

**JUSTIFICATION & APPROVAL FOR OTHER THAN FULL AND OPEN COMPETITION
for SIMPLIFIED ACQUISITIONS OVER THE MICROPURCHASE THRESHOLD (See FAR
Part 2) UP TO SAT
(See FAR 13.106-1)**

Date: 4/14/2026

PR Number: 044037077

1. Nature and/or description of the item/service being procured and its intended use (include the anticipated cost):

Oregon Caves National Monument (ORCA) operates two water treatment plants to filter surface water to provide potable water for park operations and public use. To meet the stringent requirements set by the Safe Drinking Water Act and the Oregon Department of Environmental Quality (ODEQ), the park utilizes a filtration system comprising four different types of water filters. These filter cartridges and filter bags are rated for up to 99% removal of particles greater than 1 micron for up to 16 gpm. This acquisition is for a one-year supply of filters. The anticipated cost is \$49,256.

2. Sole Source Justification rationale (Check one and explain below):

☐ **Only one responsible source.**

☐ **Urgent and compelling circumstances exist.** Include critical delivery or performance dates, and when you became aware of the requirement. Provide a specific statement of the impact on Government operations, financial or otherwise, if the required delivery or performance dates are not met.

☒ **Other:** Brand Name Justification

Explain: No other filters have been located that will meet the (DEQ) requirement of 1 micron filtration at 16 gpm and fit within and adequately seal within the Strainrite AQ2 Aquarite and Harmsco BC4-3 filter vessels that are installed at the ORCA water treatment plants. The use of any other filters would void the warranty for this water treatment plant and would create an unnecessary risk of contamination to the water supply resulting in life and safety risks to park personnel and visitors.

3. Market Research. Please explain the results or why one was not performed. State whether any other offers were received or anyone expressed interest:

Market research has been performed annually for this requirement. No other brand of cartridge filters are available that can perform at 1 micron filtration at 16 GPM and fit within and adequately seal within the filter housing that is installed at the ORCA water treatment plants.

(See FAR 13.106-1)**

PR Number 044037077

4. If this is a determination for sole source, the contracting officer certifies:

- a. Only one source is available, or urgent and compelling circumstances exist.
- b. The anticipated price will be determined fair and reasonable using the price analysis techniques described in FAR Part 13.106-3(a).
