

Scope of Work: CGC Stone- Discrep 25082
PR-52000PR260024109
Last update 04/03/26

Background:

The #1 A/C Unit failed due to water intrusion throughout the entire the system, rendering it inoperable. Attempts to repair the condenser were unsuccessful. This system is part of the critical loop that helps cool the skiff where crucial sensitive equipment is located as well as providing habitability for the crew.

Statement of Work:

Vendor to supply two condensers to CGC Stone for repairs.

- Ketema model MHX12096003, quantity 2
 - 130 ton-chill water unit

Service:

RDD: 26JUN26

Address:

ATTN: STONE (WMSL 758)
ENG Dept / AUX / DISCREP 25082
1050 Register St
North Charleston, SC, 29405
