

INFORMATION TECHNOLOGY SYSTEMS

DLA Troop Support – Construction and Equipment Directorate Maintenance, Repair and Operations Tailored Logistics Support Prime Vendor Program

DATA SPECIFICATION DOCUMENT

Version 6.0, April 2026

Monthly Order Data and Usage Data Reporting Requirements

PURPOSE: During the term of this contract, DLA Troop Support has defined a monthly requirement of Order Data and Usage Data Reporting. All data provided by the Tailored Logistics Support (TLS) Vendor will be used and viewed by C&E Management and DLA Troop Support personnel only. To increase the utility of this collected information, streamline the data collection process and minimize data manipulation efforts, DLA Troop Support has established specific data reporting requirements. These specifications include submission time frames, vehicle or medium of submission and the data elements structure that will make up the submitted data set.

NOTE: THE ATTACHMENTS ARE NOT THE FINAL VERSION OF THE PROCESS. THEY ARE MEANT TO BE AN EXAMPLE.

FILE TYPES AND DATA SPECIFICATIONS

TLS Vendors are required to submit monthly reports for **Order Data** and **Usage Data**, where each file type has a different layout and contains different information.

Order Data contains orders placed in the reporting month, reflects the state of the order at the time the customer placed it.

Usage Data contains orders shipped in the reporting month, and reflects the order at the time the TLS Vendor performs.

ORDER DATA REPORT FILE SPECIFICATIONS

Order Data reflects the TLS Vendor's line-item detail that captures order data at the time that the order is placed by DLA with the contractor. This information contains the item requirements, pricing, required delivery date, and customer information. Data captured in this file contains order line transactions prior to shipment.

Submission Time Frame: Order data provided should reflect orders captured by the TLS Vendor and must be submitted by the 5th of the following month that the order was accepted by the TLS Vendor. For example, an Order Data Report for line-item level data for the *orders placed* by DLA with the contractor during the month of January would be due to DLA Troop Support by no later than February 5, and should include all delivery orders issued during the month of January. Should the due date pass without data being received by DLA Troop Support, a member of the DLA Troop Support-C&E IT Staff will contact the contractor to coordinate immediate submission.

Medium/Vehicle of Transfer: Files shall be provided to DLA Troop Support as a pipe (|) delimited text attachment file via Email and sent to a generic email address that will be provided to the Vendor IT POC. The Usage data will be verified for format and sent to the DLA Troop Support for performance analysis.

File Naming Convention: To facilitate the automated processing and identification of submitted data files, each file type has a *specific file naming convention*. Adhering to such conventions will provide for easy storage and organization during the automated loading and archival processes, and identification and retrieval of source data files.

Order Data – File Naming Convention

Format of filenames: **ORDER.yyyymmdd.Ann.VEN.TXT**

ORDER Fixed text identifying the file as an Order Data file.

yyyy Year of submission.

mm Month of file submission.

dd Last day of the month of the file submission.

A Fixed character 'A'.

nn Two digit, zero filled sequence number, indicates the version of the file. Each time the TLS Vendor resubmits a file in a particular month, this value is incremented by 1. Resubmissions are to be all inclusive of the month, not a subset of lines. The file with the highest sequence number is loaded, all others are discarded.

VEN The TLS Vendor's three-character abbreviation assigned for the MRO Program.

TXT Fixed value of the file's extension, which identifies it as a text file.

Example: ORDER.20191031.A01.ABC.TXT where the TLS Vendor, ABC Company, has the assigned abbreviation of ABC. If you are unsure of your abbreviation, contact your contracting officer.

ORDER DATA GRID

	Data Element	Data Type	Field Length	Sample Value(s)	Comments
1	Data File Record Type Indicator	Text	1 (fixed)	U	Required
2	Vendor Line Identifier (VLID)	Text	9 (fixed)	9959229000	Required
3	TLS Vendor Contract Number	Text	13 (fixed)	SPE8E319D0014	Required
4	Delivery Order Number (PIID)	Text	14 (fixed)	SPE8E319F5001	Required
5	Vendor Quote Number	Text	V30		Required
6	Requisition Number	Text	14 (fixed)	N0018191500001	Required
7	Order Date	Date	10 (fixed)	03/20/2019	Required
8	Contract Delivery Date (CDD)	Date	10 (fixed)	04/01/2019	Required
9	DoDAAC – Ordering	Text	6 (fixed)	N12345	Required
10	DoDAAC – Ship To	Text	6 (fixed)	N12345	Required
11	Manufacturer Name	Text	V50	ACME	Required
12	Manufacturer Part Number	Text	V32	1-0023-D	Required
13	Universal Product Code (UPC)	Text	V20	039800036780	Typically 12 digits, if available for the item
14	National Stock Number (NSN)	Text	13 (fixed)	4210011367617	Optional
15	Short Item Description	Text	V100		Required
16	Unit Sold	Text	2 (fixed)	EA	Required
17	Quantity Ordered	Number	10,2	15	Required
18	Unburdened Unit Price	Number	13,4	5.60	Required
19	Burdened Unit Price	Number	13,4	6.3755	Required
20	Unburdened Extended Price	Number	13,4	56.00	Required
21	Burdened Extended Price	Number	13,4	63.755	Required
22	DoD Special Project Code	Text	V3	9GY	Optional
23	Green Product	Text	V1	Y, N, blank	Optional
24	Line Item Type	Text	2 (fixed)	PR, SE, BE, AF, FR	Required
25	Business Model	Number	1	1 – KOP 2 – Storefront 3 – BidWiser	Required
26	Comments	Text	V100		Optional

DATA ELEMENT DETAILS

Double Quotes [" "] and **Pipes [| |]** are not acceptable within the context of any field. Also, fields cannot be framed with **double quotes [" "]**.

Data File Record Type Indicator [Required]

- Defines data as line-item level data used in the C&E Management Information System and is denoted by U, which identifies the contents as unfilled, new order lines.
- **NOTE:** Order Data files only need to contain order lines from the KOP and Storefront business models. BidWiser orders are exempt from reporting in this data file as DLA already has that information.

Vendor Line Identifier (VLID) [Required]

- This value is a guaranteed unique line identifier that is used to reconcile an order line against various systems and repositories throughout DLA.
- For the BidWiser business model, these values are generated and provided to the TLS Vendor in the Award Notification Spreadsheet as the ‘Contractor Control Number’.
- For KOP and Storefront business models this value is to be generated by the TLS Vendor.
- TLS Vendor generated values should adhere to the following format specification:

vv - TLS Vendor's 2 digit, zero filled, DLA assigned ID

p - Program ID, 1 digit, fixed value of 5 for MRO

y - Fiscal Year expressed in 1 digit

jjj - Julian day of year the value was accepted by the TLS Vendor

nnn - zero filled, Base32 serial number using only the below values:

{0,1,2,3,4,5,6,7,8,9,B,C,D,E,F,G,H,J,K,L,M,N,Q,R,S,T,U,V,W,X,Y,Z}

Example: If TLS Vendor ID is 99 and an order is accepted on August 17, 2019, and the order contains five lines, then the following values would be appropriate:

9959229000
9959229001
9959229002
9959229003
9959229004

If there is another order on the same day for two lines, keep the sequence moving forward using:

9959229005
9959229006

- The above format allows for up to 32,768 distinct values per day.

TLS Vendor Contract Number [Required]

- Specific format (e.g. SPE8E326D0099), 13-position alpha-numeric (e.g. hyphens [-], slashes [/], spaces [], etc. are **not** acceptable). This contract number identifies the agreement, between the TLS Vendor Contractor and DLA Troop Support against which the order was placed.
- A TLS Vendor Contractor can have multiple contracts but the same contract number cannot be held by more than one Contractor.

Delivery Order Number (PIID) [Required]

- Also known as the PIID (Uniform Procurement Instrument Identification), this 13-character alphanumeric identifies the order with which a transaction line is associated.
- Each line within the usage data set must associated with a Delivery Order Number.
- Multiple lines can be associated with the same Delivery Order Number, so long as the lines share the same values for:
 - Ordering DoDAAC
 - Ship To DoDAAC
 - Requisition Number
 - Fund Code
 - Signal Code
 - MIPR Number (is applicable)
 - Project Code
- For the multiple award business model, the PIID is generated and provided to the TLS Vendor in the Award Notification Spreadsheet as the 'Order Number'.
- For single award business models this value is to be generated by TLS Vendors and needs to adhere to the following format:

SPE8E3YYFNNNN

SPE8E3 – Fixed value of the MRO Contracting Office DoDAAC.

YY – Fiscal Year in which the order occurred.

F – Fixed value 'F'

NNNN – Sequence Number to be within the TLS Vendor's assigned range. The TLS Vendor's range is determined by DLA. The incrementing Sequence Value within the range is determined by the TLS Vendor.

Example: SPE8E319FJ0001

- DLA Troop Support assigns the delivery order range that is available to the TLS Vendor. The TLS Vendor maintains these values throughout contract performance.

Vendor Quote Number [Required]

- This is the TLS Vendor generated quote number that was provided to the customer regarding their initial inquiry for the item.

Contract Delivery Date [Required]

- This is the negotiated calendar date, as identified by the ordering facility, by which the items ordered are required to be received.
- This field shall be submitted at a fixed length of 10 characters.
- The year must be submitted as a 4-digit year.
- Single digit months and/or days shall be entered with leading zeroes (e.g. 05/04/2020 = May 4, 2020).

- For the multiple award business model, the Contract Delivery Date is generated and provided to the TLS Vendor in the Award Notification Spreadsheet as the 'Required Delivery Date'.

Requisition Number [Required]

- No dashes are allowed in this field. This field must be exactly 14 characters long and adhere to the below structure:

Position 1 - 6: Ship To DoDAAC

Position 7 - 10: Julian Date (i.e. March 29, 2020 = 0088)

Position 11 - 14: Serial Number (Sequence # of Requisition)

- For the multiple award business model, the Requisition Number is generated and provided to the TLS Vendor in the Award Notification Spreadsheet as the 'Requisition Number'.

Order Date [Required]

- The calendar date on which the TLS Vendor accepted the order, where the customer and TLS Vendor agreed to terms concerning the item identification, Unit Sold Code, Quantity, and price to be delivered to the specified Ship To DoDAAC.
- This field shall be submitted at a fixed length of 10 characters.
- The year must be submitted as a 4-digit year.
- Single digit months and/or days shall be entered with leading zeroes (e.g. 05/04/2020 = May 4, 2020).

DoDAAC – Ordering (Department of Defense Activity Address Code) [Required]

- Six-position alphanumeric that identifies the facility that ordered the product.

DoDAAC – Ship To (Department of Defense Activity Address Code) [Required]

- Six-position alphanumeric that identifies the facility where the product is to be delivered.
- This field CANNOT be left blank – even if it is the same value as “Ordering DoDAAC.”

Manufacturer Name [Required]

- The name of the manufacturer who manufactured the listed item.
- **Note:** This is not the supplier name. It is the manufacturer's name. Home Depot, Grainger, and other distributors/retailers are not valid manufacturers and should not be reported in this field.
- Variable widths (up to 100 characters) are acceptable.
- Consistency must be used when reporting manufacturer names. "ABC CO", "ABC INC" and "ABC" are not consistent. Use one version of each manufacturer's name.
- **Double Quotes [" "] and pipes [|] within the manufacturer name are not acceptable.**

Manufacturer Part Number [Required]

- A series of characters that uniquely identifies the item associated with the line.

- Variable widths (up to 100 characters) and characters (e.g. hyphens [-], slashes [/], etc.) are acceptable.
- **Double Quotes [" "] and pipes [|] are not acceptable.**
- These values are assigned and maintained by the manufacturer of the listed item.

Universal Product Code (UPC) [Optional]

- If the item is registered with the United Code Council, provide the UPC Barcode value in this field.
- Typically this value is 12 digits, but there are several subsets of the EAN/UPC Barcode Symbology:
 - EAN: 13 digits
 - UPC-A: 12 digits
 - EAN-8: 8 digits
 - UPC-E: 8 digits
 - Bookland EAN: 18 digits

National Stock Number (NSN) [Optional]

- The NSN is a series of numbers that the government uses to uniquely identify a specific item with a government specification.
- Thirteen characters (XXXXXXXXXXXXX) in the shown format (where the X's represent numbers) no dashes should be included (define as a text field not numeric).

Short Item Description [Required]

- A series of characters that specifies identifiable characteristics (e.g. item name, size, color, etc.) of the listed item.
- Variable widths (up to 255 characters) and characters (e.g. hyphens [-], slashes [/], etc.) are acceptable.
- Framing values with **Double Quotes [" "]** or the use of pipes [|] within the description text are not acceptable. The exception to this rule is use of " as the abbreviation for inches, and ' as the abbreviation for feet. For example, a two by four by eight piece of lumber may be described as: LUMBER, 2" X 4" X 8'.

Unit Sold [Required]

- The values entered into this field shall represent the authorized government unit-of-issue codes for the listed item (e.g. CS = case, BX = box, EA = each, etc.).
- The values entered into this field **MUST** be exactly two characters.
- Values must be one of the standard codes listed within The DLA Customer Handbook: DOD 4100.39-M, VOL 10, TABLE 53.

Quantity Ordered [Required]

- The number of units, as listed in the "Unit Sold" field, of the item that the customer ordered.
- Negative numbers are prohibited.

Unburdened Unit Price [Required]

- The value entered into this field represents the actual invoice price paid by DLA to the TLS Vendor for the product or incidental service on order. This price is prior to program applicable fees being applied, such as the DLA Troop Support Cost Recovery Rate.
-
- For the multiple award business model, the Unburdened Unit Price is provided to the TLS Vendor in the Award Notification Spreadsheet as the ‘Total DSCP Unit Cost’.

Burdened Unit Price [Required]

- The value entered into this field represents the price to the Troop Support customer for a single unit, as listed in the ‘unit sold’ field. This value is to include program applicable fees such as the DLA Troop Support cost recovery rate.
- This is the amount the Troop Support customer pays per unit.
- For the multiple award business model, the Burdened Unit Price is provided to the TLS Vendor in the Award Notification Spreadsheet as the ‘Burdened Unit Price’.

Unburdened Extended Price [Required]

- The value entered into this field represents the total line product/incidental paid by DLA to the TLS Vendor (quantity delivered times unburdened unit price).
- For the multiple award business model, the Unburdened Extended Price is provided to the TLS Vendor in the Award Notification Spreadsheet as the ‘Total DSCP Extended Cost’.

Burdened Extended Price [Required]

- The value entered into this field represents the total line price to the Troop Support customer (quantity delivered times burdened unit price).
- This value does include the DLA Troop Support cost recovery rate.
- This is the total amount paid by the Troop Support customer.

DoD Special Project Code [Optional]

- The Customer is responsible for identifying any special project codes. If a special project code is supplied by the customer and the TLS Vendor Contractor is reporting it in the “project code” field of the “Summary” data, then it must be entered here for each of the line-items on the monthly reports. Every effort should be made by TLS Vendor Contractor to obtain special project codes from the customer.
- Project codes are used for the purpose of distinguishing requisitions and related documentation and shipments, as well as for the accumulation of intra-Service performance and cost data related to exercises, maneuvers, and other distinct programs, projects, and operations. Category D Project Codes are assigned for use by the Office of the Secretary of Defense/Chief, Joint Chiefs of Staff, while Category C Project Codes are common purpose Project Codes for use by all or specified Components.
- **NOTE:** Do not frame text fields with Double Quotes.

Green Product [Optional]

- The value entered into this field represents if the product is green (environmentally preferable/energy efficient). Valid values are "Y" if it is green, "N" if it's not green and blank if unknown.

Line Item Type [Required]

- Either products or services are sold through the TLS Vendor Contractor program, these must be delineated separately using the codes:

PR denotes Products

SE denotes Services

Business Model [Required]

- This numeric ID value specifies the DLA C&E Business Model associated with the order line transaction and should be one of:
 - 1 – Single Award, TVR 855 Based TLS Vendor contract
 - 2 – TLS Vendor Storefront
 - 3 – Multiple Award (currently supported through BidWiser*)

* NOTE: For the Order Data record layout, BidWiser order lines need not be reported as DLA will already have record of the transaction.

Comments [Optional]

- TLS Vendors are able to use this field to annotate any remarks or comments related to the item that they wish to convey to DLA and C&E.
- Maximum of 100 characters are permitted for this field.

USAGE DATA REPORT FILE SPECIFICATIONS

Usage Data contains orders shipped in the reporting month, and reflects the order at the time the TLS Vendor performs. In the event that an item requires multiple shipments to satisfy the ordered quantity, the TLS Vendor is to report the shipments performed each month.

Submission Time Frame: Usage data provided should reflect orders captured by the TLS Vendor and must be submitted by the 5th of the following month that the order was shipped by the TLS Vendor. For example, an Usage Data Report for line-item level data for the *orders shipped* by TLS Vendor during the month of January would be due to DLA Troop Support by no later than February 5, and should include all orders shipped during the month of January. Should the due date pass without data being received by DLA Troop Support, a member of the DLA Troop Support-C&E IT Staff will contact the contractor to coordinate immediate submission.

Medium/Vehicle of Transfer: Files shall be provided to DLA Troop Support as a pipe (|) delimited text attachment file via Email and sent to a generic email address that will be provided to the Vendor IT POC. The Usage data will be verified for format and sent to the DLA Troop Support for performance analysis.

File Naming Convention: To facilitate the automated processing and identification of submitted data files, each file type has a *specific file naming convention*. Adhering to such conventions will provide for easy storage and organization during the automated loading and archival processes, and identification and retrieval of source data files.

Usage Data – File Naming Convention

Format of filenames: **ORDER.yyyymmdd.Ann.VEN.TXT**

ORDER Fixed text identifying the file as an Order Data file.

yyyy Year of submission.

mm Month of file submission.

dd Last day of the month of the file submission.

A Fixed character 'A'.

nn Two digit, zero filled sequence number, indicates the version of the file. Each time the TLS Vendor resubmits a file in a particular month, this value is incremented by 1. Resubmissions are to be all inclusive of the month, not a subset of lines. The file with the highest sequence number is loaded, all others are discarded.

VEN The TLS Vendor's three-character abbreviation assigned for the MRO Program.

TXT Fixed value of the file's extension, which identifies it as a text file.

Example: ORDER.20191031.A01.ABC.TXT where the TLS Vendor, ABC Company, has the assigned abbreviation of ABC. If you are unsure of your abbreviation, contact your contracting officer.

ORDER DATA GRID

	Data Element	Data Type	Field Length	Sample Value(s)	Comments
1	Data File Record Type Indicator	Text	1 (fixed)	S	Required
2	Vendor Line Identifier (VLID)	Text	9 (fixed)	9959229000 (Vendor generated) BMC00000N2 (BidWiser generated)	Required
3	TLS Vendor Contract Number	Text	13 (fixed)	SPE8E319D0014	Required
4	Delivery Order Number (PIID)	Text	14 (fixed)	SPE8E319F5001	Required
5	Requisition Number	Text	14 (fixed)	N0018191500001	Required
6	Order Date	Date	10 (fixed)	03/20/2019	Required
7	Required Date	Date	10 (fixed)	07/15/2019	Required
8	Ship Date	Date	10 (fixed)	07/06/2019	Required

9	Received Date	Date	10 (fixed)	07/08/2019	Required
10	Cancellation Date	Date	10 (fixed)	07/10/2019	Optional
11	Cancellation Type Code	Text	1 (fixed)	0 – Not Canceled 1 – Partial Cancellation, Customer 2 – Partial Cancellation, Vendor 3 – Full Cancellation, Customer 4 – Full Cancellation, Vendor	Optional
12	DoDAAC – Ordering	Text	6 (fixed)	N12345	Required
13	DoDAAC – Ship To	Text	6 (fixed)	N12345	Required
14	TLS Vendor-Assigned Customer Account Number	Text	V20		Optional
15	Sub-Contractor (Socioeconomic Indicator)	Text	V30	S1;S2;S3	Optional
16	TLS Vendor Contractor Part Number	Text	V32		Required
17	Manufacturer Name	Text	V50	ACME	Required
18	Manufacturer Part Number	Text	V32	1-0023-D	Required
19	Universal Product Code (UPC)	Text	V20	039800036780	Optional
20	National Stock Number (NSN)	Text	13 (fixed)	4210011367617	Optional
21	Short Item Description	Text	V100		Required
22	Unit Sold	Text	2 (fixed)	EA	Required
23	Quantity Ordered	Number	10,2	15	Required
24	Total Quantity Shipped	Number	10,2	10	Required
25	Acquisition Unit Price	Number	13,4	5.60	Required
26	Burdened Unit Price	Number	13,4	6.3755	Required
27	Acquisition Extended Price	Number	13,4	56.00	Required
28	Burdened Extended Price	Number	13,4	63.755	Required
29	Quality Code	Text	1 (fixed)	Y, N	Required
30	DoD Special Project Code	Text	V3	9GY	Optional
31	Green Product	Text	V1	Y, N	Optional
32	Line Item Type	Text	2 (fixed)	PR, SE, BE, AF, FR	Required
33	Business Model	Number	1	KOP, BidWiser, Storefront,	Required
34	TLS Vendor Contractor Specific Field 1	Text	V50		Optional
35	TLS Vendor Contractor Specific Field 2	Text	V50		Optional
36	TLS Vendor Contractor Specific Field 3	Text	V50		Optional
37	TLS Vendor Contractor Specific Field 4	Text	V50		Optional
38	Comments	Text	V100		Optional

DATA ELEMENT DETAILS

Double Quotes [" "] and Pipes [|] are not acceptable within the context of any field. Also, fields cannot be framed with double quotes [" "].

Data Type Indicator [Required]

- Defines data as line-item level data used in the C&E Management Information System and is denoted by S, which identifies the contents as Shipped order lines.

Vendor Line Identifier (VLID) [Required]

- This value is a guaranteed unique line identifier that is used to reconcile an order line against various systems and repositories throughout DLA.
- For the multiple award business model, these values are generated and provided to you in the Award Notification Spreadsheet as the ‘Contractor Control Number’.
- TLS Vendor generated values should adhere to the following format specification:

vv - TLS Vendor 2 digit, zero filled, DLA assigned ID

p - Program ID, 1 digit, fixed value of 5 for MRO

y - Fiscal Year expressed in 1 digit

jjj - Julian day of year the value was accepted by the TLS Vendor

nnn - zero filled, Base32 serial number using only the below values:

{0,1,2,3,4,5,6,7,8,9,B,C,D,E,F,G,H,J,K,L,M,N,Q,R,S,T,U,V,W,X,Y,Z}

Example: If TLS Vendor ID is 99 and an order is accepted on August 17, 2019, and the order contains five lines, then the following values would be appropriate:

9959229000

9959229001

9959229002

9959229003

9959229004

If there is another order on the same day for two lines, keep the sequence moving forward using:

9959229005

9959229006

- The above format allows for up to 32,768 distinct values per day.

TLS Vendor Contract Number [Required]

- Specific format (e.g. SPE8E319D0099), 13-position alpha-numeric (e.g. hyphens [-], slashes [/], spaces [], etc. are **not** acceptable). This contract number identifies the agreement, between the TLS Vendor Contractor and DLA Troop Support against which the order was placed.
- A TLS Vendor Contractor can have multiple contracts but the same contract number cannot be held by more than one Contractor.

Delivery Order Number (PIID) [Required]

- Also known as the PIID (Uniform Procurement Instrument IDentification), this 13-character alphanumeric identifies the order with which a transaction line is associated.
- Each line within the usage data set must associated with a Delivery Order Number.

- Multiple lines can be associated with the same Delivery Order Number, so long as the lines share the same values for:
 - Ordering DoDAAC
 - Ship To DoDAAC
 - Requisition Number
 - Fund Code
 - Signal Code
 - MIPR Number (is applicable)
 - Project Code
- For KOP and Storefront business models this value is to be generated by TLS Vendors and needs to adhere to the following format:

SPE8E3YYFNNNN

SPE8E3 – Fixed value of the MRO Contracting Office DoDAAC.

YY – Fiscal Year in which the order occurred.

F – Fixed value 'F'

NNNN – Sequence Number to be within the TLS Vendor's assigned range. The TLS Vendor's range is determined by DLA. The incrementing Sequence Value within the range is determined by the TLS Vendor.

Example: SPE8E319FJ0001

- For the BidWiser business model, the PIID is generated and provided to the TLS Vendor in the Award Notification Spreadsheet as the 'Order Number'.
- DLA Troop Support assigns the delivery order range that is available to the TLS Vendor. The TLS Vendor maintains these values throughout contract performance.

Requisition Number [Required]

- No dashes are allowed in this field. This field must be exactly 14 characters long and adhere to the below structure:

Position 1 - 6: DODAAC of Ordering location

Position 7 - 10: Julian Date (i.e. March 29, 2020 = 1088)

Position 11 - 14: Serial Number (Sequence # of Requisition)

- For the BidWiser business model, the Requisition Number is generated and provided to the TLS Vendor in the Award Notification Spreadsheet as the 'Requisition Number'.

Order Date [Required]

- The calendar date on which the items are ordered, as identified by the ordering facility.
- This field shall be submitted at a fixed length of 10 characters.
- The year must be submitted as a 4-digit year.
- Single digit months and/or days shall be entered with leading zeroes (e.g. 05/04/2020 = May 4, 2020).

Required Date [Required]

- This is the negotiated calendar date, as identified by the ordering facility, by which the items ordered are required to be received.
- This field shall be submitted at a fixed length of 10 characters.
- The year must be submitted as a 4-digit year.
- Single digit months and/or days shall be entered with leading zeroes (e.g. 05/04/2020 = May 4, 2020).
- For the BidWiser business model, the Required Date is generated and provided to the TLS Vendor in the Award Notification Spreadsheet as the 'Required Delivery Date'.

Ship Date [Required]

- The calendar date on which the listed item(s) was shipped to the ordering facility, as identified by the Vendor.
- This field shall be submitted at a fixed length of 10 characters.
- The year must be submitted as a 4-digit year.
- Single digit months and/or days shall be entered with leading zeroes (e.g. 05/04/2020 = May 4, 2020).

Received Date [Required for MRO Vendor Program]

- The calendar date on which the listed item(s) was received at its point of use, as identified by the customer.
- This field shall be submitted at a fixed length of 10 characters.
- The year must be submitted as a 4-digit year.
- Single digit months and/or days shall be entered with leading zeroes (e.g. 03/04/2020 = March 4, 2020).
- This is not an estimated date, but an actual date that the item(s) were delivered.

Cancellation Date [Optional]

- Calendar Date on which the order line was canceled
- For lines not canceled, this field is blank
- For lines that have a cancellation, the date value must adhere to the following:
 - This field shall be submitted at a fixed length of 10 characters.
 - The year must be submitted as a 4-digit year.
 - Single digit months and/or days shall be entered with leading zeroes (e.g. 03/04/2020 = March 4, 2020).

Cancellation Type Code [Optional]

- For lines that are canceled this field specifies the type of cancellation associated with the items:
 - 0 – Not Canceled
 - 1 – Partial Cancellation, Customer
 - 2 – Partial Cancellation, TLS Vendor

- 3 – Full Cancellation, Customer
- 4 – Full Cancellation, TLS Vendor
- For lines not canceled, this field should contain the value 0.
- For lines that have a cancellation, the date value must adhere to the following:

DoDAAC – Ordering (Department of Defense Activity Address Code) [Required]

- Six-position alphanumeric that identifies the facility that ordered the product.
- The ordering DoDAAC is the first six digits of the requisition number.

DoDAAC – Ship To (Department of Defense Activity Address Code) [Required]

- Six-position alphanumeric that identifies the facility where the product is delivered.
- This field CANNOT be left blank even if it is the same value as “Ordering DoDAAC.”

TLS Vendor Contractor -Assigned Customer Account Number [Required]

- The values to be entered in this field will enable both Vendors and DLA Troop Support personnel to identify lower-level ordering facilities within DoDAACs. They are assigned by the Vendor and represent the ID for that specific ordering location.
- Values entered in this field may be of variable widths (up to 20 characters).
- These values would be established and maintained by the TLS Vendor to identify their customers.
- Examples, as follows: Vendor Assigned # = DoDAAC, Site
 - 465041401 = N12345, Site 1
 - 465041402 = N12345, Site 2
 - 465041403 = N12345, Site 3
 - 530004500 = W41K80, Site 1
 - 530004501 = W41K80, Site 2

Subcontractor (Socioeconomic Indicator) [Required]

- Required if subcontractor is a member of any socioeconomic group as defined in FAR clauses 52.219-1 and 52.212-3.
- Small Business standard per block 10 of solicitation/contract/order for commercial items.
- This field indicates if the source (e.g. distributor, subcontractor, etc.) of the listed item is a small business.
- Data Entry will indicate the type of small business grouping of the source (distributor, subcontractor, etc.) member.
- Usage data submissions will allow for up to five socioeconomic codes to be entered per line for this field. The following restrictions apply:
 - S1 and S2 **cannot** apply together for the same order line.
 - If S7 applies, there **cannot** be any other socioeconomic code entries for that line
 - Codes must be uppercase
 - Codes must be separated by a semicolon. E.g. S1;S3;S5 or S1;S3;S5; are acceptable
- Valid entries in this field shall be as follows:

Value	Definition
S1	Small Business – Not Disadvantaged
S2	Small Disadvantaged Business
S3	Small, Woman-Owned Business
S4	HUBZone Small Business (see FAR 52.219-4 for guidance)
S5	Veterans Owned Small Business
S6	National Industries for the Blind (see FAR 52.208-9 for guidance)
S7	NISH – National Institute for the Severely Disabled (see FAR 52.208-9 for guidance)
S8	Service Disabled Veteran Owned Small Business

**** Note:** If the subcontractor involved is not a socioeconomic group as listed; this field will be left blank.

TLS Vendor Contractor Part Number [Required]

- A series of characters that uniquely identifies each line item.
- Variable widths (up to 32 characters) and characters (e.g. hyphens [-], slashes [/], etc.) are acceptable.
- These values are assigned and maintained by the TLS Vendor.
- **Double Quotes ["] and pipes [|] are not acceptable.**

Manufacturer Name [Required]

- The name of the manufacturer who manufactured the listed item.
- **Note:** This is not the supplier name. It is the manufacturer's name. Home Depot, Grainger, and other distributors/retailers are not valid manufacturers.
- Variable widths (up to 50 characters) are acceptable.
- Consistency must be used when reporting these names. “ABC CO”, “ABC INC” and “ABC” are not consistent. Use 1 name.
- **Double Quotes ["] and pipes [|] are not acceptable.**

Manufacturer Part Number [Required]

- A series of characters that uniquely identifies each line item.
- Variable widths (up to 32 characters) and characters (e.g. hyphens [-], slashes [/], etc.) are acceptable.
- **Double Quotes ["] and pipes [|] are not acceptable.**
- These values are assigned and maintained by the manufacturer of the listed item.

Universal Product Code (UPC) [Optional]

- If the item is registered with the United Code Council, provide the UPC Barcode value in this field.
- Typically this value is 12 digits, but there are several subsets of the EAN/UPC Barcode Symbology:
 - EAN: 13 digits
 - UPC-A: 12 digits
 - EAN-8: 8 digits
 - UPC-E: 8 digits

- Bookland EAN: 18 digits

National Stock Number (NSN) [Optional]

- The NSN is a series of numbers that the government uses to uniquely identify a specific item with a government specification.
- Thirteen characters (XXXXXXXXXXXXX) in the shown format (where the X's represent numbers) no dashes should be included (define as a text field not numeric).
- Some Contractors may and do provide the first four characters only, which designate the Federal Stock Class (FSC).

Short Item Description [Required]

- A series of characters that specifies identifiable characteristics (e.g. item name, size, color, etc.) of the listed item.
- Variable widths (up to 100 characters) and characters (e.g. hyphens [-], slashes [/], etc.) are acceptable.
- Framing values with **Double Quotes** [" "] or the use of pipes [| |] within the description text are not acceptable. The exception to this rule is use of " as the abbreviation for inches, and ' as the abbreviation for feet. For example, a two by four by eight piece of lumber may be described as: LUMBER, 2" X 4" X 8'.

Unit Sold [Required]

- The values entered into this field shall represent the authorized government unit-of-issue codes for the listed item (e.g. CS = case, BX = box, EA = each, etc.).
- The values entered into this field **MUST** be exactly two characters.
- Values must be one of the standard codes listed within The DLA Customer Handbook : DOD 4100.39-M, VOL 10, TABLE 53.

Quantity Ordered [Required]

- The number of units, as listed in the “unit sold” field, of the item that the customer ordered.
- No Negative Numbers.

Quantity Shipped [Required]

- The number of units, as listed in the “unit sold” field, of the item that were shipped.
- No Negative Numbers.

Acquisition Unit Price [Required]

- The value entered into this field represents the actual invoice price paid by the TLS Vendor for the product or incidental service paid to the manufacturer or supplier.
- This value is the TLS Vendor's acquisition cost per unit sold for the item.
- For the BidWiser business model, the Acquisition Unit Price is provided to the TLS Vendor in the Award Notification Spreadsheet as the ‘Total DSCP Unit Cost’.

Burdened Unit Price [Required]

- The value entered into this field represents the price to the Troop Support customer for a single unit, as listed in the ‘unit sold’ field. This value is to include program applicable fees such as the TLS Vendor distribution fee as well as the DLA Troop Support cost recovery rate.
- This is the amount the Troop Support customer pays per unit.
- For the BidWiser business model, the Burdened Unit Price is provided to the TLS Vendor in the Award Notification Spreadsheet as the ‘Burdened Unit Price’.

Total Acquisition Price [Required]

- The value entered into this field represents the total line product/incidental paid by the TLS Vendor to the manufacturer/supplier (quantity delivered times acquisition unit price).
- This value is the TLS Vendor’s total acquisition cost for the line item(s).
- For the BidWiser business model, the Total Acquisition Price is provided to the TLS Vendor in the Award Notification Spreadsheet as the ‘Total DSCP Extended Cost’.

Burdened Extended Price [Required]

- The value entered into this field represents the total line price to the Troop Support customer (quantity delivered times burdened unit price).
- This value does include the DLA Troop Support cost recovery rate.
- This is the total amount paid by the Troop Support customer.

Quality Code [Required]

- This value specifies whether the line was delivered without any quality defects, and is the exact item approved by the customer.
- Valid values are "Y" for yes, and "N" for no.

Special Project Code [Optional]

- The Customer is responsible for identifying any special project codes. If a special project code is supplied by the customer and the TLS Vendor Contractor is reporting it in the “project code” field of the “Summary” data, then it must be entered here for each of the line-items on the monthly reports. Every effort should be made by TLS Vendor Contractor to obtain special project codes from the customer.
- Project codes are used for the purpose of distinguishing requisitions and related documentation and shipments, as well as for the accumulation of intra-Service performance and cost data related to exercises, maneuvers, and other distinct programs, projects, and operations. Category D Project Codes are assigned for use by the Office of the Secretary of Defense/Chief, Joint Chiefs of Staff, while Category C Project Codes are common purpose Project Codes for use by all or specified Components. A complete set of rules and procedures is contained in DOD 4000.25-1-M, Military Standard Requisitioning and Issue Procedures (MILSTRIP), Appendix 2.13.
- **NOTE:** Do not frame text fields with Double Quotes.

Green Product [Optional]

- The value entered into this field represents if the product is green (environmentally preferable/energy efficient). Valid values are "Y" if it is green, "N" if it is not green, and blank if unknown.

Line Item Type [Required]

- Either products or services are sold through the TLS Vendor Contractor program, these must be delineated separately using the codes:

PR denotes Products

SE denotes Services

FR denotes order lines that specify shipping costs paid by the customer for an order – (no product/service amounts should be reported on lines where Line Item Type=FR)

AF denotes items where Air Freight is included within the Acquisition Unit Price

BE denotes Bench Stock (when a TLS Vendor Contractor owns and manages a store and controls the inventory that item is considered Bench Stock)

Business Model [Required]

- This numeric ID value specifies the DLA C&E Business Model associated with the order line transaction and should be one of:
 - 1 – Single Award, TVR 855 Based TLS Vendor contract
 - 2 – TLS Vendor Storefront
 - 3 – BidWiser
 - ?? – Other values may be provided by your Contracting Officer

TLS Vendor Contractor Specified Fields 1 - 4 [Optional]

- These four fields are reserved for the TLS Vendor's use to report and store order specific information.
- Each field will have a maximum of 50 characters of text.

Comments [Optional]

- TLS Vendors are able to use this field to annotate any remarks or comments related to the item that they wish to convey to DLA and C&E.
- Maximum of 100 characters are permitted for this field.
