(Signature of person authorized to sign)			

SECTION SF 30 BLOCK 14 CONTINUATION PAGE

SUMMARY OF CHANGES

Block 14 (Description of Amendment/Modification): The purpose of this amendment is to:

1. Extend the proposal due date to 5/7/2026.

2. Respond to the following solicitation questions:

Q1: The note for First Article Testing (FAT) says "2 Samples Govt Tested IAW 6894520 Rev E." 6894520 is the fabrication spec. What items is the Government seeking for First Article?

A1: The Critical Fab Spec (6894520) indicates QTY 2 cable assemblies (6894510) should be provided for FAT IAW Table II. This is outlined in Section 4.2.1.1 of 6894520. Before manufacturing QTY 2 cable assemblies, QTY 5 cable segments shall be fabricated (minimum 3 feet in length) to certify tooling and fabrication practices as defined in Section 3.4.1. This is further outlined in Sections 3.4.1.1 through 3.4.1.4. The fabrication and inspection of these 5 components is the responsibility of the vendor. Following this, an inspection report/Certificate of Conformance shall be made available for Government verification. The 5 components are not to be delivered to any Government facility.

Q2: What does "Estimated Days: 360" in the FAT description refer to? Should we expect 360 days for the Government to conduct FA testing? If not, what is the approximate time frame for this?

A2: This refers to the deadline for when the QTY 2 FAT units are due to the testing facility. This is defined within the PAS: "First Article: Due within 360 days of contract award." Government testing/approval is estimated to take 240 days (ETSD: 180, ISEA: 30, PCO: 30).

Q3: Will the Government perform all tests per 6894520, or is the vendor supposed to quote test performance?

A3: For the QTY 2 FAT samples (complete cable assemblies 6894510), the Government performs the testing within Table II of 5894520. The contractor should perform testing outlined within Table V prior to submittal of the samples to the Government. Table V is 100% testing that every cable undergoes. The contractor should also perform inspection of the QTY 5 cable segments referenced above IAW Sections 3.4.1.1 through 3.4.1.4. Please note that all testing items are Not Separately Priced (NSP) for this solicitation, so all testing costs must be amortized within the deliverable unit price when preparing the FAT-required price.
