

## STATEMENT OF WORK (SOW)

### 5K SECURITY SYSTEMS SUPPORT AND MAINTENANCE SERVICES

#### 1.0 Background

The Program Executive Office Intelligence, Electronic Warfare & Sensors (PEO IEW&S) utilizes an electronic security system for surveillance, monitoring, and access control at its facility in Huntsville, Alabama. This system is administered through Lenel-compatible components and requires ongoing maintenance and technological upgrades to ensure operational readiness and mission capability.

#### 2.0 Objective

The primary objective of this Statement of Work (SOW) is to secure services for the maintenance, and technical refreshment of the existing electronic security system.

#### 3.0 Scope of Work

The contractor shall provide all labor, management, and Federal Information Processing Standards (FIPS) 201 compliant systems necessary to maintain the Access Control Systems (ACS) and Closed-Circuit Televisions (CCTV). This work includes, but is not limited to:

- Technical refreshment of existing systems.
- System programming, testing, installation, and removal.
- All other affiliated services associated with the electronic security system.

#### 4.0 Equipment and Systems Covered

Maintenance and support shall be provided for the following components of the security system:

| Equipment Category     | Description                                                      |
|------------------------|------------------------------------------------------------------|
| Access Control         | Dual Reader Interface, Keypad Proximity Reader, Proximity Reader |
| Monitoring & Detection | Security Sensor, Security Detector                               |
| System Control         | Keypad for Arm/Disarm                                            |
| Infrastructure         | Power Supply, Industrial Grade Strike                            |
| General                | Overall Security System Maintenance                              |
