

NGP Phase 1B Second RFI Questions

	Questions	Answers
1	Did the current RFI CUI attachment have a material change from the CUI attachment that was sent out back in late 2025 with the previous RFI?	No material change; additional guidance info was provided in three tables.
a	If there was a material change, will you extend the access date for requesting access to the updated CUI to better inform a response or send the updated section?	No material change. Requests for CUI has been extended to March 18th 2026.
2	What is the expected platform Launch Acceptability Region (LAR) generation approach:	
a	Will the platform generate platform internal LARs using offline NGP tail kit simulation results?	The weapon system shall generate its own LAR but the aircraft makes the final LAR determination. More specific details will be provided at a future to be determined date.
b	Will the weapon system use the UAI "In Weapon LAR" capability?	The weapon system shall be compatible with both UAI and non UAI systems. More specific details will be provided at a future to be determined date.
c	Will the weapon be required to comply with an existing platform LAR?	The weapon system shall generate its own LAR but the aircraft makes the final LAR determination. More specific details will be provided at a future to be determined date.
3	Is page count all inclusive (i.e. Does the page count limit include cover sheet, table of contents, and acronym list	Yes, this is an RFI. In the RFP, page count limit will not include the parenthetical items listed in the question.
