

Notice of Intent: NovaSeq X Series 25B Reagent Kits

(75N98026Q00260)

The National Institutes of Health intends to award a Firm-Fixed-Price Purchase Order to Illumina Inc.

In accordance with FAR Part 6.302-1, Illumina Inc is the only known responsible source who can provide the products/services that meet our standards. No other source has been identified who can provide the requirements listed below.

The purpose of this acquisition is to provide supplies to the Neurodegenerative Diseases Research Unit for research for the purpose of sequencing DNA samples on the Illumina-manufactured NovaSeq sequencing systems. These reagents will be used to identify causative genes for neurodegenerative diseases. Automated robotic Illumina sequencing systems require the use of proprietary reagents to ensure efficient operation and the desired outcomes of the operating systems. All reagents must be compatible with and perform optimally in the Illumina-manufactured systems. We use standardized protocols with the Illumina NovaSeq sequencing equipment.

This notice is not a request for competitive quotes. Illumina Inc is the service provider. However, any available small businesses (e.g., 8(a), service-disabled veteran owned small business, HUBZone small business, small disadvantaged business, veteran-owned small business, and women-owned small business) as stated herein may submit a written capability statement that clearly supports and demonstrates their ability to perform the requirement. A determination by the Government to compete this proposed award based upon responses to this notice is solely within the discretion of the Government.

It is anticipated that an award will be issued approximately five(5) days after the date of this notice unless the Government determines that another vendor has the capability to meet this requirement.

Please email responses to david.shen@nih.gov no later than 6:00 a.m. EDT on May 7, 2026.
