

Pinon Heath Center Laboratory Department

Phone: (928)725-9670

Fax: (928)725-9541

SCOPE OF WORK

- I. **Location: Laboratory of Pinon Health Center**
- II. **Period of Performance:**
March 01, 2026 to February 28, 2027
- III. **Purpose:**
This is a request to renew our Cost-Per-Reagent-Rental (CPRR) with the contractor.
- IV. **Scope of Work:**
The XN-550 hematology analyzer is similar to the current XN-1000R hematology analyzer that is on site. The techs are all key operators on the Sysmex hematology analyzer. The XN-550 analyzer sampler processing and preventative maintenance are performed in same matter as the XN-1000R. The XN-550 hematology analyzer will provide the patients 6-part automated differential, which is essential for our satellite clinic in aiding in assessment of sepsis patients. This analyzer requires minimal specimen prep time. Monthly QAP submission is effortless that is provided by the contractor at no additional cost. Sysmex Technical Service has continuously provided PHC Lab excellent service; most issues/problems are corrected via phone. There is minimal downtime with the analyzer. We will continue to have a reliable patient sample correlation with all three CSU Laboratory using Sysmex Hematology Analyzers.
- V. **Contact Information:**
Colleen Ben, Acting Lab Supervisor, Tel: (928) 674-7101
Whitney Shorty, Contract Specialist, Tel: (928) 725-9806
Charlene Francis, MSA (928) 725-9670
