

Statement of Work (SOW)

1. PROJECT TITLE: Mammography Tracking Support Services
2. BACKGROUND/PURPOSE: Federal regulation through the Mammography Quality Standards Act (MQSA) requires mammography results to be tracked annually. This software will also assist with the Medical Audits conducted annually by the FDA/MQSA. Implementing this software is mandatory for our new mammography program at Blackfeet Community Hospital to achieve ACR accreditation. It is not optional—this software is required to meet safety regulations and ensure accurate breast cancer screening. Any delay in implementation will stop us from launching this service and prevent us from achieving accreditation.
3. SCOPE: Shall provide MQSA with patient demographic information, along with providing the ability to print out and mail results, reminders, and follow-up letters. OmniCare will also provide the department with the ability to print out mammography history forms upon appointment arrival.
4. APPLICABLE DOCUMENTS:
OmniCare Quote
5. TASKS: The contractor shall provide an all-inclusive licensing agreement for the below evidence-based clinical decision support (CDS) criteria and technology solutions, Support Tool, by providing access with a unique user ID and initial password to their healthcare platform to manage administrative tasks.
