NAICS Code: N/A

THIS IS A SOURCES-SOUGHT SYNOPSIS FOR PLANNING PURPOSES ONLY. THIS IS NOT A SOLICITATION ANNOUNCEMENT FOR PROPOSALS OR BIDS, AND NO CONTRACT WILL BE AWARDED FROM THIS ANNOUNCEMENT.

PURPOSE OF THIS SPECIAL NOTICE:

United States Africa Command (USAFRICOM J4 and J6) plans to host the **African Logistics and Communication Symposium (ALCS) 2026**, from July 28-30, 2026. For planning purposes, we are gathering information on potential business or commercial entities that may be interested in participating as exhibitors.

This year's symposium theme is **"Practical Solutions for Enduring Partnerships."** The event represents a strategic shift to connect our African partners with solutions that prioritize practicality, sustainability, and affordability. The primary goal is to identify capabilities that can be realistically adopted, managed, and sustained within the diverse operational environments on the continent. We are seeking partners who can offer solutions with clear, achievable implementation roadmaps and a strong focus on lifecycle management.

This event will be held in Addis Ababa, Ethiopia, and for the first time will merge the Africa Logistics Conference (ALC) and Africa Endeavor (AE). The event will bring together senior military officials, government representatives, and subject matter experts from approximately 48 African partner nations, the U.S. DoW, and international organizations.

ALCS will provide a venue for USAFRICOM, its components, and African partners to interact with industry and strengthen partnerships. The symposium will focus on enabling participants to build on the work from past events while opening new avenues for information sharing in support of shared mission goals.

Interested parties must complete their registration via the exhibitor portal. The deadline for all representative and equipment registration is **Friday, June 27, 2026**.

Date and Time: 27 to 30 July, 2026; 08:00 to 17:00 local time (Daily)

Place of Performance:

Hilton Addis Ababa
Menelik II Avenue
Addis Ababa, 1164, Ethiopia

Provided Space: Limited to one 6-foot table and two chairs

Permitted Materials: Vendors may display pop-up banners (not to exceed 8 feet in height), marketing brochures, and small, non-operational product samples. Digital presentations on laptops are permitted. No large-scale hardware is allowed due to space limitations.

Primary Areas of Interest

The U.S. Government has a priority interest in vendors who can provide practical, sustainable, and cost-effective solutions. Submissions should ideally address how they fit within the following priority areas, though all submissions will be considered.

Priority Focus: Building Sustainable Capability Together

Solutions that demonstrate a clear, achievable implementation roadmap in the following areas:

- **Resilient C4 & IT Infrastructure:** Including low-cost secure radios, scalable network monitoring tools, and practical cyber defense solutions for low-bandwidth environments.
- **Theater Logistics & Supply Chain Management:** Systems and processes for readiness reporting, asset visibility, and managing distribution from port to final destination.
- **Operational & Energy Self-Sufficiency:** Including mobile power solutions, field maintenance equipment, and comprehensive life cycle management plans that empower local support.

- **Data Integration & Security:** Practical tools for secure data sharing, analytics, and threat intelligence that can be managed with local resources.

General Areas of Interest:

- AI-Enabled Decision Advantage & Operations Support Tools
- Beyond Line-of-Sight Communications
- Civil Infrastructure Development
- Digital Forensics
- Disease Prevention
- Field Medicine
- Force Modernization
- Maritime Security & Information Sharing
- Personnel recovery/Casualty Evacuation

The event will provide an environment for participating attendees from both government and commercial sectors to interact. The basic structure will be a shared opening and closing ceremony, with attendees breaking into respective focus areas for general sessions, in addition to dedicated vendor/government interaction time in the combined exhibit hall.

Conditions for Participation

Respondents are advised of the following conditions:

- **No-Cost to the Government:** Exhibitors are responsible for 100% of their costs associated with this event, including but not limited to travel, lodging, visas, and country entry fees.
- **Logistics and Equipment:** Vendors are solely responsible for all logistics related to their exhibition space, including the setup/teardown of booths, providing all necessary equipment, and all associated shipping or material handling costs.
- **No U.S. Government Support:** Selection grants access to the event only. No other U.S. Government funding or support will be provided.

Point of Contact(s):

For registration and logistical details, exhibitors are directed to the official event website and registration portal. Inquiries are managed by the event organizer, NCSI, through the portal: <https://www.ncsi.com/event/alcs/>

Rebecca Steppling, steppling@ncsi.com

Sarah Smith, ssmith@ncsi.com

Summary of Key Changes for Alignment:

1. **Added the Event Theme:** The tagline "Practical Solutions for Enduring Partnerships" is now explicitly stated in the **PURPOSE** section to immediately frame the event's intent.
2. **Expanded the PURPOSE Section:** A new paragraph has been added to explain the strategic shift towards practicality, sustainability, and achievable roadmaps. This gives crucial context to vendors reading the notice.
3. **Restructured "Primary Areas of Interest":** The flat list was replaced with the same tiered structure used for the website, creating a "Priority Focus" area that is balanced between J4 and J6 interests and reinforces the core message. This immediately signals to vendors what kind of solutions will get the most attention.
