

## FACTOR 1 – TECHNICAL CAPABILITIES AND APPROACH (Volume I)

The Government will use the following Technical Acceptable/Unacceptable Rating Method.

| Adjectival Rating | Description                                                  |
|-------------------|--------------------------------------------------------------|
| Acceptable        | Proposal meets the requirements of the solicitation.         |
| Unacceptable      | Proposal does not meet the requirements of the solicitation. |

## FACTOR 2 – PAST PERFORMANCE (Volume II)

The Government will evaluate the Offeror's past performance to develop the Offeror's past performance rating.

Past performance information is one indicator of an Offeror's and subcontractors' ability to perform the contract successfully. The past performance evaluation results are an assessment of the Offeror's and subcontractors' probability of meeting the requirements. The past performance evaluation considers each Offeror's and subcontractors' demonstrated recent and relevant record of performance in supplying products that meet the requirements. The Government will evaluate the Offeror's past performance to determine how relevant a recent effort is to the current requirement and to determine how well the contractor performed on those previous contracts. Relevancy includes similarity of service/support, complexity and dollar value. Offeror's past performance information will be viewed in the Contractor Performance Assessment Reporting System (CPARS) and Past Performance Information Retrieval System (PPIRS) (<http://www.CPARS.gov/>) including the Federal Awardee Performance and Integrity Information System (FAPIS)([www.SAM.gov](http://www.SAM.gov)), Product Data Reporting and Evaluation Program (PDREP)( <https://www.pdrep.csd.disa.mil/> ) and Supplier Performance Risk System (SPRS) ( <https://www.sprs.csd.disa.mil/>). Other sources of information available to the Government may also be used in the evaluation of Past Performance.

*The following adjectival ratings/definitions shall be used to assign a rating for each effort for the Relevancy of the Past Performance obtained by the Government:*

**Very Relevant:** Present/past performance effort involved essentially the same scope and magnitude of effort and complexities this solicitation requires.

**Relevant:** Present/past performance effort involved similar scope and magnitude of effort and complexities this solicitation requires.

**Somewhat Relevant:** Present/past performance effort involved some of the scope and magnitude of effort and complexities this solicitation requires.

**Not Relevant:** Present/past performance effort involved little or none of the scope and magnitude of effort and complexities this solicitation requires.

*The following adjectival ratings/definitions shall be used to assign one rating for the Performance Confidence Assessment to each Prime Offeror. This rating shall be based on the Prime's and its subcontractors' Past Performance Information.*

**Substantial Confidence:** Based on the Offeror's recent/relevant performance record, the Government has a high expectation that the Offeror will successfully perform the required effort.

**Satisfactory Confidence:** Based on the Offeror's recent/relevant performance record, the Government has a reasonable expectation that the Offeror will successfully perform the required effort.

**Neutral Confidence:** No recent/relevant performance record is available or the Offeror's performance record is so sparse that no meaningful confidence assessment rating can be reasonably assigned. The offeror may not be evaluated favorably or unfavorably on the factor of past performance

**Limited Confidence:** Based on the Offeror's recent/relevant performance record, the Government has a low expectation that the Offeror will successfully perform the required effort.

**No Confidence:** Based on the Offeror's recent/relevant performance record, the Government has no expectation that the Offeror will be able to successfully perform the required effort.

### **FACTOR 3 - PRICE (Volume III)**

A price evaluation will be conducted as required by FAR 8.405-2(d). At the conclusion of the Technical and Past Performance evaluations, the Government will reach a consensus rating for the Technical factor and for the Past Performance factor for each Offeror. If an Offeror receives a Technical rating of "Unacceptable" the Government shall not rate the Offeror's Past Performance as that Offeror shall not be considered for award. Only Offerors receiving a Technical rating of "Acceptable" and a Past Performance rating of other than "Limited Confidence" or "No Confidence" will be eligible for award. The Government will not assign a rating to the Price factor, but will determine the evaluated price for each Offeror based on information provided, for the Offerors that represent the most likely candidates for award. These Offerors will then be compared using tradeoffs between the Technical factor, the Past Performance factor and Price. Offerors are advised that the Government seeks proposals that demonstrate an acceptable technical ability at a reasonable and realistic price. Award will be made to the Offeror(s) whose proposal represents the best value to the Government.
