MARINE CORPS SYSTEMS COMMAND

Equipping our MARINES

PRIORITIES

What are our Programmatic Priorities?

- Incremental funding due to CR limitations/constraints
- Continue to support sustainment efforts.
- Leverage Commercial Off-the-Shelf (COTS) solutions in lieu of extensive R&D efforts
- Continue using Other Transaction Authority (OTA) agreements to enable faster prototyping and fielding of critical technologies

What are our Technological Priorities?

- Leverage existing mature technologies (TRL 7-9) ready to be fielded in ~12 months.
- How do we incorporate AI into existing and new systems to improve the readiness and lethality of the Marines in the battlefield?
- What technologies will be available in the next 3-5 years that will enhance or modernize existing training capabilities across the Marine Corps?
- Emerging Requirements - Looking for potential solutions for Drone Trainers, Electromagnetic Warfare and Computer Generated Forces Simulators.

Electromagnetic Warfare Ground Instrumented Range (EWGIR)

Project Description

- Electromagnetic Warfare Ground Instrumented Range (EWGIR) provides Marines with realistic training in the contested electromagnetic operating environment (EMOE). This modular, scalable system simulates diverse EM threats like jamming and spoofing, creating degraded, disrupted, and denied conditions. EWGIR tracks unit EM footprints, enabling real-time feedback on emissions control. The system supports after-action reviews with visual playback and automated reports. Designed for deployment at home stations and remote sites, EWGIR prepares Marines to effectively counter pacing threats across the electromagnetic spectrum, information environment, and space domain.

<u>Project Description</u> - Live Fire Evaluation Tool (LFET) is a new upgraded capability which captures Marine live fire data through a small mountable high tech sensor suite and sensor target system to produce high-fidelity After-Action Review. The LFET system records GPS positions of individual Marine maneuvers, has sensors to process live fire battlefield engagements, sensors to timestamp/record every shot on target, sensors to track who shot what target, and round counting for most of USMC small arms weapons. <u>Priorities</u> - Looking for mature solutions. - Upcoming RFI in 3Q FY26. WARFIGHTER TRAINING SUPPORT

	Acquisition Approach	FY26	FY27	FY28	FY29	FY30
Strategic Planning	- Structured: PdM WTS is structured to improve support of fielding, sustainment, and other support provided to improve Warfighter training readiness. - Agile: Use of MACs, SAIDIQs, SeaPortNxB, and other Joint Contracts for program sustainment, modernization, and other knowledge-based services. - Flexible: Task orders allow for adding, curtailing, or eliminating organizations, locations, or services to meet evolving warfighter (Marine Corps and Joint partners) training and education requirements nested with Marine Corps Force Design. - Effective: Maximize buying power, promoting competition, improving contracting efficiencies where possible, and managing risk throughout the acquisition lifecycle to optimize cost, schedule, performance.

Training Simulation Software/Training Management Tool (TSS/TMT)

Training Simulation Software / Training Management Tool (TSS/TMT)

Provides the capability to conduct multi-echelon Combined Arms Maneuver Training in support of Multi-Domain Operations. TSS generates a complex operational environment, delivered at the point of need. TMT is an intuitive tool that allows Soldiers to plan, prepare, execute, and assess training objectives.

Features:

- Modular Open System Approach. Soldier Centric
- Distributed Event Streaming Platform
- Web Services & Data Serialization

Soldier Virtual Trainer (SVT)

Soldier Virtual Trainer (SVT)

SVT will provide individual Weapon Skills Development (WSD) and enables Joint Fires training (JFT). The SVT is enabled by the Synthetic Training Environment (STE) and is a virtual immersive trainer that combines and integrates several individual Soldier training capabilities. The WSD provides immersive capability to meet individual/crew weapons training. The JFT provides certification and qualification of Joint Fires Observers (JFO).

This Agreement will establish a Marketplace for Army Units to procure, field and sustain WSD and JFT COTS solutions.

Games For Training (GFT)

Games For Training (GFT)

Games for Training (GFT) prepares Soldiers and Leaders for executing Unified Land Operations by delivering robust training and mission rehearsal capabilities. GFT provides an adaptable training environment supporting Company and below courseware on a suite of 53 networked computers. GFT has fielded 113 suites to 74 sites, satisfying Active, National Guard, and Army Reserves' educational requirements in the Operational, Institutional, and Self-Development Training Domains with a low-overhead, flexible, persistent training capability on geo-specific and geo-typical terrain that is relevant with all military platforms and weapon systems.

This contract will address COTS software Procurement, Fielding, and Sustainment.

- Modular Open System Approach. Soldier Centric

Test Resource Management Center (TRMC) Test & Evaluation (T&E) Science & Technology (S&T) Program

DIR IMO Topic: Test Resource Management Center (TRMC) Test & Evaluation (T&E) Science & Technology (S&T) Program

T&E/S&T Program is committed to advancing the Department of War's (DoW) mission by supporting projects with Technology Readiness Levels (TRLs) ranging from 3-6. Aligned with the DoW's Science and Technology and Test and Evaluation priorities, the program embraces a calculated acceptance of technical risk to drive innovation and achieve transformative technological breakthroughs. The T&E/S&T Program actively evaluates and invests in novel, unproven solutions that, while considered too high-risk for current DoW T&E methodologies, hold the potential to deliver significant operational and strategic advantages.

New Test Technology Focus Areas:

- Artificial Intelligence
- Drone Dominance
- Aircraft Flight Dynamics and Optical Tracking
- Long Range 5G Networks
- Nuclear Ground and Air Testing Capabilities
- Hypersonics

ACQUISITION STRATEGY

- Comprehensive suite of contracting tools to invent new test technology
- Army, Navy, Air Force, Marine & Space Force
- Broad Agency Announcement (BAA)
- T&E OT Consortium (TRex II)
- Competition: Full and Open

CURRENT CONTRACT/ORIGINAL DEVELOPER/OEM (IF RECOMPETE)

- Multiple C-Type, SA IDIQ, OTs and SBIR Ph III awards
- Multiple developers, including academia and government agencies

PERIOD OF PERFORMANCE

- TRex II OTA In-Cycle, FY26 In-cycle Request for Solutions MAR 2026

FUNDING

- Funding profile currently under development
