

## Statement of Work

For

60 MXS/MXMCE

Description: The 60<sup>th</sup> MXS requires a 500-gallon Liquid Oxygen (LOX) trailer. This trailer has a myriad of purposes, including but not limited to: Serving aircraft LOX converters, Next-Gen Patient Therapeutic LOX Converters, and 50-gallon LOX carts. Moreover, it greatly increases servicing capability while deployed in austere locations due to its mobility (e.g. When the C-17s staged out of Panama in Nov 2024, they took two pre-filled 50-gallon LOX carts and had to receive new carts through the duration of the deployment due to lack of servicing capability). Without this asset, logistics will continue to be affected due to prioritizing locations with servicing capability. This is a **Brand Name or Equal** request.

Preferred make/model: Essex Industries 500 Gallon LOX Trailer, P/N 50C-0115-1

The contractor shall provide the following:

Manufacture Essex Industries

500 GALLON LOX TRAILER

### 1. Required Specifications.

- 1.1 Must have a capacity of 500 gallons of Liquid Oxygen.
- 1.2 Must be trailer mounted and able to be towed by flightline vehicles.
- 1.3 Must normally operate at 50 PSIG.
- 1.4 Must have an annular space vacuum of < 10 microns.
- 1.5 Must have a tank pressure relief valve that actuates at 65 PSIG.
- 1.6 Must have a trailer tank safety rupture disc that relieves at 98 PSIG.
- 1.7 Will have a static grounding reel w/ clamp or mounting position for one.
- 1.8 Will have anchor points for transportation.
- 1.9 Must meet Air Force PD13WEGRVEA05 and MIL-STD-810.

### 2. Training

- 2.1 Must include end-user (25 personnel) operational training on device
- 2.2 Must include Electrical and Environmental Systems Technician (25 personnel) training on service/maintenance

### 3. Equipment warranty (12 months) must be included

### 4. All freight, handling, & labor charges must be included

### 5. Point of Contact after contract is awarded: Coordinate with TSgt Adam Strandness at 60 MXS at 707-424-2295.
