

STATEMENT OF WORK

TITLE: OS/COMET™ SOFTWARE MAINTENANCE FOR NAVAL SATELLITE OPERATIONS CENTER (10 SOPS)

DESCRIPTION

1.0 BACKGROUND

10 SOPS is responsible for the operations and maintenance of Military Satellite Communications (MILSATCOM) constellations. Specifically, Ultra-High Frequency (UHF) Follow-On (UFO) and Fleet Satellite (FLTSAT) satellites. These satellite constellations are operated via the Integrated Satellite Control System (ISCS). Additionally, 10 SOPS is responsible for operations and maintenance of the Mobile User Object System (MUOS). 10 SOPS is responsible for the associated ground systems, including the Narrowband Satellite Control Network (NSCN), which connects remote sites for ISCS and MUOS. 10 SOPS currently uses OS/COMET™ as a core base component to perform satellite operations for commanding, control, and tracking. The OS/COMET software is used across distributed networks for operations, processing & analysis (P&A), software development, and test & evaluation (T&E).

10 SOPS owns OS/COMET software site licenses for ISCS and MUOS per NAVSUP FLC SAN DIEGO Contract Number N00244-21-C-0019 awarded on 15-Jul-2021 with the conditions listed in table 1.

TABLE 1 – 10 SOPS OS/COMET SITE LICENSES

A. The Site License is for 10 SOPS ISCS and MUOS systems only.	
B. The sites covered by this license include only:	
1.	Headquarters (HQ) at Point Mugu, California
2.	Laguna Peak (LP) at Point Mugu, California
3.	Detachment Alpha (DET A) at Prospect Harbor, Maine
4.	Detachment Charlie (DET C) at Finegayan, Guam
5.	Detachment Delta (DET D) at Schriever Air Force Base, Colorado Springs, Colorado
C. The satellites controlled include one (1) FLTSAT SVs, four (4) UFO SVs, and up to seven (7) MUOS SVs. Unlimited quantities of the following licenses are included:	
1.	OSCSYS004-SOC
2.	OSCCTS004-SOC
3.	OSCUIS004-SOC
4.	COMCTCSTM004
5.	COMUIC004
6.	COMLPC004
7.	OA/TOOL
8.	GC/TOOL
9.	GCTOOLCLI
10.	FA/TOOL
11.	SIM/TOOL
D. Upon converting to a Site License, there is a Maintenance Fee due annually, which is comprised of maintenance for all the OS/COMET licenses covered under the Site License.	
E. The Annual Maintenance Fee entitles the licensee to receive patch versions, minor point release versions, and telephone technical support.	

2.0 REQUIREMENTS

2.1 **Maintenance Required:** 10 SOPS requires OS/COMET software maintenance to support all existing software installations and licensing as identified in table 1.

2.2 **Product Description:** OS/COMET Software Maintenance

2.3 **Type of Maintenance Required:** Contractor shall provide all software patches, upgrades, new version releases, licensing files and documentation for the software titled OS/COMET to support all 10 SOPS satellite constellations, networks, and software installations identified in table 1. Typical delivery method shall be via media (e.g., CD, DVD) for software and via email for licensing files and emergency patches. Delivery shall include any drawings, technical documentation, manuals and software that are standard from the contractor. Contractor shall provide OS/COMET software maintenance technical support via telephone, email, and, if necessary, on-site at 10 SOPS to resolve emergency OS/COMET software maintenance related issues preventing 10 SOPS from meeting operational satellite requirements.

3.0 **POINTS OF CONTACT:** Contractor shall provide two points of contact with telephone number(s) the government may use to initiate a service call.

4.0 **DOCUMENTATION:** Contractor shall include any drawings, technical documentation, manuals and software that are standard from the manufacturer for the items purchased at no additional charge

5.0 **SHIPMENT:** Contractor shall be responsible for packing and shipping of all materials. The shipping address is:

661 13th Street, Building 375
Point Mugu, CA 93042-5003
Attn: Director of Operations: Network
