Notice to Offeror(s)/Supplier(s):

Funds are presently available for this effort. An award will be made based on acceptable and conforming offeror. The Government reserves the right to cancel this solicitation, either before or after the closing date. In the event the Government cancels this solicitation, the Government has no obligation to reimburse an offeror for any costs.

Anticipated award date 08 May 2026

Due to the overseas location of this requirement, no set-aside will be used in accordance with RFO 19.000(b)(1)(ii). The North American Industry Classification System (NAICS) code associated with this requirement is **333992**. The Product Service Code (PSC) is **3431**. Evaluation of commercial items in accordance with RFO 52.212-2 will be utilized using most advantageous to the government.

Once solicited, all responsible sources may submit a quotation, bid, or proposal, as appropriate, which will be considered by the agency subject to the World Trade Organization. IAW RFO 52.225-5, Trade Agreements, one or more of the items under this acquisition is subject to the World Trade Organization Government Procurement Agreement and Free Trade Agreements.

Description of Requirement:

Three (3) Mobile Welding Machines and Three (3) Trailers

The requirement consists of 3 welding machines and 3 trailers. The requirement consists of a mobile, engine driven welding system with true DC constant current/constant voltage (CC/CV) output across all welding processes, enabling immediate transition between Stick, MIG, flux-cored, and DC TIG welding without external modules, manual reconfiguration, or performance degradation. The required system must provide simultaneous, independent weld output and high-capacity generator power without derating, allowing welding operations to continue uninterrupted while supporting auxiliary equipment. The welder must also support air carbon arc gouging with 3/16- inch electrodes and provide high open- circuit voltage for reliable arc starts over extended lead lengths. Generator output required 12,000 peak watts/10,000 watts continuous with 1-phase, 120/240VA & 50hz capability. Additionally, the welder must be diesel powered.

3Interested offerors are encouraged to provide a tech sheet and/or photos of the item you intend to quote.
