

STATEMENT OF WORK (DRAFT)

1. Background

LynxGuide Duress & Mass Notification System Enterprise OR EQUAL license and support, which is currently in use by Veterans Affairs (VA) Police Department for entire VA Greater Los Angeles System for panic duress and mass notification.

2. Scope

Provide enterprise license and support for roughly 30,000 seats.

3. Specific Tasks

Provide enterprise license and support for roughly 30,000 seats to include pro seats.

3.1. Subtask 1 – Technical/Customer Support. Provide technical support for virtual server to the VA Physical Security Specialist by phone between the hours of 6am-5pm Monday-Friday. After hours as needed.

3.1.1. Deliverables: Technical/Customer Support

4. Performance Monitoring

Physical security specialist will monitor system and relay back to COR (Contracting Officer Representative) or VA POC (Point of Contact) any issues that need to be resolved with contractor.

5. Salient Characteristics

- 5.1. System shall provide enterprise-wide duress/panic alerting with optional mass notification features.
- 5.2. System shall support silent/covert duress activation through hardware buttons and/or software clients.
- 5.3. System shall deliver real-time notifications (within 5 seconds or fewer of event) to designated security or response personnel.
- 5.4. System shall provide location information identifying the activation point, zone, or assigned device.
- 5.5. System shall operate on standard enterprise network infrastructure (LAN/WAN).
- 5.6. System shall include a central administrative console for configuration, user/device management, and alert routing.
- 5.7. System shall support integration with existing security systems such as access control, radios, and/or video management systems when available.
- 5.8. System shall support configurable alert routing and escalation rules.
- 5.9. System shall include system logging, event history, and reporting functions.
- 5.10. System communications shall use secure, encrypted protocols.
- 5.11. System shall support redundant components or backup communication paths appropriate to enterprise environments.
- 5.12. System shall be scalable, allowing expansion to additional rooms, buildings, or campuses.

- 5.13. System shall support predefined message templates for notification events.
- 5.14. System shall provide multi-channel alert delivery, such as desktop alerts, email, or text-based notifications.
- 5.15. System hardware components (if used) shall support battery backup or low-power operation.
- 5.16. System shall allow remote configuration changes and updates through the administrative interface.

6. Government-Furnished Equipment (GFE)/Government-Furnished Information (GFI).

Server is located on government property.

7. Other Pertinent Information or Special Considerations.

- 8.1. Identification of Possible Follow-on Work.
- 8.2. Identification of Potential Conflicts of Interest (COI).
- 8.3. Identification of Non-Disclosure Requirements.
- 8.4. Packaging, Packing and Shipping Instructions.
- 8.5. Inspection and Acceptance Criteria.

8. Place of Performance

11301 Wilshire Blvd
Bldg 222, Rm 205, Los Angeles, Ca 90073
