

QUESTION AND ANSWER SHEET

Discovery Park

AGENCY REQUEST FOR INTEREST (RFI)

MSFC-MAF-001-2026 RFI

FOR

SITE DEVELOPMENT PARTNERSHIPS

AT NASA MICHLOUD ASSEMBLY FACILITY(MAF) LOUISIANA

1. Q: Site Plan and Survey of Discovery Park.
A: See attached MAF Site Survey.
2. Q: Location and capacity of nearby utilities (Water, Sewer, Electricity, Gas, and Internet).
A: All utilities are city-provided and are located along Old Gentilly Road.
3. Q: List of current or prospective Tenants at NASA Michoud who may be interested in new or expanded facilities.
A: Cannot speak to third party interest in development/expansion.
4. Q: Map of entire MAF facilities with a focus on underdeveloped parcels.

A: See attached MAF Site Map included for Industry Day. The only underdeveloped parcel identified at this time is the subject RFI parcel.

5. Q: How discovery park will interface with other operations at Michoud, including access to road and barge facilities?

A: Discovery Park may or may not be within the NASA security perimeter. All fencing for partitioning off from security perimeter will be at the expense of proposer and should be included in any proposals. Use of barge dock is permitted on a NASA-scheduled, non-interference basis.

6. Q: Information on future plans for continuing or future use of Michoud by NASA and other current users.

A: NASA plans to continue to own and operate the facility at large for the foreseeable future.

7. Q: Whether NASA has formal or informal indications of interest for parties wishing to be located at Discovery Park or in the Michoud facility area.

A: Cannot disclose.

8. Q: How the land is regulated (state, federal) and how it is taxed.

A: It is Federal land and no taxes from the federal level will be imposed.

9. Q: Learn more about the vision for Discovery Park and broader campus development.

A: All information provided at Industry Day.

10. Q: Understand how to submit in response to the RFI.

A: Covered on Industry Day. Information was posted on Sam.gov.

11. Q: Engage directly with local, regional, and state economic development partners and industry stakeholders helping to support the growth of the economy.

A: Partners/Stakeholders were present at Industry Day. Potential proposers may work with those entities at their discretion.

12. Q: Enhanced Use Lease Framework 1 - Typical term length. 2 - Ground lease consideration structure (fixed rent, participation, in-kind improvements).

A.1: 30 years.

A.2: Escalating rent .

13. Q: Infrastructure & Site Conditions 1 - Existing utility capacity (power, water, sewer, fiber). 2 - Required infrastructure upgrades. 3 - Road access and heavy truck circulation. 4 - Environmental constraints, floodplain considerations.

A.1: All utilities are city-provided and are located along Old Gentilly Road.

A.2: All infrastructure upgrades will be specific to any development/use of the object parcel and will not be a part of the facility at large.

A.3: Direct access from Old Gentilly Road.

A.4: No floodplain considerations. Lease will contain environmental baseline sampling which will detail any current contamination levels.

14.Q: Tenant Eligibility & Approval Process 1 - Mission-alignment criteria. 2 - Security perimeter implications. 3 - NASA review timeline for tenant approval.

A.1: Must align with criteria set forth in the Announcement for Proposal (AFP).

A.2: Discovery Park may or may not be within the NASA security perimeter. All fencing for partitioning off from security perimeter will be at the expense of proposer and should be included in any proposals.

A.3: Typically, after the Announcement for Proposal (AFP) closes a decision is made in 4 to 6 weeks.

15.Q: Development Parameters 1 - Permitted building types and heights. 2 - Setbacks and design guidelines. 3 - Phasing flexibility. 4 - Parking and site coverage limitations.

A.1: Case specific evaluation. Partner will be required to submit all development plans for NASA approval which shall not be unreasonably withheld or delayed.

A.2: See attached survey for setbacks.

A.3: This will be Partner defined subject to non-interference with greater facility operations.

A.4: All parking and site coverage limitations are to be within the perimeter of the RFI object parcel.

16.Q: Financing Considerations 1 - Precedent Enhanced Use Lease (EUL) transactions at other NASA facilities. 2 - Insurance and indemnification requirements.

A.1: There are multiple EULs at several NASA Centers.

A.2: Based on the type of operations that Lessee would perform.

17.Q: Long-Term Operations 1 - Maintenance obligations. 2 - Security coordination expectations. 3 - Reversion rights at lease expiration.

A.1: Partner will be responsible for all maintenance obligations within the object parcel perimeter. Indirect maintenance may be included within the lease to cover general use/roadway areas of MAF available for use by Partner. Those costs are subject to the development configuration.

A.2: Subject to MAF badging protocols if Partner elects to locate within the MAF perimeter. No badging criteria if fencing is reconfigured to provide development outside of the MAF perimeter.

A.3: Depends, would have to discuss near lease expiration.

18.Q: How many megawatts can be pulled into the site?

A: All utilities are expected to be from city service. This question should be directed to that entity or entities.

19.Q: Additional properties available on site that will possibly be on the market soon?

A: Unknown at this time.

20.Q: Someone who is a buyer of a Tier 3/Tier 4 AI Data Factory(GPU as a Service) for NASA.

A: Do not understand question fully.

21.Q: Interested in construction details as we do elevators and then O&M for facilities for the maintenance after the fact.

A: Cannot provide as NASA would not be the developer in this instance.

22.Q: NASA's development objectives for the 45acre Discovery Park site.

A: Discussed at Industry Day.

23.Q: Site readiness assessment findings, infrastructure overview, and land use considerations.

A: No site readiness review conducted. Infrastructure overview discussed at Industry Day to the extent it applies to object parcel. All utilities shall be obtained from city service at Old Gentilly Road.

24.Q: Enhanced Use Lease structure, terms, approval process, and anticipated schedule.

A: All of these details will be published with the Announcement for Proposals (AFP).

25.Q: Detailed expectations for Master Developer responsibilities (financing, marketing, tenant recruitment, operations).

A: NASA expects proposer to include this information in any subsequent proposal for evaluation.

26.Q: Coordination requirements with existing MAF tenants and impacts related to the security perimeter.

A: Discovery Park may or may not be within the NASA security perimeter. All fencing for partitioning off from security perimeter will be at the expense of proposer and should be included in any proposals. In either configuration, Tenant will be responsible for any parcel perimeter security to regulate any interaction from outside/on-site tenants/traffic.

27. Q: What will be the model; for utilities, etc that will be provided to entities that develop in Discovery Park.

A: All utilities shall be obtained from city service at Old Gentilly Road.

28. Q: What type of security requirements will be levied on entities that develop in Discovery Park?

A: Discovery Park may or may not be within the NASA security perimeter. All fencing for partitioning off from security perimeter will be at the expense of proposer and should be included in any proposals. Subject to MAF badging protocols if Partner elects to locate within the MAF perimeter. No badging criteria if fencing is reconfigured to provide development outside of the MAF perimeter.

29. Q: What will be the prohibited personnel/functions/businesses that entities that develop in Discovery Park will not be able to engage in i.e. Foreign national customers/employees, non-US company access, or prohibited types of businesses.

A: All of these details will be published with the Announcement for Proposals (AFP).
