

ABERDEEN PROVING GROUND ADVANCED PLANNING BRIEFING TO INDUSTRY

**U.S. ARMY TEST AND EVALUATION COMMAND
FY26 STRATEGIC INITIATIVES/FUTURE CONCEPTS**

**MG PATRICK GAYDON
COMMANDING GENERAL
22 APRIL 2026**

"The forecast data is for planning purposes, does not represent a pre-solicitation synopsis, does not constitute an invitation for bid or request for proposal, and is not a commitment by the government to purchase the desired products and services."

ATEC OVERVIEW

Mission: ATEC performs test and evaluation, while in direct support of U.S. Army Transformation and Training Command, to inform Army senior leaders, in order to provide Soldiers with the capabilities to fight and win our Nation's wars.

Vision: To be a team of highly skilled test and evaluation professionals focused on informing equipping decisions for today's and tomorrow's warfighter.

WHAT WE DO

Through comprehensive test and evaluation, ATEC helps the Army ensure Soldiers receive safe, effective, suitable, and survivable equipment to maintain a competitive edge in battle.

THE ATEC ENTERPRISE

UNCLASSIFIED

HOW WE ARE UNIQUE

Our Organization

- Direct Reporting Unit to Vice Chief of Staff of the Army
- Only DoW test agency to unify developmental and operational testing
- Over 2,300 tests annually

Our Assets

- Responsible for 5.5M acres, 1/3 of Army's land mass
- 21 locations across 15 states
- Three airfields and the Army's only nuclear reactor
- Senior Command oversight for WSMR, YPG, and DPG

Our People

- 7,200+ test officers, engineers, scientists, researchers, evaluators

Our Value

- Provide unbiased information to reduce risk in acquisition
- Low cost, high ROI

ATEC COMMAND OPTIMIZATION

	 Organization	 Safety Releases	 Range Scheduling	 Test Planning	 Test Data	 Test Reporting
 Industrial Age	▪ Duplicative, sequential operational test and evaluation activities and reporting	▪ Inflexible time- and event-limited Safety Releases (SRs) only	▪ No centralized scheduling system to provide real time transparency	▪ Manual, time-intensive test plan writing	▪ Test data limited to ATEC-executed events ▪ Manual shipping of data on hard drives	▪ ATEC Evaluation Report provided too late to influence program/engineering decisions
						
 Information Age	▪ Consolidated Army Evaluation Center and Operational Test command into Operational Evaluation Command (OEC) ▪ Streamlines processes, reduce redundant reporting, and delivers timely, actionable data faster	▪ Earlier program engagement ▪ Standardized templates ▪ Reuse of hazard analyses ▪ Delegated approval authority ▪ Extended or no expiration SRs	▪ YPG Range Test Scheduling System used for near-term and long-term range forecasting planning ▪ Land space, airspace, equipment and personnel ▪ Modernization effort under way to expand use across ATEC enterprise	▪ Ghostwriter application using AI to generate draft detailed test plans by analyzing legacy test documentation ▪ Modeling & simulation / instrumentation accreditation plans and reports using AI Flow	▪ Expanding use of vendors, training, experiment, M&S, and S&T data to reduce independent government testing ▪ Implementing ATEC Data Mesh to improve accessibility, transport, consistency, and trust	▪ Running estimates provide real-time insights ▪ Emerging Results Briefs after 7 days from test ▪ ATEC Evaluation Reports within 60 days ▪ Operational test and evaluation reports consolidated (OEC)

UNCLASSIFIED

ATEC COMMITMENT TO ARMY TRANSFORMATION

▪ The Army's Changing Landscape

- The Army is rapidly transforming to meet evolving threats and technological advancements, with a focus on continuous modernization and integrating commercial off-the-shelf technologies
- This transformation demands agility, speed, and collaboration to bring solutions to the field faster and more effectively

▪ ATEC's Role in Transformation

- ATEC recognizes the need to evolve alongside the Army, ensuring testing and evaluation processes align with modern demands
- ATEC is committed to providing faster feedback loops, data-driven insights, and innovative solutions to help make informed decisions
- ATEC's strategy directly supports Army industry partners by providing access to world-class ranges for rapid R&D, prototyping, and experimentation

UNCLASSIFIED

WHY USE ATEC RANGES?

Unique, State-of-the-Art Environments

- Access to world-class, one-of-a-kind test ranges, facilities and capabilities not available anywhere else outside ATEC
- Specialized environments for rapid prototyping, system components, and full-scale experiments under realistic operational conditions

Support for Innovation and Rapid Iteration

- Opportunities to conduct experimentation and data-driven testing at all stages of development, from early prototypes to near-production models
- Real-time feedback and early integration with Army decision-makers to inform design and development

Extensive Industry and Government Partnerships

- Collaboration opportunities with key defense organizations to test the latest technologies in multi-domain operations
- Increased visibility and opportunities for networking with key defense stakeholders and potential customers

Cost-Effective Testing Solutions

- Competitive, affordable rates tailored to the needs of private industry, ensuring cost-effective access to advanced testing
- Customizable pricing models and collaborative support to help meet industry partners' budget and project constraints

UNCLASSIFIED

DRIVING INDUSTRY COLLABORATION

Streamlined Access

- **Revamped Internal Processes:** Industry partners receive new prioritization and ATEC focus on alignment of access requests to test centers with available capacity.
- **Empowered Test Center Commanders:** Commanders have new authorities to accommodate industry partner requests at their own discretion.
- **Flexible Range Utilization:** ATEC will work with partners to ensure tailored testing solutions that fit their budget and timeline, enabling quicker access to testing environments.

Enhanced Visibility

- **Industry Partner Access:** ATEC has published access opportunities on SAM.gov, making it easier for industry partners to find testing solutions.
- **Public Engagement:** Highlighting industry partners opportunities at AUSA Global Force 2026 and other upcoming events.
- **Industry Days:** Test centers hosting local on-site events to educate about ATEC capabilities for both traditional and non-traditional customers.

ARMY OPEN SOLICITATION

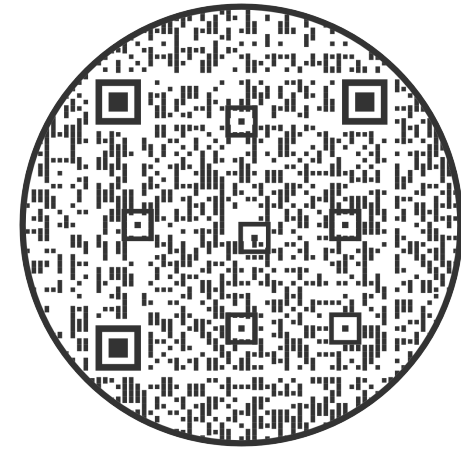

- The Army Open Solicitation (AOS) aims to provide the Army with access to innovative solutions enabling the Army to evolve quickly and maintain a competitive edge over adversaries.
- This provides a permanent, open doorway for industry to propose innovative commercial products, advanced prototypes, and diverse research proposals that close critical capability gaps.
- Interested vendors are encouraged to email their ATEC Active Capability Gap solution briefs to ACGSubmission@army.mil and CC usarmy.apg.acc.mbx.army-open-solicitation@army.mil.
- For more information on AOS, visit: <https://sam.gov/opp/cb79d6adaa3a4ae5b175865b2e803365/view>
