To: General Public (Via the Government's Point Entry)
From: James Waller, Contracting Officer, National Park Service, Denver Service Center
Subject: Sources Sought Notice
Reference: GRCA 318719, Construct Temporary Wastewater Treatment Plant at North Rim, Grand Canyon National Park

This is a Sources Sought Notice (SSN) for the purpose of conducting market research. Proposals are NOT being requested, nor accepted at this time. Responses are being requested from both large and small businesses.

Purpose: The purpose of this notice is to gain knowledge regarding the type of interested businesses and their qualifications. The National Park Service (NPS) will use information obtained through this notice to develop an acquisition strategy.

The Government anticipates conducting a competitive acquisition for this requirement. The amount of interest or lack thereof will determine the possibility of a small business or other socio-economical small business set-aside for the solicitation. Analysis of the quality of responses to this source sought announcement will be considered in the market research being conducted, and in the making of any small business set-aside determination for this requirement.

Additional Information: No proposal package, solicitation, specification or drawings are available with this notice.

Cost Reimbursement: Response to this announcement is strictly voluntary; no reimbursement will be made for any costs associated with providing information in response to this sources sought announcement or any follow-up information requests.

North American Industry Classification System (NAICS) code: 237110 Water and Sewer Line and Related Structures

Small Business Size Standard: \$45

Solicitation: The NPS anticipates issuing a request for proposals in the Summer 2026.

Bonding: The NPS anticipates bid, performance and payment bonds will be required

Project Description:

Grand Canyon National Park requires the installation of a temporary wastewater treatment plant (WWTP) at the North Rim to support visitor facilities and campgrounds during reconstruction or upgrades of the permanent wastewater system.

The North Rim is a remote, high-elevation site, with seasonal access generally from May through October, and limited road and staging areas. Helicopter access will not be required for equipment or materials transport. The facility must provide temporary treatment capacity while ensuring continued compliance with Arizona Department of Environmental Quality (ADEQ) effluent standards.

The project is located at: Grand Canyon National Park, AZ.
The construction magnitude is \$5M -\$10M

The surrounding area is rural with limited staging located adjacent to the site. The construction site is approximately 45 miles from nearest suppliers and lodging facilities (Jacobs Lake with limited facilities) and 80 miles to Kanab UT.

Grand Canyon National Park has not confirmed official campground or service openings for 2026; however, the target seasonal opening for roads and developed areas is May 15. Visitor facilities typically close mid-October, with day-use access extending to mid-November. Affected visitor facilities include:

- North Rim Campground and associated facilities
- Scenic viewpoints and trails that can be safely accessed
- Seasonal roads (AZ-67) into the developed area.

Contract activities and logistics must be structured to minimize visitor impact. Protective measures are required to ensure the surrounding area remains undisturbed. Seasonal or other shutdowns may occur during the construction season. Winter construction may be required through December 2026, as weather and roadway access allow, to complete site preparation and utility installation so the site is ready for equipment deliveries and startup in Spring 2027, in time for the May 15 opening.

Scope of Work

The proposed project would install a temporary, packaged, 90,000 gallon per day (gpd) WWTP along the existing south fenceline of the WWTP (adjacent to the sludge drying beds) until a permanent WWTP can be constructed. The temporary packaged WWTP will include headworks, two 45,000 gpd MBR treatment units, an equalization tank with aeration and pumping system to the MBR units, and a treated effluent break tank and ultraviolet (UV) disinfection system. Temporary storage units would be installed for chemical storage and laboratory functions. On site utilities (yard piping/cabbling) would be installed and connect to existing utilities.

Construction Schedule

- Fall 2026: Site preparation and utility installation
- Spring 2027: Major equipment deliveries, startup, and commissioning to allow operational use prior to May 15 seasonal opening

The North Rim wastewater treatment plant (WWTP) was destroyed by the Dragon Bravo Fire in 2025. The park's intent is to provide all visitor services to the extent possible for the 2027 operating season, using the 2026 and early 2027 to make repairs to or otherwise address damaged infrastructure. Wastewater infrastructure is critical to park operations and visitation. Currently, the only wastewater treatment available on the North Rim is via the existing septic system, which has a much lower treatment capacity than the former WWTP.

Contractor Capabilities

Contractors responding should demonstrate experience with packaged wastewater treatment plants, temporary installations, remote site construction, and compliance with state/federal wastewater regulations.

Submittal Contents: Interested (small and large) businesses should submit the following information:

- (1) Company name, DUNS number, address, point of contact, telephone number, and email address.
- (2) Business type: Classification as a Large or Small Business under the above listed NAICS, Small Business Administration (SBA) certified Historically Underutilized Business Zone (HUBZone), Veteran-Owned Small Businesses (VOSB), Service-Disabled Veteran-Owned Small Businesses (SDVOSB), SBA certified Woman Owned Small Business (WOSB), Economically Disadvantaged Woman Owned Small Business (EDWOSB). The size of a small business firm includes all parents, subsidiaries, affiliates, etc.—see 13 CFR 121.108.) Misrepresentation of size status can result in penalties.

- (3) Statement regarding your company's bonding capacity. Letters from bonding companies are not required at this time.
- (4) Information demonstrating experience and capability on projects of same or similar size, scope and magnitude, and constructed under similar conditions.
- (5) In addition businesses may submit existing marketing materials such as capability statements and brochures.

Submittal Due Date/Time: 04/02/2026
