

**DEPARTMENT OF THE AIR FORCE**  
**HEADQUARTERS AIR FORCE SUSTAINMENT CENTER (AFMC)**  
**TINKER AIR FORCE BASE OKLAHOMA**

8 April 2026

TO: AFSC/PZIM

FROM: OC-ALC/OBCA for 76 CMXG

SUBJECT: Brand Name Justification for C26-061 Comark Test Stand Computers

1. The 76th CMXG is requesting the purchase of a total of twenty-one (21) Comark/Nematron Computers. This acquisition will replace the outdated computers currently used on the test stations.

2. 76 CMXG currently utilizes The Comark/Nematron brand at [REDACTED] complex. The software technicians have an established process for configuring Comark/Nematron brand computers with the current AVEVA testing software. Purchasing this brand of computer will [REDACTED] test, and validate a new configuration for a different computer model. Purchasing any other brand of computer would introduce significant costs [REDACTED]. A change in brand name could also cause issues [REDACTED]

It is estimated that using another brand would result in a revenue loss of approximately [REDACTED] per test stand totaling [REDACTED] and [REDACTED] for the pump modules due to the extensive [REDACTED] re-engineering a new solution. Therefore, procuring the Comark/Nematron brand is the most efficient, cost-effective solution [REDACTED] and significant financial loss. Standardization [REDACTED] by allowing for the interchangeability of spare parts and software technician knowledge.

3. Therefore, it is requested that Comark/Nematron Brand Name equipment is procured to meet all the requirements of the program office [REDACTED]

4. Market research was performed by submitting multiple Request for Information (RFI's) looking for companies that could provide Comark/Nematron Computers. The time period the RFI's were opened was 2-5 March 2026. The following RFI's were submitted:

| Platform           | RFI #      | # Of Vendors | Responses Received |
|--------------------|------------|--------------|--------------------|
| GSA EBUY           | RFI1798603 | 811          | 0                  |
| GSA EBUY<br>(2GIT) | RFI1798605 | 67           | 0                  |
| NASA SEWP          | 369914     | 127          | 0                  |

The customer provided a waiver from using the mandatory source from CCS-3 as well as one (1) ROM from the Original Equipment manufacturer (OEM), COMARK, LLC. When contacted, the OEM stated they only sell to authorized resellers; however, they do have specific vendors per region. They reached out to their authorized resellers to see which ones would be willing to work with the Government and McAps INC is the only re-seller registered within SAM.gov and can conduct business with the Government. Rough Order of Magnitude (ROM)s were provided by both the OEM and McAps.

A review of The System for Award Management (SAM) databases found COMARK and McAps to both be Large Businesses. Market research also concluded that the North American Industry Classification System (NAICS) code 334111, Electronic Computer Manufacturing, and Federal Supply Class (FSC) 7B22 would be the best NAICS and FSC to use when searching for companies who can provide Comark/Nematron Computers.

Based on the stated research it is in the best interest of the government to proceed with this purchase through local contracting as a full and open acquisition.

6. I have determined, in accordance with FAR 12.201(a), that the circumstances of this contract action deem a specific brand name to be required.
