**RFO PART 12 Justification and Approval
for Other than Full and Open Competition**

- 1. Requiring Activity:** Martin Army Community Hospital, (MACH) Fort Benning, Georgia
- 2. Contracting Activity:** Medical Readiness Contracting Office – West (MRCO-W), Fort Hood Health Contracting Branch, Carl R. Darnall Army Medical Center (CRDAMC), Fort Hood, TX 76544
- 3. Description of Action:** Request to award a new [REDACTED] noncompetitive five-year [REDACTED] Firm-Fixed-Priced (FFP) contract to STERIS Corp., CAGE: 0NWN1, 5960 Heisley Road, Mentor, Ohio 44060-1834. The contract will be fully funded using appropriate Fiscal Year (FY) 26 Operations and Maintenance (O&M) funds under Defense Health Agency (DHA).
- 4. Description of Supplies/Services:** The purpose of this requirement is to provide annual calibration repair and preventive maintenance service support for Government-owned STERIS machines and equipment at MACH, Fort Benning, Georgia.

Equipment Description	Serial Number	Quantity of Required Annual Preventative Maintenance
IW PRO SI 208-220VAC 3PH 60HZ	05222314605	2
IW PRO SI 208-220VAC 3PH 60HZ	08226840606	2
V-PRO MAX 2 STERILIZER 208-230V	032622385	2
V-PRO MAX 2 STERILIZER 208-230V	032832370	2
AMSCO 2532 WASHER DISINFECTOR	3616025012	2
AMSCO 400 20X20X38 PVAC	032172524	4

Period	Period of Performance (POP)	Estimated Value
Base	1 June 2026 through 31 May 2027	[REDACTED]
Option 1	1 June 2027 through 31 May 2028	[REDACTED]
Option 2	1 June 2028 through 31 May 2029	[REDACTED]
Option 3	1 June 2029 through 31 May 2030	[REDACTED]
Option 4	1 June 2030 through 31 May 2031	[REDACTED]

FAR 52.217-8	1 June 2031 through 30 November 2031				

5. Authority Cited: Title 41 United States Code (U.S.C.) §1901 as implemented in RFO FAR 12.102(b), restricting competition for acquisitions valued over the Simplified Acquisition Threshold.

6. Reason for Authority Cited:

- a. Background: MACH at Fort Benning, Georgia owns STERIS-manufactured sterilizer machines that require continued, annual calibration repair and preventive maintenance service support.
- b. Alternatives: Alternatives considered were the use of in-house Government resources or the extension of other STERIS contracts. However, currently, there are no STERIS contracts in place to support the Government-owned STERIS sterilizer equipment requiring maintenance and service at MACH. Therefore, a new contract needs to be awarded. In addition, MACH does not have the appropriate and specialized personnel to support the requirements for the sterilizer maintenance and support. Lastly, only STERIS provides the Original Equipment Manufacturer (OEM) technicians who are trained and certified to perform scheduled and unscheduled maintenance on their equipment. STERIS provided a sole source letter which indicates that STERIS is the sole factory-authorized supplier of parts and services covered under their equipment. They are the only vendor that can provide the calibration repair and preventive maintenance checks on Steris equipment; third-party providers are not authorized.
- c. Impact if not approved: Not approving the certified STERIS services would negatively impact the sterilization practices that are important in a hospital setting. This equipment is vital and the potential threat of safety, if not properly maintained, mandates that the equipment be maintained by the manufacturer or their approved maintenance providers, as sterilization is critical to patient safety, primarily by preventing the transmission of infectious pathogens during medical procedures and eliminating Healthcare-Associated Infections (HAIs). Failure to utilize the proprietary STERIS diagnostic software would result in the inability to identify equipment operating parameters, device failures, inability to analyze product performance, and the inability to accurately calibrate the equipment.

7. Efforts to Obtain Competition: The Contracting Officer has published the notices required by FAR 5.101 and any bids or proposals received shall be considered.

- a. Effective competition: Competition is not anticipated due to the proprietary nature of the Government-owned STERIS equipment.

- b. Subcontracting competition: In accordance with FAR 19.109, a small business subcontracting plan is not required.

8. Actions to Increase Competition: Since the Government-owned equipment can only be maintained and serviced by STERIS as the authorized OEM company, no actions can be taken to increase competition until other companies are authorized or the Government replaces the current sterilizers and washers. The Government will continue to monitor the market for new entrants or technological changes that might break the proprietary "closed system" model. Prior to the exercising of each option period, the Contracting Officer will conduct market research to determine if any compatible, alternative services have become available. The findings will be documented in the contract file.

9. Market Research: Market research was conducted in April 2026 in accordance with FAR Part 10. The market research confirmed these services are not available from wholesale supply sources or mandatory sources of supply (e.g., General Services Administration, Defense Logistics Agency (DLA), Department of Veteran Affairs and military control points).

Key market research techniques and findings include:

- On 2 April 2026, the Contract Specialist reviewed Federal Supply Schedules, Government-wide acquisition contracts, multi-agency contracts, and any other procurement instruments intended for use by multiple agencies, including blanket purchase agreements (BPAs) under Federal Supply Schedule contracts (e.g. Federal Strategic Sourcing Initiative (FSSI) agreements), however no maintenance services for STERIS equipment are available.
- On 2 April 2026, the Contract Specialist reviewed the Procurement List maintained by the Committee for Purchase from People Who Are Blind or Severely Disabled under the Ability One Program, Federal Prison Industries, and Enterprise Software Agreements (incl CHESS), however no maintenance services for STERIS equipment are available.
- On 6 April 2026, the Contract Specialist reviewed the DLA Medical Master Catalog and Electronic Catalog (ECAT) platforms, and although STERIS products are currently available for sterilization and washing, no maintenance services for STERIS equipment are offered.
- A Sources Sought was posted to SAM.gov from 2-8 April 2026 by the Contract Specialist. Three (3) companies responded to the Sources Sought, and two (2) provided their capability statement. However, in accordance with the Sources Sought, none of the companies that responded are authorized to provide the services on STERIS-manufactured equipment or have the requisite knowledge to perform the required maintenance services due to the proprietary nature of the

equipment. Multiple small businesses responded to the Sources Sought; however, they do not have access to the patented, proprietary rights to the equipment software and OEM replacement parts to complete the required services on the Government-owned STERIS equipment.

Market research concluded that no other source, including any small business, could provide the proprietary services required for the Government-owned STERIS equipment. The market research has determined that due to the proprietary nature of the existing equipment, only one vendor, STERIS Corp., can meet the Government's requirements.

10. Interested Sources: No other sources have been identified that can meet the Government's requirement. As a result of the market research conducted, it is confirmed that only the OEM, STERIS Corp., can provide the required proprietary services.

11. Other Facts:

a. Procurement history. The requiring activity never purchased a service maintenance contract for the Government-owned STERIS equipment at MACH.

b. Other facts. Not Applicable.

12. Technical Certification: I certify that the supporting data under my cognizance, which are included in the justification, are accurate and complete to the best of my knowledge and belief.

[REDACTED]
Health System Specialist

13. Requirements Certification: I certify that the supporting data under my cognizance, which are included in the justification, are accurate and complete to the best of my knowledge and belief.

[REDACTED]
Health System Specialist

14. Fair and Reasonable Cost Determination: I hereby determine that the anticipated price/cost to the Government for this contract action will be fair and reasonable. This determination will be made using fair and reasonable price analysis.
