

Advanced Research Announcement (ARA) with Calls

Overview Information

NAICS Code: The NAICS Code for this acquisition is 541715 and the small business size is 1,000 employees.

Federal Agency Name: Air Force Research Laboratory, AFRL/RV Sensors Directorate

ARA Title: Trusted and Elastic Military Platforms and Electronic Warfare (EW) System Technologies (TEMPEST)

ARA Type: Initial Announcement

ARA Number: FA8650-20-S-1958

THIS IS AN ADVANCED RESEARCH ANNOUNCEMENT (ARA) THAT WILL SOLICIT WHITE PAPERS/PROPOSALS THROUGH CALLS. THIS ANNOUNCEMENT POSTS THE BASIC ARA AND DOES NOT REQUEST SUBMITTALS AT THIS TIME. THE BASIC ARA WILL REMAIN OPEN FOR CALLS UNTIL 31 March 2027.

Calls (One-Step or Two-Step, See Section IV for instructions):

Over the period of this ARA, calls may be issued to request white papers or proposals for specific area(s) of interest. It will be determined on a call by call basis whether or not the announcement is for white papers (two-step; requesting white papers, with potential to later request proposals) or proposals (one-step; requesting proposals). Each call will contain specific requirements and pertinent information. White papers/proposals submitted in response to the calls will be accepted as specified in the individual calls and evaluated in accordance with the White Paper/Proposal Review Information (Section V1 and V2). Offerors should monitor the SAM.gov website in the event this announcement is amended or calls are issued.

White Paper/Proposal Due Date and Time:

ONE-STEP Call

- PROPOSAL DUE DATE AND TIME: To be determined (TBD) on individual calls.

TWO-STEP Call

- First Step: WHITE PAPER DUE DATE AND TIME - TBD on individual calls.
- Second Step: PROPOSAL DUE DATE AND TIME - To be provided in the "Requests for Proposals (RFP)" sent to offerors whose white papers are considered to meet the needs of the Air Force (AF).

NOTE: White Paper/proposal receipt after the due date and time shall be governed by the provisions of FAR 52.215-1(c)(3).

Submission: White Papers and proposals must be submitted to the Contracting Point of Contact (POC)s indicated in the individual call.

Annual Updates: It is noted, for ease of reference, that this ARA will be republished at yearly intervals with required updates.

Solicitation Request: Air Force Research Laboratory, Sensors Directorate, Wright-Patterson Air Force Base *is not* soliciting white papers or proposals on the overarching effort described below. Individual calls, within scope of the ARA, will be issued that detail specific requirements. Unless otherwise stated in an individual call, all other requirements listed within this ARA are considered applicable.

Type of Contract/Instrument:

The Air Force reserves the right to award contract(s) and/or Other Transaction(s) (OT) pursuant to 10 U.S.C. 4023 or 10 U.S.C. 4022, based on the instrument deemed most appropriate. It is anticipated that contracts awarded under this ARA will generally be FAR based Cost-Reimbursement, Indefinite Delivery/Indefinite Quantity (IDIQ), Multiple Award Fair Opportunity, and Other Transaction type awards. If the offeror chooses to propose an OT under the authority of 10 U.S.C. 4022 offeror should ensure all applicable regulations are followed. Award type will be identified under each call.

NOTE: Cost reimbursable contracts require successful offerors to have an accounting system considered adequate by the Defense Contract Management Agency (DCMA) for tracking and costs applicable to the contract.

NOTE: If proposing a Federal Acquisition Regulation (FAR) based contract, the FAR clause references in this ARA shall apply. This announcement incorporates FAR and supplement provisions and clauses by reference. The full text of these provisions and clauses can be found at acquisition.gov If proposing an Other Transaction (OT) these FAR references and clauses would not apply. The terms and conditions of an OT will be developed and negotiated on a case-by-case basis.

Estimated Program Cost: The total estimated program value is \$808,505,000.00 with multiple awards ranging from \$1,000,000.00 to \$200,000,000.00 (the AF

reserves the right to exceed amounts if determined to be in the best interest of the Government).

Anticipated Number of Awards: The Air Force anticipates awarding multiple awards for this announcement. However, the Air Force reserves the right to award zero, one, or more Other Transactions and/or contracts, for all, some or none of the solicited effort based on the offeror's ability to perform desired work and funding fluctuations. There is no limit on the number of OTs or contracts that may be awarded to an individual offeror.

Brief Program Summary: AFRL/RYW has a need to investigate and develop methodologies, tools, techniques, and capabilities to identify susceptibilities and mitigate vulnerabilities in avionics systems, protect those systems against cyber-attack, provide simulation capabilities required to develop, mature and transition advanced sensor and avionics technologies, develop platform architecture technologies that enable revolutionary and agile capabilities, and expand emerging open system architecture standards and approaches for existing and next-generation Air Force and DoD weapon systems in multi-domain environments. The goal is to explore new and emerging concepts related to development, integration, assessment, evaluation, and demonstration of cyber security, open system architecture (OSA), novel avionics and sensor technologies, and multi-domain technologies. For this solicitation, avionics is defined to include manned, unmanned, autonomous, and remotely piloted vehicles, on-board Intelligence, Surveillance, and Reconnaissance (ISR) systems, Electronic Warfare (EW) systems, munitions, and any equipment, component, or subsystem that could compromise mission assurance of the Air Force weapon system or tactical platform.

Communication Between Prospective Offerors and Government

Representatives: Dialogue between prospective offerors and Government representatives is encouraged until submission of proposals. Technical communication will be managed by the technical POC listed below. Discussions with any of the POCs shall not constitute a commitment by the Government to subsequently fund or award any proposed effort. No guidance related to technical approach will be given. However, questions related to the objectives of the effort or prior similar efforts may be answered. Only Contracting Officers are legally authorized to commit the Government. If there is any doubt as to whether a response provides a competitive advantage, the answer will be posted publicly via an amendment to this ARA on SAM.gov. For offerors whose white papers are not selected to continue to proposal stage, notification and feedback will be managed by the Contracting POCs.

Address technical questions to the Technical POC:

Primary Technical POC

Clifton Bullmaster, Program Engineer,
AFRL/RYPD
2241 Avionics Circle, WPAFB, OH 45433
(937) 713-8249 or
clifton.bullmaster@us.af.mil

Secondary Technical POC

Ryan Bone, Program Engineer,
AFRL/RYPD
2241 Avionics Circle, WPAFB, OH 45433
(937) 713-8398 or
ryan.bone.3@us.af.mil

Address contracting questions to the Contracting POCs:

Richard Bailey, Contracting Officer, AFRL/RYSW
2130 Eighth Street, Bldg. 45, WPAFB, OH 45433
(937) 713-9919 or richard.bailey.26@us.af.mil

Tim Matelski, Contract Negotiator, AFRL/RYSW
2130 Eighth Street, Bldg. 45, WPAFB, OH 45433
(937) 713-9848 or timothy.matelski@us.af.mil.

Full Text Announcement

- I. **Program Description:** Air Force Research Laboratory, Sensors Directorate (AFRL/RYSW) is announcing its intent to solicit proposals under this "ARA with Calls". Solicitations for white papers/proposals will be accomplished via calls. The calls will encompass the following effort:

1. **Statement of Objective/Description of Technical Area(s):**

The TEMPEST program will investigate, develop, mature, prototype and demonstrate methodologies, tools, techniques, and capabilities to identify susceptibilities and mitigate vulnerabilities in avionics systems, protect those systems against cyber-attack, provide simulation capabilities required to develop, mature and transition advanced avionics and sensor technologies, develop platform architecture technologies that enable revolutionary and agile capabilities, and expand emerging open system architecture (OSA) standards and approaches for existing and next-generation Air Force and Department of Defense (DoD) weapon systems in multi-domain environments.

Calls issued against this ARA will:

- Develop experimental programs that prototype, integrate and demonstrate promising cyber security and cognitive avionics technologies to increase our platforms' and weapon systems' survivability and resiliency in the face of multi-domain threats and attacks.
- Develop, experiment, prototype and integrate, in a laboratory environment, new cognitive, cyber hardened and high speed, flexible system architectures.
- Cooperate across the Air Force, DoD, and the Intelligence Community, to develop experimental programs that integrate advanced cyber security and cognitive sensor technologies, techniques, systems and developmental algorithms, new cyber hardened and high speed, flexible system architectures, and advanced avionics, sensors, processing, and exploitation capabilities focused on Command, Control, Communications, Computers, Intelligence, Surveillance and Reconnaissance (C4ISR) onto various weapon systems to create revolutionary capabilities.
- Develop experimental programs that implement OSA-based reference

architectures to demonstrate the cost and time benefits of applying OSA techniques and align multiple open architecture (OA) standards to prove the interoperability of various standards. Apply and demonstrate tools, technologies, and techniques to more rapidly document, model, simulate, and analyze new OSA-based system capabilities to determine the benefits for individual platforms and the warfighter.

Calls to be issued against the TEMPEST ARA must a) fall under at least one of the Technical Areas of Interest detailed in paragraph I.1.a. below, and b) involve at least one of the types of work detailed in paragraph I.1.b. below.

a. Technical Areas of Interest:

1) Technologies for Assessing Platform Cyber Security:

Focuses on the design and development of technologies that provide tools to test and experimentation (T&E) units and Cyber units (such as Mission Defense Teams or Red Teams) to assess cyber vulnerabilities in weapon systems with embedded computers.

2) Technologies for Cyber-Hardened Platforms:

Focuses on the design and development of technologies that reduce weapon system vulnerability to cyber-attack.

3) Technologies for Cyber-Resilient Platforms:

Focuses on the design and development of technologies that counter both known and unknown attack vectors that occur during mission operations to maintain mission capability in cyber contested environments.

4) Agile System Architecture Development and Integration:

Focuses on the design/procurement, development and demonstration of tools, technologies, and advanced component prototypes to enable affordable, rapid development and integration of new and emerging warfighting capability. Characteristics of these systems include, but are not limited to: capable of performing multiple functions (e.g., radar, communications, and electronic warfare), capable of fusing different types of data collections (i.e., multiple intelligence (multi-INT)), inherently cyber secure and/or resilient to cyber-attack, and compliant with open system architecture standards and approaches.

5) Open System Architectures for Trusted and Agile Platforms:

Focuses on investigation, through analysis, demonstration and advanced component prototyping, the viability and relevance of current and emerging open system architecture standards and approaches to enable new capability for cyber trusted and agile platforms. This technology area seeks to determine the viability of an OSA implementation prior to system design and development. This technical area shall identify technological advances in open system architecture standards, software, processing, and hardware to demonstrate the viability of modular open system architectures.

6) Technologies for Modeling & Simulation:

Focuses on the discovery, design and implementation of novel technologies to advance the state-of-the-art in modeling/simulation to faithfully represent transmitters, receivers, electronic systems, hostile and friendly radars, and radio frequency propagation algorithms for use with advanced models and simulations.

7) Technologies to Advance RF Simulation:

Focuses on defining simulation requirements for accurately demonstrating and evaluating sensor technologies. This technology area includes the design and implementation of prototype hardware (commercial or custom) and corresponding operating software tools to conduct demonstrations of radio frequency receiving or transmitting systems.

8) Techniques, methods and technologies for measuring sensor system performance:

Focuses on developing simulation techniques and methods to rapidly evolve and evaluate advanced sensors and electronic warfare (EW) technologies demonstrated in laboratory environments. Work under this technical area of interest will develop and employ M&S methods to specify requirements, define architectures, conduct design trades, and report assessment and demonstration results.

- b. Development, Experimentation, Test, Evaluation, Assessment, Prototyping, Integration, Ground and Flight Tests/Demonstrations, and Transition Efforts:** Various methods will be used to design, develop, prototype, test, evaluate and integrate technologies into systems and systems of systems. Individual calls under this solicitation may include some or all of the following activities and may tailor requirements as appropriate.

1) Technology Development:

The contractor shall develop, prototype, demonstrate and assess technologies and techniques within technical areas of interest defined in paragraph I.1.a. Supporting technologies, tools, techniques and methods required may be provided by the Government or designed by the contractor, and will vary by call. The contractor shall procure the development of software as required per call. Specific topics and requirements will vary by call.

2) Test-Bed Development:

The contractor shall design and develop technologies related to test beds for weapon platforms. Test beds are required to support the design, implementation, and test of technologies, concepts and methodologies foundational to other tasks in this ARA. Specific topics and requirements will vary by call.

3) Test & Integration with Other Programs:

The contractor shall integrate techniques and solutions developed as part of

this program as well as other solutions developed under separate contracted programs to produce robust solutions that address the requirements of this solicitation. Techniques and solutions need to address numerous vectors and technology gaps in avionics systems and, as a result, solutions that address different areas of interest will need to be integrated to produce an overall capability demonstration. This task will also apply, integrate, test, and evaluate these solutions relative to specific platforms as directed by AFRL/Ryw. Specific topics and requirements will vary by call.

4) Test, Integration & Application of Technologies:

The contractor shall integrate and apply technology as defined in paragraph I.1.a to prototype, Line Replaceable Units (LRUs), subsystems, systems or platforms. Specific requirements will vary by call. The contractor shall also perform system transition activities which may include, but are not limited to:

- Develop transition plans, perform and execute assessments, data collections, and/or modeling and simulation activities for application of technology to production units/systems(s).
- Participate in system deployment, technical troubleshooting, required equipment upgrades, training, and technological input as needed.
- Develop or procure software updates and maintenance for integration into operational systems.

5) Research Networks and Platforms:

The contractor shall develop, operate, and maintain research networks as necessary for tool prototype design, development, and evaluation. The contractor shall ensure the networks adhere to applicable security standards and meet requirements as designed in prototype and as required by AF policy. Specific requirements will vary by call.

6) Integrated Evaluation Methods:

The contractor shall develop real-time simulation methods and technologies to rapidly evolve and evaluate advanced sensors, EW technologies, and enhanced capabilities in an anti-access area denial (A2AD) environment. This may include development and employment of MS&A methods to define requirements, architectures, hardware and software design trades, costs, and advanced capabilities, and development, definition, and update of technology capability insertion roadmaps and plans based on operational requirements and assessment/demonstration results. Specific requirements will vary by call.

7) Operational Technology Demonstrations and Assessments:

The contractor shall conduct systems engineering, hardware-in-the-loop (HITL) simulation and open-air tests to evaluate and verify operational requirements for weapon systems being used by the USAF, Reserve USAF,

and ANG. This may require MS&A as part of a structured system engineering process to develop, integrate, mature, demonstrate, and transition advanced cyber, architecture, open systems and sensor technologies, conduct technology and system evaluations through studies, analyses, hardware and/or software prototyping in laboratory environments to assess technology candidates potential to satisfy operational requirements, to be determined per call. The contractor shall conduct operational threat assessments using techniques such as battlespace simulations, table top exercises or other methods and participate in working groups and analyze threat vectors as required per call.

8) Radio Frequency Synthetic Battlespace Simulation and Generation:

The contractor shall define simulation requirements for RF simulations to accurately demonstrate sensor technology advancements, system capability, and mission improvement. Required activities will vary by call and may include, but are not limited to:

- Conduct threat performance analyses to discover, define, and implement simulation technology into digital models and simulators. The contractor shall participate in threat working groups requiring access to classified intelligence data.
- Define and implement prototype hardware/software necessary to generate RF environments for advanced technology demonstrations. The contractor shall perform simulations and collect all data required to integrate, mature, and transition EW technologies.
- Develop software tools that support MS&A required for technology demonstrations. Software tools include improved simulation input translation tools (flight path generation, emitter development, and instrumentation scripts), visualization tools for simulation outputs, receiver and jammer evaluation analysis tools that adapt to different vendor output file formats, and improved software modules for RF simulators, to be determined per call.
- Develop closed-loop digital and RF models to demonstrate and assess adaptive, autonomous, or cognitive sensor systems and implement assessment measures to evaluate machine learning systems.

9) Design, develop and evaluate High Fidelity Models:

The contractor shall design, develop, and evaluate high-fidelity models of "red" and "blue" systems/technologies of interest such as, sensors, weapons, command and control algorithms and components, network links, and EW/IO systems and techniques. Required activities will vary by call and may include, but are not limited to:

- Participate in field-testing selected sensor systems to gather data to improve existing and new models.
- Design experiments to evaluate the performance of models, algorithms, and techniques developed under this research technical area.

- Modify, upgrade, integrate, and maintain MS&A frameworks, threat scenarios and software in the loop emulations.
- Use existing and new development models to evaluate, demonstrate and assess the capabilities of sensor and sensor platform technologies and EW/IO techniques.
- Perform laboratory and field experiments, studies, and analyses to support the design, development, and assessment of advanced EW, cyberspace and IO concepts and technologies to improve air survivability. Conduct the experiments, collect and reduce the data, assess the data and report the results.
- Conduct reverse engineering and analysis of threat systems/components and EW/IO concepts/technologies of interest.

2. **Within Scope Modifications:**

Potential offerors are advised that due to the inherent uncertainty of research and development efforts, awards resulting from this announcement may be modified during performance to make within scope changes, to include but not limited to, modifications that may increase overall contract ceiling amount.

3. **Deliverable Items:**

- a. Data Items: DD Form 1423-1 CDRLs will be utilized on contract awards. Applicable data items will be identified in each call. OTs will specify data items on a case-by-case basis.
- b. Software: Software deliverables are TBD per individual call, if applicable.
- c. Hardware: Hardware deliverables are TBD per individual call, if applicable.
- d. Other: TBD per individual call, if applicable.

4. **Schedule:**

- a. Overall Period of Performance: TBD per individual call.
- b. Data Items: TBD per individual call.
- c. Software: TBD per individual call.
- d. Hardware: TBD per individual call.

5. **Other Requirements:**

- a. **Program Security Classification:** It is anticipated that the majority of the awards will require Top Secret classification/safeguarding capability, but security classification will be determined for each award. A draft DD254 will not be attached to this ARA, but will be attached to individual calls against the ARA as required. If a DD254 is applicable, offerors must verify their Cognizant Security Office information is current with Defense Security Service (DSS) at

www.dss.mil.

- b. **OPSEC:** General Operations Security (OPSEC) procedures, policies and awareness are required in an effort to reduce program vulnerability from successful adversary collection and exploitation of critical information. OPSEC will be applied throughout the life cycle of the contract. The Critical Information List (CIL) and the RY OPSEC Plan will be provided upon request by AFRL/RYOY Information Protection Office. While working on the Government installation, OPSEC guidance and OPSEC training will be provided by AFRL/RYOY Information Protection Office. This training will ensure contractors are familiar with RY's CIL and RY's OPSEC Plan as it pertains to their contract. The contractor shall apply OPSEC in their management of their current program IAW AFI 10-701 Operations Security and WPAFB Supplement to AFI-10-701.
- c. **Program Protection Plan (PPP):** All DoD contractors (including subcontractors) shall supplement their current security practices by requiring any personnel involved in executing this contract where critical program information (CPI) has been identified to protect the CPI to the standards articulated in the Program Protection Plan and in accordance with DoDI 5200.39. Upon contract award, all identified DoD contractors (including subcontractors) shall acknowledge and meet the requirements stated by the Program Manager for the protection of CPI. The DoD contractor must immediately notify the U.S. Government upon the discovery of any nonconformance with CPI protection.
- d. **Export Control:** Information involved in this effort may be subject to Export Control (International Traffic in Arms Regulation (ITAR) 22 CFR 120-131, or Export Administration Regulations (EAR) 15 CFR 710-774). If effort is subject to export control, then a Certified DD Form 2345, Militarily Critical Technical Data Agreement, will be required to be submitted with proposal.
- e. **Export-Control Items:** As prescribed by DFARS 225.7901-4, DFARS 252.225-7048, "Export Controlled Item (Jun 2013)" is contained in this solicitation. This clause (or similar language) shall be contained in ALL resulting awards.
- f. **Safety:** The Contractor shall comply with all Air Force, federal, state, and local safety and environmental regulations. An approved safety plan in accordance with AFI 91-202 AFRL Supplement 1 shall be obtained before any experiment can be conducted at Wright-Patterson AFB and shall comply with all Air Force safety and environmental regulations. The contractor shall comply with system safety requirements contained in MIL-STD 882E, section 4, "General Requirements" for any deliverable systems or hardware and software interfaces with those components. The Contractor shall test and verify the safety-critical hardware and software for safety acceptance.
- g. **Contractor Performance Assessment Reporting System (CPARS):** Contractor Performance Assessment Reporting System (CPARS) will likely be applicable, but will be determined on a call by call basis in accordance with

FAR 42.1502 and DFARS 242.1502 (and CPARS Guide 2016, Section B, 2.0). Interim and final evaluations of contractor performance for contract awards will be prepared in accordance with DAFFARS 5342.1503. The final performance evaluation will be prepared at the time of completion of work. In addition to the final evaluation, interim evaluation(s) will be prepared annually. If an IDIQ contract is awarded as a result of a call, and CPARS will be conducted for each task order. Awardees will be requested to provide a POC to receive notifications of the opportunity to provide feedback. The contractor will be permitted 14 days to review the document and to submit additional information or a rebutting statement. If agreement cannot be reached between the parties, the matter will be referred to an individual one level above the Contracting Officer, whose decision will be final. Copies of the assessments, contractor responses, and review comments, if any, will be retained as part of the contract file, and may be used to support future award decisions for other procurements.

- h. **Science and Technology (S&T) Protection:** See Attachment 1: Security Risk Review – AFRLI 61-113. However, the Government may require the offeror to submit additional information &/or a mitigation plan for any identified S&T protection risks. If the Government determines the offeror failed to provide adequate additional information; or an acceptable mitigation plan; or it is determined the offeror's S&T protection approach is high risk & does not provide adequate protection of S&T information, the Government may reject the proposal & withdraw it from consideration for award.
 - i. **Overseas Performance:** TBD per individual call/award.
 - j. **Unique/Special Clauses:** TBD per individual call/award.
 - k. **Organizational Conflict of Interest (OCI):** TBD per individual call/award.
 - l. **Associate Contractor Agreement (ACA):** TBD per individual call/award.
 - m. **Options:** TBD per individual call/award.
 - n. **EVMS:** TBD on future Calls for each item.
 - o. **Ground and Flight Test:** TBD on future Calls for each item.
6. **Other Information:**
- a. **Government Furnished Property (GFP) Availability:** TBD per individual call.
 - b. **GFI/Software:** TBD per individual call/award.
 - c. **Base Support/Network Access:** Base Support/Network Access is anticipated and will be determined per individual call.
 - d. **Data Rights:** Data Rights will be determined per individual call. Data Rights desired by the contractor should be included with proposal submission as part of the Section K (Reps and Certs) attached to each individual Call.

The Air Force Research Laboratory is engaged in the discovery, development, and integration of warfighting technologies for our air, space, and cyberspace forces. As such, rights in technical data and NCS developed or delivered under this contract are of significant concern to the Government. The Government will therefore carefully consider any restrictions on the use of technical data,

NCS, and NCS documentation which could result in transition difficulty or less-than full and open competition for subsequent development of this technology.

In exchange for paying for development of the data, the Government expects technical data, NCS, and NCS documentation developed entirely at Government expense to be delivered with Unlimited Rights.

Technical data, NCS, and NCS documentation developed with mixed funding are expected to be delivered with at least Government Purpose Rights. Offers that propose delivery of technical data, NCS, or NCS documentation subject to Government Purpose Rights should fully explain how the data was developed at private expense. Specifically, offers must explain what technical data, NCS, or NCS documentation developed with costs charged to indirect cost pools and/or costs not allocated to a Government contract will be incorporated, how the incorporation will benefit the program, and address whether those portions or processes are segregable.

Offerors that propose delivery of technical data, NCS, or NCS documentation subject to Limited Rights, Restricted Rights, or Specifically Negotiated License Rights will be considered. Proposals should fully explain what technical data, NCS, or NCS documentation developed with costs charged to indirect cost pools and/or costs not allocated to a Government contract will be incorporated and how the incorporation will benefit the program and whether those portions or processes are segregable.

Offerors shall include the data rights assertions as required by DFARS 252.227- 7017, Identification and Assertion of Restrictions on the Government's Use, Release, or Disclosure of Technical Data or Computer Software. The assertions list will be included in Section K and due at time of

proposals. Assertions must be completed with specificity. Each assertion must identify both the data and each such item, component, or process listed. Nonconforming assertions lists will be rejected.

Terms used in this section are defined in the clauses at 252.227-7013, Rights in Technical Data-Noncommercial Items, and 252.227-7014, Rights in Noncommercial Computer Software and Noncommercial Computer Software Documentation.

THIRD PARTY SOFTWARE (COMMERCIAL AND NONCOMMERCIAL):

DFARS 252.227-7014(d) describes requirements for incorporation of third party computer software. Any third party software (commercial and noncommercial) to be incorporated into a deliverable must be clearly identified in the proposal. Prior to delivery of any third party software, the contractor will obtain an appropriate license for the Government, and the written approval of the Contracting Officer.

Any third party software to be delivered to the Government that are not reasonably identifiable at proposal submission, must still be approved by the contracting officer prior to incorporation into a system deliverable. This obligation to obtain pre-approval by the contracting officer, as described above, continues throughout contract administration.

The Government will neither accept nor execute a DD Form 250 for the software deliverables until the Contractor obtains from all third party software suppliers and/or vendors (Licensor) licenses that comply with the following terms and conditions for the Government (Licensee):

- 1) The license shall not subject the Government to liability that is indefinite or indeterminate, such as an indemnification clause, as it would constitute an obligation in advance or in excess of an appropriation and violate the Anti- Deficiency Act.
- 2) The license shall not create a contingent liability for the Government. This includes, but is not limited to: unilateral price increases, automatic assessment of charges, and automatic renewal of the license.
- 3) The license shall be governed by Federal Statutes, Case Law, and Federal Regulations, and shall not be subject to the laws or jurisdiction of any municipality, state, or foreign country.
- 4) The license shall not include non-substitution language that would preclude or limit the Government from using another vendor/reseller and/or product to fulfill Government requirements.
- 5) The license shall not comment on entitlement to attorney fees.
- 6) The Licensor shall not have the authority to unilaterally terminate the license. All remedies available shall be consistent with the Disputes Clause in the underlying basic contract.
- 7) The Licensor shall not have the right to enter the premise or monitor the

networks of Licensee for the purpose of auditing the use of the license.

- 8) The Licensor shall not use any injunctive relief clauses as the Licensor cannot prevent the Licensee from performing mission operations.
- 9) The Licensor shall not have the authority to control any litigation between a third party and the Licensee.
- 10) The Licensor shall not use the fact that the Licensee is using the Licensor's products in any notification to the public (e.g., no publicity rights permitted).

II. Award Information:

1. **Anticipated Award Date:** TBD per individual call.
2. **Anticipated funding:** TBD per individual call, to include funding profile.

III. Eligibility Information:

1. **Eligible Offeror:** This is an unrestricted solicitation. Businesses/Educational Institutions of all sizes are encouraged to propose on all or any part of this solicitation under each call.
2. **Cost Sharing or Matching:** Cost Sharing is not required.
3. **Federally Funded Research and Development Centers:** The following guidance is provided for Federally Funded Research and Development Centers (FFRDCs) contemplating submitting a proposal, as either a prime or subcontractor. FAR 35.017-1(c) (4) prohibits an FFRDC from competing with any non-FFRDC concern in response to a Federal agency request for proposal for other than the operation of an FFRDC (with exceptions stated in DFARS 235.017-1(c) (4)). There is no regulation prohibiting an FFRDC from responding to a solicitation. However, the FFRDC's sponsoring agency must first make a determination that the effort being proposed falls within the purpose, mission, general scope of effort, or special competency of the FFRDC, and that determination must be included in the FFRDC's proposal. In addition, AFRL must make a determination that the work proposed would not place the FFRDC in direct competition with domestic private industry. Only after these determinations are made, would a determination be made concerning the FFRDC's eligibility to receive an award.
4. **Government Agencies:** If a Government agency is interested in performing work, contact the Technical POC identified in the Call. If those discussions result in a mutual interest to pursue your agency's participation, the effort will be pursued independent of this announcement.
5. **Other:**
 - a. **Foreign Participation:** Foreign Participation is not anticipated, however, will be considered on a case-by-case basis and identified in each call. If it is determined that foreign participation is not allowed, the US Prime Contractor and/or Sub-Contractor may hire foreign national with prior FDO approval;

however, FNs will be limited to Public Domain information only. Public Domain information is defined as information that is releasable to the general public and sometimes referred to as open source material. Examples include but are not limited to newspapers, magazines and information posted on the internet. Any proprietary information will have to be appropriately protected.

- b. **Export Control:** This acquisition may involve data that is subject to export control laws and regulations. This determination will be made on a case-by-case basis and identified in each call. If the data is determined to be subject to export control laws, only contractors who are registered and certified with the Defense Logistics Services Center (DLSC) and have a legitimate business purpose may participate in this solicitation. Contact the Defense Logistics Services Center, 74 Washington Avenue N., Battle Creek, Michigan 40917-3084 (1-800-352-3572) for further information on the certification process. You must submit a copy of your approved DD Form 2345, Militarily Critical Technical Data Agreement, with your proposal, if applicable.
- c. **Proposal Submissions:** There are no limits on the number of white papers/proposals an offeror may submit.

NOTE: You may be ineligible for award if all requirements of this solicitation are not met on the white paper/proposal due date as identified in each call.

IV. **White Paper/Proposal and Submission Information:**

- 1. **Overview:** White papers and/or proposals submitted under a call shall be in accordance with the instructions provided both in the specific call and this announcement. Each call will identify itself as a one-step or two-step process. For individual calls, the Government intends to review resulting white papers/proposals and award all, some, or none of the proposal received without negotiations/discussions. However, the Government does reserve the right to negotiate with those offerors whose proposals have been selected for funding. Offerors should be alert for any ARA/Call amendments that may change proposal requirements or permit extensions to the proposal's submission date.
- 2. **White Paper Instructions (Two Step):**
 - a. General Instructions:
 - 1) Offerors will submit a white paper and rough order of magnitude (ROM) cost no later than (NLT) the due date stated within each individual call.
 - 2) White papers must reference the announcement number (FA8650-20-S-1958) and call name/number.
 - 3) Offerors must submit one (1) copy of the white paper to the Contracting Officer via email.
 - 4) Offerors are advised that only Contracting Officers are legally authorized to contractually bind or otherwise commit the Government.
 - 5) The cost of preparing white papers in response to the ARA is not considered an allowable direct charge to any resulting or any other contract; however, it may be an allowable expense to the normal bid and proposal indirect cost as specified in FAR 31.205-18.
 - 6) **NO classified** white papers or ROMs will be accepted.

b. Technical:

1) Page Limitations: The following describes the white paper page limitations:

- a) White papers shall be limited to (TBD per individual call) pages.
- b) Font shall be standard 10-point business font Arial.
- c) Character spacing must be "normal," not condensed in any manner.
- d) Pages shall be double-spaced (must use standard double-space function in Microsoft Word), 8.5 by 11 inches, with at least one-inch margins on both sides, top and bottom.
- e) All text, including text in tables and charts, must adhere to all font size and line spacing requirements listed herein. Font and line spacing requirements do not have to be followed for illustrations, flowcharts, drawings, and diagrams. These exceptions shall not be used to circumvent formatting requirements and page count limitations by including lengthy narratives in such items.
- f) Pages shall be numbered starting with the cover page being Page 1, and the last page being no greater than Page (TBD per individual call). The page limitation covers all information including indices, photographs, foldouts (counted as 1 page for each 8.5 by 11 portion) tables, charts, appendices, attachments, resumes, etc.
- g) Format: The white paper will be formatted as follows:
 - i. Section A: Solicitation (FA8650-20-S-1958) and Call Number (TBD per call), Title of Program, Name of Company, Business Size, Company's Commercial and Government Entity (CAGE) number, Dun & Bradstreet (D&B) Data Universal Numbering System (DUNS) number, the contractor's Contracting POC and Technical POC with appropriate telephone numbers, fax numbers, and email addresses for the POCs.
 - ii. Section B: Period of Performance and Task Objectives;
 - iii. Section C: Technical Summary and Proposed Deliverables; and
 - iv. Section D: Cost (Rough Order of Magnitude (ROM)).

NOTE: The Government will check the white paper for conformance to the stated requirements. Any pages in excess of the stated page

limitation will not be considered for review purposes.

- 2) The white paper shall include a discussion of the nature and scope of the research and the offeror's proposed technical approach.
- c. Cost: The cost portion of the white paper shall include a ROM cost estimate. No detailed price or cost support information should be forwarded; only a time-phased bottom line figure should be provided.
- d. Review: The Government will review the white papers and ROMs in accordance with the White Paper Review Criteria, set forth in Section V below. Based on this review, the Government will determine which white papers have the potential to best meet Air Force needs. Offerors will be notified of the disposition of their white papers. It is anticipated that Government review of the white papers submitted will take 30 working days.

Those offerors submitting white papers assessed as meeting AF needs will be asked (via RFP) to submit a full technical and cost proposal. Offerors not required to submit proposals will be notified but may, however, still elect to submit. An offeror submitting a proposal without first submitting a white paper **will not** be eligible for an award.
- e. Other Information: Multiple white papers and ROM within the purview of this announcement may be submitted by each offeror. If the offeror wishes to restrict its white papers and ROMS, they must be marked with the restrictive language stated in FAR 52.215-1(e).
- f. White Paper/Proposal Content Summary: You may be ineligible for award if all requirements of this solicitation are not met on the proposal due date.

3. **Proposal Instructions (One Step and/or Request for Proposal):**

- a. General Instructions:
 - 1) Offerors will submit a technical and cost proposal within TBD working days of the proposal request (to be determined for each call). After receipt, proposals will be reviewed in accordance with the award criteria as defined in the Call. Proposals will be categorized and subsequently selected for negotiations.
 - 2) Offerors should apply the restrictive notice prescribed in FAR 52.215-1(e) Instructions to Offerors—Competitive Acquisition
 - 3) Technical/management and cost/business volumes should be submitted in separate volumes and must be valid for 180 days.
 - 4) Proposals must reference the announcement number FA8650-20-S-1958 and relevant technical area(s) of interest.
 - 5) Offerors must submit one copy of the proposal to the Contracting Officer via email.
 - 6) Offerors entire proposal must be submitted without password protection and must include a) cost file(s) spreadsheet(s) in Microsoft Excel including the formulas for calculating cost element bases (i.e., G&A, O/H, etc.) b) Technical/Management proposals and Statement of Work provided in Microsoft Word.

- 7) Offerors are advised that only Contracting Officers are legally authorized to contractually bind or otherwise commit the Government.
- 8) The cost of preparing proposals in response to this ARA is not considered an allowable direct charge to any resulting or any other contract; however, it may be an allowable expense to the normal bid and proposal indirect cost as specified in FAR 31.205-18.
- 9) No classified technical proposals or cost volumes are expected. Offerors are encouraged to keep all elements of the proposal package unclassified. In the rare case where an offeror has a need to submit a classified appendix, please contact the technical POC for delivery instructions.

b. Technical/Management Proposal Instructions (One Step or RFP):

- 1) Page Limitations: The following describes proposal page limitations:
 - a) The Technical/Management Proposal shall be limited to (TBD per individual call) pages.
 - b) Font shall be standard 10-point business font Arial.
 - c) Character spacing must be "normal," not condensed in any manner.
 - d) Pages shall be double-spaced (must use standard double-space function in Microsoft Word), 8.5 by 11 inches, with at least one-inch margins on both sides, top and bottom.
 - e) All text, including text in tables and charts, must adhere to all font size and line spacing requirements listed herein. Font and line spacing requirements do not have to be followed for illustrations, flowcharts, drawings, and diagrams. These exceptions shall not be used to circumvent formatting requirements and page count limitations by including lengthy narratives in such items.
 - f) Pages shall be numbered starting with the cover page being Page 1, and the last page being no greater than Page (TBD per individual call). The page limitation covers all information including indices, photographs, foldouts (counted as 1 page for each 8.5 by 11 portion) tables, charts, appendices, attachments, resumes, etc.
 - g) The proposal page limit does not include the offeror's proposed Statement of Work (SOW); however, the same formatting rules apply to the SOW, which is limited to (TBD per individual call) pages.

NOTE: The Government will check the proposal and SOW for conformance to the stated requirements. Any pages in excess of the stated page limitation after the format check will not be considered for review purposes.

- 2) The Technical/Management proposal(s) shall include a discussion of the nature and scope of the technical approach. Additional information on prior work in this area, descriptions of available equipment, use of base support (if desired), data and facilities and resumes of personnel who will be participating in this effort should also be included as attachments to the technical proposal. This volume(s) shall include a SOW(s) detailing the technical tasks proposed to be accomplished under the proposed effort and suitable for contract incorporation. ***Do not include any proprietary information in the SOW.*** In addition to the contractor proposed SOW, a Government generated SOW Supplement containing additional contracting requirements will be included in any resulting contracts.
- 3) Any questions concerning the technical proposal or SOW preparation shall be referred to the Technical POC listed in Overview on page 3 of this solicitation.

c. Cost/Business Proposal Solicited Via Calls (One Step or RFP):

- 1) Separate the proposal into a business section and cost section. Adequate price competition is anticipated for each call.
 - a) A Model Contract for FAR-based contracts will be provided as an attachment to individual calls issued under this ARA. No sample is provided for Other Transactions. Note that the Model Contract will provide examples of clauses that may be included in final contracts, and it provides a basic contract structure. Contracts that are ultimately awarded against the individual calls may vary based on individual program requirements, negotiated terms and conditions, etc.
 - b) The business section should contain all business aspects to the proposed contract, such as type of contract, any exceptions to terms and conditions of the individual Call's Model Contract, any information not technically related, etc. Provide rationale for exceptions to any portion of the individual Call's Model Contract.
 - c) Identify any technical data that will be delivered with less than unlimited rights.
 - d) Subcontracting Plans: For efforts to exceed \$750,000, Subcontracting Plans shall be submitted in the cost/business proposal. Reference FAR 19.704 and DFARS 219.704 for subcontracting plan requirements. Small business concerns are exempt from this requirement.

- e) Limitations on Pass-Through Charges: As prescribed in FAR 15.408(n)(1) & 15.408(n)(2), provisions 52.215-22, "Limitations on Pass Through Charges- Identification of Subcontract Effort (Oct 2009)," apply. Justification for exceeding the limits must be provided with the proposal.
 - f) Complete the Representations and Certifications (Section K - attached to each individual call) and submit with all proposals.
 - g) If an offeror proposes the use of Government Furnished Property (GFP), other than GFP identified in the call (if applicable), the offer must specifically identify each piece of GFP in the Cost/Business Proposal and propose and substantiate a rental cost for evaluation purposes in accordance with FAR 45.202. Include the following information in the proposal:
 - i. A list describing all Government property that the offeror or its subcontractors propose to use on a rent-free basis. The list shall identify the accountable contract under which the property is held and the authorization for its use (from the contracting officer having cognizance of the property);
 - ii. The dates during which the property will be used and, for any property that will be used concurrently in performing two or more contracts, the amounts of the respective uses in sufficient detail to support prorating the rent;
 - iii. The amount of rent that would otherwise be charged in accordance with FAR 52.245-9, Use and Charges; and
 - iv. The voluntary consensus standard or industry leading practices and standards to be used in the management of Government property, or existing property management plans, methods, practices, or procedures for accounting for property.
- 2) **Cost Element Breakdown:** Clear, concise, and accurate cost proposals reflect the offeror's financial plan for accomplishing the effort contained in the technical proposal. As a part of its cost proposal, the offeror shall submit the information outlined below, together with supporting breakdowns. All direct costs (labor, material, travel, computer, etc.) as well as labor and overhead rates should be provided by contractor fiscal year (CFY) and further summarized for the whole effort. In addition, costs should be broken down and summarized by individual task area. Detailed cost element breakdowns by Government Fiscal Year or calendar year are not required. The supporting schedules may include summary level estimating rationale used to generate the proposed costs. The cost element breakdown(s) should include the following if applicable.
- a) **Direct Labor:** Direct labor should be detailed by number of labor hours by category of labor.
 - b) **Labor and Overhead Rates:** Direct labor hours, with applicable rates,

must be broken out with bases clearly identified. The source of labor and overhead rates and all pricing factors should be identified. For instance, if a Forward Pricing Rate Agreement (FPRA) is in existence, that should be noted, along with the Administrative Contracting Officer's (ACO) name and telephone number. If the rates are based on current experience in your organization, provide the historical base used and clearly identify all escalation, by year, applied to derive the proposed rates. If computer usage is determined by a rate, identify the basis used and rationale used to derive the rate.

- c) **Material/Equipment:** List all material/equipment items by type and kind with associated costs and advise if the costs are based on vendor quotes, data and/or engineering estimates; provide copies of vendor quotes and/or catalog pricing data.
- d) **Subcontractor Costs:** Submit all subcontractor proposals and analyses with your cost proposal (See FAR 15.404-3(b)). If the subcontractor will not submit cost and pricing information to the offeror, this information must be submitted directly to the Government for analysis. On all subcontracts and interdivisional transfers, provide the method of selection used to determine the subcontractor and the proposed contract type of each subcontract. An explanation shall be provided if the offeror proposes a different amount than that quoted by the subcontractor. The offeror's proposal must:
 - i. Identify principal items/services to be subcontracted.
 - ii. Identify prospective subcontractors and the basis on which they were selected. If non-competitive, provide selected source justification.
 - iii. Identify the type of contractual business arrangement contemplated for the subcontract and provide rationale
 - iv. Identify the basis for the subcontract costs (e.g., firm quote or engineering estimate, etc.).
 - v. Identify the cost or pricing data submitted by the subcontractor.
 - vi. Provide thorough analysis of the proposed subcontract(s) in accordance with FAR 15.404-3(b). Analysis should address the reasonableness, realism and completeness of each subcontractor's proposal. If the analysis is based on comparison with historical prices, identify the basis on which the historical prices were determined to be reasonable. The analysis should include, but not be limited to, an analysis of: materials, labor, travel, other direct costs and proposed profit or fee rates.
- e) **Special Tooling or Test Equipment:** When special tooling, and/or test equipment is proposed, attach a brief description of items and indicate if they are solely for the performance of this particular contract or project and if they are or are not already available in the offeror's existing facilities. Indicate quantities, unit prices, whether items are to be

purchased or fabricated, whether items are of a severable nature and the basis of the price. These items may be included under Direct Material in the summary format.

- f) **Consultants:** When consultants are proposed to be used in the performance of the contract, indicate the specific project or area in which such services are to be used. Identify each consultant, number of hours or days to be used and the consultant's rate per hour or day. State the basis of said rate and give your analysis of the acceptability of the consultant's rate.
- g) **Travel:** Travel costs must be justified and related to the needs of the project. Identify the number of trips, the destination and purpose. Travel costs should be broken out by trip with number of travelers, airfare, per diem, lodging, etc. Supporting documentation should be provided.
- h) **Computer Use:** Detail the amount and kind of computer usage, the cost, and how the costs were derived.
- i) **Facilities Capital Cost of Money:** If Facilities Capital Cost of Money is proposed, a properly executed DD Form 1861 is required.
- j) **Project Funding Profile:** Offerors should include a project funding profile by Government Fiscal Year (GFY) (1 Oct through 30 Sept) for budgetary purposes. This will enable the Government to easily identify program funding needs by GFY.
- k) If an offeror takes exceptions to the requirements called out in the announcement (e.g., base support, Government-furnished property (GFP), CDRLs), the exceptions should be clearly stated in the cost proposal.
- l) **Forward Pricing Rate Agreements:** Offerors who have forward pricing rate agreements (FPRAs) from DCMA should submit them with their proposal.
- m) Cost/Business proposals have no page limitations.

V. **White Paper/Proposal Review Information:**

1. **White Paper - Review Criteria:** White papers will be reviewed to address whether they have the potential to meet the AF's needs based on the criteria below which are listed in equal order of importance, unless otherwise indicated in each individual call. Offerors will be notified of the results of the review.

a. **Criteria:**

- 1) Is the technical approach consistent with the technologies (Technical Areas of Interest) listed in the ARA?
- 2) Is the research of interest to the Government?

3) Is appropriate funding available?

NOTE: If white papers are viewed favorably with respect to the above criteria, the Government may request a full technical/cost proposal; however, any such request does not assure a subsequent award.

2. **Proposal - Peer or Scientific Review Criteria:** The following is a list of sample criteria that may be used for individual calls. However, each call will specify the criteria to be used. Sample language includes; "Proposals will be reviewed through Peer or Scientific Review using the criteria below, unless otherwise indicated in each individual call and/or RFP. The technical aspect, which is ranked as the first order of priority, shall be reviewed based on the following criteria that are of equal order of importance."

a. **Technical Merit:**

- 1) The offeror's understanding of the scope of the technical effort.
- 2) Soundness of the offeror's technical approach including whether the proposal demonstrates related experience and qualification of technical personnel.
- 3) Proposal's potential to advance technology and the state of the art and to meet mission and agency needs.
- 4) The potential to transition the research and development deliverables to future Government needs. Any proposed restriction on technical data or computer software will be considered.

b. **Cost/Price:** The cost/price criterion includes the realism of the proposed cost. Cost/Price is a substantial factor, but ranked as the second order of priority. (If an offeror proposes the use of GFP other than any GFP identified in each individual call, and that proposed GFP provides the offeror an unfair competitive advantage, then FAR 45.202 requires rental equivalent be applied to the Cost Factor for evaluation purposes only).

3. **Proposal – Review and Selection Process:**

a. **Categories:** Based on the Peer or Scientific Review, proposals will be categorized as Selectable or Not Selectable (see definitions below). The selection of one or more sources for award will be based on the Peer or Scientific Review, as well as importance to agency programs and funding availability.

- 1) **Selectable:** Proposals are recommended for acceptance if sufficient funding is available.
- 2) **Not Selectable:** Even if sufficient funding existed, the proposal should not be funded.

b. No other criteria will be used.

c. Prior to award of a potentially successful offer, the Contracting Officer will

make a determination regarding price reasonableness.

NOTE: The Government reserves the right to award some, all, or none of proposals. When the Government elects to award only a part of a proposal, the selected part may be categorized as Selectable, though the proposal as a whole may not merit such a categorization.

VI. **Award Administration Information:**

1. **Award Notices:** Offerors will be notified whether their white paper is recommended to submit a full technical/cost proposal or whether the proposal is recommend for award on or about 30 days after receipt of the white paper/proposal. The notification is not to be construed to mean the award of a contract is assured, as availability of funds and successful negotiations are prerequisites to any award.
2. **Administrative and National Policy Requirements:** See Section I.
3. **Reporting:** See ARA Paragraph I.3.a., Contract Data Requirements List (CDRL).

VII. **Other Information:**

1. **Acquisition of Commercial Items:** Based upon market research, the Government is not using the policies contained in Part 12, Acquisition of Commercial Items, in this solicitation. However, interested offerors may identify to the Contracting Officer their interest and capability to satisfy the Government's requirement with a commercial item within 15 days of this notice.
2. **Support Contractors:** Only Government employees will participate in Peer or Scientific Reviews. Offerors are advised that employees of commercial firms under contract to the Government may be used to administratively process proposals, monitor contract performance, or perform other administrative duties requiring access to other contractors' proprietary information. These support contracts include nondisclosure agreements prohibiting their contractor employees from disclosing any information submitted by other contractors or using such information for any purpose other than that for which it was furnished.
3. **Item Unique Identification and Valuation:** It is DoD policy that contractors shall be required to identify the Government's unit acquisition cost for all deliverable end items for which Item Unique Identification applies. Therefore, proposals must clearly break out the unit acquisition cost for any deliverable items. See DFARS 211.274-3, Policy for Valuation, for more information. (Per DoD, "fully burdened unit costs" to the Government would include all direct, indirect, G&A costs, and an appropriate portion of fee). For more information, see the following website: <http://www.acq.osd.mil/dpap/pdi/uid/index.html>.
4. **Informal Feedback Sessions:** When requested, an informal feedback session will be provided. The process will follow the guidelines outlined in the notification letter.
5. **Associate Contractor Agreements:** Associate Contractor Agreements (ACAs) are agreements between contractors working on Government contracts that specify requirements for them to share information, data, technical knowledge, expertise, or resources. The Contracting Officer may require ACAs when contractors working on separate Government contracts must cooperate, share

resources or otherwise jointly participate in working on contracts or projects. Prime contractor to subcontractor relationships do not constitute ACAs. For each award, the Contracting Officer will identify associate contractors with whom agreements are required.

6. **Updates of Publicly Available Information Regarding Responsibility Matters:** Any contract or assistance award that exceeds \$600,000; and when offeror checked "has" in paragraph (b) of the provision FAR 52.209-7, shall contain the clause/article, FAR 52.209-9, "Updates of Publicly Available Information Regarding Responsibility Matters (JUL 2013)."
7. **White Paper/Proposal Content Checklist:** You may be ineligible for award if all requirements of this solicitation are not met on the proposal due date.
 - a. White papers/proposals are due to the Contracting POC.
 - b. White papers/proposals are due no later than the due date and time specified in the Call or letter RFP.
 - c. White paper/proposal page limits are strictly enforced. See Section IV.2.b.1) and 3.b.1) of the solicitation for page limits.
 - d. If a contract is proposed, completed Certifications and Representations (Section K) are required. See Section K, attached to each individual Call.
 - e. The Cost/Business Proposal must contain all information described in the Content and Form of Proposal Section.
 - f. For any subcontracts proposed, the Cost/Business Proposal must contain a subcontractor analysis IAW FAR 15.404-3(b).
 - g. Offerors other than small businesses are to include a subcontracting plan in Microsoft Word Readable Format.
 - h. Proposals must be submitted in the format specified in Section IV.
 - i. Offerors who have Forward Pricing Rate Agreements (FPRA's) should submit them with their proposal.
 - j. If a DD254 is applicable, offerors must verify their Cognizant Security Office

information is current with Defense Security Service (DSS) at www.dss.mil.

- k. If the effort is subject to Export Control, offerors must submit a Certified DD Form 2345, Militarily Critical Technical Data Agreement, with proposal.
