

Statement of Objectives (SOO)

Project Title: Mobile Laundry Services for Deployed Personnel

Location: Tinian, CNMI

1.0 Purpose

The purpose of this requirement is to procure continuous, high-volume mobile laundry services (Mobile Laundromat) to support the hygiene, health, morale, and overall readiness of deployed service members at Tinian, CNMI.

2.0 Scope

The contractor shall provide a turnkey mobile laundry solution, including all necessary equipment (trailers/containers), personnel, maintenance, logistics, and supplies required to operate the facility. The solution must support a continuous operational environment and scale to meet fluctuating troop levels.

3.0 Background

Personnel deployed to Tinian, CNMI require reliable laundry services to maintain field hygiene and prevent disease and non-battle injuries (DNBI). Currently, local infrastructure cannot support the volume of laundry required for a population of approximately **120** personnel. A fully self-contained or rapidly deployable mobile laundry solution is required to bridge this gap.

4.0 Performance Objectives

The contractor shall design, manage, and execute a mobile laundry operation that meets the following core objectives:

- Objective 1: Capacity and Throughput
Process a minimum of 60 pounds of laundry per day, ensuring a guaranteed maximum turnaround time.
- Objective 2: Hygiene and Sanitization Quality
Ensure all laundered items are thoroughly cleaned, dried, and sanitized in accordance with military and CDC health standards to prevent the spread of bacteria, fungi, and communicable diseases.
- Objective 3: Operational Reliability
Maintain a 95% or greater operational uptime for all mobile laundry units. The contractor must implement a rapid-response maintenance plan to repair or replace inoperable equipment within 12 hours to prevent service backlogs.
- Objective 4: Environmental and Utility Management
Provide a highly efficient system that minimizes water and power consumption.

The contractor must develop a compliant solution for the safe containment, treatment, or removal of all gray water and chemical waste, strictly adhering to local and DoW environmental regulations.

5.0 Operating Constraints

- Utilities: The contractor must specify if their solution requires Government-Furnished water and power connections, or if the mobile units will be entirely self-sufficient (e.g., onboard generators and water bladders).

6.0 Period of performance

- 3 months starting May 14 to August 14, 2026 (Est), with the option to extend month to month basis. Contractor shall contact 356 ETSG CONS giving ten-day notice before work begins. Contractor shall coordinate with the 356 ETSG CONS to schedule Trailer pick up.

7.0 SUSTAINABLE PRODUCTS AND SERVICES-

- Requiring activities must obtain approval in accordance with AFMAN 32-7002 Environmental Compliance and Pollution Prevention, paragraph 3.3.5.1.1.8 before a specification or standard that requires the use of a class I ozone-depleting substance (ODS), or that can be met only through the use of an ODS, is authorized in any solicitation or contract/order.
