed necessary.

- Work Location: Onsite at Marshall Space Flight Center, Huntsville, AL.
- Travel: Some travel required.

5. Period of Performance

Twelve (12) months from contract award date, with 1 WYE, expanding after successful demonstration.

6. NASA Technical Point of Contact

Name: Jon McAfee

Email: jon.mcafee@nasa.gov

Phone: 256-426-8652

7. Place of Performance

Marshall Space Flight Center
4200 Rideout Road
Bldg 4207, RM 111
Huntsville, AL 35803
