SECTION 1 BACKGROUND AND GENERAL INFORMATION

Section 1-1 Scope

This Performance Work Statement (PWS) describes the performance requirements for Expeditionary Combat Skills (ECS) instructor services as required by the Center for Security Forces (CENSECFOR). This training shall be conducted for Naval personnel, Government civilian personnel, and others as directed by CENSECFOR and shall be performed at CENSECFOR Detachment Gulfport, MS. The contractor shall support CENSECFOR in the performance of instructional/training duties at this learning activity by providing instructor personnel who possess the requisite qualifications, expertise, and skills to deliver the respective Course of Instruction (COI).

Section 1-2 Purpose

The purpose of this PWS is to define the instructional, operational, and administrative tasks required to deliver formalized training support in the areas of basic expeditionary combat skills to Navy personnel. All training shall be in support of the formal course curriculum as developed and provided by CENSECFOR, and shall be delivered under the coordination of the CENSECFOR Officer in Charge (OIC), Training Officer, and ECS Course Manager.

Section 1-3 Period of Performance

The period of performance associated with this PWS shall be for a twelve (12) month base period, and four (4), twelve (12) month option years to be exercised at the option of the Government. The twelve-month base period is derived of a 45-day mobilization period and the remaining days of the base period for instructor support only.

Periods of Performance		
Period	From	To
Mobilization	18 July 2026	31 August 2026
Base Year	01 September 2026	17 July 2027
Option Year One	18 July 2027	17 July 2028
Option Year Two	18 July 2028	17 July 2029
Option Year Three	18 July 2029	17 July 2030
Option Year Four	18 July 2030	17 July 2031

Section 1-4 Breadth of Personnel Requirements

Based on current requirements, the contractor shall provide instructors at CENSECFOR DET Gulfport, MS as shown in Table 1-2 below. All instructor personnel shall possess the necessary qualifications, skills, background, and expertise as specified in Sections 4 and 5.

ECS Instructor Requirements			
Location	ECS Medical Support TCCC Instructors	ECS Weapons Based Instructors	Total Instructors
CENSECFOR DET Gulfport,	12	45	57

Table 1-2 ECS Instructor Requirements

Section 1-5 Contract Management

The OIC, CENSECFOR Detachment Gulfport, under the cognizance of the CENSECFOR Director of Training (DOT), is responsible for technical management of this training program. The CENSECFOR Contracting Officer Representative (COR) shall serve as the Fleet Logistics Center, Norfolk (FLCN) Procuring Contracting Officer's (PCO) primary point of contact (POC). The CENSECFOR COR shall provide overall technical oversight and management of this contract with the support of a designated Technical Assistant (TA) at the training location.

Section 1-5.1 Contract Program Manager

No later than ten (10) days after contract award, the contractor shall designate an individual who will serve as the primary point of contact for the PCO and CENSECFOR COR regarding issues relating to this contract. The contract Program Manager (PM) shall be empowered to make management level decisions in support of this contract effort, and shall oversee the Contract Det. Lead.

Section 1-5.2 Contract Site Lead

The contractor shall designate a Contract Site Lead, which, in addition to performing instructor duties, shall provide basic administrative management and supervision of the contract instructors providing services under this PWS and shall act as the local POC for the Government. The contract site lead reports to the course supervisor for the delivery of the daily administrative delivery of the course. The Contract Site Lead (or alternate acting in the absence of the Site Lead) shall have full authority to act for the contractor on all contract matters relating to the daily operations of the contract at the training location. The contractor shall furnish, in writing, to the OIC, CENSECFOR COR, and ECS Training Officer/Technical Assistant, the names and phone numbers of the Contract Site Lead (and alternate) within 15 days of contract award. The contractor shall notify the CENSECFOR OIC, CENSECFOR COR, and designated TA within one (1) working day, whenever changes are made.

Section 1-6 Travel Requirements

All travel will be executed per the applicable policies of the Federal Travel Regulation (FTR) accessible at: <https://www.gsa.gov/policy-regulations/regulations/federal-travel-regulation-fts>.

All travel shall be preapproved by the CENSECFOR COR. Travel not directly related to the requirements of this PWS, as validated by the CENSECFOR COR, will not be reimbursed by the Government. Travel related to the temporary or permanent replacement of contractor employee will be accomplished at no additional cost to the Government.

Prior to executing travel, the traveler shall submit a travel request in the format prescribed by the contractor. A copy of this travel request shall be routed, via the PM, to the CENSECFOR COR. The CENSECFOR COR will return validated travel requests to the PM with Government approval.

When travel is performed, the contractor will prepare a Trip Report as detailed in this PWS and will note the travel in the Monthly Status Report.

REIMBURSEMENT OF TRAVEL COST

Performance under this contract requires travel by contractor employees. When travel is required, the contractor is responsible for making all needed arrangements for contractor employees.

The Government will reimburse the contractor for allowable travel costs incurred by the contractor in performance of the contract and determined to be per FAR Subpart 31.2, subject to the following provisions:

- Travel required for tasks assigned under this contract shall be governed per rules set forth for temporary duty travel (TDY) in FAR 31.205-46.
- Travel, subsistence and associated labor charges for travel time are authorized whenever a task assignment requires work to be accomplished at a temporary alternate worksite.
- Travel performed for personal convenience and daily travel to and from work at the contractor's facility will not be reimbursed.
- Per diem for travel on work assigned under this contract will be reimbursed to employees consistent with company policy, but not to exceed the amount authorized in the FTR.
- In rendering the services, the contractor shall be reimbursed for the actual costs of transportation incurred by its employees not to exceed the cost of tourist class rail, or plane fare to the extent that such transportation is necessary for the performance of the services hereunder and is authorized by the COR. Such authorization by the COR shall be indicated in the order or in some other suitable written form. To the maximum extent practicable without the impairment of the effectiveness of the mission, transportation shall be tourist class. In the event that only first class travel is available, it will be allowed, provided justification therefore is fully documented and warranted.
- The use of privately owned conveyance within the continental United States by the traveler will be reimbursed to the contractor at the mileage rate allowed by the FTR. Authorization for the use of privately owned conveyance shall be indicated on the order. Distances traveled between points shall be shown in standard highway mileage guides. Any deviations from distance shown in such standard mileage guides shall be explained by the traveler on their expense sheet. The contractor shall be entitled to reimbursement for car rental, exclusive of mileage charges, as authorized by each order, when the services are required to be performed outside the normal commuting distance from the contractor's facilities. Car rental for TDY teams will be limited to a rate of one car for every four (4) persons on TDY at one site.

Section 1-7 Government Points of Contact

Provided at contract award.

Section 1-8 Government Roles and Responsibilities

The following descriptions are provided to clarify the roles and responsibilities of the government personnel associated with this contract effort. Further description of the PCO, COR, ACOR, and TA responsibilities can be found in the Contract Administration Plan (CAP) that is included as an attachment to this contract.

- **Commanding Officer (CO)** – The Commanding Officer is responsible for all aspects regarding the operation of the command. The CO makes the final decision in all cases involving the CENSECFOR organization.
- **Executive Director (ED)** – The Executive Director supports the CO by providing guidance to the CENSECFOR organization as to the priority and operation of the command mission.
- **Procuring Contracting Officer (PCO)** – The contracting officer ensures performance of all necessary actions for effective contracting ensures compliance with the terms of the contract and safeguards the interests of the United States in the contractual relationship. It is the Contracting Officer that assures the Contractor receives impartial, fair, and equitable treatment under the contract. The Contracting Officer is ultimately responsible for the final determination of the adequacy of the Contractor's performance. The PCO is the only official authorized to obligate the Government or make changes in contract terms and/or conditions.
- **Contracting Officer's Representative (COR)** – An individual nominated by CENSECFOR, and designated in writing by the Contracting Officer to act as his/her authorized representative to assist in administering the contract. The source and authority of the COR is the Contracting Officer. COR limitations are contained in the written letter of appointment and the attached CAP.
- **Technical Assistant (TA)** – An individual nominated and designated in writing by CENSECFOR to act as the COR's authorized representative. TA limitations are contained in the written letter of appointment. Normally, a TA is appointed at locations that are geographically separated from the COR and will report directly to the COR. The TA provides detailed oversight of the Contractor's performance and reports on a regular basis (normally monthly), his/her findings to the COR. These findings should be timely, complete, and impartial. The TA will interact closely with the Contract Site Lead. Per the Federal Acquisition Regulations (FAR), the TA shall not provide technical direction (in this sense, the TA may not add, increase or redefine the contractual requirements contained in the contract and/or task order), nor provide clarification as to contractual requirements established in the contract and/or task order, but instead must refer all such inquiries to the COR.
- **Director of Training (DOT)** – The DOT oversees the Training Directorate, and has oversight over the development and maintenance of the various course curricula, sustainment of training standards, maintenance of training metrics, functional oversight of learning activities, and a myriad of related responsibilities.
- **Course Curriculum Model Manager (CCMM)** – An individual attached to the CENSECFOR Training Directorate, and has oversight over the delivery and format of a specific course (or group of courses). The CCMM functions as a technical expert on the course material, and ensures that the course delivery is standardized throughout the domain.
- **Command Security Manager (CSM)** – The CSM serves as the commanding officer's advisor in matters regarding the eligibility of personnel to access classified information held at the command, ensures that all personnel who will handle classified information or

will be assigned to sensitive duties are appropriately cleared; that requests for personnel security investigations are properly prepared, submitted and monitored; and that access to classified information is limited to those who are eligible and have the need to know.

- **Officer in Charge** – The OIC is responsible for the delivery of training as well as the overall management of all resources assigned to that location, including personnel and facilities. The OIC oversees the daily production accomplished at the Detachment, and frequently interacts with the Contract Site Lead.
- **ECS Training Officer** – The ECS Training Officer is responsible for supervision and management of all Training and Operations conducted at the Detachment and ensuring all required resources are available and in place at the appropriate time. The Training Officer frequently interacts with the respective CENSECFOR Training Specialist and is designated as the TA to the COR.
- **Course Supervisor** – Appointed by the OIC to function as the manager of a specific COI. The Course Supervisor provides daily training schedules and is responsible for student management.

SECTION 2 APPLICABLE DOCUMENTATION AND SUPPORT MATERIALS

Section 2-1 Support Materials–Government Furnished Information (GFI)

GFI will be provided to contract instructors at the training location to support the instruction of the ECS course. The GFI shall consist of Navy Instructions (latest version), lesson outlines, instructor guides, student guides, special student handouts, and course tests for each COI. The Training Officer shall be the focal point for coordination of receipt of GFI and resolution of issues surrounding the GFI. Return of GFI shall be coordinated with the Training Officer upon completion of contractor performance or as directed by the CENSECFOR COR or the FLCN PCO.

Section 2-2 Training Course Control Document (TCCD)

The Training Course Control Document (TCCD) and references contained within, identify enabling and terminal objectives. This document is hereby incorporated by reference and become a part of this PWS to the extent specified herein. In the event of a conflict between documents referenced herein and the contents of this PWS, the contents of this PWS take precedence. Nothing in this PWS, however, supersedes applicable laws and regulations, unless a specific exemption has been obtained. Contractors shall use the most recent and up to date versions of these training documents, which will be provided by the Government.

SECTION 3 TRAINING REQUIREMENTS

Section 3-1 General Requirements

The normal training cycle for Naval personnel is focused on the development of individual skills to support the accomplishment of generalized missions. Most of these missions are related to traditional Navy functions. The ECS COI provides basic combat skills to individuals attached to units within the Navy Expeditionary Combat Command (NECC) and Naval Special Warfare (NSW) organizations. In accordance with Section 4 and 5 of the PWS, the contractor shall provide fully qualified and certified instructors who have demonstrated experience in an expeditionary warfare operational environment, weapons training and/or medical support experience.

Section 3-1.1 Training Environment

The services required hereunder shall be performed in one of the following specific instructional environments (these training environments are provided and maintained by the Government):

- **Legacy Environment (Group-Paced, Instructor-Led).** This is traditional classroom didactic instruction in a Navy resident schoolhouse environment. The contractor shall provide on-site instructors to teach the course.
- **Legacy Lab Environment (Group-Paced, Instructor-Led).** This includes Group-paced dynamic instruction in a Navy schoolhouse environment. The contractor shall provide on-site instruction/facilitation.
- **Blended Learning.** Structured opportunities to learn which use more than one teaching or training method, inside or outside the classroom, through which at least part of the content is delivered by computer-based instruction. This definition includes different learning or instructional methods (lecture, discussion, guided practice, reading, games case study, simulation) different delivery methods (face-to-face or computer mediated), different scheduling (synchronous or asynchronous) and different levels of guidance (individual, instructor or expert led, or group/social learning). More commonly, blended learning refers to a combination of face-to-face teaching and technologies; (Adapted from Seel2012). It involves changing traditional schooling methods and organization by taking advantage of new technologies.

As CENSECFOR pursues high-velocity learning, the use of digital or film based video and photography recording and playback may be employed to increase student proficiency and aid in rapid feedback. Possible uses of these videos/photos include the following:

- In laboratory environment, these video/photos and associated systems may be used by the Instructor to conduct timely and detailed feedback on student performance.
- Videos/photos may be archived and used as instructional tools to show both positive and negative scenarios and behaviors while in laboratories.
- Scripted and unscripted videos could be used as model maneuvers and actions to be used for future laboratory evolutions as well as possible Computer-Based Training (CBT) or other educational material.
- Promote CENSECFOR training and recruiting for Instructors within the Navy.

- Videos/photos may be used for other promotional activities such as:
 - * Promotional purposes for Fleet use
 - * Sharing with external entities in the public domain
 - * Course overview
 - * Navy social media content
- As CENSECFOR moves toward blended VR/AR approach, these videos/photos may be used to assist in the generation and production of advanced training aides.
- Administrative uses, such as historic reporting and record keeping, may be performed with these videos/photos.

Only CENSECFOR authorized video/photo equipment shall be used and only when authorized by Learning Activity Leadership. Instructors and students are not authorized to take video/photos on their personal devices, even in support of training delivery.

All digital or film based videos and photographs are subject to reuse in U.S. Navy products for public release.

Note: Contractor will not be required to supply any recording equipment, but merely allow their Instructors to participate in the recording of video or filming of CENSECFOR students in training. Contractor will not be compensated if involved in video since any filming conducted during training evolutions will be considered within scope of this PWS. If utilized, all recording equipment used will be considered Government Furnished Equipment (GFE), and local Government authorities shall be responsible for check in / out procedures.

Release of videos and/or photographs shall not be made without CENSECFOR Curriculum Control Authority (CCA) approval.

Section 3-1.2 Training Schedules

Training shall normally be conducted eight hours a day (early morning, evening, or night shift), five (5) days a week for the length of the course. However, the daily activity may extend up to twelve (12) hours if required to meet all training objectives outlined in the curriculum. Student remediation may be required and shall, when necessary, be considered beyond the normal eight (8) hour training time for each class. During the execution of the class schedule where holidays or other events impact the expeditious movement of students through the training pipeline, the CENSECFOR OIC may extend the number of daily training hours to compensate for the loss of training time

Section 3-1.3 Changes to Curriculum

Only training materials and lesson plans developed and promulgated by CENSECFOR N7 will be used in training delivery. It is recognized that certain portions of the course may become outdated based on a number of external factors. The contractor's instructors are encouraged to identify and submit recommended changes to the course curriculum to the ECS Training Officer. However, the content of the instructional material shall not be modified until formally changed by CENSECFOR N7. Additionally, during periodic course reviews, instructors may be tasked to provide assistance in the development of new course material. Instructor change recommendations shall be at no additional cost to the Government and shall become the property of the Government.

Section 3-1.4 Academic Standards

All instructors shall adhere to and maintain academic standards (e.g., course grading criteria) in accordance with assessment standards for the course. Academic standards for each course can be found in the testing Section of the course curriculum. If the student(s) have academic problems, the instructor shall inform the Course Supervisor and provide remediation to improve their course performance. Whenever possible without adversely impacting the course schedule, remediation shall be accomplished during normal training hours.

Section 3-1.5 Navy Academic Review Board (ARB) Procedures

In cases where a student's performance does not improve with remediation, a Navy Academic Review Board (ARB) may be convened by the appropriate Government authority. The board evaluates a student's progress and recommends a course of action when the student has failed to achieve learning objectives. In the event a student undergoes the ARB procedures, contract instructors may be required to provide student performance information. Academic Review Boards are discussed in NAVEDTRA 142 (Navy Training Process) and CENSECFORINST 1540.1 (Training Policy and Guidance).

Section 3-1.6 Training Decorum and Order

Contract instructors shall have the authority and are empowered to maintain their classrooms, ranges, and laboratory training areas in an orderly and professional atmosphere. They are responsible for ensuring students follow all policies, instructions and procedures governing training. Contract instructors are not empowered to physically discipline student or take physical action of a punitive nature.

Section 3-1.6.1 Complaints against Students

Students are expected to conduct themselves in a professional and military manner. Students who fail to conduct themselves with the proper decorum shall be cautioned by the contract instructor, and then referred to the ECS Course Supervisor. If the inappropriate conduct continues, the student shall be referred by the ECS Course Supervisor to the CENSECFOR OIC. This does not preclude immediate referral if, in the opinion of the instructor, the misconduct is of such severity as to warrant such action. In the event of any formal military action against students under their tutelage is required, contract instructors shall be requested to provide written statements to, or appear in person, at Non-Judicial Punishment (NJP) or Courts-Martial proceedings. Providing written statements and appearing in person at Non-Judicial Punishment or Courts-Martial proceedings for student classroom misconduct arising under this contract shall be deemed part of the instructor's contractual duties and shall not be a basis for a claim for additional payment under this contract.

Section 3-1.6.2 Complaints by Contract Instructors against Military Staff

Contract instructors shall report any threats to the training environment, order and discipline (e.g., fraternization, sexual harassment, discrimination, etc.) between contract employees and military staff to their Contract Site Lead, and/or the ECS Training Officer and OIC or AOIC who

shall notify the CENSECFOR COR immediately of the problem. Upon notification to the CENSECFOR COR that a complaint has been received, the OIC shall investigate the validity of the complaint with the cooperation of the Contract Site Lead. The CENSECFOR DET OIC will provide the results of the investigation to the PCO, CENSECFOR COR, Contract Program Manager and the Contract Site Lead, and any other personnel as deemed appropriate not later than 10 days after the complaint was submitted.

If the complaint is determined valid, the CENSECFOR OIC shall be responsible for initiation of the proper course of action. Contract personnel may be requested to provide written statements to, or appear in person, at NJP or Courts-Martial proceedings. Such statements or appearances may be directly related to charges or may provide information for use in determining appropriate punishment. Providing written statements and appearing in person at NJP or Courts-Martial proceedings shall be deemed part of the instructor's contractual duties and shall not be a basis for a claim for additional payment under this contract.

Section 3-1.6.3 Complaints against Contractor Personnel

In the event that a complaint is made regarding the conduct of contractor personnel, the CENSECFOR OIC shall immediately notify the CENSECFOR COR and Contract Det. Lead. The COR will notify the Contract Vendor Program Manager. Depending upon the severity of the offense, the CENSECFOR OIC may request the removal of the contract instructor(s) named in the complaint from instructor duty while the complaint is investigated. Should the Contractor elect not to remove the contract instructor, he shall notify the CENSECFOR OIC and COR in writing of the rationale for not removing the instructor. In situations in which student or staff safety is threatened, the government is empowered to immediately take appropriate steps to mitigate the situation, to include relieving contract instructors of instructor duty.

Upon completion of the investigation, the CENSECFOR OIC shall provide results to the PCO, CENSECFOR COR, and Contract Program Manager (and/or Contract Det. Lead). If the results of the investigation prove the complaint to be valid, the Contract Program Manager shall have a maximum of three (3) working days to propose a corrective plan for resolving the matter. This plan shall be submitted to the PCO, with copies to the CENSECFOR COR and CENSECFOR OIC. In the event that the Government deems the corrective plan insufficient for resolution of the problem, a written response to the Contractor Program Manager shall be provided within three (3) working days.

Section 3-1.7 Instructor Management

The contractor shall provide a list of contractor personnel to the ECS COR, CCMM and ECS Training Officer at the start date of contract performance, thereafter as any changes occur, and in accordance with the Monthly Status Report requirements in this PWS. Contracted instructors shall not be dismissed or removed when they have a class in session, except for cause under Sections 3-1.6.3 or instructor requirements under Section 4.

Section 3-1.7.1 Instructor Replacement

In the event that contractor instructor personnel are temporarily or permanently unavailable for more than four (4) days for any reason other than Paid Time Off or short duration Leave without Pay, the contractor shall be required to identify a replacement instructor that meets the instructor qualification requirements contained in Sections 4 and 5 of this PWS. The contractor

shall provide a detailed replacement plan to the CENSECFOR COR and CENSECFOR OIC within 72 hours of instructor departure and the identified replacement instructor shall start performance within ten (10) working days. Any such replacement shall occur without interrupting the class schedule, without additional expense to the Government, and within ten (10) working days of the unavailability of the instructor. The contractor shall be responsible for obtaining any Government issued identification cards from the former employee and to turn over those items to the designated TA immediately upon termination of employment.

If the amount or duration of the loss of contractor Instructor(s) is deemed to be detrimental to the delivery of the ECS COI, the Government may take such action as to: document substandard performance in a Contractor's Deficiency Report (CDR), reject contractor invoices for services due to the contractor's failure to deliver services as stated and quantified in the PWS, and/or cancel the contract.

Section 3-2 Student Supervision

Contract Instructors shall be present during all activities or evolutions in which students are participating that are related to the Enabling or Terminal Objectives of the curriculum to provide appropriate instructional supervision, oversight, and subject matter expert (SME) support.

Section 3-3 Classroom Preparations and Responsibilities

Contract instructors shall assist in classroom and laboratory preparation, including ranges and remote training sites, student administration, test proctoring, and safety procedures to avoid interruptions in the training day. Instructors shall promote a safe and secure environment conducive to learning for courses supported under this contract.

Section 3-4 Course Description

Section 3-4.1 Expeditionary Combat Skills (ECS)

The Expeditionary Combat Skills (ECS) course is designed to provide eligible personnel with basic expeditionary combat skills training necessary to professionally and safely perform high risk security operations when assigned to Navy Expeditionary Combat Command (NECC) or Naval Special Warfare (NSW) organizations. This course will provide NECC and NSW personnel with the necessary individual knowledge, skills and abilities to perform Basic Tactical Communications, Convoy Operations – Basic, Small Arms, Tactical Shooting, Counter Improvised Explosive Devices (C-IED), Mission Planning, Basic Tactical Movement, Basic Chemical, Biological, Radiological, Nuclear, and Explosive (CBRNE) Procedures, and Judgement-based Engagement Training (JET) / Tactical Decision Making (Shoot/Don't Shoot). The ECS course will allow personnel to demonstrate, qualify and become comfortable with both primary and secondary weapons. Students will perform basic movement while engaging targets, transition from primary to secondary weapon, execute vehicle emergency egress procedures, and conduct live-fire exercises in a controlled environment. Additionally, students will become familiar with the psycho/physiological effects induced during deadly force or life threatening confrontations and measures to effectively minimize their impact on engagement decision making during JET Training. This course is classified as High Risk as defined in OPNAVINST 1500.75 (Policy and Guidance for Conducting High-Risk Training).

SECTION 4 INSTRUCTOR REQUIREMENTS AND QUALIFICATIONS

Section 4-1 Basic Instructor Requirements

The contractor shall provide instructors who meet the qualifications and requirements stated within sections 4 and 5, and possess the requisite knowledge, skills and abilities to complete CUIT certification and deliver each phase and topic assigned. Any contractor personnel proposed to serve as substitutes and/or replacements shall be as qualified as the individuals they are replacing. The qualifications include the requirements established in sections 4 and 5 of this PWS, as well as the ability to rapidly complete the CUIT process described in section 5-2.1. All qualifications and certifications shall be supported by a complete Instructor Training Jacket (ITJ) as established in section 5-2.

Several training courses are designated as High-Risk per NETCINST 1500.13, Naval Education and Training Command High-Risk Training Safety Program. Given this designation and CENSECFOR's commitment to providing a safe and effective learning environment, the government invokes its right to assess any proposed contract instructor's background using the process as described in Section 5. The government retains the right to refuse to accept any proposed contract instructors considered unqualified or unsafe based on the results of the assessment and as dictated in NETCINST 1500.13.

In extenuating circumstances, waivers of instructor qualifications may be entertained by the CENSECFOR DOT. All instructor qualification waiver requests shall be submitted in writing to the CENSECFOR DOT via the CENSECFOR COR.

Section 4-2 General

All contractor instructors, contractor instructor supervisors, and other contractor personnel shall conform to and comply with the rules, regulations, and other requirements of the Department of Defense and Department of the Navy, and as otherwise specified in this PWS for integrity, grooming, conduct, speech, student fraternization, physical fitness, safety, and security. In order to perform the ECS training services as provided for in this PWS, the contractor instructor cadre(s) shall possess a minimum of two (2) years documented tactical military operational experience involving:

- Basic Tactical Communications
- Convoy Operations - Basic
- Small Arms
- Tactical Shooting
- Counter Improvised Explosive Devices (C-IED)
- Mission Planning
- Basic Tactical Movement
- Basic CBRNE Procedures
- Tactical Decision Making (Shoot/Don't Shoot)

In addition, each contractor instructor shall:

- Be a qualified instructor in accordance with the specific requirements identified in the following sections. Have 2 years of experience as an instructor delivering training.
- Have knowledge of basic and advanced training techniques to include classroom management, Classroom Assessment Techniques (CATs), and student motivation.
- Have knowledge of computer technology application as it applies to instructional presentation and the use of classroom training aids.
- Possess high personal standards of technical knowledge and professional competence in delivering training material.
- Possess the ability to perform in a military environment.
- Possess a familiarity with the organization and hierarchy of the U. S. Navy, military rank/grade structure.
- Possess a knowledge of Navy and military terminology.
- Possess above average communication skills and the ability to comprehend both verbal and written instructions.
- Obtain access to Risk Management Information (RMI) system in accordance with COMNAVSAFECOM 5200.3 – Access to Navy Safety Command Information (High-Risk Instructors only).

Additionally, contractor instructors are expected to maintain the personal standards of technical and professional levels of competence that are at least equal to that of the Department of the Navy military personnel undergoing training. The morale and motivation of student and instructional personnel shall be maintained at a maximum level to ensure a favorable environment for learning.

Section 4-3 Basic Instructor Qualifications

All instructor personnel shall possess the instructional qualifications contained within this Section. All instructors shall possess one of the following qualifications:

1. Have attended the Navy Instructor Training Course (NITC) (A-012-0077) (or military service equivalent), or
2. Academic credentialing (teacher/professor), or
3. Instructor training via an academic institution. Academic ITC requirements should contain at a minimum, these Learning Objectives:
 - (a) Effective communication and questioning techniques
 - (b) Adult learning theory and principles
 - (c) Instructional Delivery methods
 - (d) Lesson delivery performance laboratory
 - (e) Training environment management
 - (f) Inter-personal skills
 - (g) Evaluation and Feedback

The CENSECFOR Director of Training, with recommendation from the Learning Standards Officer, will make the final determination of whether Academic ITC requirements detailed in paragraph 3 above have been met.

Currently, only Tidewater Community College course MILT 5400 meets the requirements listed above, as it has been the only course submitted for evaluation. The contractor may submit other courses via the appropriate learning institution for consideration.

Section 4-4 Dress Code and Grooming Standards

Expeditionary Combat Skills (ECS) training attracts a significant amount of public attention, and frequently, the training locations are visited by senior DoD leadership, VIPs and foreign dignitaries. Additionally, ECS contract instructors provide technical skill role models to young military men and women attending the training. Therefore, it is essential that all instructors present themselves in a highly professional manner in appearance and dress that is commensurate with the type of training.

Contractor furnished Protective Personal Equipment (PPE) and clothing is discussed in Section 6-2 of this PWS.

Section 4-4.1 Dress Code

The contractor shall establish and maintain specific guidelines regarding the dress code for their employees. At a minimum, these guidelines shall include prohibitions of eccentricities or extremes in dress and hairstyles, apparel in a ragged and frayed condition; tank tops; halter tops; crop tops; sleeveless shirts; mesh and see-thru garments; exposed clothing with obscene or advertising logos or undergarment type shirts worn as exterior clothing. Additionally, these guidelines shall provide for standardization in appearance by their contract personnel.

Section 4-4.2 Grooming Standards

The contractor shall establish and maintain specific guidelines regarding grooming standards for their employees. These standards shall be similar to those contained in Section 2, Chapter 2 of the Navy Uniform Regulations provided grooming practices do not create a safety hazard.

Section 4-5 Instructor Categories

In support of this contract, instructors will encompass two categories, ECS Medical Support Instructors and ECS Weapons Based Instructors. In addition to meeting the aforementioned instructor requirements, each of these categories entail specialized skills, experience, and/or background as outlined in the respective sections below.

Section 4-5.1 ECS Medical Support Instructors

The contractor will provide a minimum of twelve (12) ECS Medical Support Instructors. ECS Medical Support Instructors will perform classroom and laboratory instruction. This instruction involves delivery of formal course curriculum in the areas of Basic First Aid, and Defense Health Agency (DHA) Combat Lifesaver/Tier 2 Tactical Combat Casualty Care (TCCC). ECS Medical support Instructors shall provide for daily set-up and maintenance of all medical training aides utilized in ECS training. The training aides will be provided by the Government.

Each Medical Support Instructor shall:

- Meet the basic instructor requirements set forth above,
- New hire MSI's must possess at least two (2) years of experience, within the most recent five years, in providing military first aid or emergency room / trauma center care.

In accordance with NETCINST 1500.13, Medical Support Instructors are exempted from medical or psychological screenings since they will only be teaching non-HRT topics/segments of ECS course (i.e., DHA Combat Lifesaver/Tier 2 TCCC).

Medical Support Instructors must still comply with all requirements for a Drug Free Environment as outlined in Sections 5-2.3 through 5-2.3.3.

Medical Support Instructors must still obtain CUIT certification outlined in enclosure (2) of CENSECFORINST 1540.1 in order to teach students independently, even though they will only be teaching non-HRT topics/segments of ECS course.

Section 4-5.1.1 Medical Support – Phase Lead

The contractor will assign a phase lead for the medical support category as identified below. The phase lead is responsible for all phase leadership to include, but not limited to, instructor assignments and scheduling.

ECS Medical Support TCCC Instructor Phase Lead	
Labor Category	Full Time Equivalent
ECS Medical TCCC Instructor	1

Section 4-5.1.2 Tactical Combat Casualty Care (TCCC)

Pursuant to ECS Training Requirements Review (TRR) conducted 25-26 October 2021, NECC and NAVSPECWARCOM re-validated a new requirement; implementing Defense Health Agency (DHA) Combat Lifesaver/Tier 2 TCCC as the medical standard at ECS. In accordance with OPNAVINST 1500.86 (Tactical Combat Casualty Care) and CENSECFOR Curriculum Control Authority (CCA) TCCC instruction qualification policy, the contractor shall ensure that all ECS Medical Support Instructors have and maintain current Tactical Combat Casualty Care (TCCC) certification in accordance with the latest Pre-hospital Trauma Life Support (PHTLS) standards. The contractor is responsible for any costs or travel required in the maintenance of this certification.

Section 4-5.2 Weapons Based Course Instructors

The contractor will provide a minimum of 45 ECS Weapons Based Instructors. These instructors will deliver a wide variety of training topics, as well as providing instructional and safety support for live-fire weapons training. All weapons-based Instructors shall have a minimum of 2 years' experience in delivering weapons-based courses-of-instruction which include live-fire training, and possess/be capable of demonstrating modern dynamic combat shooting skills. In addition to the aforementioned requirements, all ECS Weapons Based Instructors must be familiar with the service pistol and carbine identified in the most recent version of the attached TCCD and capable of achieving and maintaining a "Sharpshooter" qualification score with assigned weapon(s) during their initial and all qualifications throughout the duration of the contract.

Section 4-5.2.1 Weapons Based – Phase Leads

The contractor will assign a phase lead for each weapons-based level (I, II, and IV) as identified below. The phase lead is responsible for all phase leadership to include, but not limited to, instructor assignments and scheduling.

ECS Weapons-Based Instructor Phase Leads	
Labor Category	Full Time Equivalent
ECS Weapons-based Instructor Phase I - (Pistol)	1
ECS Weapons-based Instructor Phase II - (Carbine)	1
ECS Weapons-based Instructor Phase IV - (Expeditionary Warfare)	1

Section 4-5.2.2 Small Arms Requirements and Standards

Section 4-5.2.2.1 Small Arms Weapons Instructor

All Weapons Based Instructor personnel shall have completed one of the small arms instructor courses listed in paragraph 11 of OPNAVINST 3591.1 (Small Arms Training and Qualification). The contractor shall ensure that contract instructors have completed the required courses, and that appropriate documentation is filed in the Instructor Training Jacket (ITJ). The contractor shall be responsible for ensuring that the prospective instructor is capable of meeting this requirement upon reporting for duty. Instructors shall be required to qualify as sharpshooter while attending ECS in a student status. Documentation of this qualification shall be maintained in the Instructor's ITJ. Failure to qualify as sharpshooter on assigned weapon(s) may result in termination.

Section 4-5.2.2.2 Small Arms Proficiency

All assigned weapons-based Instructors shall re-qualify at least every 180 days on the courses of fire and with the type of weapons they instruct. Instructor personnel shall be provided the opportunity to sustain weapons qualification at the same time as military and Government civilian instructors. For these weapon qualifications, the Government shall provide weapons, ammunition, and range facilities. Documentation of this qualification shall be included in the contractors ITJ.

Note: The semi-annual live-fire qualification requirement is more stringent than what is detailed in OPNAVINST 3591.1; however, since the schoolhouse environment dictates a higher level of proficiency, semi-annual live-fire qualification has been implemented for all CENSECFOR weapons-based training instructors.

Section 4-5.2.2.3 Line Coach (Small Arms)

All assigned weapons-based Instructors are required to complete the applicable Personnel Qualification Standards (PQS) for Line Coach (Small Arms) as contained in the Security Force

Weapons PQS (NAVEDTRA 43466), and a letter of designation signed by the respective CENSECFOR Detachment Primary Range Safety Officer (RSO). A copy of this letter of designation shall be filed in the ITJ. Upon completion of the aforementioned PQS, the contractor shall nominate instructors for designation as a Line Coach (Small Arms) to the OIC. This qualification shall be accomplished within ninety (90) days of reporting for duty.

Section 4-5.2.2.4 Range Safety Officer (RSO)

Operation of the ranges during period of live fire training requires a designated RSO. The contractor shall ensure that a minimum number of instructors (as indicated in Table 4-1 below) are qualified to perform the duties of Range Safety Officer (RSO). This designation requires the satisfaction of the appropriate weapons instructor qualification as dictated by paragraphs above, and completion of the applicable Personnel Qualification Standards (PQS) for RSO as contained in the Security Force Weapons PQS (NAVEDTRA 43466). After the aforementioned requirements have been satisfied and forwarded to CENSECFOR HQ, a RSO Certification Board will be convened to validate the knowledge and skill level of each candidate. The composition of the RSO Certification Board will be comprised of CENSECFOR HQ personnel. The board may be conducted in-person (if feasible) or telephonically.

The RSO Certification Board will provide the board results and an appropriate recommendation to the Commanding Officer, Center for Security Forces (or a designated representative). In the event that no disqualifying factors are noted, the Commanding Officer will issue a letter of designation. A copy of this letter of designation shall be filed in the ITJ. The contractor shall nominate RSO candidates to the ECS Training Officer, who will endorse and forward the nomination through the chain of command to the CENSECFOR Commanding Officer for formal designation. When utilized in this capacity, this individual must not perform other instructor or line coach functions. Additional details can be found in CENSECFORINST 3591.1.

A minimum total of fifteen (15) RSOs out of the 45 ECS Weapons Based Instructors must meet qualification requirements: 5 Pistol, 5 Rifle, and 5 for Simunitions are required. These qualifications must be accomplished prior to the completion of the Mobilization phase, and the minimum number of qualified RSOs, as stated above, must be maintained throughout the duration of the contract.

Range Safety Officer (RSO) Requirement				
Phase of Instruction	Pistol	Rifle	Simunitions	Total Instructors
Number of Instructors	5	5	5	15

Table 4-1 Range Safety Officer Requirement

Section 4-5.2.3 CBRNE Topic Instructor

A minimum of 6 of the 45 ECS Weapons Based Instructors shall be qualified to instruct the CBRNE topics within the ECS COI. This qualification in the CBRNE topics of the ECS COI must be accomplished within ninety (90) days of contract start date and the minimum number of qualified CBRNE topic Instructors, as stated above, must be maintained throughout the duration of the contract.

Section 4-5.2.4 C-IED Topic Instructor

A minimum of 6 of the 45 ECS Weapons Based Instructors must meet qualification requirements to instruct the C-IED topics within the ECS COI. This qualification in the C-IED topics of the ECS COI must be accomplished within ninety (90) days of contract start date and the minimum number of qualified C-IED topic Instructors, as stated above, must be maintained throughout the duration of the contract.

Section 4-5.2.5 Communication and Convoy Topics Instructor

A minimum of 6 of the 45 ECS Weapons Based Instructors shall be qualified to instruct the Basic Tactical Communications and a minimum of 12 ECS Weapons Based Instructors shall be qualified to instruct the Convoy Operations - Basic topics within the ECS COI. This qualification in the Basic Tactical Communications and Convoy Operations - Basic topics of the ECS COI must be accomplished within ninety (90) days of contract start date and the minimum number of qualified Basic Tactical Communications and Convoy Operations - Basic topic Instructors, as stated above, must be maintained throughout the duration of the contract.

Section 4-5.2.6 JET Topic Instructor

Weapons Based Instructors may be required to be cross trained between Phases of Instruction I, II and IV and qualified to instruct the JET topic within the ECS COI. A minimum of 8 of the 45 ECS Weapons Based Instructors shall be qualified to instruct the JET topic within the ECS COI. This qualification in the JET topic of the ECS COI must be accomplished within ninety (90) days of contract start date and the minimum number of qualified JET topic Instructors, as stated above, must be maintained throughout the duration of the contract.

Section 4-5.3 Compliance

All instructor personnel shall be cognizant and compliant with all local, state, and federal regulations regarding firearms, explosives, and high capacity magazines.

Note: Personal weapons are not to be utilized under any circumstances.

Section 4-5.4 Armed Sentry Representative

Instructors shall be tasked to perform duties as an Armed Sentry Representative for the transportation of weapons to/from the firing range, and provide security on the weapons during the training evolution.

Section 4-6 Operation of Government Owned or Leased Vehicles

The operation of Government owned or leased vehicles shall be required in connection with the delivery of the instruction associated in this PWS. The regulations and guidelines which apply to contractor operation of Government vehicles are found in Chapter 8 of DoD Regulation 4500.36-R, Management, Acquisition, and Use of Motor Vehicles. Additionally, Section 3.8 of NAVFAC Publication P-300, Management and Support of Civil Engineering Equipment,

provides additional guidance on driver testing and licensing. Generally, government contracts and agreements require that operators comply with the licensing requirements of the state and local motor vehicle laws, as well as any federal requirements. All instructors must possess a valid driver's license, and be certified by the contractor as being fully qualified to operate the vehicles/equipment as appropriate. The contractor shall be responsible for determining any special requirements imposed by the respective geographical locations, and for ensuring that the instructors satisfy any additional conditions. The contractor will provide appropriate documentation regarding all operator qualifications to the CENSECFOR Detachment OIC, CENSECFOR COR, and PCO/ACO, prior to the operation of any Government owned or leased vehicles/equipment.

A new Entry-Level Driver Training (ELDT) requirement has been promulgated by Federal Motor Carrier Safety Administration (FMCSA). This regulation requires that all entry-level drivers of commercial motor vehicles (CMVs) who are subject to ELDT regulations receive training from a provider listed on FMCSA's Training Provider Registry. Only registered training providers will be able to submit certification of a driver's completion of entry-level driver training to the Training Provider Registry. The contractor will be responsible for all costs associated with obtaining ELDT from a registered training provider. ELDT must be completed before taking a CDL skills test. ELDT eligibility and completion requirements are detailed in accordance with ELDT Eligibility Factsheet; <https://tpr.fmcsa.dot.gov/content/Resources/ELDT-Applicability-Factsheet.pdf>.

Any instructor who operates commercial 44- and/or 36-passenger buses must be in compliance with this new ELDT regulation. It is the contractor's responsibility to determine ELDT eligibility and completion requirements for their designated drivers. Additional background information and resources are available at these links;

<https://www.fmcsa.dot.gov/registration/commercial-drivers-license/entry-level-driver-training-eldt>

<https://tpr.fmcsa.dot.gov/>

<https://tpr.fmcsa.dot.gov/Drivers/Applicability>

Section 4-7 Vehicle and Other Insurance Requirements

In accordance with FAR 52.228-5, "Insurance-Work on a Government Installation", the following minimum insurance requirements are required in accordance with FAR 28.307-2, "Liability":

(a) Workers' compensation and employer's liability. Contractors are required to comply with applicable Federal and State workers' compensation and occupational disease statutes. If occupational diseases are not compensable under those statutes, they shall be covered under the employer's liability section of the insurance policy, except when contract operations are so commingled with a contractor's commercial operations that it would not be practical to require this coverage. Employer's liability coverage of at least \$100,000 shall be required, except in

(c) Automobile liability. The Contracting Officer shall require automobile liability insurance written on the comprehensive form of policy. The policy shall provide for bodily injury and property damage liability covering the operation of all automobiles used in connection with performing the contract. Policies covering automobiles operated in the United States shall provide coverage of at least \$200,000 per person and \$500,000 per occurrence for bodily injury

and \$20,000 per occurrence for property damage. The amount of liability coverage on other policies shall be commensurate with any legal requirements of the locality and sufficient to meet normal and customary claims.

(d) Bus liability. Contractors are required to maintain insurance in accordance with SeaPort MAC contract and FAR 52.228-5 "Insurance-Work on a Government Installation." Contractors shall ensure they are insured in compliance with all federal, local, and state requirements in regard to the types of insurance and required minimums.

Section 4-8 Transportation

Contractor shall be responsible for transportation of students to and from training locations on buses provided by the Government. All contractor instructors are required to possess a valid driver's license, and be certified by the contractor as being fully qualified to operate the vehicles/equipment as appropriate. The contractor will document all operator qualifications, and provide a copy of this documentation to the CENSECFOR OIC and/or ECS Training Officer, CENSECFOR COR, and PCO, prior to the operation of any government owned or leased vehicle/equipment. A minimum of thirty (30) instructors must be certified to operate commercial 44- and/or 36-passenger buses in accordance with NAVFAC P300. Vehicle operators are responsible for making daily operational checks, vehicle log entries and maintaining general cleanliness of vehicles they operate. Bus drivers will be distributed between training phases as noted in this table;

Bus Driver Requirement				
Phase of Instruction	I	II	III	IV
Number of Drivers	8	8	6	8

Section 4-9 Other Training Requirements

Contract employees become an integral part of the CENSECFOR training organization. As part of this organization, it is appropriate that each employee is kept current on the various Government policies and processes. Training shall be maintained and kept current either by attendance at a live presentation or by completion of CBT courses.

CENSECFORNOTE 1500, Center for Security Forces FY-Current Mandatory Training (including all subsequent notes), identifies mandated training for contractor employees. This training is accomplished during normal work hours and at Government expense. Additional training requirements may be mandated. These training requirements, when directed, will also be accomplished during normal work hours and at government expense.

Section 4-10 Contract Instructor Conduct

Contract instructor personnel shall exhibit proper behavior both inside and outside the learning environment. Civil misdemeanor or criminal charges may result in removal from instructor duties. Failure to comply with the terms of the contract, DOD and/or Navy policy may result in removal from instructor duties.

Section 4-11 Waivers

In very rare circumstances, and only at the Government's convenience, a waiver request may be granted for contract instructors lacking specified experience, certifications, or qualifications. Each waiver request is unique and no guarantee of approval can be inferred based on previous waivers as training program execution with respect to personnel, logistics, environment, timing, and tempo are very fluid.

Waiver request shall be routed from the contractor's PM to the CENSECFOR DOT via the CENSECFOR COR.

SECTION 5 INSTRUCTOR EVALUATION AND CERTIFICATION

Section 5-1 Instructor Evaluation and Certification Process

Instructors shall maintain professional currency within their field of expertise. The contractor shall ensure that all instructor personnel are ready to teach the content assigned to them and can pass any tests associated with that content consistent with the standards of the contractor's internal quality assurance plan as described in section 11-1 of this PWS. All instructors shall be familiar with all presentation, delivery method, testing and remediation procedures, curriculum, training aids, devices, electronic podiums, and equipment operation and maintenance procedures associated with the course or section of the course they will instruct. In all cases, the Instructor Evaluation and Certification Process shall be completed prior to the instructor teaching Navy students.

Section 5-1.1 Instructor Evaluation

All prospective instructor personnel shall be evaluated for technical and instructional proficiency, and validated by the contractor as meeting the Navy minimum standards as delineated in sections 4 and 5. This assessment shall be made by the ECS Training Officer, or any other government representative assigned to evaluate training delivery. In such cases, the Contract Site Lead will be notified immediately and further action will be coordinated between the Contract Site Lead, CENSECFOR OIC and/or CENSECFOR COR. In all cases, Government personnel shall ensure technical accuracy of material, and provide technical guidance to the contractor, if necessary, during COI.

Section 5-2 Instructor Training Jackets (ITJ)

Upon the reporting aboard of an instructor, the contractor shall present a new ITJ to the ECS Training Officer for verification of instructor qualifications. Contents of the standardized ITJ and instructions are contained in CENSECFORINST 1540.1, NETCINST 1500.13, and NAVEDTRA 142. At a minimum, the ITJ shall contain:

- Instructor's Qualifications (i.e., Academic Qualification, completed PQS, certificates of course completion, weapons qualifications, etc.)
- Instructor's Certifications (i.e., Basic Instructor, Small Arms Instructor, Emergency Medical Technician (EMT), Explosive Driver, Water Survival Skills, and Safety Requirements Certifications (when certification is applicable), etc.)
- A letter (on company letterhead) indicating the date of completion of a medical screening in accordance with OPNAVINST 1500.75, the screening physician (including mailing address, telephone number, and email address), a brief narrative of results (e.g., requested screening and interview completed; information does/does not indicate potential disqualifying factors; candidate is/is not suitable for high risk instructor duty, etc.), and the location of the actual screening document.
- A letter (on company letterhead) indicating the date of completion of a psychological evaluation (in accordance with OPNAVINST 1500.75 or a commercially available screening guide such as the Minnesota Multi-phasic Inventory), the screening physician

(including mailing address, telephone number, and email address), a brief narrative of results (e.g., requested screening and interview completed; information does/does not indicate potential disqualifying factors; candidate is/is not suitable for high risk instructor duty, etc.), and the location of the actual screening document. This letter shall be updated annually after completion of the medical record review.

- A letter (on company letterhead) indicating the date of completion of a Drug Screening, the screening physician (including mailing address, telephone number, and email address), a brief narrative of results (e.g., requested screening and interview completed; information does/does not indicate potential disqualifying factors; candidate is/is not suitable for high risk instructor duty, etc.), and the location of the actual screening document.
- Statement of Understanding with regard to physical fitness
- Statement of Understanding acknowledging compliance with the requirements of the Lautenberg Amendment to the Gun Control Act 1968
- Core Unique Instructor Training (CUIT) Qualification for any training courses completed or each CUIT qualified area for future assigned courses.
- Basic First Aid Certification and date
- Cardio-Pulmonary Resuscitation (CPR) Certification and date
- Bloodborne Pathogen Training
- Tactical Combat Casualty Care (TCCC) Certification and date
- Hearing Conservation – Baseline audiogram completion date
- Universal Training Precautions (UTP)

The instructor verification process must be completed prior to the instructor teaching Navy students.

Upon termination of employment, a contract instructor shall be provided a copy of their ITJ. In the event that any original documents have been filed in the ITJ, a copy of the document will be made and filed in the ITJ, and the original document returned to the contract instructor.

Note: Due to restrictions imposed by the Health Insurance Portability and Accountability Act of 1996 (HIPAA) restrictions, copies of the medical, psychological, and Urinalysis. Screening shall not be filed in the ITJ. These documents shall be maintained for the life of this contract in a central location, such as the contractor's corporate office. In lieu of the actual screening, a letter (on company letterhead) indicating the date of completion, the screening physician (including mailing address, telephone number, and email address), a brief narrative of results (e.g., requested screening and interview completed; information does/does not indicate potential disqualifying factors; candidate is/is not suitable for high risk instructor duty, etc.), and the location of the actual screening document should be filed in the record. The Government, during a site assessment or another form of inspection, may request to view the actual screening document. In those cases, a request for the document shall be forwarded to the contractor at least two (2) weeks in advance. Upon review, the government shall return the actual screening document to the contractor for safekeeping.

Note: Recent changes to the Personally Identifiable Information (PII) Program have eliminated the collection and/or maintenance of Social Security Numbers (SSNs) in public records (with limited exceptions). These prohibitions also extend to use of the last four digits. Prior to presenting ITJs to the government, the contractor shall ensure that the record has been sanitized to ensure that the ITJ complies with the PII Program.

Section 5-2.1

Core Unique Instructor Training (CUIT)

NAVEDTRA 142.6, NETCINST 1500.13 and CENSECFORINST 1540 establish the requirement for all instructors to complete Course Unique Instructor Training (CUIT) certification prior to delivering course material on an independent basis. NETCINST 1500.13 and CENSECFORINST 1540 mandate that instructors assigned to deliver high-risk courses of instruction only need to attend those topics/segments deemed high-risk as a student as part of the initial CUIT certification process. Due to the complexity of the course and necessity for each instructor to understand instructional flow and student learning processes, it is CENSECFOR Detachment Gulfport policy for all personnel to attend and successfully graduate the 26-day course of instruction.

New contract Instructors who are hired prior to mobilization shall complete all requirements for certification in the lesson topic(s) assigned by the ECS Training Officer within the Mobilization period utilizing the CUIT process for the ECS COI described below.

New or replacement contract Instructors brought on post mobilization, will be required to complete all requirements for certification in the lesson topic(s) assigned by the ECS Training Officer within 90 days of reporting to the Detachment with full qualification attained in their assigned phase within 9 Months.

As not every contract ECS Instructor will be capable of completing CUIT in all Phases of ECS, the contractor shall maintain at least the minimum number of phase qualified Instructors throughout the duration of the contract: Phase 1 – 15 instructors, Phase 2 – 15 instructors, Phase 3 – 12 instructors, and Phase 4 – 15 instructors. Each Phase of the ECS COI represents a week of the course and contains the corresponding lesson topics as described in the TCCD for this course (Training Course Control Document for Expeditionary Combat Skills (A-830-0030)). The CENSECFOR Det. OIC and/or the ECS Training Officer shall provide oversight of the CUIT process.

The following steps shall constitute the CUIT process (Figure 2-1 (Instructor Certification/Evaluation Flow Chart) of CENSECFORINST 1540 outlines the specific requirements for Non High-Risk and High-Risk courses):

Phase One: Attend the course as a student as described above.

5-2.1 NOTE: Per NETCINST 1500.13, a High Risk Student Medical Screening Form (NETC 1500/5) must be completed by students participating in high-risk training prior to reporting for high-risk training. This includes all prospective high-risk training instructors required to take the training (military, Government employee, contractor, and civilian). For those personnel, NETC 1500/5 should be completed in conjunction with medical screening that is also required for all prospective high-risk training instructors as required per OPNAVINST 1500.75.

Phase Two: Indoctrination

Phase Three: Instructor Training Program. Prospective instructors will sit-in and observe the instructional delivery of all lesson topics assigned to teach. The sit-in will familiarize themselves with the curriculum materials, observe classes in session, and personalize instructor guides. Personalized lesson plans will be reviewed for technical accuracy by a Subject Matter Expert (SME) and approved by the

Course Supervisor. NETCINST 1500.13 specifically requires that instructors assigned to High-Risk courses attend those segments/topics of the course as a student for which certification is to be granted.

The prospective instructor will “team teach” appropriate class Sections with a qualified instructor, and then teach under the observation of a government representative. Each prospective instructor must receive a satisfactory evaluation on a minimum of two separate events (technical and technique), plus a laboratory event, while practice teaching. This shall be completed for each topic.

Phase Four: Instructor Certification. Provided that Phase Three has been successfully accomplished, the prospective instructor shall be qualified for the training topic which was observed and evaluated. After accomplishing this objective, the instructor shall be able to deliver future sessions for that training topic independently.

Course Instructor Certification. Upon completion of all course modules, the instructor will be determined to be CUIT certified for the respective phase and/or course.

This process shall be repeated for each phase/topic assigned to the instructor. Throughout this certification process, the instructor candidate shall consistently demonstrate the appropriate skills and demeanor required to teach Navy students. The CUIT certification documents shall be retained in the ITJ, and made available to the instructor upon their departure from employment, if appropriate.

Section 5-2.2 Physical Fitness Standards

The CENSECFOR courses of instruction require instructors who possess the fitness and conditioning to support the level of instruction. Instructors shall be personally capable of performing all training evolutions including the ability to effectively complete weapons qualifications in the standing, kneeling and prone positions, ascend or descend ladders and go through narrow passageways, and be free of any abnormal fear of heights. The contractor shall be responsible for ensuring that each instructor meets these standards at time of employment, and that these fitness standards are sustained throughout their assignment to the contract. Each contract instructor shall sign a Statement of Understanding acknowledging the above requirements. This document shall be filed in the ITJ.

Section 5-2.3 Drug Free Training Environment

The drug screening process for all contractors must be renewed every three years and during contract re-compete or renewal.

Section 5-2.3.1 Drug Testing

All high-risk instructors shall complete drug testing prior to performance start date in accordance with NETCINST 1500. The urinalysis screening shall be conducted in accordance with Department of Health and Human Services (DHHS) Mandatory Guidelines for Federal Workplace Drug Testing Program guidelines and procedures (pages 71858-71907 of Volume 73, Federal Register, November 25, 2008 (as amended)). All drug testing must be performed by

a HHS-certified laboratory. A listing of HHS-certified laboratories can be found on the Substance Abuse and Mental Health Services Administration (SAMHSA) website (<https://www.samhsa.gov/workplace/resources/drug-testing/certified-lab-list>). The Government reserves the right upon reasonable belief to request a new urinalysis screening on instructor(s) to determine “fitness for duty”. All urinalysis testing shall be provided by the contractor at no additional cost to the Government.

Drug testing conducted in accordance with DHHS guidelines and procedures meets the requirement for Department of Transportation’s (DoT) 49 CFR Part 40 Subpart E that is applicable to instructors seeking a Commercial Driver’s License (CDL) in accordance with the PWS –Transportation Section. The Government reserves the right upon reasonable belief to request a new urinalysis screening on instructor(s) to determine “fitness for duty”. All urinalysis shall be provided by the contractor at no additional cost to the Government.

Section 5-2.3.2 Maintenance of Drug Free Environment

Much of the training provided by CENSECFOR Detachment/Learning Sites is considered High-Risk, and as such, in order to ensure a safe training environment, the Government has a reasonable expectation that contract instructors remain drug-free at all times. Therefore, the contractor shall be responsible for establishing internal procedures (such as random drug screening) as needed, to provide this assurance. The results of any urinalysis or blood screenings will be handled in the same methods as discussed in the Drug Testing section above.

Section 5-2.3.2.1 Prescribed Medications

The contractor shall be responsible for informing the CENSECFOR Det. OIC (or ECS Training Officer) when a contract instructor has been prescribed medications or controlled substances. This notification shall include the potential consequences of the medication as they relate to instructor performance and the anticipated duration of treatment. If deemed appropriate, that instructor may be prohibited from delivery of high risk training evolutions until such time as a medical official certifies the individual as fit for duty as outlined in BUMEDINST 6120.20 (Competence for Duty Examinations, Evaluations of Sobriety, and Other Bodily Views and Intrusions by Medical Personnel).

In the event that the medical condition is considered chronic, the contractor shall obtain a certification from the prescribing provider as to the effect of the medication, and resulting impact on the ability to perform in a high-risk training environment. A memorandum summarizing the medical opinion shall be filed in the ITJ.

Any individual, with a psychiatric diagnosis for which medication is necessary, shall not be issued weapons and/or ammunition. Psychiatric conditions requiring medications with a Selective Serotonin Reuptake Inhibitor (SSRI) that have been determined stable by their prescribing provider shall normally be recommended for a waiver by that provider. Conditions requiring medications other than an SSRI may be recommended for a waiver on a case-by-case basis through referral to a psychiatrist. In considering waivers, the psychiatric diagnosis, medication, other medical history and their effect on judgment and motor behavior shall be the primary considerations. Recommendations for waivers shall be submitted to the CENSECFOR DOT. Waivers shall not be recommended for any individual with a diagnosis of psychosis or

bipolar disorder for which anti-psychotic or mood stabilizing (including anti-convulsant) medication is necessary.

Instructors who withhold information on medication(s) may be subject to immediate removal from instructor duties.

Section 5-2.3.2.2 Over-the-Counter Medications

Over-the-counter medications which adversely affect the focus of attention, or present any other potential safety hazard must also be reported. If appropriate, the CENSECFOR Det. OIC (or ECS Training Officer) may request the removal of contract instructors from any high risk training evolutions until such time as a medical official certifies the individual as fit for duty as outlined in BUMEDINST 6120.20. The Contractor shall immediately comply with any such requests. In situations in which student or staff safety is threatened, the government is empowered to immediately take appropriate steps to mitigate the situation, to include relieving contract instructors of instructor duty.

Section 5-2.3.3 Alcohol Policy

For the twelve (12) hours leading up to instructional briefs or interaction with students, all contractor personnel are prohibited from consuming alcohol or drugs which could hamper their ability to safely train. The Government reserves the right to require the contractor to relieve any personnel from his/her duties in the event that they appear to be in violation of this policy. If the contractor refutes this assessment, the contractor must provide results of drug/alcohol screening to ensure the instructor is fit for duty as outlined in BUMEDINST 6120.20. In this case, the CENSECFOR Det. OIC, (and/or ECS Training Officer), CENSECFOR COR, PCO, Contract Site Lead or Contractor POC will be advised of this action as soon as possible.

Section 5-2.4 Use of Tobacco Products

Contract instructors shall not utilize tobacco products (including, but not limited to) cigarettes, cigars, pipes, snuff, chewing tobacco, electronic/vapor type cigarettes or any other tobacco products during any training evolution. Use of tobacco products shall be limited to formally designated areas.

Section 5-2.5 Medical Screening

NOTE: The medical and psychological screening process for contractors must be renewed every three years and during contract re-compete or renewal. See Arms, Ammunition and Explosives Screening Section below for details.

All high-risk instructors shall complete medical screening prior to performance start date in accordance with NETCINST 1500. The medical screening shall be conducted in the presence of the contractor and shall be performed by competent medical authority (i.e., Licensed Physician, credentialed Physician's Assistant (PA), Nurse Practitioner (NP), etc.). The medical screening shall also include psychosocial screening. The High-Risk Instructor Screening Guide, Medical Officer's Interview Guide, and High-Risk Instructor Medical Questionnaire shall be used in supporting this requirement. All medical screenings required prior to reporting for duty shall be provided by the contractor at no additional cost to the government.

In accordance with NETCINST 1500.13, medical screenings for contractors serving as high-risk instructors are to be renewed every three years. Instructors who are out of periodicity must be re-screened immediately and then abide by triennial renewal requirement. Contractors will prepare a letter (on company letterhead) reporting successful completion of the screening. The letter should include the date of completion, the name of the screener (including mailing address, telephone number, and email address), and a brief statement regarding the results (i.e., the requested screening and interview have been completed; information does/does not indicate that there are potentially disqualifying factors in the instructor's medical history; the candidate is/is not suitable for high-risk instructor duty). This letter will be filed in the contract instructor's training jacket and retained at the Learning Activity to denote screening and interview have been completed and the individual is found suitable. The HIPAA of 1996 prohibits the filing of medical and psychological screening results in the local ITJ. Those results are to be safeguarded to ensure the confidentiality of the information.

Additionally, in accordance with NETCINST 1500.13, instructors attending a high-risk course in a student status will be required to submit a High Risk Student Medical Screening Form (NETC Form 1500/5). If the answers to Part 1 of the screening form are all NO, the site Corpsman will certify the screening. However, if any questions are answered YES, the required medical screening shall be performed by competent medical authority (i.e., Licensed Physician, credentialed Physician's Assistant (PA), Nurse Practitioner (NP), etc.) at no additional cost to the government. The form must be completed within 45 days of the class convening.

For both the High Risk Instructor and Student Medical Screenings (in cases where a student answered YES to any question in Part 1), a letter shall be submitted (on company letterhead) indicating that a medical screening was conducted on the respective instructor. The letter shall contain the date of the screening; the name, address, telephone number, and email address of the competent medical authority performing the screening; a brief narrative of the results (i.e., screening was successful and instructor is medically qualified to perform high-risk training duties, with the following exceptions (if applicable)); and the location of the actual screening documents. The letters will be filed in the instructor's ITJ.

Section 5-2.6 Psychological Screening

All high-risk instructors shall complete psychological screening prior to performance start date in accordance with NETCINST 1500. This screening shall determine whether the instructor is psychologically suitable to instruct high-risk training. Contract instructors with a past history involving incidents which resulted in referrals to family advocacy, medically noted traits of a personality disorder, treatment for substance abuse (within two years), and treatment for, or therapy for suicide tendencies, threats to harm others, or other mental health problems would likely require specialty referral for expert evaluation, and may be cause for disqualification from performing work as set forth under this PWS.

Per NETCINST 1500.13, psychological screening shall be conducted by a qualified practitioner. The screening must indicate that the instructor has completed psychological screening per NETCINST 1500.13, or a commercially available screening guide (such as the Minnesota Multiphasic Personality Inventory, or other available screening processes and procedures). The method employed shall be indicated on the evaluation. Any psychometric testing may be utilized. The qualified practitioner shall report any diagnoses using criteria of *Diagnostic and Statistical Manual of Mental Disorders, 5th Edition: DSM-5, Revised*. A professional opinion

shall be rendered regarding the psychological suitability of the instructor for high-risk training. Additionally, the contractor shall regularly monitor their instructors to ensure that potential psychological issues can be identified as early as possible. All instructor psychological screenings shall be provided by the contractor at no additional cost to the government.

In accordance with NETCINST 1500.13, psychological screenings for contractors serving as high-risk instructors are to be renewed every three years. Instructors who are out of periodicity must be re-screened immediately and then abide by triennial renewal requirement. Contractors will prepare a letter (on company letterhead) reporting successful completion of the screening. The letter should include the date of completion, the name of the screener (including mailing address, telephone number, and email address), and a brief statement regarding the results (i.e., the requested screening and interview have been completed; information does/does not indicate that there are potentially disqualifying factors in the instructor's medical history; the candidate is/is not suitable for high-risk instructor duty). This letter will be filed in the contract instructor's training jacket and retained at the LS to denote screening and interview have been completed and the individual is found suitable. The HIPAA of 1996 prohibits the filing of medical and psychological screening results in the local ITJ. Those results are to be safeguarded to ensure the confidentiality of the information.

Note: The *Diagnostic and Statistical Manual of Mental Disorders (DSM)* is published by the American Psychiatric Association and provides a common language and standard criteria for the classification of mental disorders. It is used in the United States and in varying degrees around the world, by clinicians, researchers, psychiatric drug regulation agencies, health insurance companies, pharmaceutical companies and policy makers. This manual should be a standard reference for mental health professionals, and is available commercially.

Section 5-2.7 Arms, Ammunition and Explosives Screening

All weapons based instructors are required to be screened per OPNAVINST 5530.13 within 60 days of hiring and annually thereafter, or more often when circumstances indicate a review would be prudent. CENSECFOR Learning Activity Leadership must be selective in assigning personnel to duties involving control of, or unescorted access to, AA&E. Such persons must be mature, stable and have shown a willingness and capability to perform assigned tasks dependably. At a minimum, an AA&E Screening Officer will validate that those being screened have a favorably adjudicated background investigation per Section 10-2; discuss the duties assigned with the person and/or the person's present supervisor; enter dates of screening, rescreening, and associated interviews and maintain these records. The screening will be documented on an OPNAV 5530/1 screening form. A satisfactory psychological and medical screening meets the OPNAV 5530/1 screening form requirement for a medical record review by a competent medical authority. Additionally and per OPNAV 5530/1 screening form, contract instructor medical records must be reviewed annually by a competent medical authority to ensure they remain suitable to continue duties involving control of, or unescorted access to, AA&E. Determination of which traits and actions are disqualifying are at the discretion of the CENSECFOR CO. At each screening, the contractor employee will read and sign a copy of the following statement:

"I understand that my behavior on duty as well as off duty is expected to reflect mature, stable judgment and that I may be removed from my duties involving control of arms, ammunition and explosives, or other administrative action taken, if my behavior does not reflect high standards. I further understand that serious harm can come from my failure to properly carry out my duties. I am aware that my improper

actions or failure to carry out my duties may result in criminal prosecution, fines, and imprisonment. I understand and accept the responsibility to safeguard arms, ammunition and/or explosives.”

Section 5-2.8 Basic First Aid

All contract instructors must possess a current certification in Basic First Aid from the American Heart Association, American Red Cross, National Safety Council, American Safety and Health Institute, or other locally available means. Training must be conducted by a competent facilitator. Stand-alone online or Computer Based Training (CBT) does not satisfy this requirement. The contractor shall ensure that a copy of the certification is retained in the ITJ. The contractor is responsible for maintaining the currency of this qualification, as well as the subsequent update of the ITJ. All First Aid certifications will be provided by the contractor. Additional information can be found in CENSECFORINST 5100.1, High Risk Training Safety, and NETCINST 1500.13.

Section 5-2.9 Cardio-Pulmonary Resuscitation (CPR)

All contract instructors shall possess a current certification in Cardio-Pulmonary Resuscitation (CPR) from the American Heart Association, American Red Cross, National Safety Council, American Safety and Health Institute, or other locally available means. Training shall be conducted by a competent facilitator. Stand-alone online or Computer Based Training (CBT) does not satisfy this requirement. The contractor shall ensure that a copy of the certification is retained in the ITJ. The contractor shall be responsible maintaining the currency of this qualification, as well as the subsequent update of the ITJ. All CPR certifications shall be provided by the contractor. Additional information can be found in CENSECFORINST 5100.1 and NETCINST 1500.13.

Section 5-2.10 Lautenberg Amendment

The provisions of the Lautenberg Amendment to the Gun Control Act of 1968 makes it illegal for anyone convicted of a misdemeanor crime of domestic violence to ship, transport, possess, or receive firearms or ammunition. This stipulation disqualifies any affected individual from performing instructional duties in accordance with this PWS. All instructors shall sign a statement which acknowledges that they understand the provisions and consequences of the Lautenberg Amendment, and that they have not been convicted of any offense covered by the act. Additionally, the contractor shall prepare a memorandum indicating that a criminal search has been conducted. This memorandum shall indicate the results of the search, date completed, method used, and signed by the company representative.

Section 5-2.11 Blood-borne Pathogen Training

The entry of another person’s blood or other potentially infectious material (OPIM) into your body is the primary method of contracting Acquired Immune Deficiency Syndrome (AIDS), its precursor Human Immunodeficiency Virus (HIV), and Hepatitis B Virus (HBV). The key to protection from these potentially life-threatening Blood-borne Pathogens is practicing universal precautions. OPNAVINST 5100.23 (Navy Safety and Health (SOH) Program Manual) provides additional direction on this subject. The CENSECFOR COR shall provide the appropriate training material to the contractor upon contract award. Upon completion of this training, the contractor shall ensure that a memorandum indicating the completion of the respective course and the date completed shall be filed in the ITJ.

Section 5-2.12 Hearing Conservation

OSHA regulations require all weapons based instructors be enrolled in a hearing conservation program. The hearing conservation program shall be administered in accordance with 29 CFR 1910.95 and shall be maintained for the term of the contract and at no additional expense to the Government.

Section 5-2.13 Universal Training Precautions (UTP)

NETCINST 1500.13 mandates that activities conducting high-risk training involving physical exertion shall incorporate Sudden Cardiac Arrest (SCA), Exertional Collapse Associated with Sick Cell Trait (ECAST) and heat stroke signs, symptoms, prevention, and response protocol, be incorporated into Core Unique Instructor Training (CUIT) and instructor sustainment programs.

This training must be completed by all contractor personnel in conjunction with their initial CUIT certification in accordance with this section, and annually thereafter, at no cost to the government. UTP training currency will be documented in the Monthly Status Report.

Videos and other training resources are available on the Uniformed Services University's Consortium for Health and Military Performance (CHAMP) website.

b. Guidance on heat injury prevention and treatment can be found at <https://www.hprc-online.org/articles/heat-illness-prevention-treatment-and-recovery>.

SECTION 6 FACILITIES AND OTHER REQUIREMENTS

Section 6-1 Instructor Only Training Equipment and Facilities

The Government shall provide all training facilities, to include classrooms, labs, ranges and equipment as well as the consumable and logistical support necessary to perform the tasks and functions described in the PWS. Space limitations may prohibit the ability to assign each contract instructor their own desk or workstation. However, instructors shall be provided with office space at the respective training location. In addition to office space, each contract instructor shall be provided with access to government computers and telephones, but not cellular phones, for official use only. Under no circumstances will contractor-provided personal computers will be connected to the Navy/Marine Corps Intranet (NMCI).

Unless provided by the Government, the contract instructors shall be expected to do light custodial work, (e.g., empty trash, dust, vacuum carpet, sweep floor, etc.) in all spaces. Classrooms and labs shall be kept clean and in good order; contract Instructors shall report all deficiencies to the appropriate Government representative immediately for correction.

Section 6-2 Contractor Furnished Equipment

The contractor shall provide the following Personal Protective Equipment (PPE) and clothing to their employees for use during periods of high-risk training and/or field operations:

- Standard Tactical Cargo Pants
- Standard Polo-type Shirt
- Standard Ballcap
- Rugged tactical or hiking boots
- Standard Waterproof Rain Gear (blouse) (similar to Gortex)
- Zip-out fleece liner for Waterproof Rain Gear

Initial quantity and replacement periodicity of above PPE and clothing shall be at the contractor's discretion, but shall provide adequate supply for hygiene and a clean and neat appearance by contract Instructors at all times.

SECTION 7 MOBILIZATION

Section 7.1 Mobilization Phase

The contractor shall implement their mobilization plan that was submitted with their proposal to start up operations and be fully operational to meet the requirements of the PWS not later than end date of the Mobilization period and prior to the commencement of training. The mobilization plan shall be submitted to the CENSECFOR DOT, ECS Det.OIC, ECS Training Officer and CENSECFOR COR for review 5 days prior to the mobilization start date. CENSECFOR COR may provide additional mobilization guidance at this time.

The mobilization period is the 45-day time period that commences at contract start and is the contractor's opportunity to obtain pass down knowledge from the incumbent contractor, to enhance understanding of ECS training environment and operations, and to train their contract Instructors so as to be prepared to assume all training requirements, in particular Sections 4-2, 4-3, 4-5, and 5-of the PWS, at the end of the mobilization period. These qualifications and the corresponding numbers of qualified Instructors are to be considered the low-water mark or minimum toward meeting PWS requirements at the end of the mobilization period.

It is expected that the contractor will have a full cadre of Instructors and their individual ITJs at the mobilization start date. The mobilization period is the time to get the contractor's Instructor cadre prepared to deliver training and is not intended for the contractor to recruit their workforce.

Specific deliverables, performance standards, and procedures to be taken when performance standards are not met are quantified in the Quality Assurance Surveillance Plan (QASP) as it applies to this.

During this mobilization period, the contractor shall:

- Implement the mobilization plan that ensures the contractor shall achieve all requirements within the mobilization period. The accomplishment of this plan requires close coordination between the contractor and all Government representatives to ensure that all tasks are accomplished prior to the performance start date.
- Deliver a complete roster of ECS contract Instructors on the mobilization start date to the PCO, CENSECFOR DOT, CENSECFOR ECS COR, ECS Det. OIC, and ECS Training Officer.
- Deliver an Instructor Training Jacket (ITJ) on the mobilization start date for each prospective instructor using the format prescribed in this PWS, ensuring that appropriate documentation has been provided for the qualifications, certifications and requirements contained in section 4 and 5. The ITJs shall be ready for review and verification by the Det. OIC and/or ECS Training Officer at the commencement of mobilization. Any incomplete ITJ items shall be annotated by the contractor on the initial Quality Assurance Plan which shall be submitted in accordance with this PWS.
- Actively engage in supervising prospective instructors in the CUIT certification process described in section 4-5 and 5-2.1 of this PWS. The Det. OIC or ECS Training Officer shall coordinate with the Contract Site Lead as to which phases/lesson topics are to be targeted.
- Should prospective Instructors fail to qualify or be deemed unacceptable due to inadequate instructional ability during the CUIT process, the vendor shall immediately

replace the non-qualified Instructor ensuring that the new Instructor can complete the required phase/topics to support the requirements in Section 4-5 and 5-2.1 by the end of the mobilization period.

- Ensure that the requirements of Sections 10-2 and 12-4 of this PWS are completed and submitted within the first 5 days of the mobilization period. Inability to satisfactorily complete a background investigation and/or be issued a Common Access Card (CAC) is considered disqualifying for any instructor candidate.
- In the event that the contractor plans on hiring incumbent instructors, the contractor shall be responsible for:
 - Screening the background investigations for those instructors for compliance, and resolving any discrepancies identified prior to the end of the mobilization period. In the event that circumstances prohibit the ability of the contractor to rectify those issues prior to the start of employment, the contractor shall provide the CENSECFOR COR with the details associated with the deficiency as well as the method and timeframe for resolving the issue.
 - Ensuring that all incumbent instructors undergo a current medical and psychological screening prior to the performance start date, and that a current urinalysis screening is also accomplished. Medical/psychological/urinalysis screenings performed on previous contracts are not acceptable.

The contractor shall contact the CENSECFOR COR and PCO immediately when a mobilization task is anticipated to not be reached or difficulties are encountered. The contractor should present their plan for completing the task(s) and the timeline. The CENSECFOR and PCO will then evaluate the plan and take the appropriate action. The contractor shall advise the CENSECFOR COR and PCO when all mobilization tasks have been completed.

Section 7.1.1 Mobilization Weekly Status Report

The contractor shall submit a weekly Mobilization Status Report to the Detachment Training Officer and CENSECFOR COR starting on the 7th day of mobilization and continuing weekly throughout the mobilization period. At a minimum, the report shall track progress of and identify the following areas as applicable. The report shall be modified at the CORs request.

- Personnel Names
- Date employment offer accepted
- Date background check completed
- Date Citizenship verified
- Status of CAC issue or re-issue
- Projected phase assignment
- Date High Risk Screening completed
- Date Drug / Urinalysis completed (report any positive results)
- Date Medical Screening completed
- Date Psychological Screening completed
- Date AA&E Screening completed
- Basic First Aid and CPR Expiration (planned date to requalify if required)
- Date Baseline Audiogram completed
- Status of NEC 805A (Instructor NEC) or Equivalent
- Date of last Weapons Qualification (Small Arms)
- Date TCCC certification course completed
- Date of Bus driver license certification

- Status of on-line training requirements per Section 4-9 of this PWS
- Status of instructor qualifications
- Status of Line Coach Designation
- Status of RSO Designation

SECTION 8 TRANSITION – OUT PHASE

Section 8-1 Transition – Out Phase

Should the contractor not be selected as the future follow-on contractor, the contractor shall participate in a transition phase to orderly and efficiently transition to a successor. The transition phase shall be considered the last 75 days prior to the end of the contract period of performance. The transition phase shall consist of phase-in training for the successor and transition of all training documentation relevant to the courses specified herein.

During the transition out phase, the incumbent contractor shall not restrict employees from discussing possible, future employment or impede the mobilization process.

The contractor shall submit a Transition Support Plan to the CENSECFOR COR not later than 30 days after the plan is requested. The Transition Support Plan must include, at a minimum, a staffing plan which ensures all training and safety requirements will continue to be met throughout the transition out phase.

SECTION 9 SAFETY REQUIREMENTS

Section 9-1 Safety

Accomplishment of the CENSECFOR mission exposes personnel to inherent risk. Similarly, the training which prepares personnel for operational duty also carries risk, as noted by the High Risk Training designation for the majority of the courses described in this PWS. Knowing the inherent risk, CENSECFOR is committed to ensuring the safest possible training environment for students, instructors and staff. Contract instructors shall fully support risk mitigation efforts and conduct themselves in compliance with OPNAVINST 1500.75, NETCINST 1500.13 and CENSECFORINST 5100.1. Contract instructors are empowered and encouraged to immediately halt training or take other corrective action to rectify behavior which the instructor(s) believe to be unsafe. A consistent commitment to safety and support of risk mitigation efforts, contractor response in the event of a mishap or near hit/miss, and adherence to Emergency Action Plans, if applicable, will be considered and documented during contractor performance assessments.

Section 9-2 Emergency Action Plan

An Emergency Action Plan is in place for each learning activity, and can be obtained from respective CENSECFOR Det. OIC. All contract employees shall execute all of the procedures detailed in the plan. Additional guidance can be found in CENSECFORINST 5100.1 and NETCINST 5100.1A.

Section 9-3 Mishap

If a mishap involving services under this contract occurs, the contractor shall promptly report the incident within one (1) hour to the CENSECFOR Det. OIC, ECS Training Officer, CENSECFOR COR and the PCO. If the Navy conducts an investigation of the mishap, the contractor shall cooperate and assist Government personnel until the investigation is complete. Contractors shall include a clause in subcontracts, if any, under this contract to require subcontractor cooperation and assistance in mishap investigations.

Section 9-4 Contractor Responsibility for Safety

Nothing in this PWS, nor any Government action or failure to act in surveillance of this contract, shall relieve the contractor of its responsibility for the safety of the contractor's personnel, the Government's personnel and property, and the general public.

SECTION 10 PERSONNEL AND INFORMATION SECURITY REQUIREMENTS

Section 10-1 General Policy

The normal screening process associated with the employment process involves a determination of the appropriate skills and requirements set forth in this PWS. Satisfaction of those requirements determines whether the candidate is qualified to perform those duties. In addition to those factors, it is important to determine whether an individual is suitable for the position. Suitability determinations ensure that the candidate possesses the appropriate character traits and past conduct to demonstrate the likelihood for carrying out assigned federal Government duties with the necessary efficiency and effectiveness. An adjudicated background investigation determines suitability.

Section 10-2 Background Investigations

A background investigation (also known as Personnel Security Investigation (PSI)) is conducted for two purposes: making employment suitability determinations and determining access to classified information (if required).

Both DoD Manual 5200.02 (Procedures for the DoD Personnel Security Program) and SECNAVINST 5510.30C (Department of the Navy Personnel Security Program) stipulate that any position involving education and orientation of DoD personnel is identified as "Noncritical-Sensitive (NCS)," and mandate that each contractor employee possess a favorably adjudicated National Agency Check with Local Agency and Credit Checks (NACLC). A previously conducted NACLC, Access National Agency Check with Written Inquiries (ANACI) or Single Scope Background Investigation (SSBI) are acceptable, provided there is no break in service exceeding 24 months. Entrance National Agency Check (ENTNAC) or National Agency Check (NAC) do not satisfy this requirement. A memorandum providing the investigative level and date of completion is filed in the employee record. If an investigation was initiated, but not completed, a memorandum from the CENSECFOR Command Security Manager (CSM) will also be filed in the member's record.

Section 10-2.1 U. S. Citizenship

Per DoD Manual 5200.02, SECNAVINST 5510.30C and 32 CFR Part 117 (National Industrial Security Program Operating Manual (NISPOM)), only U.S. Citizens are eligible for security clearances. Proof of U. S. Citizenship shall be verified by the Facility Security Officer (FSO), and a memorandum stating date and method of verifying citizenship shall be filed in the ITJ.

Section 10-2.2 Access to Classified Information

There are no requirements for access to classified information in connection with this contract.

Section 10-2.3 Positions Not Requiring Access to Classified Material

The CENSECFOR CSM will take action on background investigations. Upon reporting to the training location, the Detachment Officer in Charge/Learning Site Director (or designated representative) will provide the name and appropriate personal information for the CENSECFOR CSM to verify contractor employee's background investigation.

If required, a background investigation is initiated and an email will be sent to the contractor employee to begin completing the SF-86 (Questionnaire for National Security Positions) (or equivalent OPM investigative product) through the Electronic Questionnaires for Investigation Processing (e-QIP) system. Electronic fingerprints must be submitted, if required. Once the contractor completes and submits the SF-86, the CENSECFOR CSM will review to ensure thoroughness and continuity. If there are no significant issues/concerns contained therein, the contractor employee's SF86 with attachments will be transmitted to the Office of Personnel Management (OPM) to begin the adjudication process.

Once the investigation is adjudicated favorably, the CENSECFOR CSM will ensure the Contractor FSO (or security representative) and respective learning activity is advised. The contractor shall ensure that a memorandum is filed in the CTJ indicating the level of investigation, date of completion, and the investigating agency.

In the event that suitability/security issues are identified during the investigation process, the Navy may render the contractor employee ineligible for the assignment. An unfavorable determination by the Navy is final.

Section 10-2.4 Common Access Card (CAC)

The Government Contractor CAC serves as the primary method of identification for the contractor employees, as well as providing the basis of Public Key Infrastructure (PKI) access to NMCI and numerous Navy web sites, which may also require PKI access. The CENSECFOR CSM shall assist in providing the contractor the appropriate documentation for obtaining CACs.

The contractor shall supply their proposed employee's full name, social security number and all required items listed in this PWS to the CENSECFOR CSM no later than fifteen (15) days prior to the mobilization start date.

Section 10-2.4.1 Return of CAC Cards

The contractor shall be responsible for obtaining any Government issued identification cards from the former employee and to turn those items over to the CENSECFOR Det. OIC, ECS Training Officer or designated TA within five (5) days of the termination of the employment.

SECTION 11 DELIVERABLES

Section 11-1 Contractor's Quality Assurance Plan

The contractor shall develop and maintain a Quality Assurance Plan (QAP) in order to track and improve instructor proficiency in delivery of the course curriculum and to track individual instructor qualifications and certifications. This QAP shall provide the detail required to monitor and grade the performance of its personnel as they carry out the requirements of this PWS. The QAP shall address the contractor's courses of action to improve the performance of under-performing instructors and maintain the skills of instructors performing at or above acceptable standards.

The QAP shall describe in detail the methodology or process the contractor will utilize to ensure all required instructor qualifications and certifications remain current. At a minimum, the plan shall provide the dates and method for the accomplishment of each of the qualifications/certifications for each instructor attached to the contract. The data contained in the QAP shall mirror the documentation filed in the ITJ.

The QAP shall also detail how the contractor intends to satisfy the requirement for replacement instructors in accordance with Section 3-1.7.1 of this PWS.

The contractor shall provide the initial QAP to the CENSECFOR DOT, CENSECFOR COR, Det.OIC, and ECS Training Officer at the Mobilization start date. If there are significant deficiencies in the initial QAP determined by the ECS Training Officer, supplementary QAPs shall be submitted every two (2) weeks until the discrepancies are resolved.

An updated QAP shall be provided to the Det. OIC, ECS Training Officer / ECS Technical Assistant and CENSECFOR ECS COR not later than the 25th day of each quarter, prior to the conclusion of that quarter (25 Sep; 25 Dec; 25 Mar; 25 Jun). Any delay in the submittal of the MSR may result in delays in validation and payment of invoices.

Section 11-2 Monthly Status Report

The contractor shall develop and submit a Monthly Status Report (MSR) not later than the 5th day of the new month to the CENSECFOR COR via the ECS Training Officer / ECS Technical Assistant. This reporting requirement becomes effective upon contract performance start date. Any delay in the submittal of the MSR may result in delays in validation and payment of invoices. This status report should also provide a synopsis of any issues and/or concerns, any future objectives to be achieved, and a summary of travel costs expended during the reporting period. The monthly report shall consist of five sections:

- Section 1 shall provide a synopsis of any issues and/or concerns as well as any future objectives to be achieved.
 - Status of Student or Staff complaints against contract instructor and corresponding response or plan for resolution
 - Positive or Negative comments directed towards contract instructors on student course critiques
 - Hours spent by contract instructors in student remediation, by course/class

- Status of safety-related incidents involving contract instructors and corresponding response or plan for resolution
 - Any other contract instructor issues
- Section 2 (if applicable) shall contain a summary of any travel costs or other ODC expenses expended since the last report to include burn rate.
- Section 3 shall provide a list of all assigned instructors by assigned phase and lesson topic. Additionally, the list shall provide the company employing the instructor (if a subcontractor); instructor's start date on this contract; the date and method for satisfying the Navy Instructor Training Course (NITC); expiration date of First Aid and CPR certifications; expiration date of current weapons proficiency qualifications; level and date completed of their background investigation; and the expiration date of their current CAC card.
- Section 4 shall provide a detailed CUIT status on each instructor. On a spreadsheet, each phase and lesson topic of the ECS course will be displayed with those completed by the instructor annotated. The format of this spreadsheet shall be as prescribed by the CENSECFOR DOT.
- Section 5, (if applicable), shall provide plans for resolving any deficiencies in the CUIT progress for each instructor

Section 11-3 Trip Report

The contractor shall require his/her employees to file a trip report upon return from any periods of travel covered by this PWS. The trip report shall be in a format prescribed by the contractor, but at a minimum, shall address the objectives of the travel and whether those objectives were or were not achieved. If not achieved, the circumstances preventing the accomplishment of the objective shall also be provided. Upon submission, a copy shall be provided to the CENSECFOR COR.

Section 11-4 Service Contract Reporting (SCR)

The contractor shall report required SCR data fields using the SCR section of the System for Award Management (SAM) at the following web address: <https://sam.gov/SAM/>. Reporting inputs will be for the labor executed during the period of performance during each Government fiscal year (FY), which runs October 1 through September 30. While inputs may be reported any time during the FY, all data shall be reported no later than October 31 of each calendar year. Contractors may direct questions to the help desk, linked at <https://sam.gov/SAM/>.

SECTION 12 ADDITIONAL ISSUES AND CONCERNS

Section 12-1 Privacy Act Compliance

The contractor may be in contact with data and information subject to the Privacy Act of 1974 (Title 5 of the U.S. Code Section 552a). The contractor shall ensure that its employees assigned to this effort understand and adhere to the requirements of the Privacy Act and to Department of Defense and Department of the Navy regulations that implement the Privacy Act. Department of Navy policy and procedures implementing the Privacy Act are detailed in DoD Directive 5400.11 (DoD Privacy Program), available on-line at <http://www.dtic.mil/whs/directives/> and in SECNAVINST 5211.5E (Department of the Navy Privacy Act (PA) Program), which is available on-line at <http://privacy.navy.mil>. The contractor shall identify and safeguard data, information and reports accordingly. In addition, the contractor shall ensure that contractor employees assigned to the contract are trained on properly identifying and handling data and information subject to the Privacy Act prior to commencing work.

Section 12-2 Proprietary Information

No data provided to, or developed by, the contractor shall be used for any purpose other than the tasks assigned. All information (data files and hard copy) becomes the property of the Government and the contractor shall return them at the completion of the task. The Government shall not be required to pay royalties, recurring license fees, use tax or similar additional payments for any contractor-developed product or associated software presentation.

Section 12-3 Non-Personal Service Statement

Contractor employees performing services under this contract will be controlled, directed, and supervised at all times by management personnel of the contractor. Contractor management shall ensure that employees properly comply with the performance work standards outlined in the PWS. Contractor employees shall perform their duties independent of, and without the supervision of, any Government official. However, due to the High Risk nature of the training, the CENSECFOR TA and/or other Government representative shall provide direction and/or guidance within the execution of the training. The tasks, duties, and responsibilities set forth in this contract shall not be interpreted or implemented in any manner that results in any contractor employee creating or modifying Federal policy, obligating the appropriated funds of the United States Government, overseeing the work of Federal employees, providing direct personal services to any Federal employee, or otherwise violating the prohibitions set forth in Parts 7.5 and 37.1 of the Federal Acquisition Regulation (FAR). The Government shall control access to the facility and shall perform the inspection and acceptance of completed work.
