I. INTRODUCTION:

THIS IS A PRE-SOLICITATION NON-COMPETITIVE (NOTICE OF INTENT) SYNOPSIS TO AWARD A CONTRACT WITHOUT PROVIDING FOR FULL OR OPEN COMPETITION (INCLUDING BRAND-NAME).

The National Heart, Lung, and Blood Institute (NHLBI), Hematology Branch, requires Next Generation Sequencing (NGS) services to analyze patient samples for the detection of somatic genetic mutations associated with bone marrow failure syndromes and hematologic disorders. The results from these analyses are critical for clinical diagnosis and for determining appropriate therapeutic strategies for patients. This requirement will support ongoing clinical research and patient care activities by providing timely and reliable genomic sequencing data.

II. NORTH AMERICAN INDUSTRY CLASSIFICATION SYSTEM (NAICS) CODE and SET ASIDE STATUS

The NAICS code for this acquisition is 541380 – Testing Laboratories and Services, with a size standard of \$19 million. This acquisition is NOT set aside for small business.

III. REGULATORY AUTHORITY

The resultant contract will include all applicable provisions and clauses in effect through the Federal Acquisition Circular (FAC) 2024-07 dated 08-29-2024.

This acquisition is conducted under the procedures as prescribed in FAR Part 13—Simplified Acquisition Procedures and FAR Part 12—Acquisition of Commercial Products and Commercial Services.

IV. STATUTORY AUTHORITY

This acquisition is conducted under the authority of FAR 13.106-1(b)(1), soliciting from a single source, as only one responsible source and no other supplies or services will satisfy agency requirements.

V. DESCRIPTION OF REQUIREMENT:

PURPOSE AND OBJECTIVES:

The Government requires Next Generation Sequencing (NGS) services for the analysis of patient samples to detect somatic genetic mutations. These services are necessary to support clinical decision-making and ongoing research into bone marrow failure syndromes.

Purchase Description:

The contractor shall provide Next Generation Sequencing services capable of analyzing a panel of approximately 302 genes associated with hematologic neoplasms and related conditions. Services shall include processing of patient-derived samples (e.g., plasma, fresh cells, or paraffin-embedded tissue), sequencing of coding DNA regions, and generation of detailed reports identifying genetic mutations.

Salient Characteristics:

The required services must meet the following minimum technical requirements:

- Capability to analyze approximately 302 genes associated with hematologic disorders
- Ability to isolate nucleic acids from multiple sample types (plasma, fresh cells, and FFPE tissue)
- Massive parallel sequencing of coding DNA regions, including exons and flanking regions
- Detection of mutations including insertions, deletions, and structural variants
- Fragment length analysis capability for genes such as CALR, FLT3, and NPM1
- Ability to process low DNA input quantities
- Secure delivery of results via electronic reporting system
- Turnaround time of approximately 7–10 days after receipt of samples

Quantity:

Approximately 16 samples.

Delivery Date:

Results shall be delivered within 7–10 calendar days after receipt of each sample.

Delivery/Performance Location:

Services shall be performed at the contractor's facility.

PERIOD OF PERFORMANCE:

The period of performance will continue until all samples (approximately 16) have been processed.

VI. CONTRACTING WITHOUT PROVIDING FOR FULL OR OPEN COMPETITION (INCLUDING BRAND-NAME) DETERMINATION

The determination to award a contract without providing for full and open competition is based on market research conducted by the Government.

Genomic Testing Cooperative (GTC) is the only vendor identified that can meet all of the Government's requirements. Specifically, GTC provides a sequencing panel that includes critical genes required for ongoing clinical research, including genes necessary for diagnosing conditions such as VEXAS syndrome.

Additionally, GTC offers a turnaround time of 7–10 days, which is significantly faster than typical industry standards and is essential for timely clinical decision-making.

Furthermore, the Government has an existing body of longitudinal data generated using GTC's sequencing platform. Transitioning to another vendor would introduce variability in sequencing methodologies and data analysis, which would compromise the integrity and comparability of ongoing research and clinical results.

Market research indicates that while other vendors provide sequencing services, they do not meet all technical, schedule, and continuity requirements of this acquisition.

The intended source is:

Genomic Testing Cooperative (GTC)
25371 Commercentre Drive
Lake Forest, CA 92630
United States

VII. CLOSING STATEMENT

THIS SYNOPSIS IS NOT A REQUEST FOR COMPETITIVE PROPOSALS. However, interested parties may identify their interest and capability to respond to this notice.

A determination by the Government not to compete this proposed contract based upon responses to this notice is solely within the discretion of the Government. All responsible sources may submit a capability statement, proposal, or quotation which shall be considered by the agency. The information received will normally be considered solely for the purposes of determining whether to proceed on a non-competitive basis or to conduct a competitive procurement. This notice does not obligate the Government to award a contract or otherwise pay for the information provided in response.

Responses to this notice shall contain sufficient information to establish the interested

parties' bona-fide capabilities for fulfilling the requirement and include: unit price, list price, shipping and handling costs, the delivery period after contract award, the prompt payment discount terms, the F.O.B. Point (Destination or Origin), the Dun & Bradstreet Number (DUNS), the Taxpayer Identification Number (TIN), and the certification of business size. All offerors must have an active registration in the System for Award Management (SAM) www.sam.gov.

All responses must be received by the closing date and time and must reference Solicitation Number **75N98026Q00212**. Responses must be submitted electronically to Nicholas Capobianco, Contract Specialist at nicholas.capobianco@nih.gov.
