

Performance Work Statement Online Financial Services

2.0 STATEMENT OF WORK:

2.1 GENERAL

This acquisition is being conducted to establish a single award contract for the US Department of Housing and Urban Development Government National Mortgage Association (GINNIE MAE) to provide an electronic subscription service of financial data to support the continued surveillance of Ginnie Mae's issuers and financial counterparties. The contractor shall provide financial content covering: financial news and analysis; reviews of domestic and global banks; financial industry data; annual and quarterly regulatory filings; bank performance and peer analytics; earnings reports; and announcements and investor presentations. The contractor also shall provide a U.S. Bank Regulatory Custom Data Feed. This content will be delivered on-line as an electronic financial subscription service. This work shall be performed in accordance with all sections of this contract and any attachments.

The contractor shall perform the effort required by this contract on a Firm-Fixed Price (FFP) basis.

2.2 BACKGROUND

Ginnie Mae securitizes nearly \$3.0 trillion in mortgage-backed securities that are brought to market and serviced by various business partners, or counterparties. These entities include commercial banks, thrift institutions, savings & loans associations, mortgage banks, credit unions, and other financial institutions that perform a variety of critical functions, such as collecting monthly mortgage principal and interest payments from borrowers and forwarding those payments to investor bondholders. Considering the significant growth in Ginnie Mae's portfolio and the recent turmoil in the financial markets, Ginnie Mae continues to take steps directed at improving and increasing its ability to monitor the financial health of these counterparties and thus better manage its risk profile.

2.3 SCOPE

As an integral component of this effort, Ginnie Mae seeks to procure in-depth financial analysis and data services in a proprietary suite of comprehensive financial content covering: financial news and analysis; reviews of domestic and global banks; financial industry data; annual and quarterly regulatory filings; bank performance and peer analytics; earnings reports; and announcements and investor presentations. This content shall be delivered as an electronic subscription services of financial data. Electronic financial delivery products are unique because they support the integration of financial information directly into Ginnie Mae's proprietary software models and applications, without any additional requirements to the contractor to facilitate financial analysis and better management of the Ginnie Mae Risk Profile. Ginnie Mae will use the data for various purposes, including the creation of derivative works for its internal use, such as development of risk models, financial histories, credit profiles and other analytical tools relating to its role in the mortgage industry.

2.4 OBJECTIVE/REQUIREMENTS:

The contractor shall provide the following to include the following comprehensive on-line financial services:

- *RatingsDirect®* offers a comprehensive view of credit risk via S&P's Capital IQ Pro. It covers over 9,500 issuers and 79,000 securities across the globe. Users will be able to research, chart, and analyze credit performance and trends across industries, companies, and securities around the world. Users also will have access to comprehensive market data and credit risk indicators.
- *S&P Capital IQ Pro* offers proprietary news and research, text-based content including filings, earnings-call transcripts, broker research, and news. SNL Financial Institutions Regulatory dataset, integrated into the Capital IQ Pro platform, includes access to detailed financials, asset quality, loan/deposit composition, and regulatory capital for banks and credit unions. With over 40,000 operating companies and over 100,000 active and historical entities filed within U.S. regulatory agencies, Ginnie Mae will be able to comprehensively assess their financial standings relative to their peers. This data is critical to conduct risk management across the enterprise.
- *RatingsXpress®* provides access to S&P Global Ratings data for issuers and fixed income issues. This data is available by asset class, global issuers, international public finance and government entities. RatingsXpress helps the users to conduct risk management benchmarks, test investment policy guidelines and assess counterparty risk.
- A one-time comprehensive history of *S&P Global's* ratings on all corporate and structured finance issues.

2.5 APPLICABLE DOCUMENTS

There are no applicable documents.

2.6 PERFORMANCE REQUIREMENTS

The Contractor shall provide all personnel, materials, facilities, equipment, administrative, financial, and managerial resources necessary for the performance of this contract and shall not be separately priced.
