

NPS IQIQ Midwest Region
Solicitation Number: 140P2026R0039

	Question:		Answer:
1	Factor 1 Specialized Experience & Technical Competence: Please confirm 5-10 projects is included in Section F of the SF330. If we expand on Factor 1 in section H—it is part of the 40 Page Section H limit.		Yes
2	Factor 2 Past Performance: Are these to be additional projects for Section H? How many projects should we include? Do these have to be the same projects as listed in Section F, or additional projects?		Typically they are the same.
3	Factor 2 Past Performance: Do the write-ups for the selected Projects go in Section H and part of the 40 page limit? Or are they the same projects as listed in Section F?		Same projects listed in Section F
4	Factor 2 Past Performance: If we have CPARS evaluations for the selected Projects in this factor, do we still need to complete the Past Performance Questionnaire for each? Or just attach our CPARS evaluations in an Appendix? Do we need a CPARS/PPQ evaluation for all the project in Section F? Or just the highlighted projects in Section H?		PPQ's should be presented for each project. The Contracting Officer will obtain CPAR's through the system. Section F and Section H should represent the same projects.

5	Are our subconsultants/subcontractors required to provide five (5) Sec. F project summary sheets, as well?		No, this information should pertain to just the Prime.
6	Is there a preferred font you would like us to respond in?		no particular font is required
7	In Factor 4 - What is the secondary geographic area for coverage?		Nationwide, at times there may be projects outside the stated coverage but rare.
8	Can you confirm whether this is a Small Business set aside or it is not?		Yes, this is a Small business Set-Aside
9	Please confirm the term "completed" in Factor 2 refers to a Task Order completion vs completed construction?		the term refers to your completed contract
10	Can you please clarify if the intent is for each CPAR/PPQ to follow its associated project?		Firms do not need to submit CPAR's, the CO will pull that information, PPQ's should be submitted for each project identified.
11	Regarding the required disciplines, can you please clarify which aspect of environmental engineering? (natural resource, hazardous materials, etc.)		Due to the nature of NPS projects please consider all aspects; water and wastewater management, air pollution, waste management, EA's, EIS etc. Firms that demonstrate more experience with all aspects of EE will be rated higher.
12	Can you please confirm if Michigan, Iowa, and Indiana should be included within the traditional MWR states?		Yes,

13	Regarding the bolded note on page 10, can you please confirm it is preferred to have Factor 1b (Technical Competence and Quality Control) in Section H? And that Factor 1a (Specialized Experience) would remain in section F? Given these are specifically scored we want to be sure to place these correctly for the ease of the reviewers.		Yes, Factor 1 a - Section F, 1B shall be applied to Section H
14	Regarding the org chart of 11x17 – will that count as 1,2 or 4 pages?		1 page
15	Can you please clarify if the Technical Evaluation Factors should be addressed in SF330 Section H?		Projects are to be listed in Section F. Other technical evaluation factors are applied to Section H, Past performance shall apply to Section F
16	Can you please confirm branded SF330's (color modifications and font changes) are not compliant for this response?		Please clarify?
17	There is a stated page limit of 40 pages for Section H and no more than 3 pages for each Section E Resume. Is there a page limit for Section F Projects?		No, just need to comply to the overall 40 page count

18	Solicitation page 10 of 14 states <i>“For any project not confirmed in CPARS, firms shall use the standardized Excel spreadsheet provided in Attachment #1 to submit supporting documentation.”</i> Attachment #1 is the Standard Form SF330 instructions and forms. Attachment #2 is a PPQ Word document. This is a two-part question. 1) Please clarify if we can submit a PPQ in the event a CPARS is not available. 2) Please clarify what Excel spreadsheet you are referring to?		Yes, please submit a PPQ if a CPAR is not available. Excel spreadsheet Attachment 1 included with this amendment.
19	Regarding the Excel spreadsheet referenced in the solicitation as Attachment #1 (page 10 of 14), is this spreadsheet to be included as part of the 40 page count limit in Section H, or is this Excel spreadsheet included as an Appendix as supporting documentation and not included in the 40 page count limitation?		Spreadsheet entry will not count in the 40 page limit.

20	Factor 2 – Past Performance on page 10 of 14 is broken down by two factors: a. Successful performance on similar projects that are recent and relevant. Is this successful past performance evaluated based on the data provided in the Excel spreadsheet contained in Attachment #1? b. Successful past performance based on the projects presented in Section F? Is this second factor of successful past performance evaluated based on the data provided in only projects presented in Section F?		Successful past performance will be a combination of CPAR's and PPQ's and associated with Projects listed in Section F. Projects that are identified in Attachment 1 will also be used to evaluate past performance.
21	Is it NPS' expectation that offerors propose only <u>one resume per the 10 key required disciplines</u>? Would NPS allow more than one resume for a key personnel discipline(s) be provided, if we stay within the overall 30-page limit?		Yes
22	Are other disciplines allowed to be submitted above the 10 required disciplines listed in the solicitation (i.e., project manager) and will they be reviewed and scored?		No

23	Factor 4 – Knowledge of the Geographic Locations on page 11 of 14 of the solicitation states: “<i>These offices must be strategically positioned to ensure efficient coverage and responsiveness within both the designated primary and secondary geographic areas .</i>” Primary coverage areas include North Dakota, South Dakota, Nebraska, Kansas, Arkansas, Missouri, Minnesota, Wisconsin, Illinois, and Ohio. Please advise the secondary geographic areas referenced?		Primary coverage also includes Indiana, Iowa and Michigan. Secondary coverage is Nationwide but it will be rare to support a project outside of the primary coverage.
24	Factor 5 – Professional Qualifications on page 11 of 14 of the solicitation states: “<i>In accordance with FAR 36.6, firms shall provide verifiable documentation demonstrating that their key personnel and support staff hold valid professional registrations (licenses), advanced degrees, and recognized credentials or designations from established industry professional organizations.</i>” Please advise what the government determines as verifiable documentation, i.e., copies of advanced degrees and copies of professional licenses, and if these copies of verifiable documents are included as an Appendix to the SF330 and not part of the Section H 40 page limit?		These credentials shall be referenced in resumes and be made available upon request.

25	Technical Competence and Quality Control: Page 10 of 14 states: <i>“Please note: Information provided under Factor 1 is submitted as part of Section H “Additional Information” of the SF-330 and must comply with the overall 40 page maximum limitation (including graphs, tables, and charts).”</i> What from Factor 1 do you want to see and is being evaluated in Section H as opposed to what is being provided and evaluated in Section F?		Factor 1 Section F shall relate to 5-10 projects. Section H is associated with Factor 1b and Factor 3
----	--	--	---

26	Are we able to use our own, customized SF330 Form for our reply to this solicitation (if it meets the specific requirements for all the information requested by NPS)?		Firms can use their own SF 330s but they must comply with the SF 330 Rev 7/2021 form from the GSA website.
27	The RFQ (attached) indicates that projects submitted must be “completed” at the time of submission. Could you please clarify whether “completed” refers to the completion of professional design services, or if construction must also be fully complete for each project at the time of submission?		Completion of design services.

28	How do we add additional subcontractors in SF330 Part C? The form only allows a. – f. We'd need to add g. – j. to meet NPS requirements. (NPS requires 10 disciplines for Key Personnel include, registered professional architects and engineers in each of the following areas: architecture, landscape architecture, civil, electrical, environmental, fire protection, geotechnical, mechanical, sanitary, and structural.)		Offerors may tailor SF 330's to add additional rows.
29	how would we add 2 additional pages to the Section E. Resumes? The attached form's format is locked and only allows for limited text and field entries for projects A. – E. Adding pertinent details to each resume is not possible, given the limit on characters.		Offerors may use their own forms as long as they comply with the SF 330's Rev7/2021.
30	Is there a page limit on Section F. EXAMPLE PROJECTS WHICH BEST ILLUSTRATE PROPOSED TEAM'S QUALIFICATIONS FOR THIS PROJECT?		Page limit applies to the overall submission.
31	Is there any expectation that offerors already possess active licenses in all primary coverage states at time of the SF330 submission?		No
32	Is it expected that the PPQ Template (provided) is completed for ALL project sheets, regardless of whether a CPARs (or alternative PPQ) evaluation exists for those projects?		If a CPAR's entry for the project has been completed a PPQ is not necessary.

33	Should offerors refrain from including CPARs reports entirely (including as appendices), even when available?		NPS will pull CPARS reports for those that submit packages
34	Example: If our Section F – Project 1 is for a federal client and we have a CPARs – should the PPQ template still be sent to this client and filled out for the project? If Section F – Project 2 has a completed PPQ that we can attach (but no CPARs) would the Government accept the existing PPQ that we have for the project, or should only the PPQ template provided be used?		yes and yes
35	Please clarify the Set-Aside Status and requirements. We understand that, as a Total Small Business Set Aside for NAICS 541310 - Architectural Services, the Prime Contractor/Architect must be SBA and cannot exceed the size standard of \$12.5 million, and all first-tier subcontractors must hold the same small business status under their respective NAICS and cannot exceed the applicable size standard. For instance, our structural engineer subcontractor must be a small business under NAICS 541330 - Engineering Services and cannot exceed the size standard of \$22.5 million. Is our understanding correct?		This is being solicited under NAICS 541330. The size standard is \$26M.
36	Should we use the SF330-21_Section_H file (Extra Section H page) to format additional pages in Section H, or can we use a standard 8.5" x 11" paper format consistent with the requirements outlined at Item D in the RFQ?		Stanard 8.5X11 is acceptable

37	Please clarify the Additional Submission Instructions in Item E in the RFQ. Should the caption ("RELEASABLE TO GOVERNMENT AGENCIES FOR EVALUATION PURPOSES ONLY") be marked on each page of the SF330 submission? Or in Section H? Or in our email submitting the qualification package? Or other?		"RELEASABLE TO GOVERNMENT AGENCIES FOR EVALUATION PURPOSES ONLY" can be stated on page 1 of the SF 330"
38	Does the 40 page limit apply to the entire submittal overall or only to Section H?		Section H only
39	Professional Registrations and Credentials - provide verifiable? documentation demonstrating that their key personnel and support staff hold valid professional registrations (licenses), advanced degrees, and recognized credentials or designations from established industry professional organizations. Is this in addition to the information provided on the SF330 Part E resumes? Are we to include copies of licenses?		Yes, this is in additional and should be provided.
40	Organizational Structure (up to 11x17): Firms shall submit an organizational chart that clearly identifies key personnel, including their names, disciplines, roles and responsibilities, technical expertise, and the office locations where they are based. This chart should delineate the internal structure and lines of authority, ensuring that evaluators understand how the firm or partnership will support contract performance. Are we to add an org chart here in addition to the Org Chart requirement in the SF 330 Section D?		Org charts are typically referenced throughout the document but shall be identified clearly in Section D

41	Licensing and Certification Matrix: Firms must include a matrix that clearly communicates which individuals and disciplines are part of the primary firm or partnership. This matrix must list all the states or jurisdictions in which the personnel hold a professional license or certification. Additionally, each personnel resume shall be limited to a maximum of three (3) pages. Are we to add formal resumes here in addition to the SF330 Part E? Or are the part E resumes limited to 3 pages?		No formal resumes, Section E is the resume format.
42	Can National Park Service confirm that this is a re-compete for the next generation of this IDIQ contract vehicle, and if so, please share details as to the incumbent firms who were awarded this contract previously.		yes this is a next generation, please see SAM.Gov for further information.
43	In light of RFI responses uploaded to SAM.gov, and more specifically, Question No. 7 to which the response was that the secondary area of coverage was nationwide, can National Park Service offer insight into this and other regional contracts as being the main contract vehicles (set-aside) through which the agency will pursue the need for A/E services? Also, if such is the case, is it National Park Service's intention to forego any recompile(s) for the next generations of small pool/set-aside nationwide IDIQs?		This is a recompile for the mid-west region only. All other IDIQs will be separate from this.

44	If a firm is successful in being selected for the Midwest Region A/E IDIQ, will that preclude the set-aside prime from being able to compete for other similar regional IDIQs, especially knowing that the secondary area of coverage has been noted as nationwide? Or will National Park Service accept a Midwest Region A/E contractor to pursue priming another one of the agency's regional A/E IDIQs?		no this will not preclude the contractor from pursuing other AE IDIQs with NPS
45	In re-reading the solicitation and the current slate of RFIs addressed, we understand that the National Park Service wants each respondent to submit in the proposal both Attachment 1, as it has been referenced and provided, as well as a PPQ for each Section F included in the respondent's SF330 Part I. If this is correct, can the National Park Service offer additional clarification as it relates to the provision of PPQs:		Section F and Attachment 1 projects do not have to be the same projects. PPQ's can/should be submitted for any/all projects submitted.
46	Is each page of the PPQs considered part of the overall 40-page limit set by the National Park Service? Or will the National Park Service allow those PPQs to stand alone and separate from the SF330 components that are to not exceed 40 pages altogether?		No, only Sectoin H has a page limitCorr
47	Will the National Park Service accept PPQs that we have on file from previous submissions for projects that meet the maximum age requirements, especially if those project contacts have since left their respective federal agency within the past year in light of all the various staff changes across various multiple agencies?		yes these will be acceptable

48	If no to RFI 4b above, are the PPQs to be submitted directly to the contracting officer from the evaluating project contact on behalf of the responding firm with the evaluation having occurred within an established timeframe before the close of this solicitation?		n/a
49	This question relates to the government's response on 27 March 2026 to Question #4 and Question #18 as these two responses seem to contradict one another. Can the government confirm if we also need to provide a PPQ if a CPARs is available? Will the CPARs be compliant to show past performance?		Please submit PPQs for all projects that do not have CPARS.
50	Can we submit a previously completed PPQ from a prior proposal?		Yes
51	Can the government please advise if we submit a PPQ to the contracting officer, but the contracting officer does not return the completed PPQ to NPS (Stormy Gallagher) before the submittal requirement date of 11 May 2026, how will the government address this PPQ not being returned on time?		This will not be held against the firm
52	This question relates to the government's response on 27 March 2026 to Question #17. This is a two-part question. 1.) Can the government confirm there is no page restriction for projects included in Section F? 2.) Can the government confirm if we include additional project information from Section F in Section H, we may do so but must comply with the 40-page count limit identified for Section H?		Correct, page count limit (40) applies to Section H only.

53	Are the projects listed in Attachment 1 Excel file to include only the projects we include in Section F? Or, does the government want to see additional projects, beyond those listed in Section F, in Attachment 1 Excel file to determine successful past performance?		Additional projects can be listed in the excel spreadsheet, the projects do not have to be listed twice, this answer takes precedent over any previous answer.
54	To help us better understand your needs and areas of interest, are there particular project types or planned initiatives this IDIQ is expected to focus on?		Most services to be performed under these contracts will generally be specializing in contemporary and/or historic architecture.
55	We don't believe there is an overall page limit (other than Section H is 40 pages) correct?		Correct, page count limit (40) applies to Section H only.
56	Section E – (we know each resume is 3 pages max) – but there is no page limitation on Section E, correct?		Correct, page count limit (40) applies to Section H only.
57	Section F – is there a page limit?		No, page count limit (40) applies to Section H only.
58	Can you please clarify the Q/A response to item #21 – that the “yes” was regarding the 2nd portion of the question – multiple resumes are allowed?		yes, you are correct
59	Regarding Q/A #16, we are trying to understand if we can import the Word/PDF SF330 files into our graphic software (Adobe InDesign) and modify colors, fonts, etc while maintaining all the data/cells as required. Since the submission will be a combined pdf – is that acceptable?		Yes, this is acceptable

60	Regarding the PPQ as explained in the addendum, we read this that we are to submit the completed PPQ with our submittal, in which case the “return to” information would need to be back to our firm (vs directly to you) in order to include it. Can you confirm this intent?		No, the PPQ should be submitted to the CO directly.
61	Can the government confirm referencing professional registrations including the active license #s on the SF330 Part E resumes will be compliant, and attaching copies of licenses in our proposal is not necessary. Firms will make copies of licenses available upon request by the government.		yes, this is correct.
62	Please clarify the Set-Aside Status and requirements. We understand that, as a Total Small Business Set Aside for NAICS 541310 - Architectural Services, the Prime Contractor/Architect must be SBA and cannot exceed the size standard of \$12.5 million, and all first-tier subcontractors must hold the same small business status under their respective NAICS and cannot exceed the applicable size standard. For instance, our structural engineer subcontractor must be a small business under NAICS 541330 - Engineering Services and cannot exceed the size standard of \$22.5 million. Is our understanding correct?		This procurement is being solicited as a Total Small Business Set-aside. The NAICS Code for these services is 541330 Engineering Services and the SBA size standard is \$26 million.

63	I noted in the updated Q&A for the Midwest A&E IDIQ post ed today that the NAICS code for the opportunity has changed (Question 35). Would you please confirm whether the NAICS code for the solicitation is 541310 or 541330?		This procurement is being solicited as a Total Small Business Set-aside. The NAICS Code for these services is 541330 Engineering Services and the SBA size standard is \$26 million.
64	Regarding Q/A responses 35, 62 and 63 refers to the NAICS code as 541330 (Engineering), however the Sources Sought and original solicitation was NAICS code 54310 (Architecture). Can you confirm that the response intended to relate to engineering subconsultants ability to claim work as SBA (i.e. within engineering limits of \$26M) on the team and that a prime as an Architectural NAICS code of 54310 is still able to submit as prime on this solicitation? Or are these responses to indicate that only NAICS code 541330 (engineering) are able to submit as prime? Or are the responses to 35,62,63 intending that primes of either 54310 (Arch) or 54330 (eng) may serve as prime on this solicitation?		After conducting MR the Contracting Officer changes the NAICS to 541330. Prime Contractors shall have 541330 included in their SAM profile when submitting as an offeror.
65	Regarding the response to Q/A #59, it was determined acceptable to modify the SF330 while maintaining all the data/cells as required. Would it be acceptable to include headshot photos within Section E resumes and clarifying borders/footers to better delineate portions, while maintaining all required data/cells?		Headshot photos are not required, please use your space for informational purposes
66	Is there any leeway on the small business set aside of 12.5 million for this ID IQ project		No, this is only a Small Business set-aside

67	Under the required services it notes "incidental services, including removal of building finishes, mock up, destructive testing..." This work would be better suited to a General Contractor (GC), but including a GC is not listed in the "required disciplines." Should teams include a GC, and if a GC is included, will they be precluded from bidding on the projects?		No GC is required to be listed, this will be project specific.
68	This question relates to the response provided by the government for question #64 which advised prime contractors shall have 541330 included in their SAM profile when submitting as an offeror. Does this now require an update to Attachment 1 "Relevance to NAICS 541310" column? Should this relevance now be aligned with NAICS 541330 or both 541330 and 541310?		Prime Contractors shall have 541330 included in their SAM profile when submitting as an offeror.
69	Q60 responds with the direction that PPQs are to be submitted directly to the CO (we are presuming this means the National Park Service CO for this opportunity).		Yes, please have PPQ submitted to the CO for this requirement
70	Q51 responds to say that any unreceived PPQs by the National Park Service by the time of the close for submitting a response for this solicitation will not be "held against the firm."		correct
71	Q34 responds to say that an offeror may use an existing PPQ, whether it follows the currently provided template for this solicitation or a previous version.		correct

72	are we correct to understand that the National Park Service wants PPQs for each Section F addressed in the offeror's SF330 to have a current and completed PPQ that uses the template provided for this solicitation		you may have current or existing.
73	Is each PPQ to be submitted from its reviewer to National Park Service directly with reference as to the offeror on whose behalf it is being provided in relation to this solicitation?		PPQs shall be submitted to the CO for this requirement
74	is the National Park Service looking to have all PPQs included with the offeror's complete submission, and will accept past PPQs — even if the format for those were from a previous version — understanding that the relevant reviewing party is either no longer with that client/agency or unavailable, and in some instances due to those who have exited their federal roles within the past year		PPQs shall be submitted to the CO for this requirement
75	Please confirm that the overall 40-page limit is ONLY for the Section H components of the SF330, and not any other components of the SF330. Furthermore, that the overall and fully assembled response is not bound to be no more than 40 pages maximum.		Page count limit (40) applies to Section H only.
76	On SAM.gov, the solicitation is showing as closing May 05, 2026 12:00 PM MDT. However, the SAM.gov record version of this solicitation dated 3/27 shows an extension of the close to May 11. Yet, subsequent versions revert back to the original May 5 close		Closing date is May 11, 2026

77	What is the deadline that our clients are supposed to send their PPQs by? The current template lists a 2025 date.		11-May-26
78	Section H has a page limit of 40 pages. We would like to know is there is an overall page limit for the entire proposal?		no there is not
79	In previous responses to questions, it was stated that "Section F and Section H should represent the same projects." Please clarify if Section H can describe experience with projects not included in Section F.		Typically they are the same
80	We have CPARS for all projects we are submitting in Section F. Do we still need to submit PPQs in addition to this?		no
81	The environmental services requested appear to be more in line with an environmental scientist, not an environmental engineer. Is the resume requirement still for a licensed PE environmental engineer, or would an environmental scientist with appropriate certifications suffice for this role?		Environmental engineer
82	can the government confirm that including license #s, registrations, and other credentials on the SF330 Part E Resumes is sufficient, and we do NOT need to include copies of these anywhere else in the proposal?"		correct

83	please CONFIRM whether the Prime Contractor can submit as an offeror with ONLY NAICS 541310 code (not NAICS 541330) on their SAM profile as long as a subconsultant Engineer meets the size standard for NAICS 541330?		After consideration of concerns for the NAICS change, the contracting officer has concluded that the original NAICS of 541310 will be the needed code for your SAM profile.
84	The answers provided by the government to question #32 and question #49 seem to contradict each other. Can the government please confirm that if a CPARs is available, a PPQ is not required?		If CPARs is available then PPQ is not required
85	What is the purpose for the change in the NAICS code? The change in code and new requirement that Prime Contractors must have 541330 included on their SAM profile precludes small architecture firms, which most often only include NAICS 541310 and do not include engineering services, from being able to submit as an offeror on this contract. Our understanding is that this contract is focused on professional architectural services based on the response to Q54 that "most services to be performed under these contracts will generally be specializing in contemporary and/or historic architecture."		After consideration of concerns for the NAICS change, the contracting officer has concluded that the original NAICS of 541310 will be the needed code for your SAM profile
86	For purposes of evaluating compliance with FAR 52.219-14, will the Government assess the 50% self-performance requirement at the IDIQ level, Task Order level, or both?		Task Order Level

87	In evaluating familiarity with NPS policies and DSC workflows, how will the Government weigh comparable experience from other DOI, USDA, USFS, or DoD agencies where NEPA, Section 106, and federal design review processes are substantively similar?		If the experience is similar DSC will take that into consideration
88	For Factor 4, does the Government prioritize physical office locations within the Primary Coverage Area, or demonstrate rapid-response capability (e.g., on-site presence within defined timeframes)?		no it does not
89	For Factor 1b, does the Government prefer a single program-level Quality Control Plan, or project-scale QC examples demonstrating issue identification and correction?		Program level
90	Given the broad definition of Environmental Engineering confirmed in the Q&A, are there specific emphasis areas the Evaluation Board considers higher risk (e.g., water/wastewater, floodplain management, contaminated soils, NEPA documentation)?		No
91	Is this colorized version acceptable to the NPS RFQ?		Offerors may use their own forms as long as they comply with the SF 330's Rev7/2021.
92	We've identified 15-20 Part II sheets for all consultants. Can this be outside of the 40-page limit?		Yes, as long as it is not included in Section H
