(c) If resolution cannot be made by the contracting officer, the interested party may contact the ombudsman, **Regina E. Marquardt-Chihuahua** at **801 777-5087**, FAX **000 000-0000**, email **regina.marquardt-chihuahua@us.af.mil**. Basic Safeguarding of Covered Contractor Information Systems (Deviation Date)

(a) Definitions. As used in this clause—

Covered contractor information system means an information system that is owned or operated by a contractor that processes, stores, or transmits Federal contract information.

Federal contract information—

(1) Means information, not intended for public release, that is provided by or generated for the Government under a contract to develop or deliver a product or service to the Government; but

(2) Does not include information provided by the Government to the public (such as on public websites) or simple transactional information (such as information necessary to process payments). Information means any communication or representation of knowledge such as facts, data, or opinions, in any medium or form, including textual, numerical, graphic, cartographic, narrative, or audiovisual (Committee on National Security Systems Instruction (CNSSI) 4009).

Information system means a discrete set of information resources organized for the collection, processing, maintenance, use, sharing, dissemination, or disposition of information (44 U.S.C. 3502).

Safeguarding means measures or controls that are prescribed to protect information systems.

(b) Safeguarding requirements.

(1) Basic requirements. The Contractor shall safeguard its covered contractor information systems by implementing, at minimum, the following security controls:

(i) Limit information system access to authorized users, processes acting on behalf of authorized users, or devices (including other information systems).

(ii) Limit information system access to the types of transactions and functions that authorized users are permitted to execute.

(iii) Verify and control/limit connections to and use of external information systems.

(iv) Control information posted or processed on publicly accessible information systems.

(v) Identify information system users, processes acting on behalf of users, or devices.

(vi) Authenticate (or verify) the identities of those users, processes, or devices, as a prerequisite to allowing access to organizational information systems.

(vii) Sanitize or destroy information system media containing Federal Contract Information before disposal or release for reuse.

(viii) Limit physical access to organizational information systems, equipment, and the respective operating environments to authorized individuals.

(ix) Escort visitors and monitor visitor activity; maintain audit logs of physical access; and control and manage physical access devices.

(x) Monitor, control, and protect organizational communications (i.e., information transmitted or received by organizational information systems) at the external boundaries and key internal boundaries of the information systems.

(xi) Implement subnetworks for publicly accessible system components that are physically or logically separated from internal networks.

(xii) Identify, report, and correct information and information system flaws in a timely manner.

(xiii) Provide protection from malicious code at appropriate locations within organizational information systems.

(xiv) Update malicious code protection mechanisms when new releases are available.

(xv) Perform periodic scans of the information system and real-time scans of files from external sources as files are downloaded, opened, or executed.

(2) Other requirements. This clause does not relieve the Contractor of any other specific safeguarding requirements specified by Federal departments and agencies relating to covered contractor information systems generally or other Federal safeguarding requirements for controlled unclassified information (CUI) as established by Executive Order 13556.

(c) Subcontracts. The Contractor shall include the substance of this clause, including this paragraph (c), in subcontracts under this contract (including subcontracts for the acquisition of commercial products, other than commercially available off-the-shelf items, or commercial services), in which the subcontractor may have Federal contract information residing in or transiting through its information system.

Price Reasonableness: The proposed prices will be evaluated for Price Reasonableness. For a price to be reasonable, it will represent a price to the Government that a prudent person would pay when consideration is given to prices in the market. Normally, price reasonableness is established through adequate price competition, but may also be determined through cost and price analysis techniques as described in FAR 15.404. For additional information see FAR 31.201-3.

Balance: The Government may also determine a proposal unacceptable should the proposed prices be unbalanced. Unbalanced pricing exists when, despite an acceptable total evaluated price, the price of one or more items/Contract Line Item Numbers (CLINs) is significantly overstated or understated as indicated by the application of price analysis techniques as those defined by FAR 15.404.

Total Evaluated Price (TEP): A TEP will be calculated to be used for evaluation of offers to determine the lowest-priced proposal. The TEP calculation will be a summation of all Contract Line Item Pricing.

Solicitation Requirements, Terms and Conditions: In addition to meeting the identified factor above, Offerors are required to meet all solicitation requirements, such as terms and conditions, representations and certifications, and required delivery schedules.

Furthermore, all Offeror's shall be listed as an approved source in the Government's Screening Analysis Worksheet Form 761 or 762 prior to contract award.

A qualification package request is attached to this solicitation for those contractors who are not already qualified; however, per FAR 9.202(e), the government reserves the right not to delay contract award in order to provide a potential offeror with an opportunity to demonstrate its ability to meet the standards.

The process for the evaluation of proposals is as follows:

This award will be made to the offeror that submitted the proposal with the lowest Total Evaluated Price and is a qualified source. In the rare instance where the two lowest-priced proposals from qualified sources are the same, the PCO may enter into discussions to provide both offerors an opportunity to supply a best and final offer.

Past performance record and history will be assessed as one of the multiple standards required for a successful offeror to be determined responsible as described in FAR 9.104. Contractors shall meet the required delivery dates, as well as the terms and conditions in this solicitation, to be determined responsible.
