

ANC Millennium Columbarium Efflorescence Project Sources Sought

Project Description

The U.S. Army Corps of Engineers (USACE), Norfolk District (NAO) is anticipating a future procurement for a construction contract to support the cleaning and future prevention of biofilm and efflorescence at the Millennium Columbarium at Arlington National Cemetery (ANC), Virginia.

Description of Work:

The U.S. Army Corps of Engineers, Norfolk District is seeking eligible firms capable of performing all necessary labor, supervision, management, transportation, tools, equipment, materials, and supplies to perform cleaning and prevention activities of the Millennium Columbarium at ANC. The cleaning activities will consist of removal of efflorescence and biofilm buildup on the concrete surfaces. The prevention activities at the Millennium Columbarium structures must prevent intrusion of precipitation into the horizontal surfaces and deflect precipitation away from the vertical surfaces to minimize the frequency of future cleaning activities. Minor concrete repairs of joints and cracks are anticipated prior to installation of the cap and strip flashing.

The activities will be completed on the concrete structures of the Millennium Columbarium at these locations:

- All concrete structures in the Section 79 complex (CT 10 & 11)
- All concrete structures in the Section 85 complex (CT 12 & 13)

The Contractor's activities cannot disrupt normal cemetery operations and events and will require the Contractor's activities to be scheduled appropriately.

Target range for this project is \$1,000,000 to \$5,000,000.

The following questionnaire is designed to apprise the U.S. Army Corps of Engineers, Norfolk District of prospective contractors' project execution capabilities. Please provide your response to the following questions. Responses should be limited to five (5) pages.

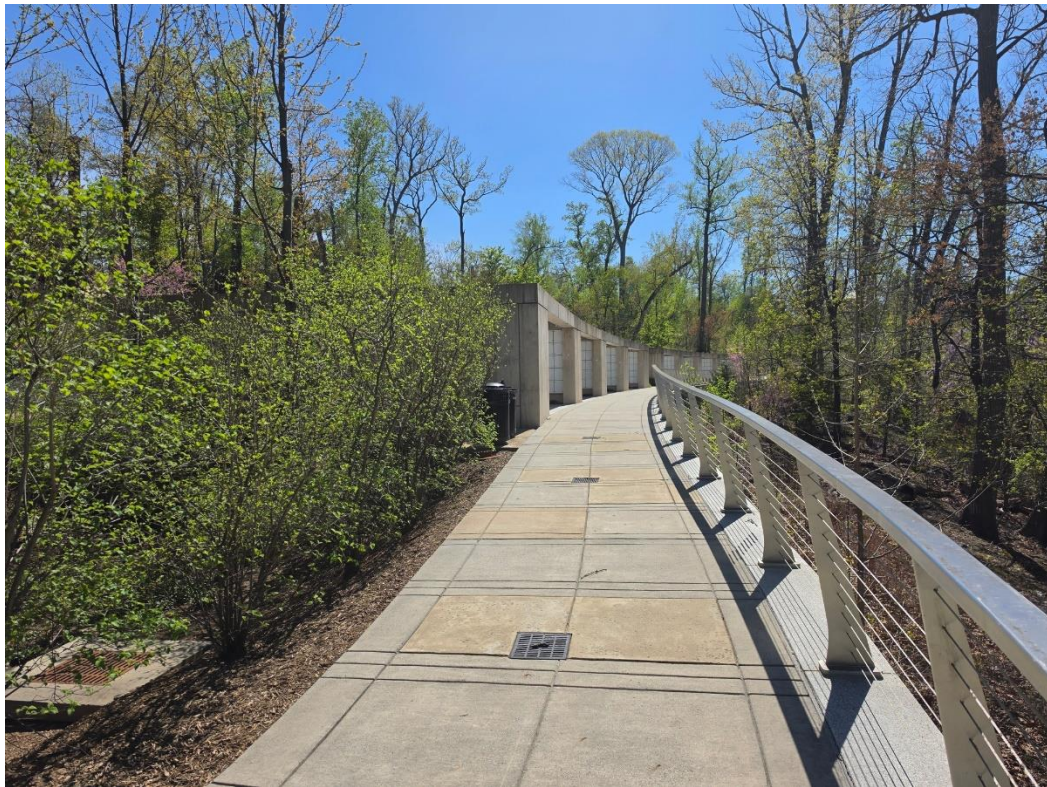

The main goal of the sources sought is to select a qualified construction contractor who can provide the most long-term cost-efficient option of the prevention aspects in the scope

of work. The government has looked at several different options including cap and strip flashing, a membrane with strip flashing, and a clear coat product.

1. Please describe briefly how you would complete the work, including recommended cleaning method and cap and strip flashing installation, along with type of equipment and materials.
2. Please provide a list of active contracts that demonstrate your firm's capacity to perform a contract of this magnitude and complexity.
3. Please describe your firm's experience with concrete cleaning and cap and strip flashing installation. Provide examples of recent projects. For each example include for whom the work was performed, lessons learned, dollar value of the project, date completed or if not completed then projected completion date and percent completed, and points of contact, email, and phone number
4. Please provide company's name, address, point of contact, phone number, and e-mail address. Please also include your firm's governmental CAGE code and Unique Entity Identifier (UEI). A local presence within the Washington D.C. / Northern Virginia metropolitan area will be considered. This can be met by having a primary office or a fully operational satellite office within this region.
5. Would you be interested in proposing on the solicitation when it is issued? If the answer is No, please explain why not?
6. Would you be proposing on this project as a sole contractor, prime contractor with subcontractor(s), or as a joint venture?
7. List major subcontractors to be utilized and short description of work each will perform
8. If applicable, provide your firm's Existing Joint Venture, Mentor/Protégé, or teaming arrangement information.
9. What is your bonding capacity per contract? What is your total bonding capacity?
10. What is your firm's business size—large or small? If the firm has a Small Business identification, please specify which and list all if more than one applies: Small Business (SB), 8(a) Business Development Program, HUBZone Program, Service-Disabled Veteran Owned Small Business (SDVOSB), or Woman Owned Small Business (WOSB).
