

Single Source Justification (Simplified Acquisition)

Section A: General Contract Information

Is this a Bridge Action as defined in the [AF Bridge Action Reduction Plan](#)?☐ Yes☒ No

Contracting Activity:

Project/Program Name: AD / FEI Microscope Maintenance

Purchase Request / Local ID Number: F1TBAP6065A001

 \$ 

Section B: Description of the Supplies/Services Required

The objective of this requirement is to purchase a Fixed Price Service Contract (Base Year with Two Option Years) that contains unlimited unscheduled on-site maintenance and repair services (including parts) for the FEI Quanta 200 Scanning Electron Microscope for a (1) year period of performance (POP) from effective date, to include (upon failure) the replacement of the FEG source. This shall also include (1) on-site preventive maintenance visit during the (POP) and all software updates on existing software.

Section C: Justification for Soliciting from a Single Source or Brand Name

1. FEI Company is the original equipment manufacturer and is the only authorized service provider in the United States for the Quanta200 FEG with experienced factory certified service technicians. A Sole Source letter from the vendor is included.
2. FEI Company and their repair technicians are the only authorized source to log into FEI's proprietary service software running on the Quanta 200 FEG's support computer. This software allows the technician to perform all service adjustments, calibrations and alignments on the instrument along with loading any new software updates.
3. FEI Company is the sole provider for all OEM replacement parts and has the essential spare parts inventory to quickly repair the Quanta 200 FEG minimizing instrument downtime.
4. This Service Contract would eliminate the likelihood of extended periods of downtime during unexpected equipment failure, while funding and documentation are being processed for each unplanned service expense.

Section D: Efforts to Obtain Competition

Market research was conducted and other sources were sought for similar service contracts on several Government databases and open market but none were found. The only option found were Per Diem services offered as "on demand", time and materials. This would cause major down time as the contractor would have to make an initial trip to troubleshoot the problem then if they can do the repair, submit a new quote for the parts and second trip. Obtaining and processing funding for each unexpected equipment failure would add to the down time of the SEM directly impacting the AFRL/RWTO Ordnance Materials Science program.

Section E: Steps to Preclude Future Single Source or Brand Name Awards

Continue conducting annual market research to determine potential future sources, but this is limited due to it being a very specialized field and each manufacturer that make Scanning Electron Microscopes include parts that use their own proprietary equipment and software.

Single Source Justification (Simplified Acquisition)

Section F: Contracting Officer's Determination

I have determined, in accordance with [FAR 13.106-1\(b\)\(1\)](#), that the circumstances of this contract action deem only a single source is reasonably available.
