For information on this acquisition, contact Jennifer Vatosiou at jennifer.m.vatosiou.civ@us.navy.mil. **Please provide Cage Code or Unique Entity ID on quotes or within email as information will be pulled on Saturday, 21 March 2026.**

BRAND NAME SPECIFICATION:

Naval Undersea Warfare Center Division, Newport, Code 2514 has a requirement for fleet installation and On-Board Repair Parts (OBRP) support for hard drives in the Combat System. These drives will be used in the fleet as spares, casualty reports (CASREPs) and installation needs. The drives main purpose are to aid with posture transitions and rebuilds – in this case, we

specifically require 50 drives to support an urgent software redelivery in April 2026. These drives are used on TI-14 through TI-24 platforms. Each posture transition, or rebuilt server, requires the platform to put their Solid-State Drive (SSD) in "write" and posture to whatever posture they are at.

These drives are brand name specific because they are the only drives approved for use in existing systems, having passed Technical Insertion development states and no other solid state drive was approved for use. The Micron brand material was shock tested in the cabinets and is therefore the only 3.8TB Solid State Drive (SSD) that is approved for use in the PMS 425 Combat System. It is crucial to procure these units in accordance with the overall submarine baseline requirements. These brands are fielded throughout submarine platform variants and there are no substitutes available that could fill this shipboard requirement. The design, development and environmental qualification efforts associated with an alternate would be in excess of 100 thousand dollars, which is cost prohibitive for the overall program. Furthermore, the requalification process could take anywhere from a month to a year which would result in delays to scheduled installs, therefore being detrimental to the overall program.

Based on the above, it is not reasonable to conclude the potential savings from competition can offset the significant duplicative cost and schedule and mission impact associated with purchasing a new brand name product. Therefore, it is in the best interest of the Government to solicit and award this requirement on a brand name only basis.
