

DEPARTMENT OF THE NAVY
NAVAL FACILITIES ENGINEERING SYSTEMS COMMAND, MID-ATLANTIC
9324 VIRGINIA AVENUE
NORFOLK VIRGINIA 23511-3095

J&A No. ML-26-24
CON/042

**JUSTIFICATION AND APPROVAL
FOR USE OF OTHER THAN FULL AND OPEN COMPETITION**

1. Contracting Activity.

The contracting activity is Naval Facilities Engineering Systems Command, Mid-Atlantic (NAVFAC MIDLANT)

2. Description of the Action Being Approved.

This Justification and Approval (J&A) authorizes the use of brand name specifications for RF shielding products (ULTRA-RF/A with Enhanced Performance Package and Xalon RF X25-RF/EMI Panel) manufactured by Shielded Resources Group (SRG) in Solicitation N4008525R2639, Design-Bid-Build P222 MQ-25 Aircraft Laydown Facilities, Naval Station Norfolk, Norfolk, Virginia.

3. Description of Supplies/Services.

The intent of solicitation N4008525R2639 Design-Bid-Build, P-222, MQ-25 Aircraft Laydown Facilities Naval Station Norfolk, Norfolk, Virginia is to construct a two-story annex to support existing high bay hangar facility, Building LP48. Annex will consist of 01 and 02 spaces constructed of reinforced concrete masonry unit (CMU) walls and a combination of masonry and metal panel veneer. Annex spaces will include maintenance shops, secured storage spaces, Unmanned Carrier Aviation Mission Control System (UMCS) spaces, Weapons Training Unit (WTU) operational trainer and applied instruction space, Aerial Refueling Storage (ARS) Workcenter with overhead bridge crane, mission equipment support areas and other equipment rooms and personnel support areas. Telecommunications rooms and secure areas will meet ICD 705 requirements and have various levels of RF shielding.

The solicitation will include brand name specifications for RF shielding products (ULTRA-RF/A with Enhanced Performance Package and Xalon RF X25-RF/EMI Panel) manufactured by Shielded Resources Group (SRG).

This acquisition will solicit proposals as an unrestricted full and open, stand-alone construction solicitation as authorized by the approved DD2579 on 25 April 2025. The estimated value of the work included in the construction solicitation is approximately [REDACTED] of which [REDACTED] is estimated for the SRG RF shielding products (ULTRA-RF/A with Enhanced Performance Package and Xalon RF X25-RF/EMI Panel). The project will be funded by FY24 Military Construction (MILCON) funds. The work under this contract is required to be completed within 1017 days after award.

4. Statutory Authority Permitting Other Than Full and Open Competition.

Per DFARS 211.14(c)(2) and in accordance with section 888(a) of the National Defense Authorization Act for Fiscal Year 2017 (Pub. L. 114-328), the justification and approval addressed in FAR 6.303 is required in order to use brand name or equal descriptions. The statutory authority for this acquisition permitting other than full and open competition is 10 U.S.C. 3204(a)(1) which permits the use of limited

suppliers when it is essential to the Government's requirements, as implemented by FAR 6.302-1, Only one responsible source and no other supplies or services will satisfy agency requirements.

5. Rationale Justifying Use of Cited Statutory Authority.

This projects includes a controlled area that must be designed and constructed in accordance with ICD 705 and TEMPEST criteria. Due to the secure nature of this project, SRG RF Shielding system products have been incorporated into the design documentation. The reasoning of these Shielding Resources Group (SRG) products being a necessary incorporation for this project are listed below:

ULTRA-RF/A with Enhanced Performance Package: The scope of this project requires an engineered integrated system to meet the project requirements. There is only one known manufacturer who can provide all the various RF shielded system products required in this project, Shielding Resources Group, Inc (SRG). While other manufacturers/suppliers can/will "provide" some of these products, they acquire it from SRG. The systems have proven their effectiveness at multiple spaces on local military installations and should serve as an appropriate solution for this project. The RF shield system is delegated design responsibility identified in the construction documents for the RF shield contractor/sub-contractor to coordinate with SRG for integration of the RF shield boundary systems. Therefore, the designer of record has determined that the use of Shielded Resources Group's RF-Shielding Products is critical for meeting the design requirements for this project.

Xalon RF X25-RF/EMI Panel: The scope of this project requires an engineered integrated system to meet the project requirements. There is only one known manufacturer who can provide all the various RF shielded system products required in this project, Shielding Resources Group, Inc (SRG). While other manufacturers/suppliers can/will "provide" some of these products, they acquire it from SRG. The systems have proven their effectiveness at multiple spaces on local military installations and should serve as an appropriate solution for this project. The RF shield system is delegated design responsibility identified in the construction documents for the RF shield contractor/sub-contractor to coordinate with SRG for integration of the RF shield boundary systems. Therefore, designer of record has determined that the use of Shielded Resources Group's RF-Shielding Products is critical for meeting the design requirements for this project.

SRG's proprietary panelized system is not made by any other manufacturer. SRG also provides proprietary RF shielded door and frame systems, using a custom fingerstock solution, which are not available by any other manufacturer. In addition, this project requires custom IO panels which SRG is able to manufacture, install, and test unlike other RF shielding product manufactures who only provide off the shelf solutions. Authority to name Shielded Resources Group (SRG) as a required source is necessary to ensure that security criteria is met and the controlled area can be certified.

6. Description of Efforts Made to Solicit Offers from as Many Offerors as Practicable.

There is only one known manufacturer who can provide all the various RF shielded system products required in this project, Shielding Resources Group, Inc (SRG). While other manufacturers/suppliers can/will "provide" some of these products, they acquire it from SRG. The systems have proven their effectiveness at multiple spaces on local military installations and should serve as an appropriate solution for this project. The RF shield system is delegated design responsibility identified in the construction documents for the RF shield contractor/sub-contractor to coordinate with SRG for integration of the RF shield boundary systems.

A sources sought notice was published on Sam.gov on 22 December 2025 detailing the requirements of the SRG RF shielding products (ULTRA-RF/A with Enhanced Performance Package and Xalon RF X25-RF/EMI Panel). The notice sought commercially available products that could meet the same requirements. The response date was 06 January 2026, and no responses were received.

A solicitation notice will be publicized on SAM.gov, in accordance with the requirements of FAR Part 5. The approved J&A will also be made publicly available as required by FAR 6.305.

7. Determination of Fair and Reasonable Cost.

The Contracting Officer will determine that the price for this acquisition is fair and reasonable in accordance with FAR Part 15 prior to contract award. Analysis will be performed by one or more of the following techniques: (1) Comparison of proposed prices received in response to the RFP; (2) Comparison of proposed prices with the Independent Government Cost Estimate (IGCE); (3) Comparison of proposed prices with available historical information; and/or (4) Comparison of market survey results. The fair and reasonable determination will be made based on the total price of the project. This proprietary item is not an individual line-item price in the solicitation.

8. Actions to Remove Barriers to Future Competition

For the reasons set forth in Paragraph 5, NAVFAC Mid-Atlantic has no plans at this time to compete future contracts for the types of supplies/services covered by this document. If another potential source emerges, NAVFAC Mid- Atlantic will assess whether competition for future requirements is feasible.
